THE Gardeners' Chronicle.

A Weekly Illustrated Journal.

ESTABLISHED 1841.

The GARDENERS' CHRONICLE has been FOR OVER SIXTY YEARS THE LEADING JOURNAL of its class. It has achieved this position because, while specially devoting itself to supplying the daily requirements of gardeners of all classes, the information furnished is of such general and permanent value that the GARDENERS' CHRONICLE is looked up to as the STANDARD AUTHORITY on the subjects of which it treats.

Subscription to the United States, \$4.20 per year. Remittances to be made payable to H. G. COVE.

OFFICE:—

41 Wellington St., Covent Garden, London, England.

The Horticultural Trade Journal

THE LARGEST, BRIGHTEST AND BEST

Horticultural Trade paper in the British Isles. It contains MORE ADVERTISEMENTS, MORE ILLUSTRATIONS and MORE NEWS than any of its contemporaries. Read by the whole of the British trade and all the best European houses every week. Annual subscription, 75 cents. Specimen copy post free. Published weekly. Horticultural Trade Journal Co., Padham, Lanca., Eng.

Special Offering of CRAIG SPECIALTIES.

Areca Lutescens, Kentias, Ficus, Pandanus, Begonia Lorraine, Etc.

The stock was never as large or as fine as at the present time. We are very anxious to make room immediately and have priced the following stock unusually low considering the quality of the goods. It is to your advantage to secure your fall supply of Palms, etc., for the coming season before cold weather sets in, and bear in mind that this is

ROBERT CRAIG & SON, MARKET AND 49TH STREETS,
 PHILADELPHIA, PA.

Estelle, Bradt, Prosperity, Roosevelt, Melba, Lord, Joost, Dorothy,

OUR PASTIMES.

Announcements of coming contests or other events of interest to our bowling, shooting and sporting readers are solicited and will be given place in this column.

Address all correspondence for this department to Wm. J. Stewart, 79 Milk St., Boston, Mass.; Robt. Kift, 1725 Chestnut St., Philadelphia, Pa.; or to the American Florist Co., 324 Dearborn St., Chicago, Ill.

BOWLING clubs everywhere are awakening for the season's campaign. Send in the scores.

THERE will be a meeting of the New York Florists' Bowling Club on Monday evening, September 29, at Arlington Hall, 23 St. Mark's Place, New York City.

THE Chicago florists are represented in the Illinois Bowling League by a team composed of Geo. Asmus, E. F. Winter-son, Fred. Stollery, Chas. Balluff and P. J. Hauswirth.

Denver.

TRADE BRISK AND GOOD STOCK SCARCE.—CARNATIONS IN DEMAND.—FROST KILLS OUTDOOR MATERIAL.—PERSONAL DOINGS OF INTEREST.

Funeral work has kept the trade busy and good stock is scarce. Tea roses are decidedly small. The demand for Beauties is good but they are not yet what can be called perfect, of only medium length and light color. Carnations are scarce. Lawsons are coming in pretty fast but are too short in stem to do any good. What few good ones are brought in sell well and at good prices. A heavy frost has settled the outdoor stock, some of which we would be very thankful for just now, or until the chrysanthemums show up.

H. J. Berry, for five years with the Park Floral Company, is now with the Webb Floral Company. Harry "grew up" with the former company and though one of the youngest in years he was one of the oldest employes. He has the best wishes of his former employer and those who worked with him.

A heavy rain last Saturday night did a little damage, hail falling in some parts of town. Glass did not suffer heavily but violets in the frames caught it and August Schenkel reports that his were badly cut up.

John Berry acted as judge at the State Fair held at Pueblo last week. B.

Detroit.

CLUB HOLDS INTERESTING SESSION.—BOWLERS PLAN ACTIVE SEASON.—CLUB TO HAVE FINE WINTER'S PROGRAMME.—TRADE BRISK AND STOCK SCARCE.—NOTES OF THE GROWERS.

The club meeting September 17 was well attended, thirty members being present. Another member was added to the list, which now numbers nearly eighty. Only miscellaneous business was transacted, including a consideration of bowling arrangements for the winter, as many are eager to enter the contest at Milwaukee next August. The coal question, which is a matter of much concern to many of us at present, was a topic of great interest, as only a few have yet made definite arrangements for their winter supply. The business sessions of the club this winter will alternate with evenings of entertainment and definite arrangements for the same are in the hands of committees appointed for the purpose.

Trade continues to increase considerably and the general scarcity of roses

and carnations is daily more perceptible. Some good asters are yet to be had and are used advantageously. President Roosevelt's visit to our city, on the occasion of the reunion of the Spanish war veterans, gave a considerable impetus to trade, but the general decorations were largely supplied from the city parks.

M. De Beul is now located on his new place, corner Van Dyke and Warren avenues, where he is just finishing the construction of two houses each 20x100 and one house for propagating, 10x80 feet. Double strength glass, 16x46, is being used. He will heat with steam.

C. H. Plumb has finished his two new houses and has them planted with roses. A new boiler room and work shed are further improvements he is making. Louis Colquitt close by is rebuilding one house, 21x83 feet. He is also putting in a new hot water boiler.

A. Kaier, of Woodmere, has rented his greenhouses to C. W. Keller, formerly of Chicago, and more recently of the state of Washington. He intends to grow carnations chiefly.

John Dunn, who was one of the party from here to Asheville, and who continued his trip as far south as Natchez, Miss., has returned and is highly pleased with the whole trip. J. F. S.

Pittsburg.

TRADE GOOD.—SUMMER AHEAD OF PREVIOUS RECORDS.—GOOD STOCK IN SIGHT.—ROSES NOT PLENTIFUL.—CHRYSANTHEMUMS WANTED.—VARIOUS NOTES.

Business has expanded wonderfully during the last three weeks and, on inquiry into the success of the summer's business, it seems to be unanimously agreed that a remarkable increase has been made in every branch of the trade. Home growers have wasted no time in improving their plants with the view that every inch of space will be utilized from now on. Roses have not improved much, but some good Beauties are coming in. They are a big help to us now, when the other kinds of rose stock are so limited. Asters have been extraordinarily fine this summer, especially whites. They were the basis of probably two-thirds of the funeral work. Carnations are beginning to improve. Both single and double dahlias assist in making attractive window displays. Many inquiries about chrysanthemums are made by persons who desire them for early October weddings. We expect to have them in within two weeks.

"Sam" McClements is building a new barn in the rear of his residence. It will be large enough to stable twenty-five head of horses. He will also have a department for Shetland ponies, of which he owns a number.

The coal famine will not affect the growers in western Pennsylvania, as natural gas is the general fuel used, and for those who have used coal, but little time is needed to change from one fuel to the other.

The new cacti house in Schenley Park will be opened to the public on October 26, when the chrysanthemum show opens. It is said that this will be one of the finest displays of cacti in the country.

Gilbert Weakley, of Randolph & McClements, has returned from his tour in the Allegheny mountains.

The Oakwood Rose Gardens, of Oil City, are still shipping good roses to Pittsburg.

George Marshall, of the Pittsburg Cut Flower Company, is back from the country.

H. L. Blind, of Blind Bros., is elated over the arrival of a handsome boy.

Fred. Burki has finished glazing and his new houses are now complete.

Harvey Sheaf has returned from his trip to West Virginia.

Charles Koening is sending in some fine Kaiserin roses. E. L. W.

ANOKA, MINN.—D. O. Pratt has opened a retail store and says the outlook is for a very good season.

GREENSBURG, PA.—Joseph Thomas is adding largely to his range, building two houses 20x100, two 16x100 and one 10x100. He has had good business.

We have the largest stock of **ARAUGARIA EXCELSA** in the country. May importation, raised from top cuttings only.

CLUB SPENDS A DELIGHTFUL DAY AT THE VINCENT PLACE.—ACRES OF PLANTS.—WONDERFUL GARDENS.—A DAHLIA SHOW.

The members of the Gardeners' Club were given an outing on September 17, by invitation of Richard Vincent, Jr., & Sons to inspect their extensive establishment at White Marsh, Md. Mr. Vincent is the club's vice-president and one of the most active florists in the state. A special train and a most sumptuous repast were provided and over 125 florists, with their ladies, participated in the excursion. A number of Washingtonians were present. The party reached the White Marsh establishment just in time for dinner, after which the visitors were taken for a tour through the greenhouses and gardens. Especial notice was given the enormous patches of dahlias, caladiums and cannas, of which there were from three to four acres of each. Each guest gathered a bunch of almost every known variety of dahlia; and the floral special train returned to the city at 7 p. m. The visitors were all high in their praise of the splendid establishment. The careful, thorough and practical method of preparation and culture in all branches of work were especially commended. Among the Washingtonians were Messrs. Wm. F. Gude and A. Gude and Thos. H. White and F. H. Blodgett, of College Park, near Washington.

On Monday, September 22, the Gardeners' Club held a free dahlia show at the Royal Arcanum Hall, the same as last year. The Messrs. Vincent sent from 3,000 to 4,000 specimen blooms, which alone were enough to insure the success of the exhibition. On the following morning the flowers were distributed among the several hospitals of the city.

C. H. Latrobe, for many years connected with park work in Baltimore and until recently general superintendent of parks, died last week.

ROCHESTER, N. H.—Otis & Corson have dissolved partnership. The business will hereafter be conducted by E. A. Corson.

F. A. BALLER, Bloomington, Ill.

St. Paul.

TRADE STARTS WELL AND PROMISES A BUSY SEASON.—LOW PRICES TO BE DEPLORED.—THE FIRST CHRYSANTHEMUMS.

Fall trade opens up very good and promises much for the future. Roses are becoming quite plentiful and are daily improving in quality. The short sightedness of some in the business in selling roses at \$1 per dozen at retail, thereby forcing others to sell at the same figure, is to be deplored. With coal at \$4.55 per ton, labor scarce and high, lumber, glass and pipe at high tide, florists should maintain good prices for their products. Carnations are daily increasing in quantity but are not yet equal to the demand. Two killing frosts have cut down outdoor stock, though a few good asters are still coming in. L. L. May & Company have cut the first chrysanthemums of the season, Fitzwygram, which were in September 19. FELIX.

Springfield, Mass.

BUSINESS ENLIVENED BY WEDDINGS AND MUCH FUNERAL WORK.—SOME SPLENDID DAHLIAS.

Trade the past two weeks has been good, wedding decorations and quite a demand for funeral work. The plant trade is picking up some. Roses and carnations are more plentiful but nothing extra in quality. Violets have not made their appearance yet but a few good orchids are to be seen in the stores. Asters are about done for. They have been very good in this section, with not so much disease as in former years. The weather has been good, giving us all a chance to house stock.

Fairfield, the State street florist, has remodeled his store and put in a neat conservatory in the rear, making a good showing of palms and so forth.

L. D. Robinson is to be congratulated on his success with dahlias. He exhibited 150 varieties at the Amherst fall show, taking first in every section. A. B.

Lowell, Mass.

WEATHER CUTS DOWN OUTDOOR SUPPLIES AND INJURES GREENHOUSE STOCK.—A VARIETY OF TRADE NOTES.

The weather has about demolished the aster crop and is the cause of considerable mildew in the greenhouses, especially where the supply of coal is short. The supply of carnations, which was steadily on the gain, has been cut down by the dull weather, but of roses there are more than enough to meet demands. Some Beauties of good quality, both in flower and foliage, are to be seen, but at present there is no great demand for them. A large bunch of these roses standing on a mirror surrounded by a window full of ferns made an attractive display at Pat-ten's last Saturday.

Chrysanthemums and violets have not made their appearance here as yet, but some of the growers are hustling to get the credit of bringing in the first supply of these flowers.

M. G. McManamon, on Prescott street, is making a great show of yellow dahlias in his window. He has booked many orders for roots for spring delivery.

Boston ferns are a feature of many window displays. They are selling briskly.

S. S. Skidelsky, of Philadelphia, was in town last week looking as radiant as ever.

Walter Morse has gone fishing and hunting down in the Provinces.

Business is away off color for this time of year. A. M.

Newport, R. I.

A VARIETY OF PERSONAL DOINGS AND TRADE JOTTINGS OF INTEREST.

The visit of the Russian Grand Duke Boris brought many orders for floral decorations on the most elaborate scale.

The beetle is again so active that citizens are signing a petition to the city for the preservation of trees.

John Baumgartner, formerly of New Jersey, is now gardener for D. B. Fearing. Daniel J. Coughlin is another new man here, being gardener for E. R. Morse.

Allen Jenkins is filling the position of gardener at I. T. Berwind's estate.

The coal dealers here are short of coal, some dealers being entirely out. C. J. M.

WASHINGTON, PA.—Lloyd Swarthout is seriously ill of typhoid fever.

Boston Ferns.

We are headquarters in the West for them. Write us about 2 1/2, 3, 4, 5, 6, 7, 8 and 10-in. sizes.

ASPARAGUS PLUMOSUS AND SPRENGERI, 2 1/2, 3, 4 and 5-inch.

SMILAX, 2 and 3-inch.

A lot of 5-in. HIBISCUS to close at \$1.50 per doz.

CINERARIAS, in 2 1/2 and 3-inch.

GERANIUMS, rooted cuttings now ready. Write

Minneapolis.

TRADE AND STOCK BOTH ON THE IMPROVE.
—ROSES OF EXCELLENT QUALITY.—PERSONAL NOTES.

Trade conditions are improving, as well as stock. Some excellent Liberty are being cut in goodly numbers, also Bridesmaid and Bride. Meteor is in limited supply here this year. The longer-stemmed Beauties are coming on in fine condition. Very few indoor-grown carnations are received as yet.

The report is that Oscar Carlson, head rose grower of Wm. Donaldson & Company, is looking for a house to rent. We are not informed as to when the happy event takes place, but Oscar has the best wishes of his many friends.

H. S. Sauer, of the East Side Floral Company, has been mingling in politics this fall. He wanted the nomination by the democrats for representative from the thirty-ninth district.

James Lynes has taken the floral department of the New Store, and from his long experience should certainly meet with success.

Vinton Ayer has taken a position with D. O. Pratt, Anoka, Minn. Arthur Rees has taken his place with Rice Bros.

Otto Will has returned from his convention and eastern trip and has many stories of interest to relate.

Last week we had quite a severe frost and one more like it will finish up the outside stock.

E. O. Lovell, of Grand Forks, N. D., was a recent visitor.

Miss Julia Ellis has returned from her vacation. C. F. R.

NEW CASTLE, IND.—George Genet, formerly with the South Park Floral Company, has gone to Lake Geneva, Wis., to be gardener for H. C. Lytton.

VINELAND, N. J.—Much fun is being made of some of the decorative flower beds in the public squares in which corn and beets are the principal components. But are not beets largely used for such purposes in England and is not corn an impressive feature of Boston's noted (?) Public Garden? Vineland critics should "go 'way back and sit down."

THE MODEL PLANT STAKE COMPANY, formerly of Brooklyn, N. Y., has removed to 208 Jersey St., Harrison, New Jersey, and is now The Parker-Bruen Mfg. Co.

The Model Extension Carnation Support.

Flushing, Long Island,
Dec. 10th, 1901.
MR. THEON N. PARKER,
Brooklyn, N. Y.

Dear Sir— I have used your Wire Carnation Support the last two years in all about 12,000. They fill the bill in every particular. Nothing could be more satisfactory and would give me a great deal of pleasure if I can bespeak a good word for you to the trade and you are at liberty to refer to me at any time.

Very truly,
A. L. TORNE,
La Fayette, Ind.,
July 8th, 1902.

MR. THEON N. PARKER,
Harrison, N. J.
Dear Sir:— After using your Model Carnation Support in two of our houses the past winter, we have come to the conclusion that it is perfectly adapted to supporting carnations, and shall use them on all our plants the coming season.

We were much pleased with the simplicity, strength and neat appearance of the support.

Yours truly
F. DORNER & SONS CO.

It is good business policy to mention the

American Florist

.....when writing to an advertiser.

Bargains FOR Florists.

We are headquarters for a general assortment of the necessary material and supplies that you are looking for. If you are about to improve or construct, consult us.

In connection with the dismantling of the Pan-American Exposition, we have for sale:

20,000,000 FEET of fine seasoned lumber, practically new, consisting of all sizes of joists, timbers, dressed and matched boards and flooring; also sash and doors.
 50,000 FEET of roofing glass.

PIPE.

We are headquarters for pipe. We offer you: 100,000 FEET of 2 to 4-inch wrought iron, lap welded casing. We can furnish this material in three ways: Either with sleeve or jacket couplings, screwed ends and threaded couplings or with expanded cast iron flanges with bolts and nuts.

1,000,000 FEET of standard black wrought iron pipe, size ¾ to 12-inch. It is second-hand but has new threads and couplings and is in first-class condition.

1,000 TONS of galvanized wire 9, 10, 11, 12, 13, 14 and 15 guage.

50,000 FEET of 2, 3 and 4-inch cast-iron soiled pipe and fittings.

100,000 FEET of garden hose, ¾ and 1-in.
 75,000 FEET of cotton rubber-lined fire-hose, (rubber-lined in and outside), ranging in sizes 1 to 2½-inch.

VALVES and fittings of every kind.

BOX COILS for heating purposes.

RADIATORS, new and second-hand.

We also offer the following bargains in

Heating Boilers

50 CAST-IRON sectional heaters, capacity from 450 to 5,000 feet.

1 NO. 2 Standard Kroeschell hot water heating boiler.

FOUR 36x10 Horizontal Tubular.

FOUR 36x12 Horizontal Tubular.

FIVE 42x10 Horizontal Tubular.

FIVE 42x12 Horizontal Tubular.

SIX 48x14 Horizontal Tubular.

TWO 54x16 Horizontal Tubular.

FOUR 60x16 Horizontal Tubular complete with all fittings.

PUMPS of all Descriptions.

A carload of shovels and spades that we are selling at \$5.00 per dozen.

We carry a complete stock of hardware and farm implements, besides plumbing material of every kind.

New Orleans.

SOCIETY HAS A SLIMLY ATTENDED MEETING.—TRAVELERS TELL OF VARIED EXPERIENCES.—TRADE DULL.—SUMMER VERY DRY.—NOTES.

The attendance at our last club meeting was not so large as expected, but those present had the pleasure of hearing the returning members tell about what they had seen during their convention trip. E. Baker read a very interesting paper about Boston and New York parks. He called attention to the importance of studying the landscape gardening art and expressed the hope that many young men will devote their attention to the profession. H. Papworth spoke in the best terms of the Asheville convention. R. Panter, our president, coming back from other society conventions, of which he is a member, stopped at Chicago and Indianapolis.

Trade has been extremely dull during the summer, in fact worse than usual at this season of the year, most likely on account of the drought. Chrysanthemums have been suffering a good deal, but some growers seem to be well satisfied. The J. Steckler Company and H. Papworth report a very promising crop, better than last year, which was good.

W. Rehm will move to a better location, near U. J. Virgin. M. M. L.

Columbus, O.

DEMONSTRATOR INTERESTS THE PEOPLE IN RAFFIA.—A NEW FIRM HAS GOOD STOCK.—VARIOUS NOTES.

A lady who was expert at fancy work made of raffia proved quite a drawing card for the Livingston Seed Company, who had her employed for a few days last week to give a "demonstration" at their store. Three more new houses recently added to the Livingston range are nearly glazed and will soon be ready for use.

That new firm, the King Avenue Floral Company, has finished all but connecting the boiler and is about ready for business, with a promising stock on hand for so young a firm.

Considerable stem rot among carnations is being complained of, not ending with the attack made on the plants in the field.

Thus far this month proves to be a saving on fuel, as firing has been discontinued on account of warm weather.

WATER.

If you want water only when the wind blows a windmill will do your work and cost less money than our Rider and Ericson Hot Air Pumps, but if you want water every day while your flowers are growing and do not want your pump blown down when the wind blows too hard, no pump in the world can equal ours. We have sold about 20,000 of them during the past twenty-five years, which is proof that we are not making wild statements.

Our Catalogue "A 3" will tell you all about them. Write to nearest store.

Fundamental Principles of Plant Breeding.

BY LUTHER BURBANK.

[Read before the International Plant Breeding Conference, New York, September 30 to October 2, 1900.]

Only the most limited view of plant breeding can be given in an ordinary thesis. It would be necessary to extend the subject through many volumes to give even a general view of what has already been demonstrated, and that which the clear light of science has yet to bring forth from the depths is too extensive even for the imagination to grasp, except through a full knowledge of what practical field work has already accomplished.

The fundamental principles of plant breeding are simple and may be stated in few words; the practical application of these principles demands the highest and most refined efforts of which the mind of man is capable, and no line of mental effort promises more for the elevation, advancement, prosperity and happiness of the whole human race.

Every plant, animal and planet occupies its place in the order of nature by the action of two forces, the inherent constitutional life force with all its acquired habits, the sum of which is heredity; and the numerous complicated external forces, or environment. To guide the interaction of these two forces, both of which are only different expressions of the one eternal force, is, and must be, the sole object of the breeder, whether of plants or animals.

When we look about us on the plants inhabiting the earth with ourselves and watch any species day by day we are unable to see any change in some of them. During a lifetime and in some cases perhaps including the full breadth of human history, no remarkable change seems to have occurred. And yet there is not to-day one plant species which has not undergone great and, to a certain extent, constant change.

The life forces of the plant in endeavoring to harmonize and adapt the action of its acquired tendencies to its surroundings may, through many generations, slowly adapt itself to the necessities of existence, yet these same accrued forces may also produce sudden, and to one not acquainted with its past history, most surprising and unaccountable changes of character. The very existence of the higher orders of plants which now inhabit the earth has been secured to them only by their power of adaptation to crossings, for through the variations produced by the combination of numer-

ous tendencies, individuals are produced which are better endowed to meet the prevailing conditions of life. Thus to nature's persistence in crossing we owe all that earth now produces in man, animals or plants, and this magnificently stupendous fact may also be safely carried into the domains of chemistry as well, for what is common air and water but nature's earlier efforts in that line, and our nourishing foods but the result of myriad complex chemical affinities of late date.

Natural and artificial crossing and hybridizing are among the principal remote causes of nearly all otherwise perplexing or unaccountable sports and strange modifications, and also of many of the now well established species. Variations without immediate antecedent crossing occur always and everywhere from a combination of past crossings and environments, for potential adaptations often exist through generations without becoming actual, and when we fully grasp these facts there is nothing mysterious in the sudden appearance of sports; but still further intelligent crossings produce more immediate results and of great value, not to the plant in its struggle with natural forces, but to man by conserving and guiding its life forces to supply him with food, clothing and innumerable other luxuries and necessities. Plant life is so common that one rarely stops to think how utterly dependent we are upon the quiet but magnificently powerful work which they are constantly performing for us.

It was once thought that plants varied within the so-called species but very little, and that true species never varied. We have more lately discovered that no two plants are exactly alike, each one having its own individuality, and that new varieties having endowments of priceless value and even distinct new species can be produced by the plant breeder with the same precision that machinery for locomotion and other useful purposes is produced by the mechanic.

The evolution and all the variations of plants are simply the means which they employ in adjusting themselves to external conditions: Each plant strives to adapt itself to environment with as little demand upon its forces as possible and still keep up in the race. The best endowed species and individuals win the prize, and by variation as well as persistence. The constantly varying external forces to which all life is everywhere subjected demand that the inherent

internal force shall always be ready to adapt itself or perish.

The combination and interaction of these innumerable forces embraced in heredity and environment have given us all our bewildering species, none of which ever did or ever will remain constant, for the inherent life force must be pliable or outside forces will sooner or later extinguish it. Thus adaptability as well as perseverance is one of the prime virtues in plant as in human life.

Plant breeding is the intelligent application of the forces of the human mind in guiding the inherent life forces into useful directions by crossing to make perturbations or variations of these forces, and by radically changing environments, both of which produce somewhat similar results, thus giving a broader field for selection, which again is simply the persistent application of mental force to guide and fix the perturbed forces in the desired channels.

Plant breeding is in its earliest infancy. Its possibilities and even its fundamental principles are understood by but few; in the past it has been mostly dabbling with tremendous forces which have been only partially appreciated, and has yet to approach the precision which we expect in the handling of steam or electricity, and notwithstanding the occasional sneers of the ignorant, these silent forces embodied in plant life have yet a part to play in the regeneration of the race which by comparison will dwarf into insignificance the services which steam and electricity have so far given. Even unconscious or half-conscious plant breeding has been one of the greatest forces in the elevation of the race. The

must be able to correctly estimate the action of the two fundamental forces, inherent and external, which he would guide.

The main object of crossing genera, species or varieties is to combine various individual tendencies, thus producing a state of perturbation or partial antagonism by which these tendencies are, in later generations, dissociated and recombined in new proportions, which gives the breeder a wider field for selection, but this opens a much more difficult one, the selection and fixing of the desired new types from the mass of heterogeneous tendencies produced, for by crossing, bad traits as well as good are always brought forth. The results now secured by the breeder will be in proportion to the accuracy and intensity of selection and the length of time they are applied. By these means the best of fruits, grains, nuts and flowers are capable of still further improvement in ways which to the thoughtless often seem unnecessary, irrelevant or impossible.

When we capture and domesticate the various plants the life forces are relieved from many of the hardships of an unprotected wild condition, and have more leisure, so to speak, or in other words more surplus force to be guided by the hand of man under the new environments into all the useful and beautiful new forms which are constantly appearing under cultivation, crossing and selection. Some plants are very much more pliable than others, as the breeder soon learns. Plants having numerous representatives in various parts of the earth generally possess this adaptability in a much higher degree than the monotypic species,

work upon by combination for still further variations.

The plant breeder, before making combinations, should with great care select the individual plants which seem best adapted to his purpose, as by this course many years of experiment and much needless expense will be avoided. The difference in the individuals which the plant breeder has to work upon are sometimes extremely slight. The ordinary unpracticed person cannot by any possibility discover the exceedingly minute variations in form, size, color, fragrance, precocity and a thousand other characters which the practiced breeder perceives by a lightning-like glance. The work is not easy, requiring an exceedingly keen perception of minute differences, great practice and extreme care in treating the organisms operated upon; and even with all the naturally acquired variations added to those secured by crossing and numerous other means, the careful accumulation of slight individual differences through many generations is imperative, after which several generations are often, but not always necessary to thoroughly "fix" the desired type for all practical purposes.

The above applies to annuals, or those plants generally reproduced by seed. The breeder of plants which can be reproduced by division has great advantage, for any valuable individual variation can be multiplied to any extent desired without the extreme care necessary in fixing by linear breeding the one which must be reproduced by seed; but even in breeding perennials, the first deviations from the original form are often almost unappreciable to the perception, but by accumulating the most minute differences through many generations the deviation from the original form is often astounding. Thus by careful and intelligent breeding any peculiarity may be made permanent, and valid new species are at times produced by the art of the breeder, and there is no known limit to the improvement of plants by education, breeding and selection.

The plant breeder is an explorer into the infinite. He will have "no time to make money," and his castle, the brain, must be clear and alert in throwing aside fossil ideas and rapidly replacing them with living, throbbing thought followed by action. Then, and not until then, shall be create marvels of beauty and value in new expressions of materialized force, for everything of value must be produced by the intelligent application of the forces of nature which are always awaiting our commands.

The vast possibilities of plant breeding can hardly be estimated. It would not be difficult for one man to breed a new rye, wheat, barley, oats or rice, which would produce one grain more to each head, or a corn which would produce an extra kernel to each ear, another potato to each plant, or an apple, plum, orange or nut to each tree. What would be the result? In five staples only in the United States alone the inexhaustible forces of nature would produce annually without effort and without cost:

5,360,000	extra bushels of corn
15,000,000	" " " wheat
1,000,000	" " " oats
1,500,000	" " " barley
21,000,000	" " " potatoes

But these vast possibilities are not alone for one year, or for our own time or race, but are beneficent legacies for every man, woman or child who shall ever inhabit the earth. And who can estimate the elevating and refining influ-

PHYLLOCACTUS STENOPETALUS GROWN BY OSWALD EDERT, WASHINGTON, D. C.

chemist, the mechanic, have, so to speak, domesticated some of the forces of nature, but the plant breeder is now learning to guide even the creative forces into new and useful channels. This knowledge is a most priceless legacy, making clear the way for some of the greatest benefits which man has ever received from any source by the study of nature.

A general knowledge of the relations and affinities of plants will not be a sufficient equipment for the successful plant breeder. He must be a skillful botanist and biologist and, having a definite plan,

for, having been subjected to great variations of soil, climate and other influences, their continued existence has been secured only by the inherited habits which adaptation demanded; while the monotypic species not being able to fit themselves for their surroundings without a too radically expensive change, have only continued to exist under certain special conditions. Thus two important advantages are secured to the breeder who selects from the genera having numerous species, the advantage of naturally acquired pliability, and in the numerous species to

ence and moral value of flowers with all their graceful forms and bewitching shades and combinations of color and exquisitely varied perfumes? These silent influences are unconsciously felt even by those who do not appreciate them consciously, and thus with better and still better fruits, nuts, grains and flowers will the earth be transformed, man's thoughts turned from the base destructive forces into the nobler, productive ones which will lift him to higher planes of action towards that happy day when man shall offer his brother man not bullets and bayonets, but richer grains, better fruits and fairer flowers.

Cultivation and care may help plants to do better work temporarily, but by breeding, plants may be brought into existence which will do better work always, in all places and for all time. Plants are to be produced which will perform their appointed work better, quicker, and with the utmost precision.

Science sees better grains, nuts, fruits and vegetables all in new forms, sizes, colors and flavors, with more nutrients and less waste, and with every injurious and poisonous quality eliminated and with power to resist sun, wind, rain, frost and destructive fungus and insect pests; fruits without stones, seeds or spines; better fiber, coffee, tea, spice, rubber, oil, paper and timber trees, and sugar, starch, color and perfume plants. Every one of these and ten thousand more are within the reach of the most ordinary skill in plant breeding.

Fellow plant breeders, this is our work. On us now rests one of the next great world movements; the guidance of the creative forces is in our hands. Man is slowly learning that he, too, may give the same forces which have been through all the ages performing this beneficent work of the world.

Phyllocactus Stenopetalus.

The accompanying illustration is a reproduction of a photograph of a dozen plants of *Phyllocactus stenopetalus* (*P. latifrons*) often catalogued as the Queen cactus. The plants in question are plunged beneath a tree on the lawn at The Oaks, the home of Col. H. F. Blount, West Washington, D. C., where Oswald Edert is gardener. The photograph was taken July 22; at the time there were 128 flowers and buds. The plants are in 8-inch to 12-inch pots and make a fine show in the early morning and on cloudy days they remain open until ten o'clock. As late as the present date the flowers are quite numerous. When winter approaches the plants are taken up and sheltered in a cool greenhouse. P. G.

Two of the Younger Canadians.

ALFRED C. WILSHIRE.

Born at Beaconsfield, Bucks, England, this gentleman, Alfred C. Wilshire, came of a family of gardeners. His father was a plantsman and so were his three brothers, with whom he removed to Canada in 1882, the quartette making for Montreal. After three years of varied experiences, two of the brothers, Alfred and Walter, set up a retail flower store. The partnership continued successfully for some five years, when Walter retired. Since then the business has been conducted, still as Wilshire Brothers, by Alfred C. Wilshire alone. He has a fine store at the corner of Sherbrooke and Bleury streets, Montreal, and does a handsome trade. Mr. Wilshire was a charter member of the Montreal Gardeners' and

CHARLES M. WEBSTER, HAMILTON, ONT.

TWO OF THE YOUNGER LEADERS IN CANADIAN FLORICULTURE.

Florists' Club, was for five years its treasurer and for two years its president. He has also taken an active part in the affairs of the Canadian Horticultural Society and at the recent Hamilton convention was elected a member of the executive committee for a second term of three years.

CHARLES M. WEBSTER.

The business conducted as Webster Brothers, at Hamilton, Ont., was founded by James Fraser Webster and George Webster, who issued their first catalogue in 1883, offering plants and small fruits. According to the best information now at hand this was the first time that a purely Canadian firm had struck for a Canadian mailing trade in plants, although a great many catalogues and plants had been coming for years in the mails from across the Niagara frontier. George Webster withdrew from the firm after a few years and James F. continued the business to the day of his death, in June, 1897. He became widely known in Ontario for his enthusiasm in everything floricultural and built up a fine trade. He was a member of the S. A. F. for many years. At the father's death the business fell to an only son, Charles M. Webster, then only 23 years of age. He became a strong advocate of specializing in the business and grows no cut flowers, devoting his whole energy to producing plants and selling them by mail. The business has enjoyed a steady growth since the day he took charge. His spring retail list is called "Canadian Plants for Canadian People." He also issues a fall bulb catalogue and does a nice wholesale business in plants by means of a catalogue. It was principally through Mr. Webster's efforts that the Hamilton Gardeners' and Florists' Club was organized a few years ago. He is the vice-president of the Canadian Horticultural Society for the current year, the term running from January to January, and was the manager of the successful trade exhibition held in connection with the recent convention at Hamilton.

SCHLNECTADY, N. V.—Chas. Limmier has taken a partner and the firm name will hereafter be Limmier & Evans.

International Plant Breeding Conference.

The long-heralded Plant Breeding Conference opened on Tuesday, September 30, at the Berkeley Lyceum on West Forty-fourth street, New York, with an attendance of about seventy, mostly professors. Among the foreign representatives present were George Nicholson, of England, whose name is a household word with the gardening fraternity all over the English-speaking world, and W. Bateson, of Cambridge University, England. The experiment stations in the various states and the Department of Agriculture, at Washington, furnished a large proportion of the attendants and the papers and discussions were scientific and sometimes theoretical, but always interesting.

The meetings, which were under the auspices of the New York Horticultural Society, were presided over by the president of that society, Jas. Wood. President Wood started the first session with a few words of welcome and then the first paper on the programme, "Practical Aspects of the New Discoveries in Heredity," was read by its author, Prof. Bateson. A paper from C. C. Hurst, of England, on "Recent Experiments in Hybridization," one from Max. Leichtlin, Germany, and one from J. T. Lynch, of Cambridge Botanic Garden, England, were read by Secretary Barron and a paper on "Artificial Atavism," from Hugo de Vries, Amsterdam, was read by Dr. McDougal. At Tuesday afternoon's session the secretary read a paper from Luther Burbank on "The Principles of Plant Breeding," "Breeding for Intrinsic Qualities" was discussed by W. M. Hays, of St. Anthony Park, Minn. "Correlation between Parts of Plants in Form, Color, etc.," was the topic of S. A. Beach, of Geneva, N. Y., and "Breeding of Disease-resistant Varieties," of W. A. Orton.

At the Wednesday sessions other valuable papers were read, among them the following: "Individual Prepotency," by W. W. Tracy; "Practical and Valuable Results of Cross-Fertilization of Sugar Cane," by D. Morris, Commissioner of Agriculture, Barbadoes; "Results of Hybridization and Plant Breeding in Canada," by Wm. Saunders; "Cytological Aspects of Hybrids," by W. A. Cannon. The paper on "Breeding Florists'

Flowers," by E. G. Hill, was read by P. O'Mara. At the evening session the papers were illustrated with stereopticon views. The subjects were: "Hybridizing *Gladiolus* Species," by W. Van Fleet; "Wine Ferments," by W. B. Alwood; "Breeding Florists' Flowers," by C. W. Ward; "Cereal Breeding in Kansas," by H. L. Roberts.

On Thursday afternoon a session was held at the New York Botanic Garden, after lunch with Dr. Britton. On Friday the visitors were taken up the Hudson by steamer to Poughkeepsie to lunch with F. R. Newbold. The places of Archibald Rogers and F. W. Vanderbilt were also visited.

The names enrolled on the visitors' register were as follows:

N. E. Hansen, Brookings, So. Dakota; W. Paddock, Colorado; G. B. Brackett, Washington, D. C.; C. C. Watrous, Des Moines, Ia.; W. A. Orton, Washington, D. C.; W. B. Alwood, Blacksburg, Va.; R. N. Kellogg, Three Rivers, Mich.; C. A. Zavitz and H. L. Hutt, Guelph, Ont.; W. T. Macoun, Ottawa, Ont.; H. L. Roberts, Manhattan, Kans.; J. B. Norton, Washington, D. C.; R. D. Connor, Roseville, N. J.; W. W. Tracy, Detroit, Mich.; C. L. Seofield and W. J. Spellman, Washington, D. C.; H. C. Irish, St. Louis, Mo.; F. G. Markham and Anne Dorrance, Dorrance, Pa.; A. J. Pieters, Washington; T. L. Lyon, Lincoln, Neb.; A. D. Showel, Urbana, Ill.; C. L. Allen, Floral Park, N. Y.; W. M. Hays, St. Anthony Park, Minn.; W. Bateson, Cambridge, Eng.; G. Nicholson, Richmond, Eng.; W. H. Evans, Washington; H. C. Price, Ames, Ia.; D. Morris, West Indies; Alfred Rehder, Jamaica Plain, Mass.; L. H. Bailey, Ithaca, N. Y.; L. C. Corbett, Washington; C. E. Allen, Madison, Wis.; S. Henshaw, Staten Island, N. Y.; D. G. Johnson, Baltimore; S. W. Underhill, Croton, N. Y.; F. H. Valentine, Ridgewood, N. J.; N. M. Shaw, Briar Cliff Manor, N. Y.;

CARNATIONS.

LIME AND SULPHUR FOR STEM ROT.

This is an age of plant diseases; they increase and perplex cultivators much more than all other ills the profession is heir to. We had no experience with stem rot in carnations until last season, and after benching it carried off over half of our Lawson and Bradt. We had been advised to use lime and sulphur for stem decay in gardenias and it works well, and Mr. Montgomery, when visiting here, advised its trial for stem rot in carnations.

We had a good opportunity to test it at that time, as our best Lawsons in the field, set out of 4-inch pots, were dying every day; nearly a quarter of them were gone. We went at once and scraped away the soil round every stem and put about a tablespoonful of air-slaked lime and yellow sulphur, equal parts, around each, and not a plant died afterward, except where they were evidently infected beforehand. At benching time, also, we used the same precaution, and our stock never was as thrifty as at present and, with the exception of Enquirer, which is of dense, tufted habit and difficult to apply the remedy to, they have not suffered from stem rot since.

I do not wish to be understood as asserting that lime and sulphur will cure the evil, but simply to tell what happened here, that others may be induced to do likewise and make a test of it for themselves. It cannot harm, and may possibly be of value to carnation growers.

In these days of rapid and extensive dissemination of varieties it is no wonder these troubles are so widespread. We bought and paid for the stem rot. It came in a batch of 100 rooted cuttings of a variety that was not new at the time, part of which died off in flats, and at the end of the outdoor season not one plant remained alive, and the disease had

in need of the best of care. As the days grow shorter the watering can be done none too carefully. By allowing a bench to become soggy a great deal of harm may be done, especially if a spell of cloudy weather comes along at this time. A careful man to handle the hose is of great value, as a severe check now is liable to show in poor results through the entire season.

Watch for red spider and if any appear be sure to get them out as soon as possible, as we now are better able to syringe than we will be later, when the days are shorter and cloudy weather predominates. Always select a bright day when you wish to syringe.

Have all the plants tied up as soon as possible and thereby avoid crooked and weak stems. There will also be less yellow and dead foliage at the bottom of the plants if they are kept tied up and away from the soil.

Keep all the stock in a growing condition, as every check is detrimental in one way or another; it will show itself later on in spite of the best of doctoring.

The soil should not be allowed to become green; whenever it gets in this condition a sprinkling of lime should be applied and then the top of the soil should be scraped and broken up, allowing the air to pass through freely. It is always best to keep the soil loosened a day or more after scraping to secure the full benefit.

Many of the plants which were housed early are now ready for liquid manure in a mild form, and plants showing weak stems will be greatly benefited by a sprinkling of wood ashes over the soil.

R. I.

CULTURAL REMINDERS.

The routine of culture has been gone over so often that it may seem an unnecessary repetition to detail the work as the weeks come along, but a little reminder of some of the points that we may overlook, or be inclined to neglect with the push of other work, will not be out of place.

Watering should be done with greater care as the cloudy days come on, because the plants, while they may be growing nicely, do not have the mass of roots and foliage to supply that they will have a month or more later and an overdose of water is about as detrimental a thing as it is possible to give a carnation. But not enough moisture will weaken and harden the plants and on this account one will have to see that they get enough water to keep them in good growing condition, but if you must err let it be on the side of too little rather than too much moisture.

I have recently talked with a grower who proposes to use several small oil stoves in his houses in order to prevent the heavy condensation of moisture that takes place with the ventilators closed when the thermometer is ranging near the freezing point outdoors and there is no heat in the pipes. This may help bridge the trouble over until the coal question is settled. To those who are near the soft coal mines or have natural gas the fuel question is of minor importance but it is a very serious matter to us fellows east of Pittsburg.

Avoid all slovenliness in and around your carnation houses. Some growers seem to think their carnations will get along all right until the rush of fall work is over, but this is a very decided mistake. It is true that the carnation will stand a goodly portion of abuse and yet give

WEST VIRGINIA, GUSTAV OBERMEYER'S NEW CANNA.

Wm. Saunders, Ottawa, Ont.; H. L. Cross, Briar Cliff Manor, N. Y.; C. F. Anstin, College Park, Md.; H. H. Groff, Simcoe, Ont.; F. B. Lloyd, Teachers College; S. A. Beach and F. C. Stewart, Geneva, N. Y.; F. V. Munson, Denison, Tex.; A. T. Jordan, New Brunswick, N. J.; Stewardson Brown, Philadelphia; C. E. Saunders, Ottawa, Ont.

spread to others in the field, and has been with us ever since. E. O. ORPET.

NOTES ON SEASONABLE TREATMENT.

Carnations should all be planted by this time and they must be watched carefully. They have to become accustomed to new conditions and consequently are

results, but it is equally true that the results thus obtained do not pay. By slovenliness is meant the leaving of the old flowers on the plants, as well as deformed buds and branches, neglecting the disbudding, allowing the plants to lie on the ground unstaked, the ground growing up with weeds, and aphids, spider and thrips having a daily picnic in the house.

The whole of this makes a pretty strong combination, yet I have seen places where it was all combined and the grower would say, "yes, they look a little hard now but we will get over into these houses in a few weeks and make a general clean up." If either one of these matters has been allowed to develop, better attend to it at once, for no other flower will respond so quickly to careful treatment, and you will be looking for responses right along now.

It is time well spent to carefully note the condition of each variety, monthly, at least, if not oftener. Condition is used here as applying to the development of buds and flowers. It is well to know how long it takes the bud when first visible to develop into a marketable flower and it is surprising to note the difference in the time between the different varieties. You will also find some surprises when you come to count up the number of buds set to each variety.

In my houses this season Crocker, Cressbrook, Dorothy, Morning Glory, Gov. Roosevelt and Queen Louise are about equally set with buds and they will range from four to ten buds per plant, buds that can be brought in at or before the holidays. This may seem a light crop to some growers but if you will go over your own place carefully you will find that it takes an exceptional plant to produce ten flowers up to January 1.

My houses also contain some novelties that will produce from one to six flowers per plant by January 1, and a few that will be lucky to produce one flower to two or three plants. This difference in the production of early flowers is not always the fault of the variety, as it is nothing unusual for a novelty to hide its good points until after January 1 and then possibly the next season come into the early class, getting, as it were, acclimated to its new surroundings.

Several varieties that give no promise of bloom at all, are, I believe good enough varieties, but the cuttings ordered in January were sent so late that they could not make good plants for this season. As a consequence I have no income from the flowers prior to January 1, with very little prospect of much after that date and practically no cuttings on the plants, yet these cuttings were billed to me at regular novelty prices, thus making a two-edged sword of injustice. A little observation of this sort may be very profitable later on, as we are apt to forget these earlier difficulties and losses when the crop is in its height and everything looks bright and promising, thus allowing ourselves to get caught in the same manner next fall.

ALBERT M. HERR.

Cannas in West Virginia.

The accompanying illustration is from a photograph of a field of cannas at the establishment of Gustav Obermeyer, Parkersburg, W. Va. The picture lacks something in detail because of the wind blowing at the time the photograph was taken, but it nevertheless serves to show the profusion of bloom. The canna in

A PANEL OF AMERICAN BEAUTY ROSES.

the foreground is Mr. Obermeyer's pride. It is a seedling of Queen Charlotte, named by him West Virginia. It is dwarf, early and a very free bloomer. Mr. Obermeyer had them in fine bloom at Easter, plants eight inches high, in 3½-inch pots. The canna in the background is Alphonse Bouvier. The geranium shown in a corner of the illustration is also one of Mr. Obermeyer's own, called Gov. Jackson.

A Panel of Roses.

The accompanying illustration is from a photograph of a panel of American Beauty roses made by J. F. Sullivan, Detroit, for the funeral of the late Senator McMillan. The dimensions of the panel were 5x8 feet and hundreds of buds were required.

LYNN, MASS.—The twenty-sixth annual exhibition of the Houghton Horticultural Society at Odd Fellows' Hall brought out a remarkable display of flowers contributed mainly by amateurs. The collections of wild flowers were especially good.

Hybridizing Gladiolus Species.

BY W. VAN FLEET.

[Read before the International Plant Breeding Conference, at New York, September 30 to October 2, 1902.]

In the following notes the term "species" is necessarily used in the horticultural rather than the strict botanical sense. For many years, through the kindness of Herr Max Leichtlin, Baden Baden, Germany, and others, we have been enabled to receive newly collected gladioli from Africa and Madagascar, often in advance of their botanical determination, and at once used them for breeding purposes. For convenience it may be well to divide these newcomers into groups according to their garden affinities with well-known species, and as a further preliminary it may be stated that only summer-blooming species and varieties, having corns that keep well over winter, are desired by growers in this country. We have produced hybrids between the *Gandavensis* or *psittacinus*, as well as *Lemoinei* or *purpureo-auratus* sections, and such early flowering species as *tristis*, *vimulus*, *trimauculatus*, *cuspidatus*,

ramosus and Byzantinus. Some of these crosses were very pretty, but rather difficult to winter over without glass protection. *Purpureo-auratus* × *vinulus* and *Gandavensis* × *trimaclatus* bloom in August and have long-keeping corns. They increase rapidly, have attractive characteristic forms and markings, but the comparatively small size and neutral flesh tints of the blooms do not rank them among decorative gladioli.

The largest group of new species comprises types allied to *G. dracocephalus*. They come under the names of *Cooperi*, *platyphyllus* and various numbered forms collected during the last six years in Swaziland, Durban and Madagascar. The most promising horticultural type came labeled from Mt. Kilima-Noseharo, in eastern German Africa. It is a slender but healthy grower and has a fine spike, large hooded flowers, scarlet, penciled with orange outside and clear deep yellow inside, deepening into bright orange in the throat. Seedlings of this distinct form are under way but have not yet bloomed. *Platyphyllus* has immense, deeply-ribbed foliage, looking like a vigorous young palm before the flower stem arises, and a large corm having a hard, woody covering. The flowers are rather small, red and yellow, penciled with purple, strongly hooded and with the perianth so short that the stigma and anthers protrude, a characteristic shared by other allied unnamed species recently flowered. Hybrids with large-flowered garden gladioli have little merit in the first generation, but improve later on.

Already several hybrids of *dracocephalus* have been put in commerce by European breeders. They are not of a character to commend the type to beauty-loving amateurs, being too narrow and hooded in form and blotchy in coloring. The best *dracocephalus* hybrids we have seen were sent out under the name of *G. hybridus asperus* by Herr Leichtlin. They are vigorous, well-furnished plants, bearing ten to fourteen broad, well-opened flowers on a strong spike. The colors vary from orange to cinnabar red, penciled all over in intricate patterns with deep or brownish red. They are harmonious and attractive in outline and coloring. Some of the newer species of this group evidently come from arid regions, as they bloom early and ripen up their corns with great promptness. Hybrids obtained from them often show the same tendency, and a useful class of early-bloomers may yet be obtained from this progeny. A tall-growing form of *G. platyphyllus* from Swaziland has green blooms covered with pencilings of bluish purple. By crossing it with the best violet blues of the *Lemoinei* section we have made a start toward a "blue" class of a very distinct aspect. This form of *platyphyllus* is destitute of the woolly corm coatings, and is of excellent constitution, having long and attractive foliage.

The *psittacinus* group is of great interest as the foundation of the splendid *Gandavensis* strain and through it of all the fine modern garden gladioli. We have used *psittacinus* very extensively and generally obtain brilliant red and yellow blooms, a dense long spike and a rigid upright growth. *G. igneus*, *decoratus* and the valuable new *Quartinianus* are of this type. The first and last are very late bloomers, needing the shelter of glass in late fall to perfect the blooms. Hybridizing with selected earlier blooming garden varieties lessens this tendency and imparts much beauty of coloring to the stately habit and lusty growth of

this useful group. *G. sulphureus* or *Adlami* is plainly an offshoot of *psittacinus*. It blooms early in July and has a straight spike of medium-sized, clear sulphur-yellow flowers, sometimes having a greenish tinge. Some growers say the *sulphureus* of the Dutch florists is different from *Adlami*, but corns procured under both names from various sources produce identical flowers.

This yellow species or variety of *psittacinus* would appear a potential breeder for the much desired improved yellow garden sorts, yet persistent work, extending over seven years, has resulted in only two good golden yellow hybrids out of thousands of direct crosses bloomed. These are the product of *Adlami* × *Canary Bird*, the latter a fine American yellow *Gandavensis* of rich color but crooked growth. The other seedlings all came red, often very intense, with a few creamy whites, although varieties with yellow predominating were almost exclusively used in pollinating. The two good yellows are large and fine but of provokingly slow increase. *Quartinianus* hybrids, especially with the new *G. cruentus* section, are very promising, the tall, leafy plants being furnished with large and striking blooms, chiefly red and yellow.

The *oppositiflorus* group naturally follows, as many growers have little doubt that the original *Gandavensis*, known to be the parent of all our superb garden strains, was produced by a union of *psittacinus* with something of the *oppositiflorus* type, instead of with *G. cardinalis*, as so often claimed. We have grown many direct hybrids of *psittacinus* and its allies with *oppositiflorus* and *floribundus* that appeared quite identical with *Gandavensis* as we have been able to procure the type, while on the other hand repeated attempts, extending over many seasons, to hybridize *cardinalis* with *psittacinus* and its allies have uniformly failed. This is the experience of more than one European investigator, and may be taken to almost conclusively settle the matter.

G. oppositiflorus, with its tall growth and many-flowered spikes, often opening eighteen to twenty-four blooms almost simultaneously, together with its delicate peach and white tinting, seems a most promising parent for producing fine whites and light tinted varieties of the exhibition type, but our own profuse trials, as well as the results of many contemporary breeders show an appalling amount of chaff to very few grains of wheat. The results of the first two generations of hybridity are almost *nil* in a decorative sense, but the third consecutive pollination with the best modern white and very light kinds has developed some very pretty and hopeful new varieties.

The looked-for high-class pure white has not come by this means, though an almost stainless *oppositiflorus* was used at the beginning and rigid selection since maintained. Really clear whites have appeared from *psittacinus* and *dracocephalus* hybridized with *oppositiflorus*, showing very strong pollen influence, but they have little vitality and low powers of perpetuation. *G. floribundus* appears the more promising of the two as a parent, though inclined to transmit red coloring to its seedlings. Its hybrids are more likely to bear flowers facing one way than *oppositiflorus*, which takes its name from the distichous or two-ranked manner in which the blooms are borne.

The only other useful member of this group known to us is a new one which

came labeled "narrow-leaved species from Swaziland." The corn had evidently been collected when immature and lay dormant two years, at last producing a long spike—thirty-two flowers—of very short and small blooms, pale lilac with feathery markings of a deeper shade. The blooms face one way and open well together. It is a very late blooming sort, but a few hybrids were secured which are now well under way.

All growers of gladioli of the *Gandavensis* type know there is a constant preponderance of the red varieties. The white and light colors tend to degenerate with greater or less rapidity, while the reds increase in number and maintain their vigor. So rapid and complete is the reversion in some instances as to amount to wholesale atavism. Considerable numbers of a choice *Gandavensis* variety have, propagated for generations in the usual manner from cornels, changed in a season so as to closely resemble a typical red and yellow *Gandavensis*. This seems to confirm Mendel's theory of dominant and recessive factors in all hybridizations. Taking *psittacinus* as the dominant, *oppositiflorus* acts in most instances as the recessive type, and tends rapidly to efface itself in favor of its virile partner during reproduction by seeds, and to a lesser degree during extension of a given hybrid plant by cormel or bud propagation.

Gladiolus purpureo-auratus is well known to be the foundation of the popular *Lemoinei* and *Nanceianus* strains of commercial varieties and *G. Papilio* of the "blue" *Lemoinei* kinds. These latter comprise a number of attractive heliotrope and purple-blue shades in the typical hooded form of the parent. *Papilio albus* is a handsome, slender-growing variety, reproducing itself perfectly from seed. It is very pure white in color with a crimson purple blotch. Crossed with the best whites among the *Gandavensis* and *Lemoinei* sections it produces a few attractive and distinct new light garden forms amid a great proportion of inferior ones. We regard it as promising and will continue work among its dilute hybrids, of which we are now approaching the fourth generation.

The species typified by *G. Saundersii* are of the first importance. *Saundersii* in the hands of Herr Leichtlin gave us the magnificent strain known in commerce as *Childsii*, still of the very highest commercial value, and the large-flowered, brilliantly colored *Nanceianus* sections, produced by the Messrs. Lemoine by crossing *purpureo-auratus* hybrids with the new species. Leichtlin used pollen from the finest procurable *Gandavensis* varieties on *Saundersii* and the result is a class of gigantic, richly colored kinds mostly of red tints, with widely expanded blooms having a nodding upper segment. When the reverse cross is made, and ovules of *Gandavensis* fertilized with *Saundersii* pollen, the result is far less striking. This has been verified by many thousand personal trials.

G. Leichtlini is a dwarf, early-blooming species with pretty, red flowers having a yellow, mottled throat. It is closely allied to *Saundersii* and the following species, and crosses readily with both. One would consider it a promising breeder from the dainty aspect of its wide-open blooms, but it has in our hands proved quite disappointing. Hybrids with *Gandavensis*, *Lemoinei* and *Nanceianus* types, with very few exceptions, lose individuality, whether the seed or pollen is taken from the species, and are a woe-

fully commonplace lot. Crossed with *Saundersii* or *eruentus*, however, a beautiful and vigorous progeny results, quite intermediate in either case. They are early blooming and, being sterile, are wonderfully profuse in bloom. Lemoine's *Glaieus* *preoces* look much like some *G. Leichtlinii* hybrids, but it is understood that *sulphureus* is a parent to some of them.

Eruentus is a particularly showy species, very distinct, though allied to the preceding both from the botanist's and gardener's standpoint. While vigorous and profuse in bloom, if its requirements are satisfied, it must be considered a particularly "miffy" species for general cultivation. Though known for many years, it no sooner appears in a dealer's catalogue than it is taken out for want of stock. Orders for corns of this species are filled with almost anything but the true article, and much disappointment has resulted among breeders and fanciers in consequence. If healthy corns are planted in nearly pure sand, with a stratum of peat for a root run, kept fairly moist and the plants afforded plenty of sun, they make strong, leafy plants and bloom finely, but resent any suspicion of clay and seldom thrive in rich garden soil.

My European correspondents report indifferent results from crossing *eruentus* with other species and garden varieties, the seedlings falling off from the parents in substance or coloring. This is our own experience in the main, but the first batch of hybridized seedlings yielded the truly magnificent variety since known as *G. hybridus princeps*. It came from seed of *eruentus* × *Childsii*, the *Childsii* being as above noted, *Saundersii* × *Gandavensis*.

It is not necessary to describe *Princeps* further than to say it almost exactly reproduces *eruentus* in its scarlet-crimson coloring, with white and cream featherings in the lower segments, but the flat circular flower is expanded to six inches in diameter both ways, the plant is doubled in size in all its parts, retaining the dark green, lustrous and profuse foliage, and is of a vigor of growth and virility of increase hitherto unknown in the genus. It appears to succeed wherever tested and can doubtless be grown anywhere and in any soil. A peculiarity of *eruentus* in developing its flower spikes after the first buds open is fully retained. When the spike first appears, it is short and blunt, looking as if only a few blooms would develop, but growth proceeds until often nineteen to twenty-two of these immense flowers are open, the last being about as large and perfect as the first. This progressive growth continues in water, if frequently changed, almost as perfectly as on the plant. From two to four blooms are fully expanded at the same time, thus giving a flowering period of nearly five weeks for a plot of *Princeps*, taking into consideration the successive side spikes and extra flowering growth sent up from strong corns. During this period, from the first of August to near the middle of September, a bed of this variety equals in brilliancy an equal expanse of scarlet *salyias*.

Attempts to reproduce *Princeps* by repeating the original cross have always failed, but many good flowers have since resulted, some of which seem worthy of perpetuation. Some odd fawn and ash colors result when crossed with species of the *psittacinus* and *dracocephalus* types. With *oppositiflorus* it gives a soft pink of remarkable profusion of

bloom, possibly valuable for bedding purposes. The potentialities of *eruentus* will not soon be exhausted and it is likely to be frequently heard of in the future.

A few unique species remain, among which *Ecklonii* seems most practical. It is a little plant, growing fifteen to eighteen inches high, with a short spike of star-shaped flowers, dull white, profusely peppered with dark purple brown. It is delicate and likes plenty of heat, but the corns are quite large and are excellent keepers. The first hybrids with *oppositiflorus* and light Lemoine yielded strong plants with long, many-flowered spikes, running into shades of wine and light purple-brown, covered inside and out with characteristic spotting of darker tints. The best of these singular hybrids, pollinized with *Princeps* and large-flowered garden varieties, have developed very striking large kinds with

FROGMORE SELECTED TOMATO.

finely shaped blooms of various pink and wine shades, with the profuse spotting well brought out. They appear well worthy of introduction as soon as sufficient stock is secured.

G. Ludwigi is an odd species of tall and very upright growth. The leaves are strongly plicate, resembling young palm fronds, and are quite hirsute, the pubescence being most strongly marked on the flower spike. The many flowers are dull salmon-pink, small and poorly opened. They are quite ventricose in form and very late in appearing. Crossing with *eruentus*, the only species we could manage to get in bloom at the same time, has improved the form, enlarged the size, brightened the color and advanced the season of the bloom, while removing most of the pubescence from the plant, which is still very upright and plicate in foliage. It is not a promising species to work from, but we hope to keep at it until real garden improvement is obtained or the successive dilute hybrids become sterile.

A most distinct and beautiful little *gladiolus* species was sent us three years

ago by Herr Leichtlin, whose collector found it among high cliffs in a little known part of Madagascar. It is not larger than a *freesia* in growth and produces good-sized and elegantly formed blooms of pure bright yellow. The yellow is as good as the best jonquil or trumpet narcissus, and not the pallid, greenish tinge usually found in the genus. It is a winter bloomer and our best efforts have been made to switch it around to get summer flowers, so as to connect with yellow garden kinds. The only species we have had an opportunity to cross it with is *igneus*, of the *psittacinus* group. One viable seed was secured, which has just produced a blooming plant. No yellow coloring appeared, the wide open blooms being quite clear salmon. It is attractive in make-up and may be of future service, though devoid of decorative value. If the yellow Madagascar species is ever obtained in quantity it will prove a treasure for winter blooming. The little corns resemble those of summer-blooming kinds and are good keepers.

It might be supposed that during sixteen years of active hybridization among *gladiolus* species, resulting in over 150,000 seedlings, many commercial varieties would be produced. Although we have found beautiful and promising novelties in this mass of hybrids and variety crosses, only two so far have been thought worthy of naming and commercial introduction. One is the *Eruentus-Saundersii-Gandavensis* hybrid above mentioned as *Princeps*. The other is a direct cross between *purpureo-auratus* and *Saundersii* known in a limited way in the trade as *Lord Fairfax*. It produces a long, curving spike of Indian-red blooms with a yellow and purple spotted throat. These are often five to seven inches across, and look like *hippeastrum* blooms arranged in a lily of the valley manner.

Frogmore Selected Forcing Tomato.

The photograph reproduced herewith shows a cluster of this favorite forcing variety grown at the Iowa State College, Ames, Iowa, which set remarkably well. The *Frogmore Selected* has proven one of the best croppers and best sellers of the past two seasons. I am indebted to Professor Irwin for the picture.

G. C. W.

Covering for Winter Protection.

At this season the consideration of what is hardy, how to prevent winter-killing and where to set out various ornamental additions for best results is uppermost in the mind of the successful gardener. Winter-killing is much misunderstood; perhaps no one knows all about it, but there are a few facts which we know to be essential to success and which are continually disregarded in the haste to cover plants for the winter.

The most important of all is to secure the proper ripening of the season's growth and the formation of the buds for next season. It is very common to maintain a succulent growth by means of watering, retarding the proper ripening until severe weather destroys the possibility. To cover such a plant harbors mildew and creates a condition favorable to other diseases equally destructive. Covering such a plant for an exceptionally cold day will help, but a permanent covering before it has reached its natural winter condition is dangerous.

Plants or bulbs that are transplanted this fall should have a good covering of leaves over the soil in which they are planted, thereby conserving the warmth and moisture of the soil to facilitate the formation of roots on bulbs, or the healing of roots on other plants, so that they will be in the same condition before the final freeze-up as are the plants which were not disturbed. The mistake commonly made in fall planting is in being too late to insure these conditions.

The exposure given plants, their proximity to buildings, whether open to full sun on stem, branches or the surface of the ground, or the nature of the soil in which they are planted, and so forth has most to do with winter-killing. This becomes quite complicated when gone into thoroughly, but there is one very common blunder by which many plants fully capable of withstanding the climate are winter-killed.

We frequently notice on a cold winter's day, the snow thawing in some sheltered position, showing the extreme differences of temperature within the radius of a few feet. Where a plant is thus baked on the top, while the snow water runs into the ground, enveloping the roots in a solid, air-tight mass of ice and soil, the plant is sure to suffer, particularly if it be a smooth-barked tree or shrub. Rough-barked plants are better equipped by nature. Protection from the sun is almost always desirable. Thatching with straw, when put on loosely, is best, as it holds air.

Most important of all is to secure perfect drainage of the soil, to keep it sweet and well aerated, with a surface drainage that will prevent the accumulation of ice, bearing in mind constantly that the drying of the top and smothering of the roots are to be guarded against.

C. B. W.

The Kansas City Premium List.

Advance sheets of the premium list for the Kansas City exhibition, November 3 to 8, show that the same liberal spirit prevails which made last year's exhibition so pronounced a success. The management has provided 158 classes. On the opening day chrysanthemums in pots, carnations in pots, miscellaneous plants and cut chrysanthemums will all be staged for good premiums. Special features of the day will be vases of 100 chrysanthemums of any one variety for prizes of \$75, \$50 and \$25; also vases of 100 American Beauties for prizes of \$150, \$100, \$75, \$50 and \$25.

Tuesday is carnation day. Liberal premiums are also provided for classes of ninety-six, seventy-two, forty-eight, thirty-six, twenty-four, eighteen and twelve cut chrysanthemums displayed on mossed boards.

Wednesday is set apart for roses, with classes for twenty-five Beauties, forty, twenty-five and twelve teas. A special premium of \$200 is provided for the best display of not less than five varieties.

The dinner table decorations will be put on Thursday and Saturday. Premiums will be awarded each day, \$800 in all. Friday there will be \$250 for four floral designs, American flags ten feet long. Saturday is seedling day, with extremely liberal premiums for novelties.

LADONIA, TEX.—The parties interested in the Stonewall Nurseries here are building a greenhouse 20x90 on a six-acre tract at Greenville. The new place will be conducted as a branch establishment.

Chicago.

SUPPLIES SHORTEN AND THE DEMAND INCREASES.—WEATHER REFLECTED IN CUTS OF ROSES AND CARNATIONS.—CHRYSANTHEMUMS RETARDED.—VIOLETS IN PLENTY.—STORE OPENINGS MAKE GOOD BUSINESS.—DOINGS OF WHOLESALERS AND RETAILERS.—PERSONAL MOVEMENTS.

Early in the week the market suffered a radical reversal of form, principally as the result of a period of very dismal and unproductive weather. Receipts from the immediate locality were much restricted, and the shortening of cuts seemed to act as a stimulus to demand. A large number of store openings have occurred during the week and great quantities of cut flowers have been required for these events, both for decorative purposes and for presentation to visitors. For the latter use the short-stemmed stock has sufficed and it has in consequence found a better market than previously. While the production of Beauties has not been curtailed to any great extent, the demand has been brisk and the stock selling lively at very fair prices. More of the medium length could easily have been used, as the quality is excellent. Brides and Bridesmaids have not been in anything like the supply noted a week ago. Late telegraphic orders have frequently failed of being filled, and prices, while they have not advanced, have stiffened to a noticeable degree. The Ivory rose is coming in very nicely and sells well. Chateaux and Liberty are wanted for fine work, while La France is in demand, but limited in supply. The most noticeable shortage of the week was in carnations. Production receded more on this item than on anything else and \$3 per hundred was easily obtainable for the best grade of stock, with anything presentable bringing \$2 per hundred. But this is a condition not likely to last more than a few days, for increased production is certain with a few days of bright sun. Chrysanthemums are coming along, but are somewhat later than usual because of the cool, dark weather. Fitzwygram is as yet about the only variety available, but of this some of the growers are entirely cut out. Violets are now in daily receipt, but in none too active demand. Quality is all that could be expected at the season. The store openings have had their effect on the greens market, asparagus being in particular demand for these affairs.

This has been opening week on State street, but of overshadowing importance has been the function at Field's, where the wonderful new store, and the older sections as well, were in gala attire. An elaborate scheme of decorating with lights and artificial flowers was executed by the store decorators, but the Wittbolds did the work which was of principal interest to florists, using something like a hundred cases of wild smilax and over 4,000 of their largest palms, ferns and cycads. The cut flowers were supplied through McKellar & Winterson and Monday morning's stock ran above \$2,000. For the first day of the opening there were used 5,236 Beauties, 2,700 Brides, 3,100 Bridesmaids, 1,100 Meteors, 12,800 carnations, 600 asters, 800 gladioli, quantities of asparagus and smilax and some miscellaneous stock. It was a big task to get together so much material and since the opening day enough fresh stock has been required to keep up the display. One vase of 200 Eucharist carnation was an attraction, billed out at 10 cents per bloom. Field's have done some wonderful adver-

tising for the opening and it is said that not fewer than 300,000 people a day have admired the display this week.

When down at New Castle last week E. C. Amling found all the growers with stock in fine shape. They have not been afflicted with the dismal weather which prevailed here in the end of September. Mr. Amling also visited Marion, Ind., and took a look at the places of F. W. Herleman, J. W. Bernard, the Marion Floral Company and Gunnar Teilmann, all of whom are well satisfied with the season's prospects. At the latter place there is a new carnation known as Marion Beauty, which impresses visitors very favorably. It is of Roosevelt color, but larger. The plant is large and vigorous, the stem long and strong, and from all appearances it is very productive.

Mrs. E. F. Winterson has been ill with blood poisoning for two weeks. Last Sunday night a severe surgical operation was performed, from which she is rallying steadily if not rapidly.

Mangel and Johnson have divided up their business interests, Mangel taking the Wabash avenue store and Johnson the Forty-seventh street place and the department store stands.

The Vaughan's Seed Store people will go to Western Springs Sunday to visit the greenhouse force. About fifty are expected to go, on the 11:40 train on the Burlington.

Geo. Reinberg has gone to Larchwood, Iowa, for a visit with relatives, and will go on into South Dakota before returning.

Wm. Ellison, of St. Louis, is in town acting as the purchasing agent for two or three of the St. Louis retailers.

H. Coatsworth has returned from New Castle, where he has been inspecting the establishment of Bentley & Company.

Hunt's have been mailing a very attractive catalogue this week.

John Zeck, of J. A. Budlong's, has been at St. Louis this week.

Visitors: C. B. Whitnall, Milwaukee; Mrs. E. Suder, Toledo, O.

Boston.

CUTS INCREASE BUT QUALITIES DETERIORATE.—ROSES COVERED WITH MILDEW.—DAHLIAS MAKE THE GARDENS GAY.

The past week has seen a very heavy increase in the cut of roses and carnations, which has been accompanied by the usual depression of values and accumulation of stock in wholesalers' hands. Asters have begun to run low, however, and this item will give no more solicitude to those whose business it is to keep the stock moving along as fast as it grows. Roses are of inferior quality. Warm, dark, foggy weather has been getting its work in and much of the material received during the past few days is an object lesson in the universality of mildew. No frost has, so far, disturbed the serenity of suburban life in this neighborhood. Gardens are gorgeous with fall-blooming flowers and dahlias are especially fine. Not for many years have we had so favorable a season for the dahlias and their splendid effect in many gardens this fall should have a stimulating effect on the demand for this showy class of flowers for next season's planting.

Several meetings have recently been held by growers unable to get stalls at the Park Street market. N. F. McCarthy made a proposition to devote his immense basement to market purposes, but, on assurance from the old market corporation that they will secure new and larger

quarters immediately, Mr. McCarthy's proposition was not accepted although extremely favorable. A new and independent organization has been formed with Dr. Rogers, South Sudbury, as president, and Winfred Wheeler, Concord, secretary and treasurer.

W. E. Doyle is having a fine show conservatory erected in the rear of his Boylston street store, by Hitchings & Company.

Visitors: Alfred Dimmock and F. Sander, Jr., St. Albans, England; J. D. Eisele and J. D. Clark, Riverton, N. J.

Philadelphia.

BUSINESS SHOWS GREAT IMPROVEMENT.—GOOD STOCK IN VERY BRISK DEMAND.—DAHLIAS HAVE PLACE OF THEIR OWN.—MARKET PROJECT MAKING PROGRESS.—NOTES WITH THE WHOLESALERS.

There has been much more activity the past week. Business has brisked up amazingly all along the line, there being a demand for all good stock; in fact, one has to be constantly on the spot to get it. The quality of everything is improving, with the exception of Bridesmaids, which seem to be getting pale, probably on account of the bad weather, we having had a great deal of rain. Beauties can now be had with stems four feet long, while the Queen of Edgely shows a remarkable growth for so early in the season. Carnations are gaining and some very nice flowers are seen. Crocker and Joost are the best pinks, with Hill best for white. Dahlias still hold the boards for the showy flower to take the place of asters or in fact supply a demand that they themselves seem to have created. All the commission houses are handling them and doing well. S. S. Pennock gets an express wagon load from Peacock's farm with every train and one shipment rarely holds out until the next arrives. Prices range from \$1 to \$4 per hundred. Violets are improving but are only good for the day received. The first doubles are in and the best that can be said of them is that they are sweet when they arrive; 50 cents per hundred is the price.

The market project is moving along nicely. Ten per cent of the capital stock has been paid in and the charter is expected next week. The date for the opening has not been fixed as yet but can not now be far off. The phenomenal price of choice of stalls at the Boston market has set the Philadelphians thinking and stockholders here are no doubt hoping their project will attain some such degree of popularity before many years go by.

S. S. Pennock has completed his addition for the ribbon department, which is now all located permanently on the second floor and occupies a floor space of 1,000 square feet. Over \$15,000 worth is now carried in stock.

Leo Niessen says his sales are far in advance of last year and the outlook ahead is very bright. He will be especially strong on Beauties and valley the coming season.

The palm men are still busy shipping. The demand for good latanias finds the stock limited. Some growers say they take up too much room to be profitable.

Dumont & Company are first in with cosmos, with which flower they do well. This must be an early sort, as the tall growing kind is only in bud as yet. K.

DULUTH, MINN.—Henry Eischen, of Eischen Bros., has been to Chicago to inspect the large ranges of greenhouses there preparatory to his firm's building a considerable addition to its range.

New York.

STOCKS INCREASING AND VALUES TEND DOWNWARD.—ROSES SHOW EFFECT OF WEATHER.—VIOLETS PLENTIFUL BUT POOR.—STORE OPENINGS TAKE MUCH STOCK.—VARIOUS NOTES.

The quantity of flowers received daily at the wholesale marts is on the increase rapidly under the influence of the advancing season and the muggy weather which has prevailed for nearly two weeks. Mildew is abundant on roses, especially those of the smaller varieties. Carnations are multiplying fast, with values on the down grade, and chrysanthemums are in sufficient supply to replace the rapidly-waning asters. Violets are overstocked as a rule but occasionally there comes a day when they sell out well, as was the case last Saturday, although the quality is such as the growers formerly threw away as valueless. The receipts of dahlias are enormous. They are now used by many of the stores, even in the fashionable sections, for showy work and the brilliant varieties of the cactus-flowered class are in fair demand.

The opening of the big new department store of Saks & Company, on Broadway, between Thirty-third and Thirty-fourth streets, called for a great quantity of flowers last Monday and sufficed to relieve the market in a most gratifying manner.

The Burgess Fuel Oil Burner Company is preparing to give demonstrations of the adaptability of their invention to greenhouse boiler heating, at the office of Thos. W. Weathered's Sons on Marion street.

Schloss & Company are introducing a new line of chiffon for florists' use which is a heavier fabric than heretofore offered and better adapted to retain its shape in knots and bows.

J. W. Withers is very sick with congestion of the lungs.

Visitors: Mrs. Williams, Pittsburg; J. N. Champion, New Haven, Conn.

Toronto.

NUMEROUS WEDDINGS CAUSE HEAVY CALL FOR CHOICE MATERIAL.—WIDE RANGE OF STOCK IN MARKET.

The many fall weddings are taxing supplies and stock of all kinds is scarce. The recent heavy rains have spoiled the asters and it makes a run on carnations, roses and other flowers. In quality stock is again first grade. Some very good Beauties are coming in, nice, long stems, selling at \$20 per hundred. A few nice Liberty and plenty of good Bridesmaids, Brides and Meteors are quoted at \$6. Morgan and Perle are also in the market but not sufficient to supply the demand. Chrysanthemums are no longer a rarity, as yellow and white can be seen in most of the stores, and all growers seem to have violets in quantity. Carnations are more plentiful, having good stems, and most orders are being filled. A good many dahlias are still coming in, cool weather being very beneficial to them, and they prove very attractive in store decorations.

Dunlops had the Osborn-Barvick wedding, where flowers were lavishly used. In the house was a very large stairway, and Kiff's adjustable vases were used to advantage.

Charles Turp is sending in some good Ethel Crocker. The flowers are exceptionally fine and stems a very good length for this time of the year.

Geo. Manton is cutting some good Beauties and tea roses from his place in Eglinton. H. G. D.

Meetings of Florists' Club.

The accompanying list gives the cities in which there are active florists' clubs. Following the name of the club is the place of meeting, the day of meeting, the hour and the name and address of the secretary:

BALTIMORE, MD.—Gardeners' Club of Baltimore, Royal Arcanum building, 18 W. Saratoga street. Second and fourth Monday of each month, at 8 p. m. John J. Perry, Sec'y, Gay and Eager streets.

BOSTON, MASS.—Gardeners' and Florists' Club of Boston, Horticultural Hall. Meets second Tuesday of each month. W. E. Fischer, Sec'y, 18 Union Terrace, Jamaica Plain, Mass.

BROOKTON, MASS.—Brookton Gardeners' and Florists' Club, store of W. W. Hathaway, Times Building. First and third Tuesday of each month, at 8 p. m. W. W. Hathaway, Sec'y, Brookton, Mass.

BUFFALO, N. Y.—Buffalo Florists' Club, 481 Washington street. Second Wednesday of each month, at 8 p. m. Wm. Legg, Sec'y, 1410 Delaware avenue, Buffalo.

CHICAGO, ILL.—Chicago Florists' Club, Handel Hall, 40 Randolph street. Second and fourth Wednesday of each month, at 8 p. m. George Wienhoeber, Sec'y, 413 Elm street, Chicago.

CINCINNATI, O.—Cincinnati Florists' Society, Jabez Elliott Flower Market. Second Saturday of each month, at 8 p. m. Frank W. Ball, Sec'y, 437 Main street.

CLEVELAND, O.—Cleveland Florists' Club, Progress Hall, 244 Detroit street. Second and fourth Monday of each month, at 8 p. m. Isaac Kennedy, Sec'y, Woodchife, Lake avenue, Cleveland.

DENVER, COLO.—Denver Floral Club, 323 Charles Block. Second and fourth Friday of each month, at 8 p. m. F. T. Rushmore, Sec'y, 2316 Franklin street.

DETROIT, MICH.—Detroit Florists' Club, Cow- Building, Farran and Gratiot avenue. First and third Wednesday of each month at 8 p. m. J. P. Sullivan, Sec'y, 214 Woodward avenue.

HARTFORD, CONN.—Hartford Florists' Club. Second and fourth Tuesday of each month at 8 p. m. J. F. Coombs, Sec'y, 688 Main street.

INDIANAPOLIS, IND.—State Florists' Association of Indiana, Commercial Club rooms, Indianapolis. First Tuesday of each month, at 8 p. m. H. Junge, Sec'y, 456 E. Washington street, Indianapolis.

MONTREAL, QUE.—Montreal Gardeners' and Florists' Club, Alexandria rooms, 2204 St. Catherine street. First and third Monday of each month. W. H. Robin, Sec'y, 23 Crosse street.

NEW YORK, N. Y.—New York Florists' Club, Elk's Hall, 19 West Twenty-seventh street. Second Monday of each month, at 7:30 p. m. John Young, Sec'y, 51 West Twenty-eighth street, New York.

OMAHA, NEB.—Nebraska Florists' Society, City Hall. Second Thursday in each month at 8 p. m. Louis Henderson, Sec'y, 1519 Farnam street, Omaha.

PHILADELPHIA, PA.—Florists' Club of Philadelphia, Horticultural Hall, Broad street above Spruce. First Tuesday of each month, at 8 p. m. Edwin Lonsdale, Sec'y, Wyndmoor, Philadelphia, Pa.

PITTSBURG, PA.—Pittsburg and Allegheny Florists' and Gardeners' Club, at rooms of Pittsburg Cut Flower Co., 504 Liberty street. Second Thursday of each month, at 8 p. m. T. P. Langhans, Sec'y, 504 Liberty street, Pittsburg.

PROVIDENCE, R. I.—Florists' and Gardeners' Club of Rhode Island, 96 Westminster street, Providence. Second Thursday of each month at 8 p. m. Alexander Reenie, Sec'y, 41 Washington street, Providence.

RICHMOND, IND.—Richmond Florists' Club, Commercial Club rooms. First and third Friday of each month. H. C. Chessmann, Sec'y.

SALT LAKE CITY, UTAH.—Salt Lake Florists' Society, office of Huddart Floral Company, 214 E. Second South street. Second and fourth Friday of each month. P. T. Huddart, Sec'y.

SAN FRANCISCO, CAL.—Pacific Coast Horticultural Society. First Saturday and third Monday of each month. Thos. H. Munroe, Sec'y.

SEATTLE, WASH.—Seattle Commercial Horticultural Club, First and Cherry streets. First Wednesday of each month. Wm. Hopkins, Sec'y, 822 First avenue.

ST. LOUIS, MO.—St. Louis Florists' Club, Odd Fellows Hall No. 2, Ninth and Olive streets. Second Thursday of each month, at 3 p. m. Emil Schray, Sec'y, 1101 Pennsylvania avenue, St. Louis.

TORONTO, ONT.—Toronto Gardeners' and Florists' Association, St. George's Hall, Elm street. Third Tuesday of each month, at 8 p. m. W. C. Jay, Sec'y, 438 Spadina avenue.

UTICA, N. Y.—Utica Florists' Club, 183 Genesee street. First Thursday of each month at 8 p. m. J. C. Spencer, Sec'y.

WEST HOBOKEN, N. J.—North Hudson Florists' Club, store of H. C. Stenhoff, Hudson boulevard, West Hoboken. First Tuesday of each month, at 8 p. m. Geo. F. Rogge, Sec'y, 616 Washington street, Hoboken.

THE AMERICAN FLORIST

EIGHTEENTH YEAR.

Subscription, \$1.00 a year. To Europe, \$2.00.
Subscriptions accepted only from those
in the trade.

Advertisements on all except cover pages,
10 Cents a Line, Agate; \$1.00 per inch.
Cash with Order.

No Special Position Guaranteed.

Discounts are allowed, **only on consecutive inser-**
tions, as follows—6 times, 5 per cent; 13 times,
10 per cent; 26 times, 20 per cent;
52 times, 30 per cent.

Cover space sold only on yearly contract at
\$1.00 per inch, net, in the case of the two
front pages, regular discounts apply-
ing only to the back pages.

The Advertising Department of the AMERICAN
FLORIST is for florists, seedsmen and nurserymen
and dealers in wares pertaining to those lines *only*.

Orders for less than one-half inch space not accepted.

Advertisements must reach us by Wednesday to
secure insertion in the issue for the following
Saturday. Address

AMERICAN FLORIST CO., Chicago.

Look out for the freeze, due any night
now.

Don't be in too big a hurry to unload
the Boston ferns this fall; they have lost
none of their popularity.

PAINS to raise the grade of your stock
will be effort well invested; in cut flowers
one good bloom is worth two poor ones,
no matter what the item or the season.

Officer.

ED. AM. FLORIST:—Enclosed is a check
for \$1 for the FLORIST another year.
We could not do without the FLORIST;
wish it came twice a week.

Van Wert, O. C. W. McCONAHEY.

Greenhouse Building.

Greensburg, Pa.—Joseph Thomas, five
houses.

Cincinnati, O.—Eden Park, one plant
house.

Toughkenamon, Pa.—C. P. Chambers,
house 35x120.

Lapeer, Mich.—W. H. Watson, house
24x120, three propagating houses.

Waban, Mass.—Herbert Kimball, one
house.

Nichols, Conn.—J. B. Nichols, one
house.

Cohasset, Mass.—Eugene N. Foss, con-
servatory.

Schenectady, N. Y.—W. C. Eger, rose
house 24x90.

House and Frame.

ED. AM. FLORIST:—Will you kindly
advise me in the matter of heating a
greenhouse 14x40, eight feet to ridge,
even span, sides four feet high, with two
feet of glass on south side opening into
four feet of sash, double boarded north
and east with shed at west end. I have
a Model Heating Company's sectional
hot water boiler for 1,200 feet of radia-
tion and will likely have to use wood and
soft coal. How many returns and what
size pipe will be best if I use a 3-inch flow
in order to maintain 48° at night and 43°
under the sash, Philadelphia climate?
Should the flow ascend from the boiler to
the end of the house and will it be safe to
tap a feed pipe on to a return? I wish
to run one return in the sash. Will it be
well to run the north returns against the
north wall under the 4-foot bench?

S. S.

In addition to the 3-inch flow, use
eight 1½-inch returns in the house and
two 1½-inch in the frame. A 2½-inch
flow would answer. This can be run

downhill with the expansion tank con-
nected at the highest point. The water
supply pipe can be connected at any con-
venient place.

L. R. TAFT.

Coming Exhibitions.

[Secretaries are requested to supply any omis-
sions from this list.]

Fourth annual exhibition Tarrytown Horticultu-
ral Society. Edw. W. Neubrand, Sec'y, Tarry-
town, N. Y.

Chrysanthemum Society of America.

WHAT THE PRESIDENT SAYS.

"When the hurly-burly's done, when
the battle's fought and won" among our
eastern growers in their several cities,
there comes the great show in Chicago,
November 11 to 15, and the convention
of the C. S. A. The time is fast approach-
ing and the moment is opportune for
reminding all growers of this important
occasion. There are now so many chrysan-
themum shows held each year that our
individual interest and support usually
centers in the show of our own immediate
locality, but a national importance
attaches to the Chicago Horticultural
Society's show this year. Chrysanthemum
growers therefore, throughout the
country should make a united effort, both
by exhibiting and by their presence, first
to make the largest and most complete
exhibition of this flower we have ever
seen and next to swell the ranks of mem-
bership in the national society and
launch it safely on a prolonged voyage
with every important city scheduled as
a future port of call.

A great show in Chicago is already an
assured fact thanks to the comprehensive
and liberal schedule drawn up and dis-
tributed several months ago. But out-
side of the actual competitive classes
there are ways and means by which we
may amplify the show and materially
enhance its scope. If limitations of dis-
tance debar some of us in the east from
entering in competition, we can at least
contribute an exhibit and, small though
it might be, the aggregate of a number
of growers would be considerable. We
want representation from every possible
district. It is almost needless to point
out what a golden opportunity is here
presented for a great assemblage of new
varieties present and prospective, and all

who have them should make a timely
note of the fact and endeavor to show
them at Chicago.

Last but by no means least we want
attendance from every section, and an
early intimation of intention to attend,
so that reduced rates of travel may be
secured. An invitation has already been
extended to the writer, and will be
tendered to the C. S. A. at the proper
time and place, for a chrysanthemum
convention in an eastern city next year,
but sufficient for the present is the com-
ing convention and it is "up to us" to
make this new departure in the policy of
the C. S. A. all that it should be. A suc-
cessful November meeting is essential
to the life of the C. S. A. in the future.
Let us combine to make the first one it
holds command attention and merit sup-
port hereafter. A. HERRINGTON, Pres.

Advertising for Retail Florists.

In the last number of the AMERICAN
FLORIST I find that the subject "Adver-
tising for Retail Florists" is commented
upon by several florists whose names are
quite familiar to us. Part of these com-
ments refer to what I said or left unsaid
at the convention at Asheville, and I feel
that they have drawn a few more sparks
from me.

Says Mr. Kift: "Advertising the flower
store will always be a problem." Mr.
Kift is right, but problems arise and are
invented to be solved. Since advertising
is such an interesting, alluring, and some-
times such a fascinatingly expensive
problem, we are all tempted more or less
to determine whether the result is profit-
able or not.

To begin, we must remember that each
florist's problem is somewhat different
from another's, and therefore his answer
will be different from the others. The
propositions involved may vary much in
some points and may coincide in others.
For example, the businesses which we
wish to advertise are in different parts
of the country, and we find that business
is done on a larger and more generous
scale in the older and more wealthy sec-
tions. These older sections will support
a character of advertising which would
be too expensive in other parts.

In the larger cities there is competition
with many florists, whereas in the smaller
cities the lack of aggressive competition
is balanced by a smaller field for business.
The florist of the smaller city has there-
fore less need for advertising because his
business house is before the eyes of a
large part of the citizens. Again, the
location and facilities of the city florist
are much to be considered. If the busi-
ness is in the heart of the retail business
district, visitors and passers-by are also
attracted, beside the regular customers,
and such businesses have found it profit-
able to advertise in theater programmes,
etc. But, on the other hand, the business
may be in close proximity to a residence
district, and the conservatories in con-
nection are well stocked with decorative
house plants, and most of your customers
are regular ones, then you must study
more direct means of advertising.

Another consideration is, what class of
people do you wish to do business with
especially? Do you wish to do a large
volume of business at a moderate rate of
profit, or do you wish to devote your
attention to a class of people who pay
well, but who are very exacting in their
tastes? If you choose to sell flowers at
a moderate profit, then your "service"
cannot be an expensive one, and if you
think that you can best handle a more or

less exclusive trade, with the idea that others will patronize you because of your position, then you must have appointments, a service, facilities and flowers which will advertise your intentions.

The more definitely that you define your policy, the more closely must you study the means by which you will advertise your business. If a two headline advertisement in a newspaper brings good results, very well, and the florist who would find such means unprofitable because thousands would read the advertisement who could not afford to buy flowers as he would present them, and those who could, would not care to be advised in that way, has no criticism to offer.

For a florist to solicit trade at retail (it is common in many wholesale businesses) would not so much as be considered by some, yet the Daniels & Fisher Company, of Denver, claim that is one of their most effective trade bringers. This all goes to prove that our problems are quite different and that the method pursued by one florist is no criterion for another. One florist can make money by dealing with a class of customers with which another could not get in touch at all. Another has tastes and ideas which it is his hobby to exploit and make successful.

Through it all I feel that the florist's business is different from a vast number of businesses, and is similar to but a few of them. The beautiful side of the business, as associated with flowers, must not be forgotten, and its influence should be so strong in our advertising that it may be felt instantly.

GEORGE W. WIENHOEBER.

Minneapolis.

WEATHER UNFAVORABLE TO STOCK.—ROSES AND CARNATIONS SCARCE.—DOINGS OF THOSE IN THE CRAFT.

The weather last week was dark and cloudy, the result being a decided shortage in stock. Tea roses and carnations were hardly to be had at all. Large numbers of Beauties from out of town growers were sent in and sold to good advantage. Greens, both smilax and asparagus, are of excellent quality and find ready sale. A heavy call for white flowers, especially, was experienced. The retailers all report a very busy week.

Hans Rosacher, of Northeast Minneapolis, has just completed planting his carnations. Sickness and a shortage in help have been a great setback to him. He is still marketing sweet peas which are of very good quality for this time of year.

Thomas Lynes is making frequent trips to the Minnesota bottoms for ducks, but as yet he has not secured very large bags.

R. Will is cutting some good carnations from his young stock. C. F. R.

Des Moines.

DOINGS OF THE LAMBERTS.—A WEDDING.—TRADE OPENS EARLY.—STOCK SCARCE.—RUMORS OF NEW ESTABLISHMENTS.

The flower business has opened unusually early this fall, demand being quite active, with short supply of home-grown stock. The wet, cold summer has retarded building and repairing somewhat, so that nearly everybody is behind with work.

Peter Lambert, the veteran in the trade, has retired from active greenhouse work, having become superintendent of Greenwood Park. A handsome cottage

was built last summer for him, and he has moved into it. His son, John D., has taken charge of the greenhouses, and to celebrate the event, took for a life partner last Wednesday evening Miss Kittie Kuhlman. "The boys" in the trade remembered John handsomely on the happy occasion.

There are rumors of ground having been bought for two new greenhouse establishments here. SENEX.

SITUATIONS, WANTS, FOR SALE.

Advertisements under this head will be inserted at the rate of ten cents a line (six words) each insertion. Cash must accompany order. Plant ads. not admitted under this head.

Every paid subscriber to the AMERICAN FLORIST for the year 1902 is entitled to a five-line WANT ADV. (situations only) free, to be used at any time during the year.

CUT FLOWERS AT WHOLESALE.

THE SEED TRADE.

AMERICAN SEED TRADE ASSOCIATION.

WALTER P. STOKES, Pres.; C. N. PAGE, First Vice-Pres.; S. F. WILLARD, Wethersfield, Conn., Sec'y and Treas.

THE bean situation continues uncertain.

THE Wholesale Seedsmen's League met in New York October 2.

THE white clover seed crop in south-eastern Wisconsin is almost a total failure this season.

WATERMELON seeds have lately sold at from 20 cents to 30 cents per pound, according to the varieties.

It is said that an offer of 75 cents per pound has been refused for Arlington White Spine cucumber in large lots.

WIRES from California indicate that Yellow Strasburg and Flat Danvers, also Australian Brown, onion varieties are being offered.

A. H. GOODWIN, of Goodwin-Harries Company, Chicago, is in New York, to meet Mrs. Goodwin, who is enroute home from Europe.

MICHIGAN garden beans of wax sorts are reported in some localities at sixty per cent of a crop, green podded sorts, seventy-five to 100 per cent.

THE Braslan Seed Growers' Company will increase the list of vegetable seeds that they will grow the coming season, adding turnip, rutabaga and tomato.

CUCUMBER seed is believed to be scarcer than first anticipated and the belief is common that trade rates on nearly all kinds will go from 75 cents to \$1 per pound.

REPORTED sales of Stowell's Evergreen sweet corn at \$1.65 are believed to be under the market. Considerable anxiety exists concerning general line of about all other varieties of sweet corn.

THE Jerome B. Rice Seed Company, Cambridge, N. Y., has issued an onion crop report as of September 20. They summarize the crop as not to exceed last year and not so good in quality.

REGARDING vine seeds, the opinion prevails that the shortage on muskmelon seed will not be so great as at first anticipated, although trade prices of from 45 cents to 65 cents per pound are mentioned.

AMONG those visiting Chicago September 27 were Albert McCullough, Fred. Barteldes, Max Welhemi, Frank T. Emerson and Jesse T. Northrup. An informal gathering with some of the craft in Chicago was had.

P. H. VAN WAVEREN, senior partner in L. Van Waveren & Company, Hillegom, Holland, died September 12, aged 67 years. He was a pioneer exporter of Dutch bulbs to America, his firm having been established in 1856.

RECENT sales of Alaska peas have been made at \$3.75. This variety, while not so scarce as some, seems to be well up to that figure. The dwarf wrinkled peas seem to be short, Nott's Excelsior possibly being a better crop than American Wonder. These two, including Gems, are now held at \$5 or above, few quotations being made.

SPRINGFIELD, O.—One Harry Brighton, not overly bright but bright enough to know good plants at sight, is in jail for stealing stock of Good & Reese. He has a wife and nine children.

Dutch Horticultural Society.

At the last meeting of the Dutch Horticultural Society, at Overveen, near Haarlem, the following awards were made: A first-class certificate to F. E. Houtvester, Utrecht, for zonale pelargonium H. Mar-

FRANK T. EMERSON.

A prominent Nebraska seed grower and General Manager of the Western Seed and Irrigation Co.

tinet; to J. J. Van Crujningen, Haarlem, for Fuchsia Otto Von Wernigrode. Certificate of merit to J. T. Vander Berg, Jutphaas, for Dahlia President Viger. Botanical certificates to H. D. Willink

Von Collen, Brenkelen, for Lepidostemon pentstemonoides; to C. J. Kikkert, Haarlem, for Epidendrum Medusæ. A silver medal and a gratuity were awarded Wezenburg & Stassen, Leiden, for a collection of 350 varieties of hardy perennials. Groenewegen & Company, Amsterdam, received a silver medal for a collection of 100 varieties of lathyrus and T. E. Houtvester, Utrecht, received a medal for a collection of single zonale pelargoniums. Bronze medals were awarded M. Van Waveren, Hillegom for hardy nymphæas and to T. E. Houtvester, for double zonale pelargoniums.

Tarrytown Horticultural Society.

At the September meeting of the Tarrytown Horticultural Society George Legg and Chas. Eddison were elected to honorary and Homer Hitecock to active membership. Mr. Shader, gardener to J. D. Rockefeller, was proposed for active membership. A large collection of dahlias was the exhibit of the evening and the following were awarded honorable mention for their exhibits: L. A. Martin, of Greenwich, Conn.; David McFarland, of Scarborough; F. R. Pierson and Thos. Cockburn, of Tarrytown. L. A. Martin read an essay on dahlias which was discussed by Messrs. Mooney, Cockburn, Gibson, Martin, McFarland, Pierson and Scott.

Schedules of the annual exhibition to be held in Tarrytown November 11 to 13 are now ready and can be had on application to the secretary, E. W. Neubrand, Tarrytown. H. G. R.

TOUGHKENAMON, PA.—C. P. Chambers is adding a new equal-span house 30x120 feet to his already extensive plant. It will be heated by hot water.

THE NURSERY TRADE.

AM. ASSOCIATION OF NURSEYMEN.

CHAS. A. ILOENFRITZ, Pres.; D. S. LAKE, Vice-Pres.; GEORGE C. SEAGER, Rochester, N. Y., Sec'y. Twenty-eighth annual convention, Detroit, Mich., June, 1903.

PEACH trees are one of the principal shortages with Georgia nurserymen.

AN unprecedented sale for wood labels is an indication of how the trade winds blow.

THE nurseries where ornamentals are chiefly handled report this their heaviest fall season.

IT is reported that one summer day's work at the Stark nursery, Starkdale, Mo., was 122,800 buds, set by fifty-eight hands.

A STORAGE house has come to be a necessity on an up to date nursery. Many fine buildings of this character are now nearing completion.

ACCORDING to Wesley Greene, secretary of the Iowa State Horticultural Society, there are nine and a half millions of bearing fruit trees in Iowa.

THERE is an increasing demand for the cherry for ornamental work. Prunus Padus is one of the best. It is the European bird cherry, in cultivation in many forms. The variety commutata is noteworthy because it is one of the earliest of all trees to leaf out in the spring.

St. Louis.

BUSINESS SHOWS PRONOUNCED IMPROVEMENT.—WORLD'S FAIR DOINGS STIMULATE SOCIAL ACTIVITY.—MARKET IN GOOD SHAPE.—NOTES.

Trade is picking up and a very notable improvement in stock is seen. The roses are of much better color, but there are hardly enough of the first grade to supply the demand. World's Fair doings have brought a number of prominent people to the city and created a considerable demand for the best flowers. Ostertag Brothers had a fine decoration at the Southern Hotel, September 30. George Waldbart also had a good order for work at the St. Louis Club for a dinner to Miss Helen Gould and other members of the Board of Lady Managers, on October 1.

The wholesale market is in good shape this week. From \$2 to \$5 is received for roses. Some very fine Beauties are bringing \$3 per dozen. Ivory is about the best white rose at present. Carnations are bringing from \$1 to \$2. A few chrysanthemums are to be had at from 75 cents to \$2 a dozen. Violets are beginning to come in quite lively but prices are low.

The new store of Ellison & Tesson is open and ready for business, in the Masonic Temple.

Mrs. M. Ayers has a very fine new wagon, surpassing those burned some time ago.

John Zeck, manager for J. A. Budlong, Chicago, was in the city this week.

Robt. Tesson was at Chicago and vicinity this week. R. J. M.

TROY, O.—The large addition to the plant of L. A. Thomas gives him ample facilities for a big season's business.

NEW HAVEN, CONN.—The Frank S. Platt Company was made a joint stock corporation last week, capital stock, \$20,000. The business of general seeds, flowers, etc., will be carried on at the old location on State street, where Mr. Platt has been for many years.

**SAVES MANY TIMES
ITS PRICE**

THE AMERICAN FLORIST COMPANY'S DIRECTORY saves many times its price to every one who catalogues or circularizes the trade. Fully revised to date of publication, it puts the mail only to live names, avoiding waste of postage and printed matter, time and labor.

Contains 418 pages, lists of Florists, Seedsmen and Nurserymen of the United States and Canada by states and towns, also alphabetically; firms that issue catalogues, private gardeners, horticultural societies and much other up-to-date information which makes it a reference book of daily utility wherever a wholesale trade is done.

Published annually by the

American Florist Co.
324 Dearborn St. CHICAGO.

OUR PASTIMES.

Announcements of coming contests or other events of interest to our bowling, shooting and sporting readers are solicited and will be given place in this column.

Address all correspondence for this department to Wm. J. Stewart, 79 Milk St., Boston, Mass.; Robt. Kift, 1725 Chestnut St., Philadelphia, Pa.; or to the American Florist Co., 324 Dearborn St., Chicago, Ill.

At New York.

The bowling season opened in a mild and innocuous manner on Monday evening, September 29. The call for a meeting at the Arlington alleys brought out a group of just seven, but there were valid excuses sent in from several of the old stand-bys and no doubt they will all get limbered up in good shape before many weeks. The scores herewith appended as the result of this first set-to are published without the approval of the various parties responsible for them. A worse record is sometimes seen, but not often.

Player	1st	2d
Trendly	129	103
Sheridan	106	119
Stewart	133	111
Burns	142	139
Lang	131	148
Lorenz	121	97
Shaw	86	92

At Philadelphia.

The cups are now all in and the case is somewhat crowded, but they can be set a little closer, however, if any more come our way. The interest keeps up and many interesting matches take place on the alleys. The following are the averages of all who rolled over ten games last month:

Mooney	177	Craig	155
Moss	174	Hogerle	153
Dunham	174	Fletcher	151
Eimmerman	171	Watson	150
Allen	171	Archer	150
Moore	163	Holmes	149
Conner	162	Anderson	143
Harris	161	Yates	142
Kift	159	Falk	135
Westcott	158	Gibson	134
Baker	157	Dunlop	130
Bonsall	157	Eickmeyer	129
Kuestner	157	Leaver	127
Adelberger	156	Hanna	121
Polites	155		

K.

Philadelphia Gardeners' Cricket League.

The series of games played by the Philadelphia Gardeners' Cricket League resulted in a succession of victories for Wootton, who therefore win the prize bat offered by H. Waterer. The Wootton team is composed of employes on the estate of G. W. Childs-Drexel, Bryn Mawr, Pa., their generous employer providing an excellent crease on the beautiful lawn. Thomas Long, the head gardener, regulates his work so that the employes get every Saturday afternoon in summer for practice and matches.

M. Braunon. M. Hatch. J. Brown. A. Bycroft. J. Hirst. T. Long. J. Dennis. W. Wootters. T. Cummings. S. Hammond. G. Cummings. W. Buchanan. W. Burnette. G. Holdsworth. W. T. Long, Mascot.

THE WOOTTON TEAM IN THE PHILADELPHIA GARDENERS' CRICKET LEAGUE.

This is also supplemented by some daily practice. Much credit is due to S. Hammond, the captain, for his coaching and managing, his ability in cricket being of a sufficiently high order to secure a place on any good amateur team. G. Cummings, Holdsworth, Dennis and Long have also shown to advantage in many matches throughout the summer. F. C.

Providence, R. I.

TRADE QUIET.—CARNATIONS SCARCE BUT ROSES ARE ABUNDANT.—A VARIETY OF PERSONAL JOTTINGS.

Quiet still prevails in retail circles. Withasters fast going out of season, there has been a firm demand for carnations, but these are to be had only in small quantities. Roses, however, are in abundance at low figures and tide over the shortage of other funeral flowers.

J. A. Foster was interviewed regarding his proposed retail venture in his new theatre building, and said he will not open a store if he can lease the room for some other business.

C. W. Jenckes & Brother celebrated their fiftieth business anniversary in the Trocadero September 29 and used some fine palms for decorative effect.

Hamilton, of Edgewood, is cutting his first crop from 5,000 carnations, and says he still finds Lizzie McGowan a sure thing in white.

Col. Wendelschaefler lost his daughter this week. There was a notable showing of fine floral pieces at the funeral.

T. F. Keller has repainted his store and stocked up with araucarias that make a nice display.

Wm. Hay persists in sending in good single violets away ahead of the other fellows.

Macnair decorated the new Imperial theatre last week. M. M.

POMONA, N. C.—The new carnation house just built by the J. Van Lindley Nursery Company is 34x200, and not 16x216 feet in area, as stated in J. M. Lamb's report as vice-president at Asheville last August.

WANTED

HEAT KEEPS STOCK PLENTIFUL. — MILDEW ON THE ROSES.—GOOD CARNATIONS. —GROWERS BOXING BULBS.

The warm weather still continues and a plentiful supply of stock is in evidence. Prices remain about the same as last week. Mildew is making its appearance as a result of the cloudy days. Some first-class single violets are coming in and are selling quite well. Chrysanthemums are being called for. There will be an abundance in a couple of weeks. Carnations are very plentiful and never better at this season of the year. Lily of the valley is becoming more plentiful and there is enough of green goods in the market. Dahlias are fine and make a splendid show. The varieties might be improved upon; some of the newer kinds would be acceptable.

The growers are busy boxing Dutch bulbs. There seems to be a scarcity of red tulips. There always seems to be an annual hughaboo about bulbs of one variety or another. Echo.

Lapeer, Mich.

WATSON ENLARGING PROPAGATING FACILITIES.—GOING INTO ROOTED CUTTINGS.—COAL PILE A HELP.

W. H. Watson is finishing a rose house 24x120 feet. It will be planted to carnations the first of next week and to roses early next spring. He also has material on the ground for three propagating houses each 12x40. This, with his present propagating bed 4x100, will give room for early and continuous propagating. Mr. Watson is adding many field-grown plants of the new and best carnations and expects to make a good showing in the rooted cutting business this winter. He is not sorry that a coal pile of 350 tons is in stock but is arranging to increase it at least 100 tons. The saving on the early purchase was \$265. The sale on field-grown carnations has been very satisfactory.

STOCK GERANIUMS

Field-grown heavy plants. J. D. Eisele and James Davidson, our 1902 novelties, fine bedders, \$2.00 per doz. America, Beaute Poitevine, Dryden, Mrs. E. G. Hill, Frances Perkins, \$1.00 per doz. Cash please.

Pittsburg.

TRADE SLACKS UP BUT GOOD STOCK IS UNDER THE DEMAND.—ALWAYS PLENTY OF LOW GRADE MATERIAL.—PERSONAL AND TRADE NOTES HERE AND THERE.

The business for the week has been slightly off. It is difficult to secure satisfactory stock just now, although under the existing weather conditions, we could hardly expect the new plants to yield a high percentage of fancy blooms. Wholesalers would gladly welcome a fifty per cent increase of the better grades to meet the present demands. While the lower grades are very useful in many respects, the supply is most always greater than the demand. Beauties are fine but Kaisersins are backing up. Brides and Bridesmaids look ragged and Meteors are poor. Liberty is good but very scarce. Single and double dahlias could hardly be improved and sell excellently. Lily of the valley is fine and in demand.

During the chrysanthemum show at Phipps' Conservatory in Schenley Park the railroads will run excursions from points within a radius of 100 miles at surprisingly low rates. This will bring thousands of visitors to see the show each Sunday.

Some of the results of John Bader's work in Europe materialized on Tuesday in the form of two carloads of palms and plants of various kinds.

The flower stores now look very inviting. Most of them have been repainted and received new stock for the winter trade.

Mrs. Adelina Golden, the aged wife of J. O. S. Golden, the well-known Allegheny florist, died Tuesday, September 30.

Mrs. Thos. Ulam has recovered from the effects of her injuries received in a recent railroad accident.

Randolph & McClements have greatly enlarged their store and beautified it to a considerable extent. E. L. M.

STOCK SHORTENS UP.—ROSES CHEAPER THAN CARNATIONS.—GROWER PREPARING PEAT FOR THE BURNING.—LOCAL NOTES OF INTEREST.

A noticeable feature in the cut flower market is the short supply of stock. With the aster crop at an end and carnations in limited supply, the outlook is anything but pleasant; it makes one long for the chrysanthemums to fill up the gap. At present roses are cheaper than carnations, roses of fair quality selling at from \$1.50 to \$3 per hundred, while ordinary carnations bring from \$2 to \$2.50 per hundred, and the top-notchers bring \$4 straight.

There is one man in Lowell who is not dreading the coal famine. Mr. Marshall has a natural peat bog on his thirty-acre farm and is confident that he can get his winter's supply of fuel from mother earth with less expense than he could get coal, even though it was selling for \$6 instead of \$15 a ton. The peat is cut into blocks about the size of an ordinary brick and is thoroughly dried by artificial heat before being used.

Lewis Small, of Tewksbury, who has plenty of growing timber on his land, contemplates cutting some of it and burning it this winter instead of coal.

Albert Koper, the grower of Fairmaid, cannot begin to supply the demand for blooms of this variety.

Whittet & Company report a very satisfactory fall trade on plants.

A. C. Tingley has fully recovered from his sickness. A. M.

Buffalo.

STORE OPENINGS OCCASION THE PRINCIPAL ACTIVITY IN TRADE CIRCLES.—VARIOUS NOTES.

Trade in general is quiet, but store openings this week call for about all the palms in the city. Several weddings are booked for next week, when cut flowers will be used and not as many palms. Chrysanthemums are with us now, also good violets. Roses are of fair quality, Beauties being the best. Carnations are scarce, but some very good ones are coming in from Brookins, of Orchard Park.

J. H. Rebstock has gained a verdict of "no cause for action" in a suit for \$2,000 by one of his employes, over a runaway horse.

Mr. and Mrs. S. A. Anderson were in Cleveland last week. Bison.

GERANIUM

100,000 Cuttings in the Sand.

These will be ready in November at the following prices. S. A. Nutt, Buchner, Heteranthe, \$1.25 per 100; \$10.00 per 1000. Perkins, Poitevine, Landry, Riccard, \$2.00 per 100; \$15.00 per 1000. Jean Viaud and M. de Castellane, \$2.50 per 100; \$20.00 per 1000. Bonnot, Castris, Acteon, Harrison, La Favorite, America, La Pilot and Jaulin in small quantities at \$1.50 per 100.

Pansies

500,000 Ready Now AND UNTIL DEC. 1st.

You make no mistake when you buy Herr's Pansies, they are the kind that make you money when they come into bloom. Free by mail at 75c per 100; by express, \$4.00 per 1000.

Westerly, R. I.

BOSTONIANS VISIT A GROWER.—STOCK IN FINE SHAPE.—THE NEW WHITE CARNATION.—IVORY ROSE IS LIKED.—NEW RANGE CONTEMPLATED.

A delegation came from Boston one day last week to see how Lillian Pond, the favorite white carnation of last season, is doing at her new home in Westerly, R. I. Mr. Reuter's establishment consists of about forty houses and a good share of the space is given over to carnations, of which there are 40,000 plants this year, one-half of the entire planting being the new Lillian Pond, and thus indicating conclusively Mr. Reuter's own faith in the variety. The plants are sturdy, with no excess of grass, the flowers pure white, very fragrant, and those being cut even at this early date measure three inches and over in diameter, with stems long and strong. It seems a gem.

All the favorite varieties, such as Lawson, Prosperity, Queen Louise, Cressbrook, Floriana, Gaiety and Genevieve Lord, are grown here in greater or less quantity. A considerable proportion have been in the houses ever since the middle of June, having been set in the beds from pots, and these are giving much satisfaction. Lawson under this treatment is giving first-class flowers at this early date, with stems from fifteen to eighteen inches long.

Mr. Reuter has learned to like Ivory rose very much during the time he has been growing it and recommends this variety on account of its constant prolific blooming character, for those who grow roses for their own daily retail consumption. Bride and Bridesmaid have always been grown extensively here. There are now several houses of grafted plants in first, second and third year. A range of several houses each 600 feet long is contemplated in the near future and a farm of twenty-seven acres recently purchased is depended upon to afford room for another range or two later on.

BABYLON, N. Y.—The Austin Corbin estate has been sold to A. A. Hausman. Fred. Donaghue remains in charge of the greenhouses and grounds.

Bargains FOR Florists.

We are headquarters for a general assortment of the necessary material and supplies that you are looking for. If you are about to improve or construct, consult us.

In connection with the dismantling of the Pan-American Exposition, we have for sale:

20,000,000 FEET of fine seasoned lumber, practically new, consisting of all sizes of joists, timbers, dressed and matched boards and flooring; also sash and doors.
 50,000 FEET of roofing glass.

PIPE.

We are headquarters for pipe. We offer you:

100,000 FEET of 2 to 4-inch wrought iron, lap welded casing. We can furnish this material in three ways: Either with sleeve or jacket couplings, screwed ends and threaded couplings or with expanded cast iron flanges with bolts and nuts.

1,000,000 FEET of standard black wrought iron pipe, size ¾ to 12-inch. It is second-hand but has new threads and couplings and is in first-class condition.

1,000 TONS of galvanized wire 9, 10, 11, 12, 13, 14 and 15 gauge.

50,000 FEET of 2, 3 and 4-inch cast-iron soil pipe and fittings.

100,000 FEET of garden hose, ¾ and 1-in.

75,000 FEET of cotton rubber-lined fire-hose, (rubber-lined in and outside), ranging in sizes 1 to 2½-inch.

VALVES and fittings of every kind.

BOX COILS for heating purposes.

RADIATORS, new and second-hand.

We also offer the following bargains in

Heating Boilers

50 CAST-IRON sectional heaters, capacity from 450 to 5,000 feet.

1 NO. 2 Standard Kroeschell hot water heating boiler.

FOUR 36x10 Horizontal Tubular.

TRADE GOOD AND WORTHY STOCK SELLING WELL.—FLORAL DESIGNS AT THE FALL FESTIVAL.—NOTES.

The floral display at the festival last Saturday brought out a fine showing of lodge emblems. All the designs were elaborate and a perfect reproduction of the insignia of the order furnishing it. The judges had quite a task in awarding the prizes. Each florist was paid for the design he made up by the order the emblem represented. John Bertermann, of Indianapolis, and George Reimers, of Louisville, acted as judges.

Trade the past week has been very active and stock of all good kinds moved well. Sunday the weather turned cooler, which had a tendency to shorten the supply somewhat and increase the mildew on roses. Some very good carnations are being sent in by C. C. Murphy, his white being particularly good and moving well at \$1 per hundred with not nearly enough to go around.

Chas. L. Washburn, of Chicago, was in town last Friday and we regret very much that illness prevented him from prolonging his visit.

J. A. Peterson held an auction sale of plants last Friday and is well satisfied with returns. D.

Washington.

BUSINESS IMPROVES SLOWLY.—COAL QUESTION A WORRY.—VARIOUS NOTES.

Trade is opening slowly. Asters, dahlias and gladioli are still plentiful. Roses are quite equal to demand. J. R. Freeman is cutting a number of fine Bridesmaids. The American Rose Company has been cutting a fine lot of Ivory and their Hungarian yellow rose.

The coal question is beginning to be quite a serious affair here. Some that have been burning anthracite coal are making preparations to use bituminous. But even this smoky coal has been run up to \$7 per ton and very small quantities to one customer.

The past week we had plenty of rain and the weather is fine now. The bedding in the parks and squares is at its best and will make a fine showing for the G. A. R. encampment.

George C. Shaffer is fitting up a new store at 1711 Pennsylvania avenue N. W., in addition to his Fourteenth street store. He hopes to have the opening October 6. P. G.

CROP INSURANCE.
Life insurance is valuable because it guarantees the outcome.

"Gurney" Heaters

"BRIGHT IDEA," "DORIC" and "400 SERIES" do the same thing for your hothouse: **THEY GUARANTEE THE CROP.** First of all they save 20 per cent on the coal bill and so keep expense at a minimum. Next, they produce an even heat and so do not imperil the life of the plant. Next, they are simple to operate and so require least attention. Lastly, they wear longer than others and thus perceptibly reduce the capital invested. Don't buy or exchange until you've investigated them.

Seasonable Plant Notes.

Plant houses are liable to be somewhat congested at this season, unless it may be in the case of some of the wholesale dealers, the latter naturally making every effort to get out their orders before severe frost may be looked for, or at least all that can be delivered before frosty weather sets in.

But it is the retail grower and dealer who is likely to be especially crowded just now, for trade has scarcely opened up enough to give him room, while the tender stock from outdoors is claiming space and attention, and the plants grown under glass throughout the summer are still increasing in size and need the fullest advantages of light and air that can be given them during the damp days and chilly nights that so often prevail in the autumn.

A bench full of plants, be they palms, Boston ferns, cyclamens or primroses, needs to be set over occasionally in order to clean off dead leaves, weeds and any other rubbish, and at the same time to turn the plants around and to arrange them in regular sizes and straight rows so as to give a good general effect, for many a good sale has been made on account of a first impression gained by the purchaser upon entering the greenhouse.

It is also the contention of the writer that it does not cost any more to have a house of plants effectively arranged and kept in an orderly condition than to have them standing about in irregular blocks with unequal spaces between the plants and a general lack of system.

There are times when the rush of trade may play havoc with systems, but these rushes pass over in time, and just as soon as the lull comes then is the proper time to straighten out the stock, to find out what space is available, and to readjust matters in readiness for future business, for anyone who is looking for the possible \$1 per square foot from his greenhouse area cannot afford to waste space, and should promptly get something to fill in the chinks as soon as an opening appears.

There is not much doubt but that old greenhouses that are used for many seasons for growing foliage plants get more or less infested with insects of various species, and also with the germs of various diseases, and that much good may be done to such structures by emptying them of plants at some time during the summer and then giving the house a thorough fumigation with sulphur or

some other disinfectant, this treatment to be followed by a good coat of paint.

But this thorough method of cleansing is likely to be deferred just as long as possible, owing to the press of other work, and one measure of precaution that may easily be taken and continued throughout the year is that of not permitting decayed or insect-infested leaves to be thrown on the floor or under the benches, nor to store old pots or other rubbish in the same house with the plants.

The mention of such matters as this may savor of the kindergarten, but then we must remember that the methods used in the kindergarten lead the mind toward a higher education, and it will be readily admitted that there is still plenty of room for improvement in methods in very many of our florists establishments.

It is at this time of the year particularly that tender ferns are liable to suffer from an excess of moisture on the foliage during the night, the difference in temperature being so great between noon and midnight that the moisture in the air is condensed on the foliage of the ferns, and when this condition continues for several nights in succession the foliage begins to decay, or to "damp off," as it is commonly termed.

This state of affairs often causes trouble with adiantums, especially if the plants are rather crowded, and as a measure of precaution it is best to do the watering quite early in the day and also to keep on enough ventilation at all times to make a free circulation of air, some ventilation being needed during the night until the weather becomes so frosty that it is no longer safe to leave the ventilators open.

But it is also well to bear in mind that it is fresh air and not draughts that is needed for the welfare of the ferns and that there should be some discretion exercised in the quantity of air admitted. This applies to the commoner adiantums that are grown for cutting, among which are several forms of *A. cuneatum*; to *A. decorum*, another fern that is admirable for this purpose, and also to the various forms of *A. tenerum* that are grown by those who desire some larger and more effective fronds for decorative work, though the varieties of *A. tenerum* are possibly less affected by moisture overhead than are some of the less robust species, partly owing to the stronger texture of the fronds of *A. tenerum* and partly to the less compact growth which

permits the air to circulate through it better.

Adiantum Ghiesbreehtii (or *A. scutum*) is another fine fern for cut fronds, though not so commonly seen as some of the preceding sorts, the fronds of this species reaching a goodly size and being almost as beautiful as those of *A. Farleyense*, and less fragile.

The fern known as *Adiantum Ballii* is one of the varieties of *A. tenerum*, though the original plant appeared some fifteen or more years ago among a batch of seedling *A. cuneatum*, but the spores from which *A. Ballii* sprang were doubtless derived from a stock plant of *A. tenerum* that was growing in the same house. This fern has been received with much favor in some markets of our country, and is a very useful one to any grower requiring some large and graceful fronds on good stiff stems, and as *A. Ballii* germinates readily and comes true from seed there is no difficulty in keeping up a stock.

Adiantum Farleyense should still be growing freely, and it is not too late to shift on such plants as may be well rooted and liable to need more room, for in spite of its delicate beauty this fern is a vigorous feeder and requires plenty of nourishment, perhaps the best fertilizer for the fern in question being dry cow manure, a liberal quantity of which should be mixed in the stiff, turfy soil in which this fern delights.

Some very successful growers of *A. Farleyense* also like to mix some chopped sphagnum moss into the potting soil, and remarkably good plants have been grown in that compost, but the addition of the moss is not an absolute necessity to success with this plant.

After repotting *Farleyense* at any season of the year it is best to water carefully until the roots are moving freely again, for once the soil is soured it will be slow work to get the growth on the plants, but if they are potted just a little in this respect until re-established there will soon be nothing to fear in regard to watering.

It is occasionally stated, and perhaps with good intent, that one may dig up the Boston ferns that have been planted out on a bench for the summer, put them in pots or pans according to size, keep them in a greenhouse for two or three weeks, and that the plants are then ready for the retail customer. This rapid-fire method is enticing to the grower, and possibly has many practitioners, but like some other rapid-fire arrangements it has its recoil, and this is often found in the form of a vigorous kick from the retail purchaser after the early demise of such a plant, the moral being that it pays best to sell only thoroughly established plants. W. H. TAPLIN.

The Compost Heap.

Now is the time to put up your compost heap for the next year's roses. Although it might do to put it off for another month or more, it is better to attend to this matter as soon as possible, as there is no telling when we will get cold weather, which will be a hindrance.

There is a great difference in the soil in the several sections of our country and, of course, we are not all satisfied with what we are obliged to use, but as a general thing we make the best of what we have. However, where the soil is too light and sandy you can remedy this evil if you are fortunate enough to be able to locate some good sticky clay to mix with it. While this does not give you as good soil as that which is naturally heavy, it is, at

least, an improvement over the former soil.

The first thing necessary to a good compost heap for next year is a rich, fibrous loam. This is not to be found on an old pasture which has had no attention for years and is covered with moss, but, on the contrary, should come from a pasture which has a good thick sod with plenty of vitality.

Pile up the soil in a heap by packing a layer of soil, then a layer of manure, in proper quantity, and so on until the heap is completed. By forming your heap in this way, and allowing it to lie through the winter, the sods will be well rotted

GORDON GRAY.
(President Cleveland Florists' Club.)

and you will be able to cut it down and thoroughly mix and pulverize it next spring.

The quantity of manure to use will vary somewhat according to the soil, but about one-sixth of stable manure, cow manure preferred, is generally sufficient, with a light sprinkling of bone meal between each layer. R. I.

Gordon Gray.

Gordon Gray, the newly elected president of the Cleveland Florists' Club, was born in Banphshire, Scotland. He came to America at the age of sixteen years and entered the service of Jas. Dundas, at the corner of Broad and Walnut streets, Philadelphia, as assistant gardener. Many of the older members of the craft will remember him as a conspicuous figure during the monthly exhibitions held in the public square. Four years were spent at the Dundas place, and four years more as gardener with E. B. Grubb, of Burlington, N. J., after which, in 1863, he removed to Cleveland to take the position of head gardener to Stillman Witt, in whose service he remained twenty-six years. In 1890 he started his present plant-growing establishment, on Quincy street, where he has conducted a successful business ever since. ECHO.

SALEM, O.—Harry T. Miller has resigned his position as grower for L. L. Lamborn, at Alliance, O., and October 1 formed a partnership with Wm. Mundy. The new firm will be Mundy & Miller. Next spring they intend to build two houses 20x100 for roses.

Dahlias at Atco, N. J.

Those who have seen seven or eight acres of cannas in full bloom at this season of the year and journey to Atco, N. J., to see forty acres of dahlias and expect five times as grand a show as the cannas make, will surely be disappointed. And those who expect to see dahlias growing in rich soil of a loamy nature, which are six or eight feet high, will also be disappointed, for in Atco, with fields of sand to grow in, the dahlias are quite dwarf in comparison. The dahlias here, of course, grow in height somewhat according to the time they are planted.

I saw one part of the farm that had been planted the first week in September. Many of these did not appear to be more than a foot high, and most of those in the main plantations were from two and a half to four feet high, though the new single variety called *Twentieth Century*, "the star of the whole aggregation," appeared to be six or seven feet high. It would be interesting to know how high this variety grows in soil naturally more fertile and of a more loamy character.

The office, greenhouses and water supply are located on the highest point of this great dahlia farm, which, as before stated, is one bed of sand, and for the most part a gentle grade from this point has, at some trouble and expense, been secured to facilitate irrigating purposes. In this bed of sand it must require a strong flow of water to reach to the furthest point. Irrigation, I presume, is not practiced to any great extent, only on those varieties grown for cut flower purposes, and these are planted as conveniently as possible to the office and packing rooms and the water supply.

Lawrence K. Peacock, who is at the head of this dahlia industry, states that they use little or no barnyard manure in their operations and pointed out a block that has received no manure for the past two years. For plant food the concentrated fertilizers are used and they are not applied until the plants show well above ground and then are broadcasted and cultivated in. Mr. Peacock stated that two carloads had been used this year, of ground bone, nitrate of soda and one of the potash salts, but whether it was muriate or sulphate I failed to catch. As to the proportions used, I neglected to ask. It has been proven by experiment, I believe, that sulphate of potash is better for potatoes and tobacco; for the latter the flavor or burning qualities of the "weed" are improved, and for potatoes it is said the sulphate produces a more "mealy" or "floury" article of food. But whether the dahlia is at all particular did not appear.

When mention was made that the plants are growing in nothing but a bed of sand—yes, sand, apparently, that a bricklayer or stonemason or plasterer would not hesitate to use in any of their respective operations, nor would a propagator demur at using it in which to root any or all kinds of cuttings—Mr. Peacock said that there is a clay subsoil. Later on we came upon a washout at the lower end of the field and could see that there were some little evidences of loam at a depth of three or four feet, but it was far from having the tenacity or the adhesiveness we are accustomed to in our Wyndmoor clay.

The varieties grown at Atco are too numerous to mention. They were really bewildering to me, who had not been identified with the dahlia for about thirty years. Nor could I take the interest in them that I should have done until I saw two very old friends in Arrah Na

Pogue and Frank Smith, both similar in color and markings, yet quite distinct. They are of the old-fashioned, double dahlia type, and in color they were deep maroon, tipped with pink or white.

William K. Harris said, at the display of dahlias made at the September meeting of the Pennsylvania Horticultural Society, that there has been no improvement in the dahlia for fifty years. He said there were just as good varieties half a century ago as there were on exhibition in Philadelphia the third Tuesday in September, 1902, and as to the cactus dahlia, they do not appeal to him, but the Twentieth Century might be all right as a cut flower.

Dahlias are prone to sport, especially the parti-colored varieties. One which Mr. Peacock drew our attention to he had dubbed Uncertainty. This, I understood him to say, is known as John Thorpe, Mary Eustice, Emperor and Floral Park Jewel. The flowers of this variety vary on the same plant from a solid deep red to partly red and partly variegated, and some flowers are uniformly variegated, and flowers of a Daybreak pink are frequently met with. One cultivator of dahlias, (or was it a publisher of a catalogue?) wanted to name it Helen Gould, but Mr. Peacock promptly put his foot down upon this questionable proceeding.

We came across Penelope. I remember this name when a boy, but the varieties were distinct. This at Atco was one of the best fancy varieties in the whole collection. The flower was quite full to the center, of perfect form and finish, and a delicate shade of lilac in color. May Loomis was similar in its color shades, but quite distinct and quite a favorite.

Perle D'Or, a white cactus-shaped variety, is very useful as a cut flower and considered by S. S. Pennoek, who was also a visitor, as one of the best for that purpose. Red Hussar, a bright red in color, double, and Lyndhurst, another in the bright red class, are also excellent as cut flowers. Solid colors are the most sought after for cut flowers by the retail florist, so said Mr. Pennoek, who handles all the cut flowers from this dahlia center. It was interesting to be present to hear the comments on the different varieties. Most of the intermediate shades were passed by and dubbed "off colors," many of which attracted my attention just because they were of uncommon shades.

No. 13 is a bright red pompon. Black-bird, as its name implies, is almost black in color, changing to rich velvety maroon, and having a bright red spot at the base of each petal. The flowers are large, regular in form and finish and the petals are of good texture. The plant is inclined to be dwarf, with dark, glossy-green foliage of finely cut or fern like character. Mr. Peacock says it is an early bloomer; as to its profusion, we could see that for ourselves. The flowers are single. An attractive single white variety has been appropriately named Anemone and ought to prove useful in the cut flower list.

Among the 5,000 seedlings there were few indeed that could be classified as of no value, but many that are not only improvements upon the types which they represent, but many of entirely new types were to be seen, some resembling the finely cut petals of the chrysanthemum; one in particular reminded me of the old chrysanthemum, Abd-el-Kadir. There is a future for this class of dahlia, one would think, being more graceful in form than are the older formal "humpish" varieties of our youth; especially does

POTTERS' KILN, BY G. & J. W. LUDWIG, ALLEGHENY, PA.

this apply when we are thinking of dahlias for cut flowers.

Dahlias are useful both as blooming plants for outdoor decoration where they do well, and also as cut flowers with the careful selection essential for this purpose, but it does seem like a piece of presumption to designate any dahlia so far seen as "orchid dahlia." To what class of orchids is it supposed to belong? Not a cypripedium surely, nor a cattleya, neither a dendrobium. It is all very well to get enthusiastic about a new good thing, but let us not allow ourselves to exaggerate, thus subjecting ourselves to possible ridicule.

The Twentieth Century is a large flower, frequently being six inches across. The tip and base of the petal are white, shading or blending towards the center of the petals with delicate solferino. It is a strong, healthy grower and if it will do as well generally as it does at Atco it ought to become popular.

Since dahlias do so well in the sand here, would it not be well to experiment with sand in the hills when the tubers are planted? In Great Britain the dahlia is highly fed, and treated liberally generally, especially when same are under cultivation for exhibition purposes. The flowers grow much larger over there than

were to be seen in New Jersey, possibly owing to the more moist and congenial climate, in addition to the higher cultivation given them, but if the same care were given them here as is given them over there, possibly we could produce equally as large and as finely finished flowers as are to be found on the exhibition boards in Great Britain.

Although as stated in the opening paragraph heading these notes, the dahlia does not make as grand a display as does the canna for general outdoor decoration, yet the dahlia flowers will bear closer examination than will a canna and will give correspondingly more satisfaction in that respect, as the latter are of little or no value as cut flowers. Mr. Pennoek says that he finds ready sale for all and more than all that have been sent to him from Atco so far this season, especially when the flowers are bright or delicate or distinct in color, and of good form and texture, and have general good characters for keeping, for there is a difference in the dropping or keeping qualities of dahlias as in many other flowers.

Altogether I enjoyed myself thoroughly and hope to pay a visit to Atco again when the dahlias are in bloom.

EDWIN LONSDALE.

A Potlter's Kiln.

The illustration on page 375 is from a photograph made recently of a design built by G. & J. W. Ludwig, Allegheny, Pa., for the Manufacturing Potlter's Association for the funeral of one of their number, Isaac Knowles, of East Liverpool, O. The piece was six feet high and large quantities of choice stock were used. The price received for the piece was \$150.

Wintering Aquatics.

After a season of pleasure and delight, or even disappointment, in the cultivation of aquatics a perplexing problem confronts many who are interested in this particular class of plants. Of course it is a matter of little or no concern to those who have had a few season's experience, but, judging from the numerous inquiries as to how to winter plants a few notes on this subject may not only be of interest but may possibly save some valuable stock.

Because of different methods of culture it is almost impossible that these remarks will fit every case. There are plants in the natural pond, artificial pond, large and small fountain basins, pools and tubs. There are two classes of plants to be considered, hardy and tender. When I speak of hardy water lilies it must not be considered that they will stand actual freezing, as will hardy perennial plants. Aquatics will not, although there may be exceptions. Certain it is that the native American varieties will not bear freezing, but under natural conditions and in water two or more feet deep they are out of reach of frost and are secure, so long as no accident occurs and the pond retains the water.

The same holds good in large artificial ponds, however constructed, but there are numerous artificial ponds that must be protected, not so much on account of the plants as for the masonry, and in many

salt hay and branches to keep them all in place, or even boards could be placed on the top. Of course there are other materials than those mentioned but in all cases leaves are indispensable, whatever light material is used on the top of them.

Another method is to remove the plants. Large plants in tubs or boxes cannot be removed entire; they must be dug up. To dispose of these and keep them in good state of preservation until next planting time is the question. Some favor placing them in a cellar but here they are apt to be unduly excited into growth before they can be planted out with safety. To dig the roots and put them in boxes with soil or sand and place them in water out of the reach of frost is courting disaster. It is almost impossible to dig roots without being bruised or broken more or less and if such roots are again placed in water out of doors, they will certainly rot. If placed in a cool house, packed fairly close together in a tub and kept at a moderately low temperature they will survive, but they are just as liable to start into growth too soon as if they were placed in a cellar. Possibly the best method is to bury them. Select a porous soil or make it so. Dig a trench twelve to eighteen inches deep, the colder the section the deeper the trench. Place the roots close together, cover with sandy soil or sand, give a good soaking of water to settle the sand between the roots, cover the spot with a good coating of leaves, cover these with same poor conductor of heat and cold and finish off with branches to keep all in place. The roots will keep in excellent condition until it is safe to plant out the following spring.

In small ponds and basins it will be prudent to leave the roots undisturbed. Cover the whole with boards, piling leaves on the top and around and covering these again to keep them in position. In sections where there is annually a

Nelumbiums are more difficult to manage, at least in some respects. Although they are hardy they are no more so than hardy nymphæas. It is not prudent to dig nelumbium tubers in fall; they will suffer more than nymphæa roots. Leave them undisturbed and if they cannot be well covered with a sufficient depth of water have all water drawn off and use leaves and so forth for a protection as before recommended for water lilies. An excellent way to winter nelumbiums grown in tubs is to sink the tubs in the ground to the level of the rims and protect with leaves and other material sufficient to keep frost from the tubers. Several methods will suggest themselves in individual cases.

With tender nymphæas there is a great difference between the roots and tubers of the day-flowering and night-flowering plants. The night-flowering varieties produce numerous side shoots and these toward the end of the season produce tubers which can be dried off, but the main crown will invariably rot. The day-flowering varieties do not produce side shoots, or at least produce them very sparingly, and the main shoot or crown will not submit to a drying process, but will rot. These remarks apply to full grown plants and plants that have flowered during summer.

In the case of the night-flowering varieties, after one or two light frosts the plants may be dug up, cutting off the long roots and the large leaves and, with the soil adhering, plant the same under the benches in the greenhouse or place them in a box, planting them the same as if under the bench, and put in a warm cellar where they will remain undisturbed. After planting, in either case give the plants a soaking of water to settle the soil; then let it dry out gradually. The leaves and central crown will die down, but the side shoots will ripen good tubers, and can be left in the same condition until time to start them or plant out of doors.

The day-flowering tender nymphæas should be dug up and trimmed, root and leaf, and placed in pots of sufficient size to contain the roots without much crowding. The plants should be placed in a shallow tank, or tubs will answer. These should be kept in any ordinary greenhouse with winter temperature of 60° to 65°. Where no greenhouse is at command a warm cellar or such place will answer the purpose, but living plants require light. Small and medium-sized plants will ripen single tubers and these, if grown in pots, will frequently be starved into a resting condition when they should be growing freely. These make the best of tubers for wintering over and may be dried off and kept until wanted for starting in spring. Tubers or plants of most varieties of nymphæas can now be purchased at so little cost that in many cases the labor, care and space is worth considerably more than saving old stock. The same remarks apply to many of the minor aquatic plants such as water poppies, water hyacinths, water snowflake and so forth.

WM. TRICKER.

WARE, MASS.—Chas. F. Clark has opened a flower store here.

PEKIN, ILL.—Geo. A. Kuhl has been quite ill the past week and under the doctor's care.

FENTON, MICH.—George Bridson has recently completed an addition to his glass and installed a new hot water apparatus.

A DAY'S CUT OF ASTERS IN A SUCCESSFUL SEASON.

cases it is the simplest and easiest method to draw off the water. In such cases attention must be turned to the care of the plants. In most cases they will be benefited by being undisturbed, and if the outlet is kept clear, which can readily be done by covering it with wire netting, so that rain and melted snow can pass off, the plants can be protected with leaves,

good fall of snow and ponds are of moderate size, a temporary roof could be built over them, a coating of leaves placed around, the snow doing the rest of the work. Plants grown in tubs may be treated the same way, either the plants taken out and buried or the tubs sunken in the ground and protection afforded with leaves and other material.

FIELD OF ASTERS GROWN FOR THE NEW YORK MARKET BY FRANK L. MOORE, CHATHAM, N. J.

Asters For the New York Market.

We have found the growing of asters for market an arduous and, at times, a tantalizing task. One year the plants reached the blooming stage in fine shape and then several heavy rains robbed us of three-fourths of the yield. In this way we went through the long mill of shifting, weeding and disbudding without the labor of reaping. On the other hand, this year we had more than average success with the crop. Although, as every grower must know, we had in New Jersey much wet weather just at the critical time, in early August, yet, having well-drained ground, the blooms which matured in the first three weeks totally escaped harm. The whites which came last showed more harm done by wet than we liked to see, still there was a good proportion of fancy grade blooms among them. This year we lost but a small fraction of the plants by stem rot. This we attributed to the slope of the ground, which was one to ten.

Both the accompanying illustrations were taken on September 3, 1902. The larger picture was taken about 3 p. m., just previous to the regular daily cut. The second, the same day, immediately after. That cut averaged about one bloom to the plant. During the entire season of about three weeks there was an average product of ten blooms per plant rating as high or higher than the first grade. The average of grades we found was about one-fifth fancy, one-third extra and the remainder first. We found that on account of the bad effects of rain, the grades did not run as well the latter as the first part of the season. As to growing, the seed is sown in

February. The plants are set out in the first part of May. They are spaced twelve inches one way and eighteen inches the other. Each bed contains five rows. We have found this to be the most convenient arrangement. The ground is prepared with plenty of manure. A sloping surface is preferred, for the aster cannot endure standing water or stale moisture. We find it advisable to change the location each year, principally in order to avoid stem rot and pests. For the latter we use slug shot occasionally, but this year insects have done little harm. Again, we find it well to have a water supply near the field, for in dry weather frequent watering is very essential. Next in order comes the weeding and disbudding. The latter occupation is by no means a light one. At first, when the plant has reached sufficient size, the center is taken out. Then as the branches attain length it is necessary to remove the side shoots. This has to be done at least twice in a season. The blooming season begins about the middle of August and lasts until the second week in September. The best period is the last week in August.

RALPH C. B. MOORE.

Hellanthus Rigidus.

Taking everything into consideration I am inclined to call it the best of the sun-flowers. Here in the garden it has been in bloom for a month at least, and I shall expect to find some blooms in early October. I do not think it is as generally known as it deserves, for we have sent out a great many plants of it, in the last six years, to people who saw it here for the first time.

JOHN F. COWELL.

The New York Flower Show.

At the meeting of the Tuxedo Horticultural Society, October 7, at Tuxedo, N. Y., Harry A. Bunyard spoke in part as follows:

Anent the coming exhibition of chrysanthemums, palms, orchids and foliage plants under the auspices of the New York Florists' Club, to be held at Madison Square Garden this month, it is well to say something, perhaps, beforehand. It is not possible to hold a show on the "Hurrah" plan because New York is New York, and New York methods must be followed and any catch-penny feature must be harred. The National Sculpture Society this year is working in conjunction with the New York Florists' Club and I do not know of any co-exhibit that can be more harmoniously arranged or blended with horticultural exhibits. For the information of the uninitiated I might say that the floor area of the amphitheatre of the Madison Square Garden is nearly 35,000 square feet and the height, from floor to roof, which is of glass and iron, is nearly eighty feet, so you see one has quite a large "hall" to fill and decorate.

The Sculpture Society has already received nearly 200 entries. The pieces of statuary range all the way from miniatures that can be held in the palm of the hand to pieces weighing several tons. As to the entries for plants, flowers, orchids and foliage plants, as the latest date for making entries is October 25, they are somewhat problematical, though enough entries are already in from the large exhibitors to make this line an assurance, with "several counties to hear from."

The entrance or lobby leading to the exhibition will be flanked alternately with statuary and bay trees. At the immediate entrance a large arch of trelliswork will be erected, covered with wild smilax and other greenery. Passing under the arch one will see a vista of the whole exhibition. A long, unbroken walk twenty-five feet wide will reach to the far end. Ranged on either side will be massed the cut flower exhibits, with a background of palms, foliage plants and statuary on pedestals. A feature of the cut flowers is that they will be arranged in groups of one color on benches of irregular size and shape, in stairway fashion and covered with sheet moss. The vases will be of uniform white, in harmony with the general color scheme, white and green.

At the east end, that is, opposite to the arbor, will be erected an immense arbor, semi-circular in shape, the two ends facing the arch, all of trelliswork and painted white. The base will be six feet in height, twelve feet wide, while stairways of rustic work will lead to the promenade, where a view of the whole exhibition can be obtained. Each side of the platform will contain sixteen archways of trelliswork and the roof will also be a trellis, all painted white and covered with wild smilax. Between the archways plants and statuary will be alternated. In the center of the arbor on the amphitheatre floor will be a semi-circular pool of water to be filled with water lilies and aquatic grasses. A fountain will be midway between the ends of the arbor.

On the two sides of the amphitheatre, about midway from either side and ends will be two square arbors of trelliswork, arched and about forty feet in height, in the same style as the other features, and on either side about midway between these arbors and the arch and semi-circular arbors four fountains will be installed.

A hedge of cedars will surround the garden, clipped to the height of the boxes which surround the amphitheatre. Where possible these will be trimmed to give a topiarian effect. A canopy of some light material and light blue in color will be hung from the roof, covering the whole

An Experiment With Hyacinths In Water.

The object of the experiment here described was to show whether the behavior of varieties was due to the variety itself or the manner of culture. The experiment was planned by Prof. John Fields and the writer in the fall of 1899 in connection with the work at the Oklahoma Agricultural Experiment Station. The experiment began December 11, 1899. Sixteen ounce, salt-mouth, glass bottles were used in place of hyacinth jars. Of each of nine varieties six bulbs were used and these were arranged, for convenience, in a solid square and the bottles numbered from 1 to 54. Six different culture media were used so that each bulb of each variety was in a different culture medium from the rest, as follows:

	Rain water.		Nitrogen.		Potash.		Phosphoric acid.		Chalk.		Complete fertilizer.	
	1	2	3	4	5	6	7	8	9	10	11	12
Leonidas, single, light blue..	1	2	3	4	5	6	7	8	9	10	11	12
Grandeur a Merville, blush white, single,	7	8	9	10	11	12	13	14	15	16	17	18
Bouquet Royal, pure white, double.....	13	14	15	16	17	18	19	20	21	22	23	24
Charles Dickens, double, dark blue.....	19	20	21	22	23	24	25	26	27	28	29	30
Gertrude, single, deep rose. 25	25	26	27	28	29	30	31	32	33	34	35	36
Czar Nicholas, double dark pink.....	31	32	33	34	35	36	37	38	39	40	41	42
Amy, single, bright carmine 37	37	38	39	40	41	42	43	44	45	46	47	48
Robt. Steiger, single, deep red.....	43	44	45	46	47	48	49	50	51	52	53	54
Voltaire, single, creamy white.....	49	50	51	52	53	54						

Each time the water was changed six cubic centimeters of the fertilizer were added. Set five was not changed at all. The chalk was introduced in order to neutralize any acid that might be formed. The water was changed at intervals of two weeks during the experiment. The plants were kept in a dark, cool cave for forty-nine days until the roots of some of the bulbs had reached the bottom of the jars and a little foliage showed, when they were placed in the greenhouse in subdued light. Notes were carefully made from time to time on the development of

Amy, early, fine; Robert Steiger, uneven, fair; Voltaire, very even, early, fine.

On March 7 Leonidas, Bouquet Royal, Charles Dickens, Gertrude, Czar Nicholas, Robert Steiger and Voltaire flowers all gone. Grandeur a Merville in prime condition. Amy had the second spikes of flowers at their best. The first stalks all gone.

At no time could any difference due to different culture media be detected but there was a marked difference in the different varieties. E. E. BOGUE.

American Paeonias.

Until recently it has been our custom to draw on Europe for our new paeonias, and most of us who have imported roots have had our experiences, often vexatious and costly. Some of the leading foreign propagators seem incomprehensibly careless or else they have not yet learned that "Honesty is the best policy," for a good deal of their stock has been sadly mixed. In one instance a leading English dealer sent an old customer in Massachusetts a lot not at all true to name. Lady Alexander Duff, for instance, was supposed to head the list, and this costs \$5 a root, but the plants were entirely spurious.

Now this is not an exceptional case and England is a long way off, so that it is hard to get mistakes corrected. I myself, imported from one of the leading dealers of Holland. On blooming the stock proved badly mixed. After considerable correspondence I secured a correction, but will it be any better? I cannot tell till blooming time again. Those he sent for Madonnas, which should have been fine, delicate flowers, were the coarsest kind of common pink.

Some years ago I sent to a large French firm for a choice lot. I think they were true to name, but they cost set down 60 cents a root. I afterward found I could get exactly the same kinds, with better roots, and true to name, only 200 miles away, where the propagator was using every precaution to keep his stock pure, and I could get them by the thousand for one-third of what the imported ones cost. This man some fifteen years ago bought about \$50 worth of the very best sorts and now has about 30,000.

It is time for us to begin to rely on ourselves for paeonias, first, because our leading propagators are responsible and reliable, and, second, because we have plenty of good, rich land and we can propagate cheaper than Europe can, and so save duty and freight. Paeonias can be grown as a field crop on our rich prairies and raised by the million. They are a crop in which labor does not count, like sugar beets. We are no longer obliged to go to Europe for our best varieties. A few years ago some of our florists commenced raising from seed. See what Richardson, of Boston, did. Where is there anything that can out-class his creations? His Grandiflora and Perfection stand beside the Glory of Erturt, and his Rubra Superba is peerless as a late flower. It is a grand, solid, crimson ball, with a delicate, satiny finish, and can be cut and kept in cold storage to the middle of July.

I have planted the costly, foreign kinds side by side with our Iowa and Nebraska sorts and for the life of me cannot see why preference should be given to the foreigners. Zoe Callot is unique and beautiful, but for delicacy of finish and exquisite loveliness it bears no comparison with Terry's Mrs. Harrison, which it so closely resembles. Many sweet and deli-

DELIVERY WAGON OF J. SIMMONS, OF TORONTO, CANADA.

of the rafters and reducing somewhat the height of the building.

Formal tables for the exhibits will be entirely dispensed with where possible and groups of plants displayed in unconventional lines. Specimens like foliage plants will be placed in raised beds, filled with tan-bark so that the pots can be plunged.

roots, flowers and leaves. In February the standing was as follows:

Leonidas, flowers late, uneven, good; Grandeur a Merville, late, even, good; Bouquet Royal, late, even, inferior; Charles Dickens, long, uneven flowering period, good; Gertrude, nearly always two or three spikes, uneven, fair; Czar Nicholas, very late, poorest of the lot;

THE MAIN AISLE OF MARSHALL FIELD & CO., CHICAGO, DECORATED FOR LAST WEEK'S "OPENING"

(Plants and cut flowers to a cost of over \$5,000 were employed in this work.)

cate ones come to us from over the sea, but Terry's Morning Star is equal to the finest. When we come to the deep crimson Pottsi, Fulgida and Rubens, Richardson's Kubra Superba, Terry's Grover Cleveland (Tecumseh) and Rosenfield's Red Cloud put them all to shame.

Mr. Rosenfield has been very quietly at work raising seedlings and, after discarding hundreds, he gave us Golden Harvest and Floral Treasure. I notice in the list of W. H. Arendt, given in the AMERICAN FLORIST for September 6, that he has put them both down as of the best twenty-five, selected from 300 kinds. Mr. Rosenfield has several thousands yet to be heard from. His Blushing Maid is one of the best.

There is a great future for our Japan hybrids. The new kinds recently imported are very unique and striking, and they seed readily planted among our finest sorts. I am sure we will have a progeny that will be a delight. I have saved about a fourth of a pound of these precious seeds and mean to see what they have in store for us. A large number of enthusiastic propagators are now at work and we will hear from them. But some are planting seeds from inferior, single and semi-double flowers that seed readily; such will raise a large family of scrubs. Save only seeds from the very best and raise thoroughbreds.

C. S. HARRISON.

PAWTUCKET, R. I.—C. S. Chase, of Dighton, made a fine exhibition of dahlias at the New Idea store last week.

Florists and "Openings."

It is much to the interest of the flower trade to encourage the "opening" as practiced by dealers in other lines of merchandise; each "opening" not only provides a week's work for sundry loads of decorative plants and an outlet for more or less cut flower stock, but the idea is infectious and the custom of calling in the florist to assist the store decorators is rapidly becoming an established practice.

A new record was made in the matter of expenditure for floral purposes at the dedication of the new retail store of Marshall Field & Co., in Chicago, last week, when more than \$5,000 was paid for cut flowers and the use of plants. But the premises are so tremendous that even with this lavish outlay for material, most of the higher decoration had to be made of the paper flowers which were so long the one resource of the window trimmer. More than 4,000 palms and large ferns made less show in Field's great store, with its two acres to the floor, than would a single wagon-load in an ordinary dry goods store in a provincial city, and where Field needed over \$2,500 worth of cut flowers for not very large bouquets on the show-cases and counters, the average storekeeper could make as good a showing with a very modest investment.

The effect at Field's was worthy of the approval it received. Specimen plants were used in the show windows and on the floor, vases of roses and carnations

of best grade on the show-cases and more plants on the shelving, carrying the natural stock well above the eye, to where it blended harmoniously with the garlands and shaded lights of the main aisles and the wide light-shafts. The principal aisle is 415 feet long and during the week of the opening, despite almost continuous rain, it was packed with people, and the comments on the cut flowers were such that it is certain that they will be liberally used at every pretentious affair of the kind in the future. It was the first time cut flowers had been used to any great extent in a decoration of this character, but they are as necessary, at least as effective, as plants.

One item which the local florist anywhere can sell to the store of whatever character, which is about to have an "opening," is wild smilax. Nothing makes so much display for the money, and the cost is low where quantities are required. Field used nearly a hundred cases.

Chrysanthemum season is at hand and it affords an opportunity for effective work in the way of decorating for store openings. Given a modern store, a dozen cases of wild smilax, a couple of loads of palms, not too much scattered in the store, a few vases of fair chrysanthemums in several varieties and it requires no great skill to produce an effect which will more than please the man who pays the bill and make the praise of the visitors pave the way to other jobs of the kind. It is the crowds

which make these efforts of value to the florists; it gives the people a chance to become familiar with flowers, to see how they are arranged for effect and to learn to expect them. At Field's the average attendance for six days was from 200,000 to 350,000, averaging not far from 300,000. This seems extraordinary in view of the fact that the largest attendance in the first two months of the World's Fair was only 154,000 and that on October 9, Chicago day, the attendance of 716,000 was the largest gathering of which there is authentic record.

When the florist is approached about an "opening" it is worth while to bear in mind that at most affairs of the kind the ladies are given some little gift. One case is on record where a dealer in cemetery monuments gave an "opening" and attracted literally thousands by advertising that each lady would be given a palm, and she was, a 2½-inch or 3-inch latania. A woman would rather have a plant or a flower than any other souvenir and in chrysanthemum season the local florist can always supplement his own resources by calling upon the wholesalers in the nearest big city. At the time of spring openings, if not in fall, there is almost always a large supply of roses and carnations which can be used both for decorations and gifts.

Private Greenhouses.

One of the most encouraging features of the present period of extensive greenhouse building is the extent to which private glass is being erected. The growth of the love of flowers, it cannot be the love of ostentation, is finding expression in the erection of ranges of houses which will be a constant inspiration to the owner, his friends and others of sufficient means. Some retail florists have been known to deplore the erection of private greenhouses, but it is rather a matter for self-congratulation, for whatever may be lost in small sales of cut flowers is more than compensated for by the demands upon the wholesale plantsman, and of still greater value to the trade at large is the stimulus to trade through the wish for flowers bred by their frequent sight or daily use. Never before were so many pretentious private ranges built as this season. As an instance of the activity in this direction it may be stated that at present Hitchings & Company are at work in one state alone on the following: At Weston, Mass., six houses for Gen. C. J. Paine; at Pride's Crossing, Mass., five houses for W. B. Thomas; at Belmont, Mass., four houses for H. O. Underwood; at Quissett, Mass., house for H. A. Marshall; at Cohasset, Mass., house for H. W. Wadleigh.

Dahlia Show at San Francisco.

Three commodious assembly halls in San Francisco's Mission Opera House proved none too spacious for the accommodation of those who, on Saturday evening, September 27, attended the Pacific Coast Horticultural Society's complimentary dahlia show, which all spoke of as being exceptionally fine. In addition to the floral exhibits several features were worthy of mention, the quality of the abundant supply of cake, lemonade and claret punch, the concluding dance, the music and the musicians. The music was by a mandolin orchestra of seven young ladies, each as pretty as a prize flower, and as contrasted in their loveliness as were the dahlias which

the ladies wore in their hair, respectively, Countess of Lonsdale, Starfish, Grand Duke Alexis, Britannia, Mrs. J. J. Crowe, Night and Standard Bearer.

The manager of this banner dahlia show was Wm. Eldred, chairman for the Crocker estate, and as chairman of the exhibition committee he was ably assisted by such growers as H. Plath, T. Monro, T. W. Bagge, F. Cleis, C. Abraham and John Atkinson. There were a number of fine exhibits not for competition, notably a large and fine collection of decorative and cactus dahlias from Golden Gate Park. The cash prizes were awarded as follows:

First prize, both for decorative collection and cactus variety, to Crocker estate. Second prize, cactus variety, to F. Lude-mann, Pacific Nurseries. Third prize, cactus variety, and second prize for decorative dahlias to Wm. Kittlewell. First prize for best collection of single dahlias was awarded to R. Lichtenberg.

NEWS.

Chicago.

STOCK VERY SCARCE AND WHOLESALERS HUSTLE TO FILL REGULAR ORDERS.—PRICES TAKE A BRACE.—AVERAGE RETURNS MAKE UP FOR SHORT SUPPLIES.—SCARCITY GENERAL OVER WIDE AREA.—RESPECTED VETERAN FLORIST ENDS HIS LIFE—ILLNESS THE CAUSE.—CLUB MEETING.—WHOLESALERS FEAR TIEUP BY EXPRESS DRIVERS.—VARIOUS PERSONAL NOTES.

The week opened with the market bare of stock. It was an unexampled condition at the season, for the rush of orders showed that the shortage was general in the territory tributary to the Chicago market. Every wholesale house was inundated with letters and telegrams and the long distance telephone was frequently brought into use by those whose need was greatest. There was such a rush that few houses attempted to do anything at all on orders from infrequent buyers, the "regulars" taxing their facilities. Few indeed were the orders filled in full in the early part of the week. Of course the city trade required more or less stock, for trade is improving, and they had to hustle for their supplies. As a natural sequence prices advanced sharply in those houses where it is the practice to grade the stock closely, and grades deteriorated where it is the preference to adhere to printed rates at the expense of quality, for there are yet quantities of low grade roses. Carnations felt the changed conditions as much as roses and prices ranged from \$2 to \$3, and upward for fancy stock. The out of town buyers made some complaint at prices charged, but this was unjust, for nothing was shipped out which would not have brought just as much over the counter, and sometimes stock was billed out for less than the waiting city buyers offered, so careful are most of the houses to avoid anything which would look like "breaking it off" in a man, just because conditions this week afforded an excuse. With several days of sun the cuts are on the increase, but it will take pretty good quantities of stock to make the market more than a little easier. Chrysanthemums are coming along more rapidly now, pink and yellow being available, and the qualities are generally very good. Early this week \$3 a dozen was readily paid. Cosmos has also moved lively. Violets are not so good as at the same date last year. There is an accumulation of adiantum and some days smilax is so slow sale that it goes to waste.

The first meeting of the Florist's Club, after the summer recess, was held October 8. It was well attended and much good work was accomplished. There were several visitors present, among them A. T. Boddington, of Clucas & Boddington, New York; Wm. Murphy, of Cincinnati, and Isaac Kennedy, of Cleveland. The report of Treasurer Sanders was presented, showing a substantial balance. Ed. Enders, of the entertainment committee, presented his report showing a substantial amount in favor of the club. J. D. Thompson, of the J. D. Thompson Carnation Company, invited the members to visit his establishment on October 22, the train leaving Chicago at 8:35 a. m. This train will arrive at Joliet in time to visit the penitentiary, an incident of the trip for which Mr. Thompson has arranged. A reception committee for the forthcoming show week was appointed, consisting of Geo. Wienhoeber, Chas. Reardon, Frank Benthey, Walter Kreitling, John P. Risch and J. D. Thompson. The members of this committee will also act as guardians in the matter of exhibits. A committee of three, viz., Phil Hauswirth, Geo. Wienhoeber and John P. Risch, was appointed to act in conjunction with the Horticultural Society concerning the banquet to be given during flower show week. There were on exhibition carnations Enchantress and Governor Wolcott, from the J. D. Thompson Carnation Company; Lillian Pond, from S. J. Reuter, Westerly, R. I., and Murphy's White, from William Murphy, Cincinnati. There was also on exhibition an excellent vase of lily of the valley from Carl Jurgens, who, in conjunction with Isaac Kennedy and Frank Benthey, acted as judges. The judges in their report considered Enchantress the best carnation on exhibition, Lillian Pond the best of the whites, with Governor Wolcott a close second and Murphy's White promising for commercial purposes, while Jurgens' lily of the valley was highly commended. During the meeting Mr. Boddington invited the members to attend the coming New York show. Mr. Kennedy said he never saw carnations so good at this time of year as those exhibited at the meeting and he considered Enchantress especially fine. Mr. Murphy, of Cincinnati, invited all the members to attend their winter and spring exhibitions. Toward the close of the meeting J. D. Thompson said that he had brought his exhibit of Enchantress (a magnificent vase of 100 blooms) to the meeting with a double purpose. He first wished to let the florists see Enchantress, and next to present the blooms on exhibition to the dear and respected friend of all the members, Edgar Sanders, and this was done in due course.

The craft was shocked on Monday morning to hear that John P. Tomner had put an end to his life the previous morning. Mr. Tomner was 73 years of age and one of the oldest active florists in the country. He had followed the business for many years. He came to Chicago forty years ago and worked for some time for the West Park board. The laying out of Union Park was one of his principal works. In later years Mr. Tomner went into cut flower growing, his daughter selling his cut from a counter in one of the wholesale houses. Lately a retail store adjoining his home at 992 North Sixty-third avenue has taken all Mr. Tomner's energies, for he has been in failing health. He was well liked by all who knew him and the family have the sincere sympathy of all in the local market.

The wholesalers held a meeting Tuesday with their knees under the mahogany at the Bismarck. The impending strike of the drivers for the express companies was the principal topic of conversation over the viands. It was decided to ask the union for a special dispensation in the event of a strike, to keep things going, and E. E. Piesser, of Kennicott's, Leonard Kill, of Peter Reinberg's, and E. C. Amling were appointed a committee to present the matter to the union officials.

The trip of employes of Vaughan's Seed Store to Western Springs was postponed on account of wet weather. If the weather proves favorable, a large party will take advantage of the outing October 12.

P. J. Hauswirth put up the decoration for the Marquette Club's Chicago day banquet at the Auditorium. It is one of the largest banquets of the year but the outlay for flowers is modest.

Eli Hobbs has retired from active business, the concern being reorganized as the E. Hobbs Company, with George Wagner, long with the house, as manager.

Jno. Schoepfle & Company have their new establishment fitted up in grand shape and anticipate a rousing business throughout the season.

The Chicago house of the Pittsburg Plate Glass Company was burned out Tuesday evening. The loss was almost total.

If President Roosevelt had been here the past week, as planned, it is hard to tell what would have been done for flowers.

Edgar Sanders celebrated his seventy-fifth birthday anniversary October 10. His health is improving day by day.

C. E. Young, who has been manager at Fleischman's, has returned to New York. E. Warendorff is now in charge.

The S. Wilkes Manufacturing Company expects to get into its new and greatly enlarged plant early next spring.

C. L. Washburn is just getting out from a three week's illness. He had a narrow escape from typhoid fever.

Miss N. M. Sisler, of Hunt's, is back at her desk this week after an enjoyable trip to Colorado.

John Muir is just getting about after a two months' illness. He still limps with rheumatism.

George C. Hartung has opened, at 1629 Barry avenue, a nice establishment in the retail way.

Charles Strombach, head gardener at Lincoln Park, is very ill with pneumonia. Mrs. E. F. Winterson is convalescing rapidly, though still very weak.

Orders have come from as far as Portland, Oregon, this week.

A. L. Vaughan is at home from a trip west.

Visitors: John Bertermann, Indianapolis; Isaac Kennedy and L. F. Darnell, Cleveland; W. A. Hartman, South Haven, Mich.; R. F. Tesson, St. Louis.

PEORIA, ILL.—James C. Murray has remodeled and redecorated his store and has things in fine shape for a big fall business.

FALL RIVER, MASS.—M. Conroy has opened a new and well-appointed store at 101 South Main street, opposite the Academy of Music.

SPRINGFIELD, MASS.—At the next meeting of the Amateur Horticultural Society, November 7, Abel F. Stevens, of Wellesley, will lecture on chrysanthemums.

New York.

ACTIVE BUSINESS CLEANS UP THE MARKET AND GIVES WHOLESALERS DISTRICT A BETTER TONE.—STOCK NOT MUCH IMPROVED.—CARNATIONS SHOW BEST QUALITY.—CHRYSANTHEMUMS FARING WELL.—VIOLETS IN BETTER STATE.—CLUB MEETS MONDAY.

A more satisfactory tone pervades the cut flower business this week, the activity of the past ten days having been quite marked. Several out-of-town events of considerable magnitude have contributed thereto, as they called for large shipments of stock. All that is lacking in present conditions is the stability that comes later in the season and which, of course, cannot be reasonably expected as yet. Roses are very generally mildewed, Bridesmaid and Bride being, as usual, the chief sufferers. American Beauty has been in very heavy supply but with these as with all varieties of roses the cut has suddenly diminished, a result consequent upon the warm weather of last week, which drove everything into bloom and finished up the crop generally. Carnations alone respond promptly to the bright days of this week and show an improvement in quality every day. Orchids, particularly the white ones, have been in good demand and cattleyas have managed to climb back into the 50-cent seats. From \$5 to \$6 per dozen has been quoted for a few very fine yellow and white chrysanthemums. These prices are exceptional, however, the medium and lower grade stock going as low as \$6 per hundred. The supply is increasing to fair proportions. Violets are gradually coming into better form. Report has it, however, that the warm weather last week affected the stock of a number of growers adversely and it will take some time for the plants to recuperate. The quantity coming in is heavy for so early a date and is keeping values down accordingly. The Rhinebeck violets are ahead of the Poughkeepsie crops by about three weeks. Lily of the valley is plentiful at present but a good demand is keeping it fairly well cleaned up, at normal prices. Some very large dahlias are seen about, and such have been sold at \$3 a hundred. The smaller blooms do not figure for anything worth quoting. All green material such as smilax, asparagus and ferns is selling better than for some time past, yet there is still room for improvement.

The club meeting of next Monday evening, October 13, being the last regular meeting before the date set for the Madison Square Garden Exhibition, ought to bring out a big representation of the club's members, and there is sure to be much of interest transpiring. The meetings are now held at Civic Hall, 128 East Twenty-eighth street.

Visitors: Messrs. Asher, Pascal, Tremper and Coombs, of the Rhinebeck violet growing fraternity; Mr. Clarke, Portland, Ore.; Walter Mott, Jamestown, N. V.; J. A. Pettigrew, Boston.

CARTHAGE, MO.—Stephen Hyde & Son are embarking in business here, building one greenhouse.

OTTAWA, ILL.—F. J. King has begun the rebuilding of his home, destroyed by fire September 22. His loss was fully insured.

LENOX, MASS.—The judges selected to serve at the annual exhibition of the Horticultural Society are A. Herrington and Wm. Duckham, of Madison, N. J., and W. Anderson, of South Lancaster Mass.

Detroit.

QUARTETTE VISITS GROWERS AT THE FURNITURE CITY.—GREAT RANGES OF GLASS AND MUCH GOOD STOCK IN EVIDENCE.—TRADE EXCELLENT AND STOCK SHORT OF THE DEMAND.—CLUB HOLDS ROUTINE SESSION.—BOWLING TO BEGIN.—NOTES WITH THE GROWERS AND OTHERS.

On Sunday, September 28, a party of Detroit florists consisting of Philip Breitmeyer, Wm. Dilger, Thomas Browne and J. F. Sullivan made a flying trip to Grand Rapids. We were met at the depot by G. F. Crabb, Henry Smith, Chas. Chadwick and A. Hannah, who escorted us to the Eagle Hotel for dinner, after which the establishments of the above named florists were visited. At Henry Smith's place of twenty-one houses, using 100,000 square feet of glass, were seen four houses of carnations, 26x270 feet, nicely established and giving promise of a big cut during the season. One house of Meteor roses was especially fine and called forth many expressions of admiration from the visitors. One house of violets, two of chrysanthemums and one of adiantum showed evidence of skillful care on the part of the growers in charge. Mr. Smith has material on the ground to build one or two more houses this fall for a fine lot of carnations yet in the field. At A. Hannah's place, where 60,000 feet of glass is devoted chiefly to cut flowers for his city store, extensive improvements are in progress, several of the houses being entirely rebuilt with Garland iron gutters, with division walls and table supports of concrete. Chas. Chadwick's place of over 120,000 feet of glass is devoted mostly to carnations, there being about 75,000 already planted and appearing healthy and vigorous. Eli Cross was visited and his place, devoted exclusively to violets, was found in the most perfect order. He has recently put in new boilers and built a new chimney and added to the capacity of his workroom and boilerroom. His six houses of violets give every indication of big results the coming season. Crabb & Hunter's, the well known home of Irene carnation, was found very interesting. Their chrysanthemums have been carefully grown and are uniformly good throughout. Much of their glass area is devoted to carnations, all doing well, while their roses are good and their one house of Beauties are especially fine.

The past ten days have been marked by a goodly number of decorations by the florists, some of them quite extensive. B. Schroeter had the work for the opening of the largest dry goods store in the city. J. Breitmeyer's Sons had the decoration of the new County building on the occasion of its formal opening. J. F. Sullivan had the banquet decorations at the Masonic Temple for the carriage manufacturers' convention. The scarcity of flowers, which at present seems quite general, is being deeply felt by the local florists, whose trade is extraordinarily active for this season of the year. The heavy rains have ruined the late crop of asters and other outdoor flowers, thus throwing the burden on roses alone, the supply of which has been, however, fairly plentiful and far in excess of that of carnations. Chrysanthemums are beginning to make their appearance in small numbers and are hailed with delight by both dealers and the public.

The last meeting of the club, October 1, brought out a large attendance, but only miscellaneous business was transacted. Definite bowling arrangements were consummated and active and regular prac-

tice will begin at once in preparation for the big event at Milwaukee next year. At the next meeting, October 15, S. Alexander, the park botanist, will give a lecture on the "Botanical Classification of Plants and Flowers." Mr. Alexander gave an instructive and interesting talk at Palmer Park last Friday to the teachers and students of botany from all the high schools of the city on "Forest Trees and How to Distinguish Them."

Gus. Knoch, at Woodmere, has acquired another acre of ground immediately adjoining his greenhouse property, which he will devote to perennial shrubbery and other field plants. He is putting in a new thirty-five horse-power steam boiler and building a workshed 24x50 feet and one house 9x90 feet for bedding plants.

Mrs. Wm. Dilger, of the Michigan Cut Flower Exchange, was apprised Wednesday morning of the sudden death of her father in Kentucky. She left for there in the afternoon of the same day.

J. F. Sullivan was the only Detroit florist making exhibits at the recent State Fair at Pontiac, taking first prizes on all the entries of cut roses and floral arrangements.

Avery Rackham and Hugo Schroeter have both returned from the east where they went some time ago to acquire additional experience in their line of work.

John Carey, of Mt. Clemens, is putting in a new boiler and building a brick coal shed 28x40 feet. J. F. S.

Boston.

MARKET SHOWS HEALTHY TONE.—GOOD OUT OF TOWN DEMAND BUT ONLY BEST GRADES WANTED.—STOCK RATHER SCARCE.—FRUIT AND VEGETABLE SHOW ALSO BRINGS OUT A FINE DISPLAY OF DAHLIAS.

The cut flower market is in a generally healthy condition. Shipping demands are increasing and are fully up to the average for this date. The main difficulty is that they call for a better grade of stock, as a rule, than the market affords and this trouble seems to be on the increase every year, as the out-of-town buyer grows more and more critical. There is an abundance of American Beauty roses and a fairly good demand is experienced for this and the Queen of Edgely. Other roses are rather scarce, that is, the better grades. Carnations begin to make more of an impression but with the exception of the Lillian Pond and a few of the other extraordinary varieties the quality is not yet very good. The first blooms from indoor crops are beginning to come in, but with stems short as yet. Chrysanthemums are not sufficiently abundant to interfere with the sale of carnations, which maintain a price which is hardly commensurate with their quality. In chrysanthemums the only colors yet available are white and pink, but yellow may be looked for any day now, with the fine bright weather prevailing. Violets, in single and double sorts, are received only in limited quantity thus far. The double ones are very small and inferior. As to values generally the quality of stock in market and the irregularity of the demand does not warrant any advance in prices at the present time.

On the occasion of the fruit and vegetable show last Friday and Saturday, at Horticultural Hall, the display of dahlias was extremely brilliant. H. F. Burt, W. P. Lothrop, C. L. Hovey and Mrs. E. M. Gill were the principal contributors. Blue Hill Nurseries staged another of

their interesting collections of hardy herbaceous flowers, also a plant of a new variegated grass which should prove valuable for basket work, *Arrkenaterium bulbosum variegatum*. It received no notice from the committee. R. & J. Farquhar & Company showed a stand of fine gladioli, also of varieties of *Lilium lanceifolium rubrum*. A freak single dahlia from Messrs. Farquhar named "Collarette variety President Viger," so called because of an inner circle of small white ray petals, was awarded a certificate of merit, an honor far beyond its deserts. J. E. Rothwell showed a beautiful plant of *Cypripedium Sanderianum* and a new hybrid, *Laelia Owenianum* (*L. Dayana* × *Xanthina*) neither of which was recognized. A silver medal was awarded to Mrs. L. H. Ames, W. N. Craig, gardener, for one of the finest displays of Muscat grapes ever seen here. Premiums to the amount of \$300 were distributed for apples and pears, the same good old kinds our fathers ate.

A branch of the Woman's Auxiliary of the American Park and Outdoor Art Association was organized in Boston on October 6.

Mrs. Lucius H. Foster died at her home in Dorchester on October 2.

Visitors: A. B. Cartledge and J. L. Pennock, Philadelphia.

Philadelphia.

LIVELY BUSINESS WITH SHORT SUPPLIES.—RETAILERS OBLIGED TO HUSTLE FOR SUPPLIES.—PRICES ADVANCE.—CLUB HOLDS INTERESTING SESSION.—PAPERS BY WELL KNOWN MEN.—EUROPEAN MATTERS TREATED.

Business has been lively the past week. Weddings and funerals have been the principal events and they have used up a lot of flowers. Everything is scarce, roses particularly being very hard to get, the stock being doled out in small lots so as to try and make them go around. Orders ahead are all right, but one has to be on the spot if he wants to make sure, as the way the buyers swarm around the boxes as they come in at this early day puts one in mind of Thanksgiving time. New York is even telegraphing here for Beauties, but there are none to spare. Prices are advancing. Special Beauties are now \$3 per dozen, but the stock, what little there is of it, is fine. A good selling size goes for \$2 to \$2.50. Teas are improving. Bridesmaids have been very poor but will soon be in good shape. The frost holds off and there is still a fine lot of dahlias; \$1 to \$4 is the price. The chrysanthemums are here in several varieties. Nice flowers of Mme. Bergmann sell for \$1.50 per dozen, with *Glory of Pacific* at \$2, *Montmort* and *Merry Monarch* \$1.50 to \$2. *Cosmos* is in and sells for from 50 cents to 75 cents per hundred. Carnations are selling well at \$1.50 and \$2. Cattleyas are plentiful at 50 cents straight. Violets, doubles, 50 cents; singles, 25 cents to 35 cents per hundred. Lily of the valley is plentiful at \$3 and \$4.

The October meeting of the club was well attended and everyone was in the best of humor. I am pleased to say that John Westcott was elected president, which is an honor due one who has taken so much interest in the club since its inception. David Rust succeeded to the vice-presidency and the other officers were re-elected unanimously. S. S. Pennock read an able paper on the Asheville convention and touched on other topics of business interest. H. F. Michell read an interesting account of his recent

European trip, describing many of the places that he had visited. Both papers were much appreciated and the essayists were voted the thanks of the club. Fred Ehret also briefly told of his trip and especially mentioned the fact that there are no cut flower commission men in the European cities that he had visited, as the growers generally sell their flowers on the street corners or in the markets. The paper for the next meeting relates to the increasing use of hardy plants and the importance of the same to the florists' trade. Samuel C. Moon will be the essayist.

John Shellem has taken the small store on Eighteenth street, below Chestnut, and will run it as a branch to his establishment at Seventeenth and Tasker streets. K.

St. Paul.

GROWERS HAVE GOOD PROSPECTS FOR WINTER.—STOCK NOW SCARCE AND BUSINESS ACTIVE.—FLOWER SHOW POSTPONED.—NOTES OF DOINGS OF PRODUCERS.

R. C. Seeger has a range of seven houses containing about 27,000 square feet of glass devoted principally to roses and carnations, with one small house of violets. Mr. Seeger was one of the first in this section to grow Liberty and now has two or three large benches planted to it. While he has had fairly good success with it he says it has not been as profitable as Meteor. He has a few hundred plants of Baldwin which are nice and thrifty, the blooms of good form and substance and a beautiful shade of dark pink. Mme. Testout, Pres. Carnot and Kaiserin are grown for summer, producing fine crops from June till December. Carnations are planted this year more extensively than heretofore and are looking very fine. Varieties grown are White Cloud, Flora Hill and Norway in white, Crane and Jubilee in red, Daybreak, Lawson, Joost and Marquis for pink. A few Prosperity complete the list. The most promising sort is Lawson.

Fall trade is increasing in volume daily, the only drawback being the scarcity of good stock. I have never seen stock so short in quantity and so uniformly poor in quality as it was last week, but a few days of bright weather have improved the quality as well as the quantity and stock is now more plentiful. Beauties are in good demand, some of the best retailing as high as \$8 per dozen. A few violets have made their appearance and sell readily. Princess of Wales appears to be the earliest in this section. Chrysanthemums are coming very slowly, Fitzwygram being the only one cut so far.

Keiper & Powles have about 6,000 feet of glass devoted mostly to growing plants for the trade. They grow large quantities of asters for summer and now have a house of single-stemmed asters for fall business. One house is devoted to sweet peas during the winter months. For their spring trade geraniums are their leading specialty and are grown in immense quantities, a great many hot-bed sash being used.

L. L. May & Company are handling the new carnation, *Euchantest*. It is a valuable addition to our list of good varieties. Harry Fenn is a good crimson of the Roosevelt type. Mrs. Patten is a nice, bold flower, variegated with lighter pencillings than the Bradt, borne on a stiff stem. It looks like a good one.

The chrysanthemum show under the auspices of the Ladies' Auxiliary of the Manufacturers' Association has been

postponed to November 10 to 12. Even at that late date chrysanthemums will hardly be at their best.

C. F. Haupt has a compactly built range of about 6,000 feet of glass where he grows a general line of stock, his specialty being violets. Chrysanthemums, roses and carnations are also grown successfully.

Carl Peterson has two nice houses 18x100 devoted principally to carnations, which are fine. He expects to do a big business in geraniums and other bedding stock, having laid in a good supply of cuttings.

The coal question is uppermost in the minds of florists and others who depend upon it to produce their goods. Soft coal is becoming scarce as well as hard. It sells now at \$5 per ton in carload lots. FELIX.

Scranton, Pa.

CITY OF STRIKES A POOR PLACE FOR BUSINESS THE PAST YEAR.—COAL SUPPLY ALMOST EXHAUSTED.—GROWERS HAVE GOOD STOCK FOR FALL.—PERSONAL NOTES.

Scranton may well be termed the city of strikes. We had not fully recovered from the unsuccessful carpenters' strike until the employes of the Scranton Traction Company went out. We endured months of warfare before their trouble was adjusted, only to be followed by the great strike of the miners of the anthracite coal fields, which has been on more than four months. It is not safe for a man to be seen on the street with a dinner pail; he is liable to be set upon, so hard is the feeling against the non-union workers. There is no coal to be had at any price and unless the strike is settled soon most of the large mills will have to suspend operations. As long as they could get soft coal they got along very nicely but the only fuel at present is culm, and very few places are equipped for burning that, it requiring a blower and one man's whole attention to run a fire, making it very expensive, especially for the florists, who, with good coal, can do the firing with very little trouble and time.

Owing to the strike there is great depression in all business in this vicinity. The growers in Scranton report a promise of a fine stock of chrysanthemums and carnations for the fall and winter. McClintock has five as fine houses of carnations as can be found in this section of the country. He is an advocate of early planting and is growing all of the latest varieties. He has also four houses of chrysanthemums which are very promising. During the summer he erected two houses 12x80 and one propagating house 10x160. His roses are making a fine growth.

Anton Schultheis, who bought the R. W. Palmer place, has remodeled all the houses and changed the hot-water system for steam heat. He grows roses and carnations. Mr. Schultheis is a hustler and does not propose to be behind the other Scranton florists.

Johnathan Rodham has leased a tract of land next to McClintock's nursery and erected two houses 21x120 for growing carnations for the wholesale market. He has put in one sixty horse-power boiler for heating.

Morel Brothers have erected several iron-frame houses for roses and carnations. They have put in two sixty horse-power boilers to furnish steam.

Thos. Arner is doing a nice business and his general stock is looking fine.

Elias Anthony has enlarged the list of Scranton florists by erecting two houses 12x60 for bedding plants and cut flowers.

J. H. McConnell and wife have returned from a visit to Newark, N. J.

G. R. Clark has returned from a business trip to New York city.

W. S. Mott reports trade fair during the summer months.

Marvin & Muir have two fine houses of Boston ferns.

W. H. Davis is cutting some fine roses. MAC.

Denver.

TRADE ACTIVE AND STOCK INADEQUATE TO MEET DEMANDS.—NEWER ROSES TAKE WELL.—CHRYSANTHEMUMS ARE LATE.—BOWLING.

The supply of stock falls far short of the demand. Trade has been very active the past two weeks in all lines. White stock in particular, is scarce, so design work gives quite a trouble. Beauties have fallen off in supply, both at home and those shipped in, but the demand for them rather increases. Violets are in regular supply but only in limited quantities as yet. They are quite good for the season. A few good Liberties are seen occasionally, which go very quickly, and the variety gives promise of being just as popular as last season. Chatenay, of which a few were grown here last year, are planted more heavily this season and will, I think, prove very popular. It is not yet at its best but takes very well and will be used much in table work. A few selected Brides and Bridesmaids come in that go at good prices, while poorer stock is eagerly sought after for funeral work. The first chrysanthemums will be in about the end of the week, Bergmann and Glory of Pacific being the first. They will fill a big gap. Carnations are coming on slowly and only a few good ones are to be seen.

Six of the craft got together last Tuesday to organize the bowling club, something we start every year but it does not hold. However, there is a chance this year, as Milwaukee looks close and it would not be a bad walk over there. So we may land six for a team next year.

The first pot chrysanthemums were put on sale this week but are yet only well in bud. There are a lot of them to be sold but I trust they will do as well as in other years. B.

Buffalo.

STOCK SCARCE AND TRADE FAIRLY ACTIVE.—GOOD CHRYSANTHEMUMS NOW AVAILABLE.—WEDDING DECORATIONS.

Dark and rainy weather cuts down supplies. Roses are about all that can be depended on, and they are scarce. Violets have not improved as yet and carnations are scarce. Some good chrysanthemums have been sent in by S. B. Smiley, Lancaster. Several weddings this week called forth a lot of flowers. The Mooney wedding was the largest and the work was divided. R. W. Rebstock decorated the house and Miss Donovan the church. S. A. Anderson made the bouquets and they were very fine. Several receptions last week called for a good lot of flowers, of which J. H. Rebstock and Palmer supplied the most.

It is a mistake to put up store decorations at too low a price. The stock is liable to a good deal of injury.

Anderson's new wagon is certainly the finest flower wagon in the city.

The changes in J. H. Rebstock's store give it a much brighter look. BISON.

Minneapolis.

STOCK SHORTENS UP AND DEMAND EXCEEDS SUPPLY.—QUALITIES DETERIORATE BUT PRICES ADVANCE.—VARIOUS NOTES.

Last week's shortage of stock of all varieties caused a decided demand and it seemed barely possible to fill orders. Tea roses advanced to \$4 and \$6 per hundred, carnations to \$2.50 and \$3 per hundred and American Beauties to from 75 cents to \$3 per dozen. In fact, anything in the shape of a flower sold at a good price. The growers have not yet got down to steady firing and, with dark days and cold nights, the stock received a severe check. One grower cutting from 1,000 to 1,200 carnations daily was reduced to 200.

It is a pleasure to hear E. Nagel relate his early experience in the flower business in Minneapolis, when he was foreman at R. J. Mendenhall's. Flowers were hard to secure then and the best of prices prevailed. Some of the decorations in which he was overseer ran all the way from \$600 to \$2,500 and the difficulties encountered are comical to hear.

Paul Berkowitz, of Philadelphia, and E. Ford, of New York, were recent callers.

A. Swanson is cutting chrysanthemums of good quality. C. F. R.

Springfield, Mass.

CHRYSANTHEMUMS EARLY.—TRADE FAIR.—GREENHOUSES ALL IN GOOD SHAPE.—OWNERS WATCHING EXPERIMENT AT HEATING WITH OIL.

The first chrysanthemums of the season were brought in by L. Morgan, of Longmeadow, October 4, this being earlier than usual for Glory of Pacific and Polly Rose, which is a white sport from Pacific. They were of good quality and are selling fairly well. Carnations are more plentiful and roses improving in quality, there being a steady demand for same. A few small weddings and hall decorations, with an occasional funeral design, help to keep the store men busy. As for the greenhouses, all stock looks in fine condition. Crops are coming along nicely but all are wondering what is going to be done to keep from freezing, as coal is out of the question. Selatter & Son are putting in a burner and are going to try kerosene. All are watching the results, which it is to be hoped will be a success. A. B.

Worcester, Mass.

FALL BUSINESS SHOWS UP EARLY.—PLENTY OF GOOD STOCK IN MARKET.—NEW FLOWER STORE.

Business has started in an encouraging manner and with plenty of good stock in the market trade has been very good. Chrysanthemums are now arriving in reliable quantity and, for early varieties, are very fine. There has been a heavy call for violets and the Princess of Wales is the popular variety now, extra good for this time of the year. Roses are improving every day and show the effect of steady firing. The fall weddings are very numerous and several fine decorations have been turned out, and more coming in the immediate future.

Chas. D. Machie, formerly in charge of the cut flower department of the Boston Store, has opened a flower store on Main street. A. H. L.

ORANGE, N. J.—The Floricultural Society opened the season with a smoker at Elks' Hall Wednesday evening. It was an enjoyable affair, as usual when anything is done in Orange.

THE AMERICAN FLORIST

EIGHTEENTH YEAR.

Subscription, \$1.00 a year. To Europe, \$2.00.
Subscriptions accepted only from those in the trade.

Advertisements on all except cover pages, 10 Cents a Line, Agate; \$1.00 per inch. Cash with C. order.

No Special Position Guaranteed.

Discounts are allowed, only on consecutive insertions, as follows—6 times, 5 per cent; 13 times, 10 per cent; 26 times, 20 per cent; 52 times, 30 per cent.

Cover space sold only on yearly contract at \$1.00 per inch, net, in the case of the two front pages, regular discounts applying only to the back pages.

The Advertising Department of the AMERICAN FLORIST is for florists, seedsmen and nurserymen and dealers in wares pertaining to those lines only. Orders for less than one-half inch space not accepted.

Advertisements must reach us by Wednesday to secure insertion in the issue for the following Saturday. Address

AMERICAN FLORIST CO., Chicago.

ALAS, poor jadoo.

THE inconveniences of the coal strike will not be in vain if a practical method of burning crude petroleum be the outcome.

IMPORTATIONS are arriving and once again Azalea Mme. Van der Cruyssen is procurable only in limited quantity in assortments.

THE corn crop is out of danger, the wheat crop is garnered and a big hay crop under cover; this spells prosperity in the west and prosperity in the west means "easy" money in the east this winter.

THE marriage statistics show that throughout the country there is a considerable decrease in the number of young couples who might be expected to go to housekeeping this fall, and the theorists allege the high price of coal as the cause. However, florists all over the country find wedding work plentiful, doubtless for the reason that the class of people who need flowers in decorations still have a little surplus after paying the coal bill. It isn't the poor man who is the average florist's best patron.

Largest Prize at Chicago.

The Foley Mfg. Co., of Chicago, manufacturers of greenhouse material, offer the following prizes to be added to the regular schedule at the Chicago show:

- For best chrysanthemum plant.....\$25
- For best vase American Beauty roses 25
- For best vase of carnations..... 25

This makes it possible for one chrysanthemum plant to win \$55; for fifty American Beauty roses to win \$65 and for 100 carnations to win \$45. We believe this to be the largest prize money ever offered for carnations.

Draft for Soft Coal.

ED. AM. FLORIST:—Having been forced to the use of soft coal, we are confronted with the problem of short stacks. We enclose rough diagram showing length of flues and stacks. Can we get any results at all with the stacks as they are and do you think there is any advantage in having the flues run the entire length of the house? Would we gain anything by mixing anthracite and bituminous?

T. N. Y.

I have never attempted to use soft coal in a flue and doubt if it could be burned without danger of injury to the plants from gas escaping into the houses. From the drawings I judge that hot water or

steam are now used for heating the houses, and the reason for putting in a flue running for seventy-five feet through the house is to improve the draft by lengthening the smoke stack. Running it horizontally as proposed will result in lessening the draft when the fire is first started. I have used soft coal in a hot water heater with good results when the chimney was only twenty feet high above where the smoke pipe entered. The mixing of anthracite and bituminous would improve the results. L. R. TAFT.

Answered By Good People.

ED. AM. FLORIST:—We are pleased to state that we have secured some excellent help through the use of a "want adv." in your valuable paper.

LAKEVIEW ROSE GARDENS.

Janestown, N. Y.

Greenhouse Building.

Baldwinsville, Mass.—Joseph Chambers, cucumber house 20x140. M. Paine & Son, cucumber house 20x134.

Waltham, Mass.—Anderson & Williams, house 30x250.

Oakdale, Md.—Edw. Warfield, two houses.

Elkhart, Ind.—C. G. Conn, carnation house.

Chester, Pa.—Herbert Shaw, one house. Jersey City, N. J.—Peter Henderson & Company, range of storage houses.

Sharon, Mass.—Mrs. J. Snow, carnation house.

Yucca Filamentosa.

ED. AM. FLORIST:—What distance apart should Yucca filamentosa be planted? What is the spread of the plants when fully grown? What kind of soil should they have? Do they require heavy manuring? C.

The plant is a native of the southwestern United States and Mexico. It is well adapted for dry and sandy soils and requires a well drained area, but is tolerant of a large range of soil. Not much manure is required. The plants should be set at least two and one-half feet apart. W. A. PETERSON.

Bougainvillea Sanderiana.

ED. AM. FLORIST:—Will you please through your columns give the mode of procedure in flowering Bougainvillea Sanderiana during the coming spring months? The plants were planted out in June, as recommended by a correspondent, and lifted in September and now occupy 10-inch and 12-inch pots. They are vigorous and extremely luxuriant, and will shortly be well established in their pots. CAREFUL READER.

After potting Bougainvillea Sanderiana, plants that have been lifted from the open ground should be placed in a greenhouse lightly shaded, at a moderate growing temperature for about ten days or so, spraying them over the top daily, until they have recovered from the effects of the lifting. After this has been accomplished reduce the temperature to a sufficient degree to prevent the plants from making new growth. Clean off all shading, expose the plants to the full light, and always keep them on the dry order throughout the winter, when the plants will have well ripened and fully budded up. About six or seven weeks before Easter move the plants from their dormant position, into the forcing house, give them plenty of water and expose

them to the full light. If these directions are carefully followed, there should be no trouble whatever in blooming these plants in profusion. WM. K. HARRIS.

Over There In Kansas.

Papers had a lot to say
Sneerin' like, o' Kansas;
Welt it to 'em every day,
Chuckin' fun at Kansas.
Air just full o' slander darts
From the busy Eastern marts—
'Nuff to break the people's hearts
Over there in Kansas.

Say that's where cyclones are born,
On the plains o' Kansas;
Every word a word o' scorn
Fur the folks in Kansas.
Hoppers darkeenin' the sun—
Dozens of 'em weigh a ton—
Seem to think it's lots o' fun
Cra-kin' jokes at Kansas

Now it's come their time to laugh,
Them air folks in Kansas,
Givin' Easterners the gaff
'Bout affairs in Kansas.
Fields a-bulgin' out with wheat,
Corn for all the world to eat,
Other crops that can't be beat,
Over there in Kansas.

Trains a-haulin out the stuff
From the plains o' Kansas;
Railroads can't get cars enough
Fur to empty Kansas.
Ort to see the farmers grin,
Stroke the lilacs on their chin
As the cash comes rollin' in,
Over there in Kansas.

Women singin' songs o' glee
'Bout ol' fruitful Kansas;
Babies crowin' merrily
Everywhere in Kansas.
Party gals a-buym' clo'es,
Toggin' out from head to toes;
Style? You bet your life she goes
Over there in Kansas.

When the cares o' day are done
On the plains o' Kansas,
And the kids begin to yawn—
Sleepy kids in Kansas—
Farmer wipes his glasses blurred,
Reads a chapter o' the Word,
Then kneels down and thanks the Lord
That he lives in Kansas.
—Denver Post.

Grubs and Club Root.

ED. AM. FLORIST:—What can be done to a house of roses when the soil is infested with grub worms? There seems to be a large grub under each plant, two under some, and they are cutting the roots off, finally killing the plant. This is the first time I have experienced anything of the kind and I do not know what to do, for it seems likely the grubs are breeding right in the soil on the benches, as we find many only about half grown. We sometimes see the grubs in the soil when filling the benches and always pick them out, but some of course always got in, although they never before did any harm. What can be done? What is the cause of club root and how does one get rid of it? J. B. J.

The trouble is usually in collecting the soil from the neighborhood of where trees are growing. The grub that destroys the roses in the way the correspondent describes is the larva of the June bug, as commonly called. When once taken into the house it is a very difficult matter to eradicate them except by killing them as they are working around the plants. There is no known remedy that I have ever found, or ever heard of, that will destroy them without injuring the plants. Probably a large portion of the worms that one finds in the houses are not the particular ones that destroy plants, as they may be the larvæ of the large horse fly. These, of course, are brought in through the manure and, as a rule, do not do very much damage to the roots of the roses; at the same time they are not desirable. JOHN N. MAY.

Indianapolis.

STATE SOCIETY HOLDS A PROTRACTED SESSION.—MANY MATTERS OCCUPY ATTENTION.—COMMITTEES APPOINTED.—PERSONAL AND TRADE NOTES.

The meeting of the State Florists' Association, October 7, was well attended. With President Haugh in the chair, the meeting disposed of the routine business and then took up the flower selling of the state prison gardener. Messrs. Stanley, Langstal and Alley were appointed a committee to see the proper officers in order to have it stopped. John Hartje, H. W. Rieman and Frank Alley were appointed to prepare a calendar of important events, concerning our association, which is to be printed as a supplement to the by-laws. Hartje, Baur and Irvin Bertermann were named by the chair to arrange for a small and free flower show to be held in the State House in November. Premiums in cash and certificates will be awarded. The date of the exhibit will be announced later. Irvin Bertermann related some of his Asheville experiences in a humorous and interesting manner. Having been the only Indianapolis florist who attended the convention, he enjoyed an interested audience and a vote of thanks was tendered him. The association also voted \$25 as a contribution to the \$150,000 fund required to secure an army post and a technical institute for this city. Most of the members have also individually contributed for the same purpose. Although the meeting adjourned at an unusually late hour, it was not too late for the more enthusiastic members to enjoy a little social gathering.

Robert McKeand seems to like his new home and position in Marion so well that he neglects his Indianapolis friends. Fully two meetings have passed without his being present and that means much for faithful "Mac."

Miss Minnie Hack, who on September 17 was married to Mr. J. Gruenwald, is now at home in Maywood. Among her numerous presents was a beautiful rocking chair, given to her by her florist friends.

John Bertermann has returned from Chicago, where he made his usual fall purchases for the season.

Baur & Smith are cutting carnations of fine quality in their new house.

H. J.

WANTED--Satisfied Customers.

WHEN a man needs satisfied customers for the success of his business, the most he can ask of the buyers is orders; he has, himself, to supply the satisfaction. Now, we have a great many satisfied customers, but we want more. Our business has increased each year since starting, in 1895, every year faster than the year before. We want to keep up the record.

We want to hear from new buyers, those who are not satisfied where they are. Send us an order in the regular course of business; everyday orders, that's what we want. If you're satisfied, come regularly. We protect our steady trade at all times. Send for our weekly price list.

CUT FLOWERS AT WHOLESALE.

THE SEED TRADE.

AMERICAN SEED TRADE ASSOCIATION.

WALTER P. STORES, Ptes.; C. N. PAGE, First Vice-Pres.; S. F. WILLARD, Wethersfield, Conn., Sec'y and Treas.

HENRY A. SALZER and party, who have been journeying in Europe for two months, are expected home at an early date.

FRED. H. HUNTER has left the Cox Seed Company, San Francisco, to take the management of the Germain Seed and Plant Company, at Los Angeles.

THE Funk Bros. Company, of Bloomington, Ill., made a big display of seed corn at the Illinois State Fair at Springfield last week and will show the same at the Peoria Corn Carnival next week.

It was a sad condition of Michigan republican politics which permits ex-Secretary Alger, of embalmed beef memory, to secure the senatorial nomination over such a capable, sound and incorruptible business man as Dexter M. Ferry.

JOHN GUERINEAU and Miss Annie McGowan, both employes of the Sehlegel & Fottler Co., Boston, were married on Tuesday, September 23, greatly to the surprise of their associates, who had no suspicion that such an event was in contemplation.

THE crop of northern Michigan field peas is being rapidly picked up by representatives of manufacturers of prepared foods. They are paying from fifteen to twenty per cent higher prices than were ever known at this season. Growers have received as high as 85 cents per bushel during the past week.

HERBERT W. RAWSON and Harry E. Fiske have been admitted to partnership in the firm of W. W. Rawson & Company, Boston. Mr. Rawson is the son of W. W. Rawson, a graduate of Cornell and for five years with the house. Mr. Fiske has been with the firm fourteen years, nine as manager. Mr. Rawson will continue the market gardening branch as heretofore.

THE seed business conducted by H. L. Holmes, at Harrisburg, Pa., has been succeeded by the Holmes Seed Company, incorporated September 19, 1902, under the laws of Pennsylvania, with a capital of \$50,000. The officers are: George A. Gorgas, president; H. L. Holmes, vice-president and general manager; E. E. Beidleman, secretary; E. Z. Gross, treasurer; R. C. Neal, Sr., Chas. S. Boll and B. F. Myers, directors. The new firm expects to increase its business largely, both wholesale and retail.

BOUQUET green (*Lycopodium*) pickers and handlers are expecting higher prices, partly, no doubt, because of the market closing high last December. This situation and their apparent inclination to think green is gold may influence them to speculate and hold the stock for late buyers. This makes an unsettled market and usually a flat one at the finish. Again the labor question and the weather conditions may alter the outlook considerably later on, there being almost eleven weeks between now and Christmas.

REFERRING to the letter from W. Atlee Burpee published in our issue of August 30, the Johnson & Musser Seed Company, incorporated, writes that their authority for the statement which Mr. Burpee refers to, was printed in the *Los Angeles Herald* of June 13, 1900, which contained the statement then said to

have been made by Mr. Burpee to the *Herald* reporter as follows: "We depend almost entirely on California for seeds." Mr. Burpee now holds by his letter of August 30 that he never intended to make such a broad statement as this.

Cleveland.

COOL WEATHER CUTS DOWN PRODUCTION.—STOCK SCARCE AND PRICES ON THE UP GRADE.—BUSINESS BRISK.—GRAHAM AND HIS LILIES.—NOTES.

The weather for the past week has been decidedly colder, and consequently there has been a considerable shortening up on material of all kinds, especially carnations, the supply being totally inadequate to meet the demand. Prices have advanced all along the line. Roses are in fair supply, but more of the better grades could be used. Business was never better at this time of the year. The out of town demand for stock is very heavy. Dahlias are in their prime and immense bunches are to be seen in all the store windows.

Cosmos is beginning to arrive at last; it is almost two weeks later than last year. Chrysanthemums are becoming more plentiful. Good lily of the valley is selling well.

Adam Graham has completed building another house for carnations. His stock is looking well. A batch of lilies from bulbs grown in the Azore Islands, looks very promising. These will be watched with interest by the craft on account of the claim being made that they are entirely free from disease.

Isaac Kennedy has sold out his interest in the J. M. Gasser Company. ECHO.

HARBOR SPRINGS, MICH.—E. E. Parmeter is closing out his greenhouse business and will give his attention to seed growing.

BATH, ME.—The greenhouses on North street recently conducted by the Kennebec Nurseries have been sold by the assignee to a new corporation to be known as the Kennebec Greenhouses.

OUR DIRECTORY FOR 1902 WILL BE MAILED TO YOU PROMPTLY UPON APPLICATION. PRICE TWO DOLLARS.

THE NURSERY TRADE.

AM. ASSOCIATION OF NURSEYMEN.
 CHAS. A. LOENFBLITZ, Pres.; D. S. LAKE, Vice-Pres.; GEORGE C. SEAGER, Rochester, N. Y., Sec'y.
 Twenty-eighth annual convention, Detroit, Mich., June, 1903.

CRIMSON RAMBLER roses are in demand in the eastern and central states.

ONE of the items of nursery stock notably in demand is Rudbeckia Golden Glow.

THE large sale for raffia indicates good business and heavy budding in the nursery trade this year.

CHICAGO is taking the first steps toward raising a million dollars for investment in small parks.

PROSPERITY among the fruit growers assures a wide market for trees in both the fall and spring seasons.

THE nurserymen of Dansville, N. Y., estimate their combined fall shipments as more than two and a half million trees.

THE demand for American apples in Europe continues to increase. Shipments are now going out from Montreal, Boston and New York.

PROF. N. E. HANSEN, of Brookings, S. D., is making elaborate experiments with the Siberian crab as a hardy fruit stock for the northwest.

THE grape growers in Ontario county, New York, have contracted with wineries to supply Delaware grapes at \$100 per ton, a price which has not prevailed for years.

A RECENT experiment in shipping Georgia peaches to Liverpool, backed by the government, proved profitable. It is thought likely Europe will take many Georgia peaches next season.

Kenton, O.

GROWER MAKING STEADY PROGRESS.—OUT OF TOWN TRADE TO BE PUSHED,—GOOD NEW HOUSES.

W. Sabransky has had an eight years' season of uninterrupted prosperity since he located in Kenton, in 1894. He began business with only 4,000 feet of glass and has been building steadily, this season's addition bringing the total up to 20,000 square feet. The two new houses are of the most modern pattern, iron frames, posts and duplex gutters. One of the new houses, 26x128, is given to roses, the other, 16x128, to carnations and another similar carnation house is to be put up in the spring. The heating plant, two hot water boilers, is in a pit 15x50 feet.

Mr. Sabransky has a house 16x105 of chrysanthemums which are in prime condition, but a large part of his business is in plants, wholesale and retail. He does a nice mailing trade and is planning to largely increase this branch of his business.

Dreer's Importations of Azaleas

Our importations of Azaleas have arrived and we have commenced shipments. If you have not yet placed your orders we would advise you to do so at once, in order to secure low fall prices, as well as to take advantage of low cost of transportation while shipments can still be made by freight.

We are in position to give you best qualities because our growers are among the most skilled specialists in Belgium. We can give you best values because we are not only the most extensive importers of these plants to the United States, but also because we buy for cash at best prices and give our customers the benefit of these important points.

10 to 12-inch crowns, bushy plants.....	\$4.50 per dozen	\$35.00 per 100
12 to 14-inch crowns, bushy plants.....	6.00 per dozen	45.00 per 100
14 to 16-inch crowns, bushy plants.....	7.50 per dozen	55.00 per 100
16 to 18-inch crowns, bushy plants.....	12.00 per dozen	90.00 per 100
18 to 20-inch crowns, bushy plants.....	25.00 per dozen	200.00 per 100
20 to 24-inch crowns, bushy plants.....	36.00 per dozen	300.00 per 100

We can still include in assorted lots ten per cent Mme. Van der Cruyssen, this variety being very scarce this season.

EXCEPTIONAL VALUES IN ARAUCARIA EXCELSA

The two sizes of Araucaria Excelsa offered below are the greatest values we have ever offered in this plant and you will make a mistake if you don't secure a supply for your Holiday trade:

OUR PASTIMES.

Announcements of coming contests or other events of interest to our bowling, shooting and sporting readers are solicited and will be given place in this column.

Address all correspondence for this department to Wm. J. Stewart, 79 Milk St., Boston, Mass.; Robt. Kift, 1725 Chestnut St., Philadelphia, Pa.; or to the American Florist Co., 324 Dearborn St., Chicago, Ill.

At New York.

On Monday afternoon, October 13, the election of officers and general planning of the programme for the season will be in order at the meeting of the New York Florists' Bowling Club and an earnest request is made for a large attendance. Come and bring your sporting friends. Scores recorded on Monday evening, October 6, were as follows:

Player	1st	2d	3d	4th
Lang	141	179	193	146
Trenndy	149	147	143	139
Lorenze	115	141	130	93
Smith	116	161	118	148
Mansfield	141	117	155	

At Chicago.

After the meeting of the Florists' Club there were several very interesting bowling games. Among the visitors present were A. T. Boddington, New York; Wm. Murphy, Cincinnati, and Isaac Kennedy, Cleveland. The scores were as follows:

Player	1st	2d	3d	4th	5th
Phil. Hauswirth	169	154	152	180	151
Wm. Murphy	118	123			
A. T. Boddington	74	106			
John Hoeft	78				
E. F. Winterson	157	174	155	178	211
I. Kennedy	127	135			
W. Kreithling	78	106			
M. Barker	100	101			
George Hartung	108				

Cincinnati.

TRADE BRISK AND SUPPLIES SHORTEN UP.—CHRYSANTHEMUMS MORE PLENTIFUL.—GOOD CARNATIONS.—DEMISE OF A POPULAR GENTLEMAN.—VARIOUS NOTES.

The cool weather of the past week shortened the supply of flowers considerably; in fact, good stock was scarce. The commission houses cleaned out stock every day and fair prices prevailed. Chrysanthemums are coming in more plentifully and \$1 to \$1.50 per dozen is the price. Bergmann predominates. Roses are improving in quality and are in good demand. Max Rudolph is cutting some very good carnations. He says that Mrs. E. A. Nelson is doing well for him and is well pleased with it. From the different growers about the city who invested in the Nelson I have the same report.

Herman Betz, brother of Robert Betz, after an illness of several weeks, succumbed last Saturday to bronchitis. For many years Mr. Betz was employed by Mr. Critchell. He was buried Tuesday afternoon and quite a number of the craft attended. He leaves a wife and daughter who have the sympathy of a large num-

ber of friends, as the numerous floral tributes sent to the house of mourning testified.

J. A. Peterson went to Dayton, O., with the Hanselmann Commandery last Tuesday to attend the sixtieth annual conclave of the Grand Commandery, Knights Templar of Ohio. D.

Columbus, O.

TRADE VERY HEAVY AND STOCK SCARCE.—A GOOD RED CARNATION.—CARNATION GROWER PROSPERS.

The junior member of W. Sabransky, Kenton, O., was in the city last week displaying a fine sample of his new red carnation, Crane X Flora Hill. Mr. Sabransky, who has grown this prolific red for the past three years, claims it is one of the cleanest growers on their place. He is thinking of entering it at the Brooklyn carnation convention.

All records have been broken for the past two weeks in number of deaths in this city, and the heavy rains ruined all outdoor stock, making white flowers very scarce. Every firm in the city had all and more than it could do in cut flower work and many were the boxes carried from the station every morning, containing stock shipped in.

Gravett & Sons, of Lancaster, O., are shipping in some fine carnations. This firm is adding a house or two every year to its plant and will soon be classed among our largest carnation growers.

Some very good Bergmann chrysanthemums are making their appearance, with Glory of Pacific not far off. CARL.

Chicago Carnation Co.
Joliet, Illinois.

NEW ENGLAND FLORISTS.

Owing to the scarcity of space in the Boston Flower Market, for handling my enormous stock of **CHRYSANTHEMUM CUT BLOOMS**, I wish to state to my patrons and others that I can ship blooms direct from Boston and Cliftondale during the season. This will be a great help to parties who cannot carry the blooms from the market.

I have by far the largest and finest stock in New England and shall cut about **75,000 first-class blooms**.

For further particulars, address

WILLIAM SIM,

Stall 21, Park St. Flower Market, Boston, Mass., or Cliftondale, Mass.

CEMETERY TO HAVE MODERN RANGE FOR PLANTS AND CUT FLOWERS.—TRADE REPORTED GOOD.—VARIOUS NOTES.

Work on the greenhouses which James J. Belden is building for the Oakwood Cemetery Association, is about completed. The conservatory is 114 feet long. The palm house, which occupies the center, is fifty feet long and thirty feet high. On either side of it are the plant houses, which are thirty-seven feet long. Behind the palm house is a square cellar which is to be used as a potting shed and boiler room. The conservatory will be stocked with Mr. Belden's large collection of palms and plants. Cut flowers will be sold to patrons of the cemetery. The Phillips Company, of Jersey City, is constructing the steel work.

All the florists report that business is good. The quality of roses has been somewhat injured by the warm weather. Carnations are coming in well. Asters are all gone and chrysanthemums are just beginning to come in. The summer has been exceptionally good and the demand for outdoor stock seems to be growing every year. Orders are already booked for planting next year.

P. R. Quinlan & Company are making a window display of Dutch bulbs and also have a window of orchids. These bring 50 cents a bloom and the plants are worth \$8 to \$10 each. Mr. Quinlan has a new chrysanthemum which is being cut now. It is to be called Phillip's Early White. A. J. B.

FLORENCE, COL.—L. Tempfin & Company have just completed a large work-room and stocked it with 400 wire designs.

SAULT STE MARIE, MICH.—W. E. F. Webber has prospered and this year increased his glass area to 5,000 feet. He proposes to put up further houses next spring.

Lowell, Mass.

TRADE VERY BRISK AND STOCK HARD TO GET.—DEMAND FOR ALL KINDS OF WORK.—FUNERAL FLOWERS WANTED IN PROFUSION.—VARIOUS NOTES.

Business is gradually on the increase. The greenhouse men have been busy handling plants for openings and there have been several weddings which have called for stock of good quality, which has been hard to get of late. But the bulk of the work has been designs for funerals, which have kept some of the storemen on the jump. Chrysanthemums are to be seen in some of the store windows, making their debut last week, but at present the public would rather "have a look" than buy. Bergmann is the variety shown, selling at from \$1.50 to \$3 per dozen. The supply of roses, except Brides and Bridesmaids, has improved immensely, both in quality and supply. Some very fine Kaiserins are being shipped to town. The supply of Morgans far exceeds the demand. Helen Gould is to be had in limited supply. The name of this rose seems to help sell it. The supply of greens is excellent.

Many of the small growers on the outskirts of the city are in a quandary what to do for fuel this winter. Some of them have wood piled up so high that one thinks he has struck a woodyard.

Patten furnished several large designs for the funeral of the Hon. Frank Jones, at Portsmouth, N.H., last week. Charles Halstead accompanied them to see to their safe arrival.

During the past few days the first consignments of Princess of Wales violets arrived, from George Foster, of Tewksbury. A. M.

GERANIUM

100,000 Cuttings in the Sand.

These will be ready in November at the following prices. S. A. Nutt, Buchner, Heteranthe, \$1.25 per 100; \$10.00 per 1000. Perkins, Poitevine, Landry, Riccard, \$2.00 per 100; \$15.00 per 1000. Jean Viaud and M. de Castellane, \$2.50 per 100; \$20.00 per 1000. Bonnot, Castris, Acteon, Harrison, La Favorite, America, La Pilot and Jaulin in small quantities at \$1.50 per 100.

Pansies

500,000 Ready Now AND UNTIL DEC. 1st.

You make no mistake when you buy Herr's Pansies, they are the kind that make you money when they come into bloom. Free by mail at 75c per 100; by express, \$4.00 per 1000.

The Model Extension Carnation Support.

Flushing, Long Island,
Dec 11th, 1901.

MR. THERON N. PARKER,
Brooklyn, N. Y.

Dear Sir — I have used
your Wire Carnation Support
the last two years, in
all about 12,000. They fill
the bill in every particular.
Nothing could be more
satisfactory and would
give me a great deal of
pleasure if I can bespeak a
good word for you to the
trade and you are at liberty
to refer to me at any
time.

Very truly,
A. L. THORNE,
La Fayette, Ind.,
July 8th, 1902.

MR. THERON N. PARKER,
Harrison, N. J.

Dear Sir: — After using
your Model Carnation Support
in two of our houses
the past winter, we have
come to the conclusion that
it is perfectly adapted to
supporting carnations, and
shall use them on all our
plants the coming season.

We were much pleased
with the simplicity,
strength and neat appear-
ance of the support.

Yours truly

STOCK SCARCE AND TRADE BRISK.—GOOD PRICES REALIZED.—AN AMATEUR EXHIBITION.—GOOD DISPLAY AT THE FAIR.

Flowers are somewhat scarce this week, especially white, due partly to the very dark and cold weather. Roses bring from \$3 to \$5. Beauties are to be had for from 75 cents to \$3 per dozen. Extra good carnations run as high as \$2.50 to \$3, but the majority go at \$2. Chrysanthemums are beginning to appear from the home growers and some very fine flowers are to be had at from \$1.25 to \$1.50 per dozen. Violets are showing a marked improvement and prices have gone up slightly. Considerable funeral work is reported from all sections of the city.

The Engelmann Botanical Club held a flower show in the basement of the High School and about 1,000 people were in attendance. The show was of fruits and wild flowers and flowers from the gardens of the school children who had taken prizes in a garden contest. The show was a decided success. A good display of fungi was also to be seen.

The St. Louis Fair was held this week and the floral display was of the best. Of the prizes already awarded Wm. Schray & Sons took twelve firsts, two seconds and one third, Youngs' taking two firsts and twelve seconds. The fruit display is very complete and some first-class articles are to be seen.

The Plant Seed Company intends to move to their new location at 615 North Fourth street sometime this month on first of next.

Otto Koenig, of the Koenig Floral Company, was presented with a baby boy the first of the week.

The decorations at the Veiled Prophet's ball were very fine and the local papers commented very favorably on them.

The deciding ball game between the Tessons and Bernings was won by the latter.

Visitors: Isaac Spacht, Jerseyville, Ill.; W. H. Gullett, Lincoln, Ill.; C. H. Foreman, Louisiana, Mo.; J. C. Vaughan and J. S. Wilson, Chicago. R. J. M.

ELKHART, IND.—H. J. Seale, in charge at Lawndale, the beautiful country home of C. G. Conn, the millionaire band instrument manufacturer, is adding a carnation house to the range of conservatories.

Bargains FOR Florists.

We are headquarters for a general assortment of the necessary material and supplies that you are looking for. If you are about to improve or construct, consult us.

In connection with the dismantling of the Pan-American Exposition, we have for sale:

20,000,000 FEET of fine seasoned lumber, practically new, consisting of all sizes of joists, timbers, dressed and matched boards and flooring; also sash and doors.
50,000 FEET of roofing glass.

PIPE.

We are headquarters for pipe. We offer you:

100,000 FEET of 2 to 4-inch wrought iron, lap welded casing. We can furnish this material in three ways: Either with sleeve or jacket couplings, screwed ends and threaded couplings or with expanded cast iron flanges with bolts and nuts.

1,000,000 FEET of standard black wrought iron pipe, size ¾ to 12-inch. It is second-hand but has new threads and couplings and is in first-class condition.

1,000 TONS of galvanized wire 9, 10, 11, 12, 13, 14 and 15 guage.

50,000 FEET of 2, 3 and 4-inch cast-iron soil pipe and fittings.

100,000 FEET of garden hose, ¾ and 1-in.
75,000 FEET of cotton rubber-lined fire-hose, (rubber-lined in and outside), ranging in sizes 1 to 2½-inch.

VALVES and fittings of every kind.

BOX COILS for heating purposes.

RADIATORS, new and second-hand.

We also offer the following bargains in

Heating Boilers

50 CAST-IRON sectional heaters, capacity from 450 to 5,000 feet.

1 NO. 2 Standard Kroeschell hot water heating boiler.

Pittsburg.

STOCK NOT OVERPLENTIFUL AND TRADE BRISK.—CLUB DISCUSSES THE DAHLIA.—DOINGS OF GROWERS AND OTHERS.—NOTES.

Chrysanthemums are in, Bergmann, Glory of Pacific and Merry Monarch. They are very satisfactory in price and quality. Double violets are also with us, as are orchids, which are very fine. The new rose, Canadian Queen, has been received, and it will undoubtedly be a very satisfactory addition, even better than Morgan. Beauties are very much improved, Meteors also. Brides and Bridesmaids are slow in coming up to the mark. Carnations are also improved. Some fine Goethes are on the market.

Blind Brothers will have a house of excellent Golden Wedding and a house of Timothy Eaton chrysanthemums. They also have half a house of Gloire de Lorraine begonia. Blind Brothers have made remarkable strides in the six years they have been in business. In that time they have erected 50,000 feet of glass and anticipate further expansion in the future.

J. B. Murdoch & Company are delighted with the fine progress of their carnation plants. The entire stock is very vigorous and perfectly free from disease. Mr. Murdoch states that there are already over 250,000 buds in sight.

The Pittsburg and Allegheny Florists' Club held its monthly meeting on October 7, the discourses of the evening being confined to the dahlias, of which there were several exhibits. Thirty members were present.

George W. Goldner, of Reed & Keller, New York, was in a railroad wreck on October 3, near New Castle, Pa. His samples were destroyed but Mr. Goldner escaped injury.

W. L. Campbell, of Castle Shannon, will cut over 2,000 gladioli this week and the quality will be high.

Dave Geddes' new wagon was demolished in a runaway on Saturday.

John Ferguson has a house of fine Sprengeri. E. L. M.

View of a piece of ground 40 ft. respectively 41 ft. 6 in. in width, covered by one roof (old style), and also by three sections of our Patent "Short-Roof" Construction. Compare headroom over benches and number of supports.

56 MARION ST., NEW YORK CITY.

Greenhouse Piping Preservative

SOMETHING NEW.

For finest effects, most durable finish and satisfactory results,

LUCAS RADIATOR BRONZING LIQUID PAINT

has nothing to equal it on the market. It is an up-to-date specialty for preserving and beautifying greenhouse piping that is making a big hit wherever used.

Applied similar to other paints, the bronze being dusted on. Samples and prices free for the asking. Write to-day.

WATER.

If you want water only when the wind blows a windmill will do your work and cost less money than our Rider and Ericsson Hot Air Pumps, but if you want water every day while your flowers are growing and do not want your pump blown down when the wind blows too hard, no pump in the world can equal ours. We have sold about 20,000 of them during the past twenty-five years, which is proof that we are not making wild statements.

Our Catalogue "A 3" will tell you all about them. Write to nearest store.

Hydrocyanic Acid Gas in Greenhouses.

Some tests of hydrocyanic acid gas as a greenhouse fumigant were made under my direction by C. W. Warburton in the spring of 1902, as the basis of a graduating thesis at the Iowa State College. A fumigation box was built in the basement of the horticultural building for experimental work, and for the practical use of the gardener. Hydrocyanic acid gas had been used in the greenhouses with varying results. The houses contained many kinds of plants, some much more susceptible to injury than others, and when gas of sufficient strength to kill all the insects was used the more tender plants suffered. On the other hand, but few plants might be infested, and to destroy the insects on these the entire house had to be fumigated, which necessitated additional expense and danger. Neither would the size of the houses permit of them being quickly ventilated.

Another advantage of the fumigating box is that one calculation determines the amount of potassium cyanide and sulphuric acid necessary to produce the strength of gas wanted, and when they are purchased they can be put up in packages the right size to fumigate the box.

For anyone who has a greenhouse in which is grown a mixed collection of potted plants, I believe it will be found both practicable and profitable to provide a fumigating box to which any infested plants can be quickly transferred and exposed to the gas. The box in question is simply a closet three feet wide, six feet long, and the height of the ceiling. An outside window opens into the box and is hinged and so arranged that it can be opened from the outside of the box, allowing it to be quickly ventilated.

All the tests were made at night as previous experiments had proven conclusively that all plants are less susceptible to injury in darkness than in sunlight. In the experiments three objects were in view: (1) to determine how temperature influenced the effect of gas on the plants exposed; (2) to determine the effect of exposing plants to a strong gas for a short time; (3) to determine the effect of exposing plants to a weak gas (the "dilute method") for a long period. The following results were obtained:

EXPOSURE AT LOW TEMPERATURE.

The plants exposed included *Cyperus alternifolius*, *Artemisia maritima*, *Colceus* of several varieties, *Calla Ethiopica*, *nephrolepis*, *Cineraria hybrida*, *acaly-*

phas of several species, *Erythrina Crista-galli*, oleanders, *Kentia Forsteriana*, arecas, *Asparagus Sprengeri*, and several other varieties.

They were exposed for twenty minutes, using the gas at the rate of 0.15 grammes per cubic foot, at a temperature of 55°. None of the plants were injured by this exposure. The green flies which infested the callas and other plants were all killed, as were most of the mealy bugs. It was found necessary for effective work to break up the masses of mealy bugs in the axils of the leaves of the cyperus and on the oleanders. The spider on the erythras were practically uninjured. The scales with which the ferns and palms were affected were practically all killed by this exposure. The old mealy bugs were found to be very much harder to kill than the young ones. The work done with this exposure and at the temperature given was very satisfactory in its results.

EXPOSURE AT HIGH TEMPERATURE.

The same conditions existed in this experiment as in the former one except that it was performed at a temperature which ranged about 66°. A large number of coleus plants infested with mealy bugs were treated. The plants were small, but were well branched. The mealy bugs were greatly reduced in numbers. The plants were uninjured except for an occasional branch in which the cells had apparently collapsed. These branches afterwards dropped off. These plants showed more injury than similar ones exposed at lower temperatures.

HEAVY EXPOSURE FOR SHORT TIME.

Previous work in the greenhouse had shown that cacti of different species infested with the cactus scale (*Diaspis cacti*) and with mealy bugs were liable to injury if exposed to 0.16 grammes of cyanide per cubic foot for twenty minutes. A test was made, using 2 grammes per cubic foot, with an exposure of fifteen minutes. This was found to be very effective in killing the scale, and since the plants were uninjured, is to be preferred to the ordinary strength. The plants used in this experiment embraced species of *cereus*, *echinocereus* and *opuntia*. The differences in effect of this treatment and the ordinary one used in the greenhouse were no doubt largely due to the much lower temperature (a variation of 25°) and to the greater rapidity with which the gas could be removed from the box than from the greenhouse.

The method found so effective on the cacti was tried on several species of

palms and other stove house plants. The plants exposed were arecas, Kentia Forsteriana, nephrolepis and agaves. The plants were infested with scale of various kinds, the agaves being especially bad shape. The insects were all killed, and the agaves were also badly burned. The leaves showed no sign of injury for several days, but later turned yellowish-white in color and fell away. The other plants were not injured.

LIGHT EXPOSURE FOR LONG TIME.

The Henenway "dilute method" of fumigation was tried on a number of plants, but was not satisfactory. The plants showed more tendency to injury than when treated with the common method, and the insects were not much affected. The gas was used at the rate of 0.02 grammes per cubic foot and the temperature varied from 55° to 50°. The plants subjected to treatment were coleuses, acahyphas, oleanders and cyperuses. Several trials were made with this method but it was rejected as unsatisfactory.

Chrysanthemums, which were found to be especially susceptible to injury, were exposed to 0.15 grammes for twenty minutes, and to 0.2 grammes for fifteen minutes. These plants were badly infested with black aphid. The aphid were all killed by the treatment but the young growth of the plants was also burned. Only a few of the upper leaves of the plants were affected, and the injury was less than for the aphid. The sprouts from old plants, which had been growing under the edge of the greenhouse bench, were more severely injured than were rooted cuttings from the bench. The sprouts were softer, and had larger pores than the cuttings, and hence were more subject to injury.

SUMMARY.

The statement made by Messrs. Woods and Dorsett that "Plants were less injured by a short exposure to a relatively large amount of gas than they were by a long exposure to a relatively small amount, and that, on the other hand, a strong dose for a short time was most effective in killing insects," was fully borne out by the experiments. The "dilute method" of fumigation proved unsatisfactory. It was found that most plants are unable to withstand an exposure greater than 0.15 grammes per cubic foot for twenty minutes. The cacti and plants of similar nature were found less liable to injury than the rapid-growing, "leafy" plants. In most cases the injury resulting from the fumigation was less severe than that resulting from the attacks of the insects. The green and black aphid were found to yield most readily to treatment of all the common greenhouse pests. The mealy bugs and scales were only killed on application of gas more nearly approaching the danger line for plants, and the red spider cannot be kept under control by this method. On the whole the method is a very satisfactory one.

The main difference between the action of 0.15 grammes for twenty minutes and 0.2 grammes for fifteen minutes is that the latter density is strong enough to kill all the insects, while the gas may be removed before it injures the plants. The first strength mentioned will probably prove more satisfactory for general greenhouse work because of the time required for diffusion and ventilation, while the latter will be found advantageous for use in small and easily ventilated fumigating boxes like the one used in the experiment.

A factor which must be taken into consideration quite strongly is the temperature. At the lower temperatures the pores of the plants are more closely shut and the gas can penetrate to a less extent and hence can work less injury. It is advisable, therefore, to do the work at a temperature as low as may be obtained but probably not lower than 50°.

H. C. PRICE.

Isaac Kennedy.

The secretary of the Cleveland Florists' Club started in the greenhouse business at an early age, with his father in Greenfield, Mass., and worked in some of the principal rose growing establishments in Massachusetts until 1880, in which year he removed to Philadelphia and entered the employ of Robert Scott & Son, where he held the position of foreman for upwards of ten years. Three years were

ISAAC KENNEDY.
(Secretary Cleveland Florists' Club.)

spent in partnership with George Campbell, on Germantown avenue, Philadelphia, and six years more as foreman for John Burton, Chestnut Hill, president of the S. A. F. Mr. Kennedy removed to Cleveland in 1900, where he became a member of the J. M. Gasser Company, recently selling out his interest in that firm. He has been an active participant in all the affairs of the craft and the recent prosperity of the Cleveland Florists' Club is as largely attributable to his energy as to any other factor.

ROSES.

NOTES ON SEASONABLE TREATMENT.

All the young stock should now be in a vigorous state of growth and at this time of the year our careful attention is needed in order to succeed. The days are becoming shorter and the temperature is falling. As the plants are obliged to become accustomed to these conditions we should help them as much as possible.

Give plenty of air and thereby obtain a healthy, hard growth which will ward off mildew to a great extent. Of course judgment should be used as regards ventilating. As a general thing the temperature should not be allowed to go above 72° to 74° on Bride, Bridesmaid and

Golden Gate, but occasionally we have a day which is very windy, with the sun shining brightly. On such a day as this it is better to allow the temperature to rise a little than to ventilate fully and thereby cause a strong draught. It pays to have a house under the care of a careful and observing man. Such a man will be able to help the stock in such cases. Although a thermometer is a safe guide in regard to heat and cold, we are sometimes obliged to vary from it when we see that our plants are in need of a little different treatment.

With coal as scarce as it is at present it is a difficult matter to say anything in regard to heat, but nevertheless I will give my advice on the supposition that one is able to keep steam up, as this weather demands heat for roses if one wishes to grow stock which will bring good prices. For Bride, Bridesmaid and Golden Gate 58° to 60° is the proper night temperature, allowing it to rise to 70° during bright days, when you can ventilate freely.

For Liberty I should advise no lower than 62° at night. Of course this necessitates growing this rose otherwise than in a house with Bride, Bridesmaid or Golden Gate. If grown with these varieties it is very liable to go dormant and prove a failure. For a day temperature 75° is sufficient. This rose has proved itself to be a stubborn one to force and it is doubtful if it is a paying variety.

Many growers are going back to Meteor as a red rose, having become convinced that there is more money in it than there is in Liberty. The temperature for Meteor should not be lower than 65° at night in order to avoid buds which come with a blue color and what are called "bull heads" in shape. This rose has much to commend itself in spite of all that has been said during the Liberty boom. It does better after the days become longer and as a summer rose it is an improvement over Liberty, as it is a more double flower.

American Beauty, compared with our other winter roses, takes more time than any of the others in order to grow it properly. It is one which pays well in most localities when doing well, but unless one can obtain first-class flowers it is a failure. The most successful growers of Beauties are, I believe, those who devote their whole attention to this one rose. Although I have seen very good stock in houses where the middle benches were used for Beauty and the side benches for Bride and Bridesmaid, this plan is not always advisable, as American Beauty is very often in need of special treatment, such treatment, in fact, as would be detrimental to the Brides and Bridesmaids.

During the dark days the temperature and watering should have the very best of attention, such attention as only a careful and observing man can give. After a man has become accustomed to the soil in his houses he can tell a great many times whether it is in need of water or not by the appearance of the soil, but it is not always safe to go by the appearance only, as when syringing is done frequently the top of the soil is liable to appear moist while that near the bottom of the bench is too dry to promote healthy growth. A careful grower tests the soil often by digging down here and there through the house, so that he may know the exact condition of the soil around the roots.

Now that we are using more steam heat the syringing is valuable to the plants to promote a healthy, moist

THE ART INSTITUTE AT CHICAGO.

(Where the Horticultural Society of Chicago and Chrysanthemum Society of America hold their joint exhibition, Nov. 11 to 15, 1902.)

atmosphere, as well as to check the red spider. Syringe only on bright days, unless there is spider in the house, and in order to keep this pest in check direct the stream upwards, so it will strike the leaves from underneath, as this is where the spider does its work.

The first few crops to be cut are liable to come so that we cut quite heavily for a short time and then there is a check and a period during which the cut is very light. It is at such a time as this that a careful waterer will aid the plants. During the time the crop is on, the plants will use a liberal amount of water, but after the crop is cut off be careful not to water as heavily, as they do not require it.

R. I.

CARNATIONS.

SULPHUR-LIME TREATMENT FOR STEM ROT.

In the AMERICAN FLORIST for October 4, 1902, page 344, E. O. Orpet reports an instance in which sulphur and air-slaked lime placed around the stems of carnations seemed to prevent stem rot. For several years past this treatment has been occasionally recommended for carnation stem rot, but so far as I know its value has not been thoroughly tested by experiment.

In the first place, it should be understood that carnation stem rot is of two principal kinds. (1) The kind which causes the whole plant to wilt and die suddenly by rotting the stem just below the surface of the soil. This disease is caused by the fungus *rhizoctonia* and may be called *rhizoctonia* stem rot. (2) The kind which kills the plant gradually, a branch at a time. In this kind of stem rot the stem below the surface of the soil remains sound until long after the death of the plant. It is caused by the fungus *fusarium* and may be called *fusarium* stem rot. These two

kinds of stem rot should be carefully distinguished because they are entirely different diseases and may require different treatment. They seem to be about equally common.

In the autumn of 1898 the New York Agricultural Experiment Station made some experiments on the treatment of the *fusarium* stem rot of carnations at Floral Park, N. Y. A bench seventy-two feet long by two and one-half feet wide was filled with soil in which many carnations had died of *fusarium* stem rot the previous season. On September 7 the bench was set with 300 carnation plants of the variety Uncle John; 100 were set shallow, with the roots barely covered, 100 were set so deep that in many cases the soil came above the point of branching, and the remaining 100 were treated with flowers of sulphur and air-slaked lime as follows: Immediately after the plants were set the soil was removed from around the stems of the plants and 6.87 grammes (a heaping tablespoonful) of a mixture of sulphur and lime, equal parts, placed around the stem of each plant.

By November 4, less than two months after benching, the majority of the plants were more or less affected with *fusarium* stem rot. The actual number of plants either dead or dying was as follows: Plants treated with sulphur and lime, 81; deep-set plants, 77; shallow set plants, 77. By January 1, 1899, there remained only three living plants in the bench of 300. The destruction was complete and there appeared to be no benefit whatever from the use of the sulphur and lime and no difference between shallow-set and deep-set plants.

That the plants were not badly diseased when benching is shown by the fact that 200 other plants of the same lot were set in the opposite bench in the same manner (100 shallow and 100 deep)

and they produced a good crop of blooms. Only five died.

While the results of this experiment show plainly that the sulphur-lime treatment is a failure for the *fusarium* stem rot it does not necessarily follow that it would not prevent the *rhizoctonia* stem rot. Its value for *rhizoctonia* stem rot can be determined only by experiment.

F. C. STEWART.

TEMPERATURE AND VENTILATION.

Now that the heating of our houses is to become a part of our daily routine, we have another detail of carnation culture that requires careful attention and watching, namely the temperature of our houses. Not all but a goodly proportion of the trouble caused from sleepy carnations is due to temperature changes, or to the fact that the temperature is either too high or too low. Any one of these three things will cause a tendency to sleepiness in the blooms.

Extreme changes, such as allowing the house to run up to 80° or 90° during the day and then down to 45°, or even to 40°, at night will not only induce sleepiness but will also bring a good big percentage of bursted calyxes. There is not so much damage caused by the day temperature running up to 80° or a little over on a bright day if there is plenty of ventilation on the houses, but without such ventilation this temperature is ruinous, and the night temperature should then range from 45° to 55°.

A comparatively safe rule to follow is to have the difference between the day and night temperatures run from 15° on a cold; cloudy day to 25° or 30° on a bright, sunny day. The last figures should only be used for very bright days, with an abundance of ventilation on the houses. Where the houses are partly shaded the first figure should be used and on a very cold, dark day the difference

should be rather less than more than 15°. This variation has to be made according to the weather conditions, the location of the houses and the needs of the variety in question.

Keeping the temperature too high, either day or night, or both, will produce soft flowers and weak stems. The weakness of the stems can be overcome by what might be called the intensified fertilization employed by some growers, but the soft flowers will go to sleep, often before they leave the retailer's hands, and the grower will have one buyer less for his flowers.

If they are grown too cool they will not stand the warm temperature of the store when they are taken from the ice box and will certainly not stand the atmosphere they are likely to get in the home of the last purchaser. Getting the temperature too low will also bring a big lot of bursted calyxes, not only on those varieties that are subject to this trouble, but even on the iron-clads as well.

all those that do split their calyxes will give the best results in a temperature of 50° to 55°, keeping as near the lower mark as the requirements of the variety will stand. These temperatures refer to the night temperature. Varieties that come slowly and produce short-stemmed flowers will bring better returns if grown in the higher temperature, thus getting the crop into bloom when it is wanted. My experience with all varieties similar in color to Daybreak shows them to do best in the lower temperature.

Ventilation is a very important factor in making these regulations and where the higher temperature is used, ventilation should be very carefully attended to and put on the house a portion of each day, regardless of the weather, so as to change the air in the houses at least once every twenty-four hours, even if it does take some extra firing to keep the house right while the ventilation is on. When the lower temperature is used it may not be absolutely necessary to have the ventilation on every day but it should be on at

least once in every two days regardless of the weather, and of course in both cases it should be on whenever the house gets up to its 70° or 80°, as the case may be.

Where the grower has a number of varieties in one house a fairly safe rule is 50° at night and 70° during the day.

ALBERT M. HERR.

WITH THE GROWERS.

POEHLMANN BROS., MORTON GROVE, ILL.

There are few places in the vicinity of Chicago more worthy of a visit than that of the Pochlmann Bros. Company, at Morton Grove, a short distance from the city, on the Chicago, Milwaukee & St. Paul Railroad, and consisting of some 300,000 square feet of glass. Few equal and none excel this establishment in the production of first-class flowers. Soil, location, and shipping facilities are of the best. The main section of the establishment is within a stone's throw of the railroad station, where all freight can be handled in a most expeditious manner, which is a very important factor in the flower producing business in these days of keen competition.

August Pochlmann, the junior and very active member of the firm, which consists of three brothers, takes the visitors in charge. The carnation range of twelve houses was first visited. These plants had suffered considerably from excessive rains during the summer season, and Mr. Pochlmann said they were not nearly as good as last year but, considering the siege they had gone through, were looking remarkably well and gave promise of making good shortly.

The fourteen chrysanthemum houses were next inspected, and one could not help but admire the evidence of excellent culture in their make up. Clean, healthy, bright foliage, and uniformity of size in the varieties was the rule. A house of Col. Appleton gave promise of being extra fine. Nearly all the early kinds had been disposed of and the houses were being prepared for carnations. Those houses containing the later varieties are to be used for bulbous stock and pot plants of various kinds.

AMERICAN BEAUTY ROSES AT POEHLMANN BROS. CO, MORTON GROVE, ILL.

In an article several years ago there was a strong argument made for growing carnations in a higher temperature, the writer claiming that the time to have carnations is when they are wanted, not when everyone has them to burn, and he advocated something like a rose temperature for them. There is no question but that many of our newer carnations do best in what would have been considered some years ago a very high temperature for them; neither is there any doubt but that many of our carnations are produced in a temperature that is too high for the production of long-keeping blooms. It is up to each grower to strike the happy medium that will produce a fair crop of good keeping, high-grade flowers. The man who sacrifices quality for quantity will soon find his flowers traveling in the second or third class grade.

It is simply impossible in an article of this kind to lay down any set rules for carnation culture, even in reference to such a matter as the temperature of the houses, but a little observation on the part of each grower will soon enable him to govern his place so as to obtain the best results. All such varieties as do not split their calyxes can usually stand 45° to 50°, with a preference for the 45°, and

CONNECTING PASSAGeway IN THE NEW RANGE OF POEHLMANN BROS. CO., MORTON GROVE, ILL.

NEW RANGE OF POEHLMANN BROS. COMPANY, MORTON GROVE, ILL.

I might mention here that 30,000 lilies are grown, *Harrisii* and *longiflorum*. In addition to these 160,000 Dutch bulbs are handled, besides a large quantity of French bulbs and freesias, all of which means an enormous amount of work to handle and flower successfully. A large amount of *stevia* is grown and is flourishing. Two houses are devoted to *mignonette* and it proves a paying investment when done right.

The new range of detached Beauty houses containing 30,000 plants came in for inspection, and right here is to be seen the evidence of careful cultivation, for a more uniformly better lot would be hard to locate anywhere. No indications of blackspot, mildew or yellows were to be seen. What proved to be the most interesting feature was the excellence of the plants which had been carried over the second year. The plants had all been cut back and replanted into fresh soil. This, in itself, is a very doubtful experiment, but here it seems to be a success, yet, Mr. Poehlmann is not in favor of the universal adoption of this plan, as the one-year plants are more certain to give good results in midwinter. The side benches in this range are planted to Brides and Bridesmaids, which are in fine growing condition and producing excellent results.

The plan of detached houses for Beauty growing is considered by this firm to be better than the connected plan, inasmuch as the shade is reduced to a minimum and the sun's rays have a more beneficial effect upon the soil. Better results are thought to be obtained in midwinter, but this plan is open for discussion and it is a difficult point to decide, as equally good results have been obtained by the connected method of construction. However, seeing is believing, and the excellence of the stock grown here would seem to warrant this firm in building their Beauty houses on these lines.

Another section of the establishment some little distance from the main part, presided over by Adolph Poehlmann, was visited. Here nothing but tea roses are grown. This range consists of about 50,000 feet, all connected and heated by steam and hot water. The stock here, as in the old place, was in the same excellent condition and gave promise of producing an abundance of bloom throughout the season. Here preparations are being pushed for erecting next year an additional range of 116,000 feet. This will give a total of over 400,000 square feet of glass. Here is a firm which started ten years ago with a couple of small houses and a limited capital, erecting yearly ranges of 100,000 feet of glass and making good returns on their investment. Truly, the western grower is a hustler. John Poehlmann, the third member of the firm, presides over the selling department in the Chicago market in a way well known to the trade. ECHO.

Rambles With St. Louis Growers.

A visit to the greenhouses of Wm. Schray & Sons found things in fine shape. Although three wagons had taken the best plants on the place to the Fair, which was being held that week, there was enough left to fill all available space, so that they were not missed. They have a nice lot of poinsettias in pots, and smaller ones in pans, that have a good color and will be in fine shape for the holiday trade. In the same house are some very fine plants of *Begonia Gloire de Lorraine*. Some good plants of *Farfugium grande* occupy one corner of this house.

Chrysanthemums occupy their usual amount of space in this establishment, which is three houses, and a very promising lot they are. Timothy Eaton and Col. Appleton are fine and, as Julius

Schray says, it gives a man a pleasure to have a house full of them. Other varieties come in for their space and are very good. One house is almost entirely devoted to Mr. Schray's seedlings, of which he has in the neighborhood of seventy-five to 100. One, a yellow, which by the way is the first yellow seedling that he has ever raised, is very promising, as it has a heavy stem and good foliage. Another is a pink, resembling the pink that was sold to Mr. Hill last year. Another has the foliage of Mrs. E. D. Smith, but the color is not visible as yet. There are, besides, several good sports that will be tried.

Some very fine ferns are to be seen here. Boston ferns are in a healthy condition. *Adiantum cuneatum*, of which they have a fine lot, will only do well in one house on the place. They have also a large variety of ornamental and useful ferns. A bench of young *Kentia Belmoreana* is in good shape. This is one of the few places in this city that grows orchids.

The few roses grown are in fine shape and the same is true of the carnations. The *Harrisii* lilies that are already taken in are strong and healthy. They will grow quite a number of them this winter. A new boiler of about twenty-five horse-power will be put in this week to replace one of the old ones. This place is much scattered, being made up of sixteen houses all told.

A visit to F. J. Fillmore, found him celebrating his fifty-third birthday by working hard at making up funeral designs with his better half and also preparing to send his twin Florida boilers into exile in the woodshed. These boilers used to be the pride of Mr. Fillmore's heart, and many a joke has been made in the Florists' Club concerning them, but now that hard coal is so very expensive he has taken them out and has installed two Huxton boilers, one of thirty horse-power, nicknamed "Jumbo"

by him, and a smaller one for his rose house, called "Midget." "Jumbo" is already connected and is in good working condition. His greenhouses make their usual neat and clean appearance and the plants are in the same condition. His carnations are exceptionally good, especially Flora Hill, which is now producing nice large flowers. His roses are coming on strongly and some few are allowed to bloom. He has very few chrysanthemums this year and they are mostly in pots, clean and healthy.

Mr. Fillmore has a very odd chair, sitting in his office, with a high back, and a writing board attached to the right arm. When asked concerning it he will tell you that it was made in 1820 and was the property of the founder of the Missouri Botanical Garden, the late Henry Shaw. It was presented to him lately by Mrs. Edon, the housekeeper for Mr. Shaw. R. J. M.

Gardeners' Gossip.

At the last meeting of the Gardeners' and Florists' Club of Boston E. O. Orpet gave an interesting talk in an informal way on subjects that are of everyday interest to both branches of the craft, telling of the value of pedigree selection of violet stock as demonstrated by plants of the third generation and the efficacy of Ivory soap as a remedy for red spider on violets and mildew on roses as well as for all species of aphids.

The stem rot of gardenias and carnations he said was checked to a considerable degree by the use of lime and sulphur, but if it is inherent to the stock, it is impossible to eradicate it except by careful propagation, and the value of the latter system was impressed upon the hearers as one of the vital points to be observed.

The much discussed Shasta daisy was stated to be a desirable herbaceous plant as seen among forms raised from seed. By early sowing plants were obtained that bloomed freely all the season, but among them were many forms no better than the common white weed of the

pastures, while others were far superior even to *Chrysanthemum maximum*, which is no doubt concerned in the origin of the Shasta daisy. These, when propagated, will form an interesting and valuable addition to hardy border plants, as light frosts do not injure the late blossoms which at this time are most useful.

Where mushrooms are grown it was advocated to plant spawn early in August in benches where mignonette is sown, the soil being rich in nitrogen and the temperature of beds at that season warm enough to start the spawn and a crop will ensue more or less all winter, of a quality much superior to those grown under benches in the usual way.

An interesting and instructive discussion was the result of the condemnation of leaf mould as a potting material for orchids, the result of its use being the sure introduction of earth worms, gall flies and fungoid troubles as well as the extreme care needed to avoid over watering. Orchid cultivators were urged to begin raising plants from seed to get a race of plants that will produce cut flowers at times when the supply is short from the imported varieties, and Mr. Orpet told of the experiments being started elsewhere along these lines to supply the New York market, where orchids brought 75 cents per bloom at wholesale during the Newport season. The remarkable fact was brought out that orchids raised from seed, while always flowering at their own time, quite often produced two crops a year.

Among other interesting points the speaker very strongly advised the craft to take up the study of bees as of great interest on account of their wonderful and intelligent system in everything pertaining to their government, also as a source of profit but most of all for their value in the garden as fertilizers of fruit bloom, more especially in a wet season like the past. It was pointed out that by the culture of Italian strains the danger of stings to the operator is reduced to nothing.

The gossip was altogether a very interesting discussion of topics that are of everyday interest and provoked a discussion that was of benefit to all and the wish was voted that at some future time it might be continued.

A Decorated Automobile.

The picture of a decorated automobile is from a photograph taken on October 6, at Washington, D. C., during the parade of nearly 100 decorated self-propelling vehicles which was a feature of the great encampment of the G. A. R. The carriage in question won a silver loving cup as the most handsomely decorated of any in the line. The work was done by A. Gude & Brother and in the vehicle were Col. C. E. Wood, its owner, and Wm. F. Gude, ex-president of the S. A. F. and president of the Business Men's Association of Washington. The auto was a bower of roses, chrysanthemums and carnations. The front was completely covered with Kaiserin and American Beauty roses and the sides were gay with carnations and Asparagus Sprengeri, with huge satin bows and streamers. The rear of the carriage was banked with red roses and white chrysanthemums, while the wheels were of red roses.

Coming Exhibitions.

[Secretaries are requested to supply any omissions from this list.]

BOSTON, MASS., November 6-9, 1902.—Chrysanthemum show Massachusetts Horticultural Society. W. P. Rich, Sec'y, Horticultural Hall, 300 Massachusetts avenue.

CHICAGO, ILL., November 11-15, 1902.—First annual exhibition Chrysanthemum Society of America and twelfth annual exhibition Horticultural Society of Chicago, to be held jointly. E. A. Kanst, Assistant Secretary, 5700 Cottage Grove avenue, Chicago.

KANSAS CITY, Mo., November 3-8, 1902.—Flower show Convention Hall Directors, Kansas City, Mo.

LENOX, MASS., October 23, 1902.—Fall exhibition Lenox Horticultural Society. F. Herremans, Sec'y.

LOUISVILLE, KY., November 12-15, 1902.—Chrysanthemum exhibition Business Women's League. H. Nabz, superintendent, Louisville, Ky.

MADISON, N. J., November 6-7, 1902.—Seventh annual flower show Morris County Gardeners' and Florists' Society. C. H. Atkins, Sec'y, Madison, N. J.

MARSHALL, TEX., November 13-14, 1902.—Annual flower show East Texas Flower Association. W. L. Martin, Sec'y, Marshall, Tex.

NEW HAVEN, CONN., November 11-13, 1902.—Annual flower show New Haven Horticultural Society. Thomas Pottit, Sec'y, 316 Orange street.

NEW YORK, N. Y., October 30-November 6, 1902.—Annual exhibition New York Florists' Club. John Young, Sec'y, 51 W. Twenty-eighth street.

PHILADELPHIA, PA., November 11-15, 1902.—Annual autumn exhibition Pennsylvania Horticultural Society. David Rust, Sec'y, Horticultural Hall, Broad street below Locust, Philadelphia.

PROVIDENCE, R. I., November 13-14, 1902.—Chrysanthemum exhibition Rhode Island Horticultural Society. C. W. Smith, Secretary, 27-29 Exchange street, Providence.

ST. PAUL, MINN., November 10-12, 1902.—Chrysanthemum and orchid exhibition Ladies Auxiliary of the Northwestern Manufacturers' Association. Mrs. A. P. Moss, Sec'y.

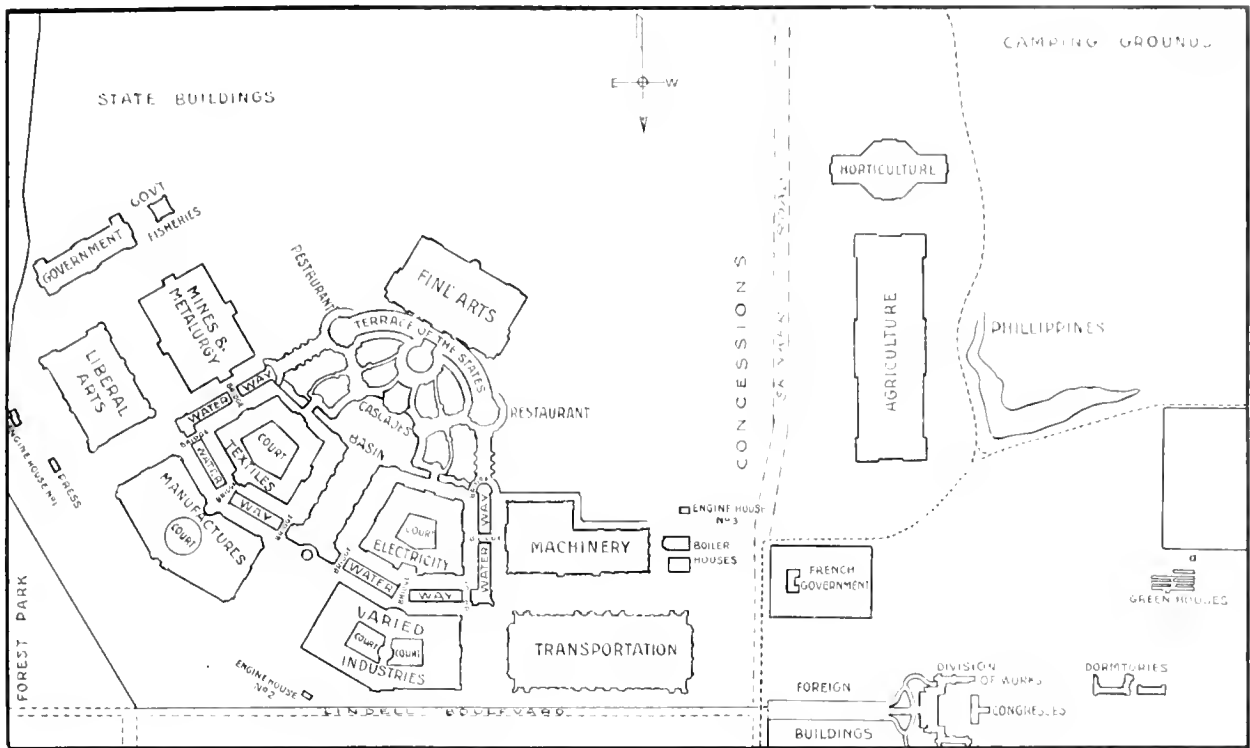

TARRYTOWN, N. Y., November 11-13, 1902.—Fourth annual exhibition Tarrytown Horticultural Society. Edw. W. Neubrand, Sec'y, Tarrytown, N. Y.

Concerning Exhibitions.

The schedules for chrysanthemum shows are now coming to hand from all over the country. As a rule the prizes are liberal and should furnish the necessary incentive to bring out the exhibitors in good force, especially in the cut flower classes. Unfortunately the labor and expense of growing high grade trained plants, the room required for their development and the difficulty and cost of their transportation are so much out of proportion to the prize fund of most societies and to the value on the exhibition floor, as far as the public is concerned, as to place the competition in

AUTOMOBILE DECORATED BY A. GUDE & BRO., WASHINGTON, D. C.

PARTIAL BLOCK PLAN OF THE ST. LOUIS WORLD'S FAIR.

this line out of the reach of any except the private gardeners on the few estates where such efforts are encouraged regardless of cost, and the great majority of the exhibitions will have to get along as best they can without these marvelous and expensive specimens of the expert gardeners' art.

It is a matter of regret that, instead of the pitiable attempts in the line of trained plants so often in evidence, growers intending to exhibit do not turn their attention to raising naturally-grown plants, particularly of the brighter varieties of the pompon classes for massed effect. It is possible to produce artistic results with these far beyond anything that can be accomplished with formal specimens or rigid, "one bloom to plant" material.

Most of the tables devoted to the displays of cut blooms are too high and much of the effect is thereby lost. An almost universal mistake is the overcrowding of the cut flower displays. In many instances the attractiveness of the show as a whole would be immeasurably enhanced were one-half or two-thirds of the material taken away.

It is hard to understand how the management of an exhibition can permit wilted, drooping flowers, table decorations or other floral designs to remain in sight after their beauty has fled. Such things must leave a most unfortunate impression on the minds of visitors who have paid to see the show. So soon as an exhibit begins to look untidy it should be understood that, if the exhibitor will not freshen it up, it is to be removed at once by the committee in charge.

In no enterprise is it more true than in a flower show that "what is worth doing at all is worth doing well." In introducing the public to an exhibition, large or small, the first essential is that the show shall be neat, finished, fresh and tasteful. Nothing in the way of tables, vases, pots or other accessories should be

tolerated that a good decorator would be unwilling to use in a private parlor or hall. It is only by adherence to this rule that the good repute of our profession can be maintained and the support of refined people assured for exhibitions.

S.

St. Louis World's Fair Buildings.

AN OPEN LETTER.

MR. F. W. TAYLOR, CARE HORTICULTURAL DEPT., ST. LOUIS, MO.

Dear Sir:—I acknowledge receipt of the block plan of the St. Louis World's Fair site and am greatly disappointed, and believe that disappointment will be general among those interested in horticulture, to note that the buildings for both horticulture and agriculture are apparently located without and at the side of the general plan and grouping of the department buildings, and such unsightly things as boiler and engine houses are between these departments and the general group of buildings for the fair.

The ground plan would seem to justify the conclusion that both horticulture and agriculture had been overlooked or forgotten in the first general plan. This relegating of horticulture to the back-ground is more in line with the usages of county fairs of twenty-five years ago, and although poorly located at Omaha, it is certainly in great contrast to the prominence given horticulture at the Chicago and Buffalo fairs. I believe the best recent opinions would locate exhibits of this kind where they would very fittingly beautify many parts of the general grounds. The large and prominent place allotted to "concessions" might well have been given to these two great departments and the money changes placed farther away than these beautiful displays which typify the best of gardening art. Yours truly,

(Signed) J. C. VAUGHAN.

Chicago, October 14, 1902.

New York.

CLUB HOLDS GOOD SESSION.—ORCHID COLLECTOR RELATES EXPERIENCES.—THE DETAILS OF THE WORK.—VISITORS ARE HEARD.—CRAIG PROPOSES EXHIBITION NOVELTIES.—CLUB TAKES ACTION ON THE COAL STRIKE.—THE MARKET.—VARIOUS NOTES.

The meeting of the New York Florists' Club on Monday evening brought out an attendance of about fifty, including many of the most substantial members. The regular routine, including satisfactory reports from the outing committee and the exhibition committee, passed off in usual order and Mr. O'Mara reported from the Plant Breeding Conference, where he had served as a club delegate. John E. Lager then entertained the members with a lengthy and very interesting account of his experiences in orchid hunting in South America, describing minutely the habitat of the various species sought, the methods of their collecting and shipment, the difficulties of travel through mountain fastnesses and river gorges, the dangers from wild animals and the many privations which must be met in this hazardous work. Mr. Lager has an enormous store of anecdotes and interesting facts at his disposal and could easily write a big book relating his many strange and thrilling experiences. A cordial vote of thanks was extended to him, also to H. Beaulieu for an interesting exhibition of new dahlias. It was announced that a large display of these flowers promised by Mr. Peacock had been delayed on the way and, therefore, had failed to reach New York in time for the meeting.

Among the visitors were Robert Craig and Ed. Fancourt, of Philadelphia, and F. Sander, Jr., of London, each of whom was called upon for a speech. Mr. Craig's effort was a gem in its novelty and wittiness. Expressing his deep interest in the approaching exhibition at Madison

Square Garden, he suggested the advisability of taking into consideration the great popularity everywhere now of athletic diversions and, as such sports are recognized universally in all modern literature and dramatic effort, and as he thought of the days of ancient Greece in the period of her grandeur, when feats of athletic skill held a foremost place in the minds of the people, it seemed that the New York club would do well to initiate something of this kind. Imagine, he said, the drawing power of a four-round boxing match between Julius Roehrs and J. N. May and the subsequent portrayal thereof by the sporting editors of the daily journals. He would enter Samuel Henshaw and S. C. Nash for a two days' walking match and would guarantee big gate money. The tumult of applause that followed when he drew a word picture of Julius Roehrs coming forth to have a laurel wreath placed on his brow fairly rattled the pictures on the wall.

Patrick O'Mara offered the following resolutions which were adopted by a unanimous vote:

WHEREAS, We, the members of the New York Florists' Club, having within our membership the great majority of the commercial florists in and around New York, are particularly dependent upon anthracite coal as fuel for heating our greenhouses, and

WHEREAS, Owing to the perishable nature of our products absolute ruin is impending, millions of dollars of invested capital is imperilled and the livelihood of thousands is at stake unless coal can be secured soon, therefore be it

Resolved, That we petition the governor of New York to use every available means to end the present intolerable condition in the coal industry, and be it further

Resolved, That a copy of these resolutions be sent to His Excellency, B. S. Odell, governor of New York.

The peculiar features of the cut flower market this week are the rapidly multiplying numbers of chrysanthemums, the quantity and beauty of the cattleyas and the scarcity of roses. In chrysanthemums Polly Rose is the best thus far. Especially fine are the specimens seen at John Young's. They are grown by Wm. Brennecke and are equal in size, finish, stem and foliage to many of the exhibition varieties that come later on. The cattleyas are elegant throughout, some of the blooms being exceedingly large and rich, and they are a most dangerous rival to the violets for corsage wear, in which line the demand is steadily increasing.

As to violets, it may be said that the growers have increased in number so rapidly and the competition is so keen that a grower sending inferior stock stands small chance for existence this year. Already a few parties are sending in violets of better grade than has ever been seen at so early a date. The demand is very light and the quantity altogether being received is not large considering the number of establishments devoted to this specialty. It is asserted by those who ought to be good judges that the three-dollar violet is not likely to materialize and that growers will have to be content with moderate values. There have been about twenty new violet-growing establishments added to the list in Rhinebeck this season. This is now the great violet center and Poughkeepsie, which held the lead so long, has dropped far in the rear. There are some fine establishments in the neighboring Highland, but in Poughkeepsie proper there is barely a dozen growers of any prominence left where at one time there were about sixty.

On October 11 F. S. Earle gave a public lecture on "Health and Disease in Plants"

at the Bronx Botanical Garden. The remaining lectures of the course are as follows: October 18, "The Growth of Plants in Darkness," Dr. D. T. MacDougal. October 25, "Some Historic Trees," Prof. L. M. Underwood. November 1, "A Meeting Place of Modern and Ancient Floras," Dr. A. Holleck. November 8, "The Stonecrop Family," Dr. N. L. Britton. The lectures are illustrated by means of lantern slides and otherwise.

Dahlias are lingering in the lap of the chrysanthemums and they really work together splendidly, the loose, informal style of the cactus varieties adapting them nicely for this purpose and their brilliant colors giving a liveliness to chrysanthemum combinations otherwise unobtainable.

Hicks & Crawbuck express great satisfaction over the results up to date of their new wholesale establishment on West Twenty-ninth street. Henry E. Riedel, well known for a generation in the New York trade, is on deck there.

One of the best white carnations seen in this market at present is the Bertha Rath, which Frank Millang is handling for its grower, Mr. Rath. It lacks a little yet in length of stem, but in all other points it is good.

Ford Brothers have completed the remodeling of their store, which now gives them nearly double the space they had formerly and is equal to the best of the wholesale stores.

Chas. Millang is having a conservatory erected in the rear of his cut flower store, to be used for palms and other commercial decorative plants.

Visitors: Sam. McClements, Pittsburg; Ed. McMullin, Boston.

Chicago.

RECEIPTS INCREASE AND AVERAGE RETURNS GO DOWN.—GOOD DEMAND FOR CHOICE STOCK.—CHRYSANTHEMUMS COMING IN HEAVILY.—VALUES A DISAPPOINTMENT TO THE PRODUCERS.—SALES SLOW.—GOOD VIOLETS.—ALL ABOARD FOR JOLIET.—HORTICULTURAL SOCIETY MEETS.—PERSONAL AND TRADE DOINGS.

By the end of last week there had been so great an increase in daily receipts that the market was back to normal, but Sunday's storm and Monday's cold served to check production, so that the surplus which had been feared for the middle of the week was postponed. However, there have been ample supplies in general lines and for early orders. Beauties have sometimes been hard to find in some special grade late in the day, and white carnations of high grade have also been a little short, but there have been too many of low grade colored carnations. In fact, supplies have been so ample that averages for the last seven days are much under the previous week, even with the big break which came on Friday and Saturday. The last few days have seen large increases in the number of chrysanthemums finding their way to market, and the universal report is that they are slow sale, considerably slower than a year ago and averaging the growers less money. There are all grades at hand, from very poor to very good, but most of the houses say that the scaling down in values applies all along the line. There are some good violets now at hand, but the market is erratic; one day the demand exceeds the supply and the next there is no demand at all. The city trade fell off after the stores stocked up Monday and has been quiet all the week. Out of town demand has continued fair, but the call is always for better and better goods,

with the result that while the select stock and fancy grades may hold up in price there is a larger and larger proportion of the receipts which has to be jobbed off to the Greeks.

The party visiting Joliet on invitation of the J. D. Thompson Carnation Company will leave the Union depot, Adams and Canal streets, October 22, at 8:35 a. m. on the Chicago & Alton R. R. There will be a special car on the train, on which round trip tickets will be furnished at \$1.05. The trip will include a visit to the penitentiary in the forenoon, after which dinner will be served. The party will then proceed to the greenhouses. Those who cannot arrange to go by the early train may take one leaving on the Rock Island R. R., Harrison street and Fifth avenue, at 11:45 a. m., where some one connected with the firm will take care of them. The invitation is extended to all persons in the trade. The train returning will leave Joliet at 6:30 p. m., and those who go by the Rock Island can return over the Alton in the special car.

At the meeting of the Horticultural Society of Chicago, October 13, the various exhibition committees reported progress. It was announced that Chas. R. McClune had been engaged as press agent and President Chadwick appointed P. J. Hauswirth, W. N. Rudd and E. A. Kanst to act with a similar number of members of the Florists' Club as a banquet committee during the forthcoming exhibition.

Eli Cross is shipping violets from Grand Rapids in a corrugated pasteboard box, the cost of which is only a cent or two more than the return charges on the old wooden box, and the saving in express charges is considerable. It is a box which might well be adopted by many growers.

Weber Brothers are just getting into their second crop of Bride and Bridesmaid, from carried over plants. Their prospects are fully up to the past two seasons, when they had as fine stock as came into the market.

J. A. Budlong is preparing to add another house 27x200, to be used for propagating carnations this winter and for chrysanthemums next fall. He is at present installing three additional boilers.

Albert Fuchs has completed two handsome apartment buildings at the corner of Lawrence and Kenmore avenues. One of them is named "The Netherlands," the other "The Fanny Richter," for his wife.

Henry Smith had his greenhouse builder down from Grand Rapids this week, inspecting modern local houses, for Mr. Smith is putting up two more structures of the most approved pattern.

Oncidiums are not largely handled in this market, but the retailers find them useful; they have paid Aming as high as \$1 a spray for good stock this week. Cattleyas are plentiful.

The Central Floral Company not only has its window full of fine stock, but each variety bears a card giving its name, which appears to interest passers-by very much.

The next meeting of the Florists' Club will be held in Handel Hall October 22, at 8 p. m. The election of officers for the ensuing year is scheduled for this meeting.

The new hall of statuary at the Art Institute is rapidly nearing completion. It will be ready in ample time for the big November flower show.

November 1 is All Saint's day, annually the occasion for a large business with New Orleans, and this year St. Louis will observe the day.

Wietors and Peter Reinberg, among others, are cutting chrysanthemums in good quantities.

The Chicago Carnation Company is sending Deamud some good American Beauty stock.

There was a frost October 13 which proved unlucky for unprotected stock outdoors.

J. C. Vaughan left October 14 on his fourth trip this season to the green districts.

A. Kennicott has been down at Carbondale for a few days, planting pæonias.

Max Kingier is back at Auling's after a five weeks' illness.

Visitors: A. S. Rice, Minneapolis; Eli Cross and Henry Smith, Grand Rapids; F. H. Holton, Milwaukee.

Boston.

A QUARTER CENTURY OF PROGRESS COMMEMORATED.—CALEBRATION AND A BANQUET.—ELABORATE MENU.—GOODSPEAKERS AND MERRY.—MARKET OPENS LIVELY.—GOOD DEMAND AND DIMINISHED SUPPLY.—VARIOUS NOTES.—VISITORS.

Friday, October 10, was the twenty-fifth anniversary of the establishment of the cut flower commission business in Boston by Patrick Welch and it was observed as a gala day, in a manner befitting an event so full of import to the wholesale flower trade of New England. The celebration culminated in an elaborate banquet at the Quincy House on Friday evening, where there were gathered half a hundred staunch friends and admirers of the enterprising, sagacious and genial example of a self-made man in whose honor they had assembled. Not only was the event of significance as marking the turning of a quarter century of existence for a successful business house but the remarks of the various speakers as they counted the progress of events and contrasted the old conditions with those of to-day, showed that all recognized that the occasion also commemorated appropriately the achievement of an honorable position among our commercial industries, for a business which from its inception had to endure more than the usual allowance of obloquy and abuse even at the hands of those it benefited the most. So it was a double triumph for P. Welch, as he sat at the head of such a table and looked around upon the faces of an assembly in whose personality was well represented every attribute of business and professional life which distinguishes and individualizes a Boston gathering. And the two other members of the firm of Welch Brothers, Messrs. David and Edward Welch, who have contributed, in their several departments, their full share towards the popularity which their house has attained, they also were accorded an equal part in the congratulations.

The "Old Guard" had naturally an active share in the preparation and carrying out of the programme. F. K. Mathison presided, Ed. Hatch made an admirable toastmaster, the decorations evinced the artistic taste of M. H. Norton, the viands were served with characteristic generosity by W. W. Edgar, and the music and the be-mottocd menus exemplified W. J. Stewart's ideas of what an up-to-date symposium demands. The figures "1877-1902" were portrayed in brilliant colors on the walls, long festoons of asparagus were draped overhead, the walls were banked with potted plants and the table was a veritable garden of bloom. The menu bore a striking portrait of Mr. Welch flanked by the quota-

tions "I awoke one morning and found myself famous" and "He wears the rose of youth upon him." Extracts from gifted authors and poets were interspersed among the various courses, the closing sentiment being "O bed! O bed! delicious bed! That heaven upon earth to the weary head!"

As to the speakers, there was "not a speck of mildew in the whole bunch." Mr. Mathison was witty and eloquent by turns in his opening address, as he referred to Mr. Welch as an exemplification of perpetual motion and complacent sagacity and recounted the beneficial effect of the great distributing agency which Welch Brothers had built up. He introduced Mr. Hatch as a toastmaster who could toast his audience without using up a pound of anthracite coal. Mr. Hatch's introductions were in the best of taste. The first speaker was George Moore, of Quebec, who was foreman at Waban Conservatories twenty-five years ago and was more or less of a factor in encouraging young Mr. Welch in the early days of his business venture. His

PATRICK WELCH.

address was well worthy of the close attention it received and very interesting historically, as the recollections of an intelligent and observant man. Prof. Louis C. Elson recited an original poem written for this occasion in which the personal characteristics and virtues of the three brothers were wittily exposed. Lafayette G. Blair and Judge C. W. Hoitt each ably represented the legal contingent and paid brilliant tributes to the several abilities of Patrick, David and Edward. The eloquence of Lawrence Cotter and of Wm. E. Doyle, who followed, was equally impressive and M. H. Norton, W. J. Stewart, Jackson Dawson and others spoke as only close associates of a quarter century can speak of an esteemed friend. Warren Ewell was simply inimitable and outdid himself if such were possible. P. Welch, when he rose to respond, received an ovation such as a president might envy. He was most appreciative and expressed his indebtedness to growers, buyers and colleagues generally and particularly to his late lamented friend, Edmund M. Wood, for what success had come to his lot. Letters of congratulation were presented from Patrick O'Mara, John Young, Thos.

Young, W. F. Sheridan, A. F. Barney, Carl Jurgens, S. J. Reuter, J. M. Galvin and others. Among the guests from outside the state were E. J. Harmon, Portland, Me., and A. M. Rennie, Providence, R. I.

The market opens up pretty well this week, with a good demand, local and shipping and a diminished supply of roses in all varieties and a disposition to stiffen up a little on prices. Violets are more plentiful and of better quality than thus far this season. Carnations are selling freely but not up to the mark in quality and there is much fault finding on the part of buyers at the price asked for such a quality. Chrysanthemums continue to increase in number, also in size and quality of flowers.

The first meeting of the Gardeners' and Florists' Club was held at Horticultural Hall on Tuesday evening, October 14, and the members were entertained by E. O. Orpet, of South Lancaster, who presented a lecture entitled "Gossip on General Gardening Topics."

Martin E. Tuohy, of South Boston, has opened a new store at 253 Main street, Charlestown.

H. Thiemann has been obliged to go to the Hot Springs on account of severe rheumatism.

Visitors: C. E. Mehan, Alfred Burton and Wm. Stephens, Philadelphia; W. T. Macoun, Ottawa, Ont.; Geo. Nicholson, England.

Philadelphia.

TRADE ON THE INCREASE.—OUTLOOK PROMISES A SPLENDID SEASON.—RECEIPTS INCREASE AND STOCK GRADES HIGHER.—THE PRICES.—MARKET WILL SOON BE READY TO OPEN.—COMMISSION DEALERS BARRED.—TWO FLOWER CENTERS NOW.—A VARIETY OF NOTES.

Business keeps up very well. The transient trade seems to be increasing and as there are a number of weddings in sight there will no doubt be a gradual increase until the debutant teas commence, which occasions give a grand impetus to the social season. The great scarcity of flowers the past few weeks has happily been relieved by larger shipments, there being considerably more flowers received the last week at all wholesale houses. Prices are a little stiffer, top Beauties having moved up to \$3.50 per dozen. In this class the stems are thirty-six inches long and the buds perfect. Select teas now range from \$6 to \$8. The quality is improving but considerable progress will be necessary before the winter standard is reached. Carnations range from \$1 to \$2 per hundred; two-thirds of the flowers are from outdoors or from buds that were on the plants when they were lifted, and are not up to the mark. We are now getting some nice double violets at 75 cents per hundred. Singles are getting better, 25 cents to 35 cents per hundred being the price. Chrysanthemums are now making their presence felt and are daily becoming more numerous. Mme. Bergmann, Willowbrook, Glory of Pacific and Polly Rose are the principal varieties. So far prices range from \$1 to \$2.50 per dozen. Cosmos is arriving in large quantities and these, together with the dahlias, of which there is still an abundant supply, keep the stocks in the stores very full and of great variety.

The market movement is getting along famously. The charter has been secured and everything points to an early and successful opening. Some time ago I mentioned in these notes that the matter of

the admission of commission men was laid over. It appears, however, that this was a mistake, as it was determined definitely that they should not be admitted. The list of subscribers to the stock is most gratifying, as it shows that all, with one or two exceptions, who cut any figure in this market, have connected themselves with the movement, either by purchase of stock or renting stalls. It is not thought that all who have subscribed to the stock will send their entire cut to the market, but the great majority will and sufficient acreage of glass is promised to insure a stock that should draw a great crowd of buyers. There is about 1,500,000 feet of glass represented in the 610 shares subscribed and if two-thirds of the product of this area is handled through the market it will be a great advantage to the trade in this city. Mr. Young takes exception to some of my remarks in this column relative to the location selected. What was said as to the flower center of the city being at Sixteenth street above Chestnut cannot be doubted, as at least four-fifths of the wholesale commission business is conducted there or within one block of this point, and as it has grown gradually, it follows that it has been found to be the most convenient place for all concerned. I did not select a place; I mentioned or pointed out a place that I thought had been overlooked by the committee, and while it did not suit, not being in a convenient or modern building, it certainly had location in its favor. There will now be two flower centers about ten minutes' good walking distance apart, which will be a distinct disadvantage to the buyers and, I believe, to the sellers as well. However, I believe the market will be a great success and Joseph Heacock, John Welsh Young, S. S. Pennock, Charles Mehan and others who have worked hard in the matter up to date deserve and should have all credit for what they have done.

At the establishment of Robt. Craig & Son, on the occasion of a recent visit Carnation Adonis appeared to be in splendid shape. Begonia Gloire de Lorraine, under the careful hand of John Winship, an accomplished grower of the old school, never looked better. Cyclamens in vast quantity, also grown by Mr. Winship, were in extra fine condition.

Everybody is overjoyed at the turn affairs have taken in the coal strike. Let us hope that the turmoil is indeed over and matters fixed up in such a way that they will stay fixed, and that there will never be any more trouble with this vital necessity.

Wm. K. Harris is growing a quantity of handsome pyramidal genistas (cystisus) this season. K.

Nashua, N. H.

TRADE TAKES A TURN FOR THE BETTER.—STOCK INSUFFICIENT FOR FUNERAL REQUIREMENTS.

Up to last week business was unusually quiet but during the past few days, owing to the frost of last week and several funerals, trade has been very brisk. Up to last Saturday the supply of stock was sufficient. At the funeral of W. D. Cadwell, agent of the largest cotton mills here, on Monday, some very beautiful and expensive designs were used. August Gaedeke & Company made up by far the larger portion, including a five-foot gates ajar and a forty-inch arch with closed book. Doyle and Newman, of Boston, were also well represented by their work. The

stock in the various establishments never looked better at this time of year. The coal supply for the winter has been secured.

St. Louis.

CLUB HAS AN ATTRACTIVE PROGRAMME OF ESSAYS.—BIG STORM PLAYS HAVOC.—NARROW BELT SUFFERS.—BUSINESS GOOD AND STOCK MORE PLENTIFUL.—FAIR A SUCCESS.

The following is the programme for the season at the St. Louis Florists' Club: October, "Hardy Bulbs for Cut Flowers," by R. J. Mohr; "Poinsettias for Christmas, Cut and in Pans," by C. C. Saunders. November, "How to Grow Cyclamens for Christmas," by A. Jablonsky; "Forcing Romans and Narcissi," by F. Fillmore. December, "Blooming Plants for Retailers for Christmas," by R. Tesson; "Best Method of Rooting and Growing Rubber Plants," by C. Beyer. January, "Forcing Harrisii Lilies for Easter," by Geo. Windler; "Growing California Violets," by J. Steidle. February, "Growing Carnations: Advantages of Early Planting," by Wm. Winters. March, "How to Grow Beauties," by M. Herzog. April, "Experience with Short-span Greenhouses," by J. F. Ammann; "Forcing Hydrangeas for Easter," by Emil Schray. May, "How to Keep an Attractive Show Window," by J. J. Beneke; "How to Grow Brides and Bridesmaids," by E. Emmons. June, "Paeonias and Other Hardy Plants for Cut Flowers," by Otto Koenig; "Best Method of Growing Sweet Peas Outdoors and Best Varieties for Cut Flowers," by A. S. Halstead. July, "Benefits Derived by Attending Conventions," by F. C. Weber. August, "Trade in Cut Flowers of the Past Season," by F. M. Ellis.

The St. Louis fair was most successful in point of attendance but the floral exhibits, while good, were not as extensive as has sometimes been the case. Some very fine plants were shown and the designs were excellent. Wm. Schray & Sons were the largest exhibitors and prize winners in the plant classes, with Young & Sons Company second. In many points the competition was close between them. In the classes for cut flowers, designs and table decorations Ellison & Tesson and Youngs competed so sharply that there was an almost equal division of the firsts and seconds. The association had offered \$500 in premiums and these three exhibitors took most of it.

Stock is coming in more plentifully this week but only a small part of it is fancy, either roses or carnations. The best roses bring as high as \$5 and \$6 per hundred, while carnations run about the same as usual, from 75 cents to \$2.50 per hundred. Chrysanthemums are beginning to come in more plentifully and bring from \$5 to \$20 per hundred. Cosmos has been a drug on the market, as violets come very near being, bringing from 25 cents to 40 cents per hundred. A considerable amount of funeral work has used up everything in white.

A very hard rain and hail storm swept over this city Sunday night but fortunately was not very much spread. The Egging Floral Company had a great number of lights destroyed, while Chas. Beyer, just a mile farther south did not even hear the hail. A few others in the direct path of the storm had a little glass broken. Egging's loss was \$2,500, insured. The Michel Plant and Bulb Company, Mrs. M. Ayers, Miss Mary Oster, tag and A. Brix are among those who

received injury, from \$100 to \$2,500. Kirkwood had a touch of it also.

A forged check swindler has been operating among the local florists. It is the old scheme of ordering flowers sent and offering a check which requires a few dollars change. Among those who lost are the Egging Floral Company, the Deimer Floral Company and Rose Aruta, each of whom tells the police that the man was so smooth that he awakened not the least suspicion. He is described as 35, five feet nine inches tall and well dressed. R. J. M.

Detroit.

CLUB LISTENS TO A BOTANICAL DISCUSSION.—ARBORETUM PLANNED.—TRADE GOOD AND SUPPLIES OF STOCK INADEQUATE FOR THE DEMAND.—A WEDDING.

Thirty members of the club were present at the regular meeting last Wednesday evening to listen to an address by S. Alexander, the park botanist, on "Botanical Classification of Plants and Flowers." The lecturer was well provided with many specimens of trees, plants and flowers which he used to good advantage in making his remarks both instructive and highly interesting. Mr. Alexander has undertaken the establishment of an arboretum at Palmer Park and is endeavoring to have the park commission make an appropriation for the establishment and maintenance on Belle Isle of an herbal botanic department on similar lines to an arboretum and identical with the only one of its kind in this state, which is at Lansing, and where all kinds of plants and flowers indigenous to Michigan are collected. At the next regular meeting of the club, November 5, Professor Taft will address the members on some subject of his own selection.

Trade conditions are good and business continues to increase daily. Carnations are improving in quality, but the supply is much short of the demand. Chrysanthemums are beginning to come in more plentifully and are easily disposed of. An extraordinary demand for Beauties is noticed, but the supply is short. Violets are eagerly sought for and, although several of the local growers are picking a fair quantity, the supply is not sufficient.

George Browne, of Greenfield, was not at the club meeting Wednesday evening; his presence was required at a marriage ceremony at the same hour. He sent the cigars, however, to the hoys of the club.

On Saturday evening, October 4, Geo. Reynolds and Harry Smith entertained a few members of the club at Doston's cafe at Grosse Pointe. J. F. S.

Cincinnati.

CLUB MEETS AND TRANSACTS ROUTINE BUSINESS.—BANKERS SAY FLORISTS' PLANTS TOO SMALL.—SHOW PREFERENCE FOR PARK STOCK.—VARIOUS NOTES.

The regular monthly meeting of the Florists' Society, held October 11, was well attended and a good deal of routine business attended to. The schedule of premiums for the November exhibition of chrysanthemums was adopted and the list of prizes offered ordered to be mailed to the different growers. A committee consisting of Messrs. Rudolph, Ohmer, Ball, Rodgers and Schwartz was appointed to secure the necessary notices in the daily press. Ben. George will be the officer of the day. A vase of Enchantress carnation from the Thompson Carnation Company, Joliet, Ill., was on exhibition and favorably commented upon.

The Ohio State Bankers' Association held its convention here this week and wound up with a big banquet. The committee in charge of the decorations claim that the local florists have not plants large enough to decorate the hall and called upon the Board of Public Service to get the plants from the city greenhouses. Luckily the matter was referred to Park Superintendent Critchell, who threw cold water on their desires. I think that with a little perseverance and hard cash the bankers could be supplied by the local florists with all the plants they could use.

We are going to have another wholesale house in the near future and rumor has it that Louis Kyrk, now at McCullough's, will be the manager.

Business is fair and a nice lot of flowers is being sent in. The only scarcity seems to be in carnations.

Mr. and Mrs. James B. Allan are in Boston, visiting Mr. Allan's parents.

J. Goldman, of Middletown, was a visitor this week.

We had the first killing frost Tuesday night. D.

Cleveland.

CLUB HOLDS WELL ATTENDED MEETING.—NEW CARNATION SHOWN.—BUSINESS VERY GOOD.—NOTES OF PERSONAL AND OTHER DOINGS.

The club held its regular meeting October 13 and was very well attended, some thirty members being present. J. D. Thompson sent a vase of Enchantress carnation for exhibition, which was very much admired and received the endorsement of the club as being the best carnation of its color extant. A number of our new members were present and seemed to enjoy themselves thoroughly, bowling, some good scores being made.

Business is all that can be desired. Several large weddings have helped things along, Smith & Fetters having the major portion. Mr. Fetters has returned from Arizona for a couple of weeks, looking the picture of health. I am glad to state that his partner, Mr. Smith, is recovering rapidly from his recent attack of illness.

Fred. Aul was as busy as usual when the writer called. His chrysanthemums were found to be up to the standard. Thousands of vincas, ivies and hydrangeas were being housed. No matter how busy he is, he generally finds time to attend the club meetings.

The F. R. Williams Company is sending in some fine stock. Their houses of Bride, Bridesmaid and Meteor are second to none, the latter being exceptionally fine.

James Wilson has everything in ship-shape order for winter and, if the present condition of the stock counts for anything, he will be right in it this winter.

Wm. Smith, of Madison avenue, is running his roses over the second year. If they turn out as well as they did last year he will be right in it. Echo.

Lowell, Mass.

TRADE HEAVY FOR THE SEASON AND SUPPLIES ON THE INCREASE.—CHRYSANTHEMUMS SERVE TO FLATTEN PRICES.—NOTES.

At present the cut flower market is in excellent condition, with the supply of stock gradually on the increase. For the past two weeks the market has been short of the demands, which have been heavy for the time of year. Chrysanthemums are being cut in large quantities. Bergmann, Polly Rose, Glory of Pacific

and Mouravia are the ones that are coming in at present. Business continues to keep up, something doing all the time, and everybody seems to be getting a slice of what is going on. No frosts have visited us so far and some of the small growers who are minus coal are praying with a good many others that it will hold off for a while longer. At this late day there seems to be no end to dahlias, which are being shipped to town in immense quantities. Red and yellow are the colors that predominate and make very attractive window displays. With the stately chrysanthemum army on the move and steadily on the increase it has put an end to the fancy prices realized for carnations the past two weeks. Violets are now to be had in good supply and quality.

Henry Caldwell, formerly of Lowell, but now employed on the French estate in North Easton, was in town last Saturday, renewing acquaintance.

Frank Faulkner has severed his connection with the old Sheppard place, to go to work for J. Lewis Lomis, at Washington, D. C. A. M.

Providence, R. I.

STOCK PLENTIFUL AND DEMAND NOT HEAVY.—PRICES TEND DOWNWARD.—VARIOUS TRADE NOTES.

Up to October 6 all hothouse flowers had been scarce and hard to obtain when the orders came in, but since that time the market has eased off on prices and filled up on stock until now it is possible to secure roses at \$2 to \$5 and carnations at \$1.50 per hundred. Chrysanthemums of ordinary type bring \$1 and \$1.50 per dozen wholesale although not in very good demand as yet. The weather has been poor for business, damp and cloudy.

Mr. Glass is now in charge of the Rhode Island Greenhouses since Mr. Cameron's retirement. He was formerly with Edgar, of Waverley and Spencer Bros., of Bristol, N. H. The range is kept in nice condition always, and Mr. Glass expects a profitable season.

W. S. Nichol, of Barrington, still holds close to his Wild Rose carnation which is in full crop at present. It is a nice flower for design work.

Almy is in full sway with his carnations, violets and chrysanthemums, especially the latter, which are very good this season.

L. Williams is off crop on everything, but has a nice round lot of chrysanthemums showing up strongly.

John Wood is again on the move, this time to Westminster street, below the Arcade.

F. Macrea's roses are coming in regularly now. M. M.

BATH, ME.—The Kennebec Greenhouses have been incorporated with \$10,000 capital stock. J. S. Hyde is president and treasurer.

EVANSVILLE, IND.—Johanna M. Niednagel, wife of Julius Niednagel, died October 5, as the result of paralysis. She was in her forty-ninth year.

ALEXANDRIA, IND.—George Rentschler, of Janesville, Wis., has purchased the Alexandria Greenhouses and leased the ground on which they stand.

SYRACUSE, N. Y.—The fine new range of steel-frame structures at Oakwood Cemetery are the work of the Phillips Manufacturing Company, Jersey City, N. J., from the plans upward, including the heating.

Meetings of Florists' Club.

The accompanying list gives the cities in which there are active florists' clubs. Following the name of the club is the place of meeting, the day of meeting, the hour and the name and address of the secretary:

BALTIMORE, MD.—Gardeners' Club of Baltimore, Royal Aramum building, 18 W. Saratoga street. Second and fourth Monday of each month, at 8 p. m. John J. Perry, Sec'y, Gay and Eager streets.

BOSTON, MASS.—Gardeners' and Florists' Club of Boston, Horticultural Hall. Meets second Tuesday of each month. W. E. Fisher, Sec'y, 18 Union Terrace, Jamaica Plain, Mass.

BROCKTON, MASS.—Brockton Gardeners' and Florists' Club, store of W. W. Hathaway, Times Building. First and third Tuesday of each month, at 8 p. m. W. W. Hathaway, Sec'y, Brockton, Mass.

BUFFALO, N. Y.—Buffalo Florists' Club, 481 Washington street. Second Wednesday of each month, at 8 p. m. Wm. Legg, Sec'y, 1440 Delaware avenue, Buffalo.

CHICAGO, ILL.—Chicago Florists' Club, Handel Hall, 40 Randolph street. Second and fourth Wednesday of each month, at 8 p. m. George Wiehoboeber, Sec'y, 413 Elm street, Chicago.

CINCINNATI, O.—Cincinnati Florists' Society, Jabez Elliott Flower Market. Second Saturday of each month, at 8 p. m. Frank W. Ball, Sec'y, 437 Main street.

CLEVELAND, O.—Cleveland Florists' Club, Progress Hall, 341 Detroit street. Second and fourth Monday of each month, at 8 p. m. Isaac Kennedy, Sec'y, Woodcliffe, Lake avenue-Cleveland.

DENVER, COLO.—Denver Floral Club, 323 Charles Block. Second and fourth Friday of each month, at 8 p. m. F. T. Rushmore, Sec'y, 2316 Franklin street.

DETROIT, MICH.—Detroit Florists' Club, Cowie Building, Farran and Gratiot avenue. First and third Wednesday of each month at 8 p. m. J. F. Sullivan, Sec'y, 214 Woodward avenue.

HARTFORD, CONN.—Hartford Florists' Club. Second and fourth Tuesday of each month at 8 p. m. J. F. Coombs, Sec'y, 688 Main street.

INDIANAPOLIS, IND.—State Florists' Association of Indiana, Commercial Club rooms, Indianapolis. First Tuesday of each month, at 8 p. m. H. Junge, Sec'y, 456 E. Washington street Indianapolis.

MONTREAL, QUE.—Montreal Gardeners' and Florists' Club, Alexandria rooms, 2204 St. Catherine street. First and third Monday of each month. W. H. Horobin, Sec'y, 23 Closse street.

NEW YORK, N. Y.—New York Florists' Club Civic Hall, 128 East Twenty-eighth street. Second Monday of each month, at 7:30 p. m. John Young, Sec'y, 51 West Twenty-eighth street, New York.

OMAHA, NEB.—Nebraska Florists' Society, City Hall. Second Thursday in each month at 8 p. m. Louis Henderson, Sec'y, 1519 Faraom street, Omaha.

PHILADELPHIA, PA.—Florists' Club of Philadelphia, Horticultural Hall, Broad street above Spruce. First Tuesday of each month at 8 p. m. Edwin Lonsdale, Sec'y, Wyndmoor, Philadelphia, Pa.

PITTSBURG, PA.—Pittsburg and Allegheny Florists' and Gardeners' Club, at rooms of Pittsburg Cut Flower Co., 504 Liberty street. Second Thursday of each month, at 8 p. m. T. P. Langhans, Sec'y, 504 Liberty street, Pittsburg.

PROVIDENCE, R. I.—Florists' and Gardeners' Club of Rhode Island, 95 Westminster street. Providence. Second Thursday of each month, at 8 p. m. Alexander Rennie, Sec'y, 41 Washington street, Providence.

RICHMOND, IND.—Richmond Florists' Club, Commercial Club rooms. First and third Friday of each month. H. C. Chessmann, Sec'y.

SALT LAKE CITY, UTAH.—Salt Lake Florists' Society, office of Huddart Floral Company, 214 E. Second South street. Second and fourth Friday of each month. P. T. Huddart, Sec'y.

SAN FRANCISCO, CAL.—Pacific Coast Horticultural Society. First Saturday and third Monday of each month. Thos. H. Munroe, Sec'y.

SEATTLE, WASH.—Seattle Commercial Horticultural Club, First and Cherry streets. First Wednesday of each month. Wm. Hopkins, Sec'y, 622 First avenue.

ST. LOUIS, MO.—St. Louis Florists' Club, Odd Fellows Hall No. 2, Ninth and Olive streets. Second Thursday of each month, at 3 p. m. Emil Schray, Sec'y, 4101 Pennsylvania avenue, St. Louis.

TORONTO, ONT.—Toronto Gardeners' and Florists' Association, St. George's Hall, Elm street. Third Tuesday of each month, at 8 p. m. W. C. Jay, Sec'y, 438 Spadina avenue.

UTICA, N. Y.—Utica Florists' Club, 183 Genesee street. First Thursday of each month at 8 p. m. J. C. Spencer, Sec'y.

WEST HOBOKEN, N. J.—North Hudson Florists' Club, store of H. C. Steinhoff, Hudson boulevard, West Hoboken. First Tuesday of each month, at 8 p. m. Geo. F. Rogge Sec'y 616 Washington street, Hoboken.

THE AMERICAN FLORIST

EIGHTEENTH YEAR.

Subscription, \$1.00 a year. To Europe, \$2.00. Subscriptions accepted only from those in the trade.

Advertisements on all except cover pages. 10 Cents a Line, Agate; \$1.00 per inch. Cash with order.

No Special Position Guaranteed.

Discounts are allowed, only on consecutive insertions, as follows—6 times, 5 per cent; 13 times, 10 per cent; 26 times, 20 per cent; 52 times, 30 per cent.

Cover space sold only on yearly contract at \$1.00 per inch, net, in the case of the two front pages, regular discounts applying only to the back pages.

The Advertising Department of the AMERICAN FLORIST is for florists, seedsmen and nurserymen and dealers in wares pertaining to those lines only. Orders for less than one-half inch space not accepted.

Advertisements must reach us by Wednesday to secure insertion in the issue for the following Saturday. Address

AMERICAN FLORIST CO., Chicago.

SOME good kinds of peonias are as scarce as hard coal.

IN nearly all lines of the trade there is much demand for intelligent help.

MANETTI rose stocks, both the English and French, are reported scarce.

THERE is no class of consumers to which the news of the settlement of the coal strike is more welcome than to the florists.

AMERICA is one of the few carnations raised in the United States that are attracting the attention of English growers.

GOOD judges of carnations speak in very high praise of Enchantress as seen at the J. D. Thompson Company's houses at Joliet during the past two weeks.

THE mailing label on your paper shows when your subscription expires; when you send your renewal note that the date changes within two weeks; it will serve as your receipt.

Naturally.

ED. AM. FLORIST:—The adv. in your paper brought more than twice the amount of orders of any other paper. Greene, N. Y. THE PAGE SEED CO.

American Carnation Society.

DEPARTMENT OF REGISTRATION.

Gunnar Teilmann, Marion, Ind., registers Marion Beauty, a dark velvety scarlet, large fringed flower, a fine producer and grower; cross between Gen. Macco and Flora Hill.

ALBERT M. HERR, Sec'y.

The Use of Cement.

The following paragraph from the *Toronto World*, though addressed primarily to Canadian readers, is even more applicable to conditions in the United States, according to the Bureau of Statistics of the latter country: "The use of Portland cement is in its infancy and the manufacture of it on a large scale is only beginning in this country. Cement promises to replace stone for all kinds of heavy foundations and other wall works, to replace stone for paving, to replace brick very largely for building, and to replace lumber where lumber has been used. Indeed, cement will soon be, next to steel, perhaps more than steel, the chief building material of this continent. Our houses will soon come to be of cement and every day sees the field for the use of cement growing at a surprising ratio."

Greenhouse Building.

Hartland, Me.—Fuller-Osborne Company, range of houses.

Gardner, Mass.—J. R. Davis, cucumber house 20x140. Mrs. Geo. S. Colburn, house 20x125.

Hampton Falls, N. H.—J. A. Dow & Son, one house.

Grand Rapids, Mich.—Henry Smith, two houses.

Chicago, Ill.—J. A. Budlong, house 27x200.

Annapolis, Md.—E. A. Seidewitz, two houses.

Wintering Caladiums.

ED. AM. FLORIST:—What is the best method of wintering the bulbs of Caladium esculentum? With us the greater part of the bulbs rot. N. J. F.

Caladium esculentum bulbs should be kept warm and dry. If kept in a dry place in a temperature of from 65° to 70° there is no doubt but what they will winter perfectly. The bulbs should not be cleaned before being stored. Clean them when you want to start them in the spring. Start with bottom heat. E. A. KANST.

Sweet Pea Certificates.

ED. AM. FLORIST:—In your issue for September 6, 1902, on page 217, appears an article on the doings of the National Sweet Pea Society, England, signed "H." in which it is stated that Dobbies' new sweet peas Britannia and Jessie Cuthbertson gained the coveted award of a first-class certificate. Will you kindly permit me to say that this is not correct. I was present at the committee meeting when they were exhibited and no award was made by us to either of the two, although they are undoubtedly very beautiful. Dorothy Eckford (Eckford) and Golden Rose (Hurpee) each gained a first-class certificate. S. B. DICKS.

Soft Coal and Flues.

ED. AM. FLORIST:—The inquiry of "T. N. Y." in the last issue puts me in mind of a place where I was in charge of five houses 110 feet long, heated by flues. There was a run of brick for about fifteen feet from the fire box, then terra cotta pipe the whole length of the house to the far end, where the smoke stacks were sixteen to twenty feet in height. During my stay there of several years we used nothing but soft coal and it did the work well. If the draft is free there ought never be any trouble. Flues always smoke at first, possibly more with soft coal than otherwise, but after once warmed up work satisfactorily. W. F. SCHMEISKE.

Trouble With Carnations.

ED. AM. FLORIST:—I am sending you a sample of affected carnation blooms in the hope that you can tell what the cause is, and the remedy. Can it be the damp weather? The plants are good and healthy and the blooms were fine until recently. S. L.

During a spell of mild, wet weather we have met with the same trouble as "S. L.", especially at this time of the year. To guard against it we keep a little steam on, just enough to maintain a dry atmosphere, the ventilators being left open a little all the time. We also allow the beds to dry out more than usual during such a spell. We have just passed

through two weeks of dark, wet weather and in that time some of our carnation beds were not watered at all.

C. W. JOHNSON.

Chrysanthemum Society of America.

The seedling committees of the C. S. A. meet each Saturday until the end of November, as follows:

Boston, Mass.—E. A. Wood, chairman, care of Boston Flower Market, Park street; James Wheeler, William Nicholson.

New York, N. Y.—Engene Dailedouze, chairman, care of New York Cut Flower Company, Twenty-sixth street and Sixth avenue; James W. Withers, William H. Duckham.

Philadelphia, Pa.—A. B. Cartledge, chairman, 1514 Chestnut street; William K. Harris, John Westcott.

Chicago, Ill.—James S. Wilson, chairman, care of J. B. Deamud, 51 Wabash avenue; George Stollery, E. Wienhoeber.

Cincinnati, O.—Albert Sunderbruch, chairman, care of Cincinnati Cut Flower Company, 437 Main street; James B. Allan, E. G. Gillett.

Exhibits to receive attention from the committees must in all cases be prepaid to destination, and the entry fee of \$2 should be forwarded to the secretary not later than Tuesday of the week preceding examination.

Anyone having a variety in season after dates fixed, can have the same passed upon by specially notifying the chairman of committees.

Toronto.

TRADE ONLY FAIR BUT STOCK IMPROVES WONDERFULLY.—PRICES ON THE UPGRADE.—ALL ABOUT THE FIGURES.—VARIOUS LOCAL NOTES OF INTEREST.

Trade is only of a fair average, as nothing of consequence has transpired during the past two weeks to make the retailers over-jubilant. The autumn races and a few social functions only called for decorations of the smaller order. Out of town orders keep coming in rapidly and growers are taxed to their full capacity. Stock has improved wonderfully and prices have gone up in consequence. Balduin is the latest acquisition to the rose crop and is very well liked. Stems are not as long as desired, as the plants are still small and will not allow cutting into severely. Ivory is also showing up much better and its very sweet odor finds it ready sale. Beauties are in very good condition. Stems are all a good length and compare favorably with a year ago, good blooms being quoted at \$20 per hundred. Meteors have also picked up considerably and these, with Bridesmaid and Bride are now quoted up to \$8 per hundred. Sunset and Perle are exceptionally good and these, with the other smaller teas, are quoted at \$6. Carnations have advanced, both in quality and price, first and second grade selling at \$3 and \$2 respectively. Some very good blooms of Lorna, Lawson, Crane, Morning Glory and Glacier seem the pick of most growers. Violets are plentiful, but excepting the stock of one or two growers, the quality is hardly up to the standard. Outdoor stock is about done for, the recent frosts having played havoc with dahlias and quite naturally chrysanthemums are holding the fort at present. Prices vary considerably, being quoted at from \$5 to \$15 per hundred, but as yet I have not seen any flowers worth the latter figure.

After the usual summer vacation, the

Florists' Club is again ready to resume business, on Tuesday, October 21, at St. George's Hall. As Toronto will be the meeting place of the C. H. A. in 1903, this subject will be brought up and all members are expected to be present.

Although the formal opening of the new Market House is to take place on November 1, many of the florists and gardeners installed their stands last Saturday. Quite a showing of palms and other plants was made, but the shortage of cut flowers was quite noticeable.

Coal is the uppermost topic of conversation with the growers at present. Owing to the scarcity of fuel of all kinds, several of the smaller growers are thinking of allowing their houses to freeze up for the winter.

There has been a great demand for palms and Boston ferns. Customers have also been clamoring for blooming plants, but aside from cyclamens there is little to offer.

Eugene Wintle, well known among the florists, and an authority on botany, fell from his buggy the other day, breaking his neck.

J. H. Dunlop is putting in a new boiler, larger than any of the present ones in his establishment.

The Steele Briggs Company is putting tile benches in the palm house and conservatory.

Manton Brothers are again on the market with cattleyas. H. G. D.

Washington.

GROWER HAS GOOD STOCK.—A PROMISING ADIANTUM.—TRADE NOT YET HEAVY.

J. R. Freeman has finished his new violet house 75x100 at his Brightwood place. His new foreman, Harry Rowe, has things looking in good shape. Four houses are in roses, American Beauty, Liberty, Perle, Carnot, Bridesmaid, Golden Gate and a white sport from Bridesmaid. Four houses are also in carnations, Mrs. Lawson, G. H. Crane, Mrs. Joost, White Cloud and others. His cyclamens are fine.

J. H. Ley has now about 20,000 of his new Adiantum hybridum. It is a distinct cross between Adiantum decorum and A. amabile, having the strong solid fronds of the former and the elegance of the latter. It will, he believes, supersede Adiantum cuneatum.

Trade has not improved much. Cosmos is very plentiful and chrysanthemums are making their appearance. P. G.

OBITUARY.

JACOB BECKERT.

Jacob Beckert, who was one of the oldest and most widely known florists in western Pennsylvania, died October 14 at his home at Troy Hill, Allegheny. He was 65 years of age.

JULES LEFEBVRE.

The death is announced of Jules Lefebvre, one of the best known chrysanthemum growers in the north of France, at 80 years of age. He was president of the Chrysanthemum Society of the North of France from 1894 to 1900.

EDNEY SMITH.

Edney Smith, one of the oldest residents of Waterloo, N. Y., died October 7 after an illness of many months with sarcoma of the face. He was born at Catskill, on the Hudson, but had resided in Waterloo since a mere lad, being in

his eighty-third year. He was one of the proprietors of the Smith & Kuney greenhouses and was well known as an experienced and skilled gardener and florist. He was an active member of the First Presbyterian Church of Waterloo, having been an elder for many years past, and was a most devout church member, as well as a highly esteemed citizen and business man. He was the third oldest member of Seneca Lodge, F. and A. M., of Waterloo, having united with that lodge in 1856, and his funeral was in charge of that order. He is survived by his wife, seven sons and a daughter.

MARSHALLTOWN, IA.—J. H. Wright, Jr., is now nicely installed in his new place at 113 North Third street.

BUTTE, MONT.—Richard Kirkham, manager of the State Nursery Company's retail store here, and Miss Gertrude O'Leary were married October 8.

SEBALIA, MO.—The winners from this section at the St. Louis fair last week included the Archias Seed Store, of this city, and George A. Shepherd and L. Luther, of Lamonte.

WORCESTER, MASS.—H. F. Littlefield has installed a complete outfit for heating his greenhouses by means of crude oil. For temporary purposes a tank holding sixty gallons of oil has been placed outside the building, and pipes run from it to the boiler room in the basement. The burners are attached directly to the main pipe at a slight cost. The oil runs through the pipes easily, as the tank is eight feet higher than the top of the burner. If the system is a success a huge tank holding 200 gallons of oil will be erected in place of the present one.

SITUATIONS, WANTS, FOR SALE.

Advertisements under this head will be inserted at the rate of ten cents a line (six words) each insertion. Cash must accompany order. Plant ads. not admitted under this head.

Every paid subscriber to the AMERICAN FLORIST for the year 1902 is entitled to a five-line WANT ADV. (situations only) free, to be used at any time during the year.

CUT FLOWERS AT WHOLESALE.

THE SEED TRADE.

AMERICAN SEED TRADE ASSOCIATION.

WALTER P. STOKES, Pres.; C. N. PAGE, First Vice-Pres.; S. F. WILLARD, Wethersfield, Conn., Sec'y and Treas.

VISITED CHICAGO:—C. F. Crossland, manager of the Winnipeg, Manitoba, house of the Steele, Briggs Seed Company.

J. E. WOODBRIDGE-TRACY, representing the seed division of the U. S. Department of Agriculture, is visiting growers on the Pacific coast.

L. L. MAY & COMPANY, St. Paul, have put in new cleaners and elevators and erected a mammoth bin for beans and peas on the roof of their warehouse.

RED clover has joined the ranks of the scarce items this fall, the price having advanced a dollar per 100 pounds lately. The heavy rains are given as the cause of the shortage.

ALBERT DICKINSON, of Chicago, has purchased nearly half a million dollars worth of trackage property in the "Midway" district, between St. Paul and Minneapolis.

BOTH growers and seedsmen are discouraged with the continued poor crops of Gradus and Thos. Laxton peas. Perhaps Laxton Bros. should give us some better knowledge of how to grow them.

J. B. KIDD, for past three years with Elliott & Sons, New York, is leaving to take a place as travelling representative of the Cox Seed Company, San Francisco. He has thirty-two years' experience in this country.

THE Civil Service Commission on November 11 will hold examinations for positions as seed clerks in the U. S. Department of Agriculture. The positions pay from \$840 to \$1100 a year. Those desiring to take the examination should apply to the Civil Service Commission for application blanks.

THE reports of the Michigan tomato fields are very discouraging. On account of the cold and exceedingly wet weather of the last month the tomatoes have been very slow to ripen, also on account of the lack of sunshine, and as yet but little seed has been harvested. This also applies to radishes grown in that section. The probabilities are delivery will fall in many cases very much below the estimates made at the beginning of September.

THE floral novelties offered by Ernst Benary, Erfurt, include Chrysanthemum segetum, Helios; Delphinium elatum hybridum nanum; Hohenzollern aster, Crown Prince (brilliant carmine); Calceolaria hybrida grandiflora, Olympia; Dianthus Heddeewigi fl. pl., Fireball; Phlox Drummondii nana compacta radiata; Nasturtium Lilliput, Othello; Tropaeolum Lobbi Virehovanianum; Gaillardia grandiflora semi-plena; Viola cornuta rosea; and Single Comet aster, pure white. The only novelty offered in vegetables is the Crimson Giant Forcing turnip radish.

Buffalo.

A VARIETY OF PERSONAL AND TRADE NOTES.—UPS AND DOWNS IN THE CRAFT.

Trade is fair, with the supply of flowers limited. Chrysanthemums are better every day; some very good yellows are coming now. The usual number of small weddings is on for this week.

C. H. Keitseh is making a good display

in his store. While he is pretty far uptown there is a trade that would follow Charlie wherever he might go.

Violets from the east are very fine. Some good California are coming from Pierson, of Cromwell, Conn.

Brookins, of Orchard Park, is cutting about 6,000 carnations a week at present.

C. D. Zimmerman is looking forward to a good cut from his place this fall.

The political campaign will interfere with trade for the next three weeks.

Palmer's new store will be opened about October 20.

Mrs. W. F. Kasting has been ill for a week.

Bison.

CHAR. A. LOENFRITZ, Pres.; D. S. LAKE, Vice-Pres.; GEORGE C. SEAGER, Rochester, N. Y., Sec'y. Twenty-eighth annual convention, Detroit, Mich., June, 1903.

THE Chases are among the incorporators of the Eureka Orange Company, of Riverside, Cal.

THE Association of Horticultural Inspectors of the United States and Canada has been in session at Atlanta, Ga.

A NATIONAL congress of apple growers will be held at St. Louis, November 18 and 19. C. S. Wilson, Hannibal, Mo., is secretary.

THE Franklin County Nursery Company, Winchester, Tenn., has been incorporated, capital stock \$10,000, incorporators E. E. Bohn, F. M. Grizzard, C. F. Pitsinger, T. E. Sipes and I. W. Crabtree.

A Privet Hedge.

ED. AM. FLORIST:—On the north front and east side of my city lot I have a fine hedge of California privet. It was planted about twelve years ago and I keep it trimmed to a height of about three and a half feet. By reason of good advice it has been clipped well rounded and not squared on top, and the barbering has been done most artistically. It is also well mulched in winter, and always appears as one of the handsomest privet hedges hereabouts. Nevertheless it is getting very thin at the bottom, particularly on the north front, and I would be greatly obliged if you could advise a remedy. I have thought that this fall I might do well to cut it back severely, to about two feet in height and width. But I would like to have good counsel in the matter from someone in authority. D.

As the hedge in question is getting thin at the base, there is no remedy except cutting it back severely, so as to force it to break away freely from the bottom; and of course the lower it is cut down, the lower it will be induced to become thicker at the base. I would advise cutting it back to about fifteen or eighteen inches from the bottom. If the bottom of the hedge is kept cultivated, and well supplied with rotted manure it will soon be in good condition again.

JOHN DUNBAR.

ROCHESTER, N. Y.—George A. Parker, superintendent of Keney Park, Hartford, Conn., lectured on park subjects before the American Society of Municipal Improvement on the evening of October 7. Mr. Parker said that one-twentieth of every city's area should be reserved for parks and squares.

Dreer's Importations of Azaleas

Our importations of Azaleas have arrived and we have commenced shipments. If you have not yet placed your orders we would advise you to do so at once, in order to secure low fall prices, as well as to take advantage of low cost of transportation while shipments can still be made by freight.

We are in position to give you best qualities because our growers are among the most skilled specialists in Belgium. We can give you best values because we are not only the most extensive importers of these plants to the United States, but also because we buy for cash at best prices and give our customers the benefit of these important points.

10 to 12-inch crowns, bushy plants.....	\$4.50 per dozen	\$35.00 per 100
12 to 14-inch crowns, bushy plants.....	6.00 per dozen	48.00 per 100
14 to 16-inch crowns, bushy plants.....	7.50 per dozen	55.00 per 100
16 to 18-inch crowns, bushy plants.....	12.00 per dozen	90.00 per 100
18 to 20-inch crowns, bushy plants.....	25.00 per dozen	200.00 per 100
20 to 24-inch crowns, bushy plants.....	36.00 per dozen	300.00 per 100

We can still include in assorted lots ten per cent Mme. Van der Cruyssen, this variety being very scarce this season.

EXCEPTIONAL VALUES IN ARAUCARIA EXCELSA

The two sizes of Araucaria Excelsa offered below are the greatest values we have ever offered in this plant and you will make a mistake if you don't secure a supply for your Holiday trade:

6-inch pots, 20 to 24 inches high, 4 tiers.....	\$1.00 each
6-inch pots, 24 to 28 inches high, 4 to 8 tiers.....	1.25 each
7-inch pots, 30 to 32 inches high, 5 to 6 tiers.....	1.50 each

RUBBER PLANT—FICUS ELASTICA.

An exceptionally fine lot of 5-inch pots, plants well furnished, fifteen inches high, \$4.50 per dozen; \$35.00 per 100.

OUR PASTIMES.

Announcements of coming contests or other events of interest to our bowling, shooting and sporting readers are solicited and will be given place in this column.

Address all correspondence for this department to Wm. J. Stewart, 79 Milk St., Boston, Mass.; Robt. Kiff, 1725 Chestnut St., Philadelphia, Pa.; or to the American Florist Co., 324 Dearborn St., Chicago, Ill.

At New York.

At the meeting Monday evening, October 13, the following officers for the New York Florists' Bowling Club were elected: President, W. H. Siebrecht; secretary, W. C. Mansfield; treasurer, Lawrence Hafner; captain, Theodore Lang.

At Chicago.

The bowling club is the talk of the day, much interest in the Milwaukee contest next August being already displayed. Go where one will throughout the city or in the suburbs, it is bowling, the bowling club, everlastingly bowling. It is a good sign, as Dooley says, and no doubt much good will come of it. But this commendable enthusiasm must not be allowed to burn itself up in little bonfires which are speedily lost to view. It seems preferable, rather, that this awakened sentiment in favor of the bowling club be carefully concentrated and conserved for a glowing conflagration which will not only burn up Milwaukee but every other city that sends a team to the next national contest. This is evidently the intention of the bowling club president, P. J. Hauswirth, who saw our bowling man this week and announced that he desired all persons of the trade interested in bowling, whether or not they are members of the club, to attend a meeting which will be held at McKellar & Winterson's, 45 Wabash avenue, October 23, at 8 p. m., with a view to forming a local trade league. As many as possible should attend in order that the proposed league may be given a bounding start. You, of course, will be there.

The Florists are not breaking many records in the Illinois League, although they did catch the redoubtable Anson team napping one game. On October 10 they rolled the following score:

Florists	1st	2d	3d	T'l
Balluff	145	182	191	518
P. Stollery	169	151	157	477
Hauswirth	162	164	140	466
Winterson	189	151	127	467
Asmus	135	147	187	469
Total	800	795	802	2397
VESTIBULES	872	898	889	2659

Kansas City.

TRADE BRISK AND ALL GOOD STOCK MOVING RAPIDLY.—GROWERS PREPARING FOR THE BIG FLOWER SHOW.—PERSONAL AND TRADE NOTES OF LOCAL INTEREST.

Almost all stock was scarce the past week, especially Beauties. Everything brought good prices and carnations sold at a premium. A few chrysanthemums helped ease the market the latter part of the week and brought good prices for early varieties.

John H. Vesey, who has the old Baker Brothers' place, has the plant in good condition this fall and is cutting some good carnations and chrysanthemums. His Lawson and Triumph are extra. He expects to show chrysanthemums at the Kansas City flower show.

R. S. Brown & Son report trade good and are sending in some fine chrysanthemums.

They expect to supply Kansas City with the Pierson fern next fall, which they believe is a good thing.

A. F. Barbe has enlarged his place the past season and is growing good stock. He has some chrysanthemums that will be hard to beat. The stems on the later varieties are from six to seven feet long and very stiff.

W. L. Rock had a large decoration at Convention Hall for the Priests of Pallas ball, October 8, which is one of the society events of the season. He reports trade unusually good for this time of the year.

Sam'l Murray is growing a fine lot of pot chrysanthemums for the flower show. He has devoted all his houses to growing this class of chrysanthemums and expects to make a good showing.

John Thorpe has come to remain until after the flower show. He requests all exhibitors to make early entries, so there will be no trouble in getting space.

Fred. Weber, who has charge of Geo. M. Kellogg's Grand avenue store, says

business has been very good and no trouble to sell good stock.

A. Newell and all the retailers report brisk business in carnival week; much ahead of last year. C. W. S.

Helena, Mont.

The employes of the State Nursery Company, their families and a few friends, on their annual picnic this year went to the Missouri River dam. This dam furnishes electric power for the capital city, and also for the largest mining camp in the west, Butte. We went in two trolley coaches. There were thirty-two persons in the party, and a quantity of provisions. Some of the party went fishing, while several of the others took a ride in a steam launch on the Missouri river 3,000 miles from its mouth. J. J.

RIO VISTA, VA.—Mark T. Thompson's acres of dahlias are now very fine. The outdoor chrysanthemums will be very attractive a little later.

Cut Gladiolus Spikes

of the HIGHEST QUALITY, in lots of from 100 to 100,000. Pink, scarlet, crimson, white, light, yellow, blue, lavender and heliotrope; in fact, almost every shade imaginable.

Write for prices and particulars, stating your requirements.

SCHMIDT & BOTLEY, Springfield, Ohio.

Denver.

SUPPLIES ADEQUATE FOR A VERY GOOD BUSINESS.—CHRYSANTHEMUMS FINDING WARM WELCOME.—NOTES.

With the chrysanthemum season fairly well started, the market seems well supplied, compared with the previous week. Beauties are better and more plentiful, while tea roses have come on surprisingly fast within the last few days. Liberty is coming in plentifully but is going well. Carnations are improving and some really fine stock is now seen, Gus. Benson sending in some Crane and White Cloud that are as good as those seen in mid-winter. Violets are good and the sale on them is very satisfactory.

In chrysanthemums Robinson, Glory of Pacific and Bergmann have made their appearance and seem to go well enough to predict a successful season on them. Pot plants of them are selling very well. Although this country is not well adapted for autumn foliage, now and then some pretty stock is seen and we are waiting for a job or two to work it in. B.

Minneapolis.

WEATHER CONDITIONS FAVOR INCREASED PRODUCTION.—SHORTAGE FOR A FORT-NIGHT.—VARIOUS NOTES.

The flower producing conditions of the weather now are good and we hope that stock will soon commence to improve in quantity. Last week witnessed some shortage in all classes of flowers, as did the previous week, and there was some disappointment in filling standing orders. Violets are coming in more plentifully now and realizing a good price, from \$1 to \$1.50 per hundred. Chrysanthemums are making their appearance, Nagel and Swanson having the first on display.

The Minneapolis Floral Company has on track 1,000 tons of coal, which means quite an item at present.

A. S. Rice left for Chicago last Saturday night for an indefinite stay.

The coal question is the leading subject among the florists. C. F. R.

NEW HAVEN, CONN.—The New Haven Horticultural Society held an enthusiastic meeting on October 7. A paper on raffia by J. Handyside, the exhibition of a new canna by John Doughty and a fine display of garden flowers were among the attractions.

DON'T WASTE

Printed Matter and Postage.

THE American Florist Company's Directory saves many times its price to every one who catalogues or circularizes even a small part of the trade. Fully revised to date of publication, it puts the mail only to live names, avoiding waste of postage and printed matter, time and labor.

Contains 418 pages, lists of Florists, Seedsmen and Nurserymen of the United States and Canada by states and towns, also alphabetically; firms that issue catalogues, private gardeners, horticultural societies and much other up-to-date information which makes it a reference book of daily utility wherever a wholesale trade is done.

Sent postpaid at \$2.00 a copy by the publishers.

The Model Extension Garnation Support.

Flushing, Long Island,
Dec. 11th, 1901.
MR. THERON N. PARKER,
Brooklyn, N. Y.

Dear Sir— I have used
your Wire Garnation Support
the last two years, in
all about 12,000. They fill
the bill in every particular.
Nothing could be more
satisfactory and would
give me a great deal of
pleasure if I can bespeak a
good word for you to the
trade and you are at liberty
to refer to me at any
time.

Very truly,
A. L. THORNE,
La Fayette, Ind.,
July 8th, 1902.

MR. THERON N. PARKER,
Harrison, N. J.

Dear Sir:— After using
your Model Garnation Support
in two of our houses
the past winter, we have
come to the conclusion that
it is perfectly adapted to
supporting carnations, and
shall use them on all our
plants the coming season.
We were much pleased
with the simplicity,
strength and neat appear-
ance of the support.

Yours truly
F. DORNER & SONS Co.

STOCK INCREASES IN SUPPLY AND IMPROVES GREATLY IN QUALITY.—PARK MAN GETS PAID.—LOCAL AND TRADE NOTES.

Chrysanthemums are increasing in quantity and their sale is very steady. Roses are much improved. Beauty, Liberty, Meteor and Bridesmaid are best. Both local and shipped-in stock seems greatly improved. Carnations and lily of the valley are correspondingly fine. Violets are improving in quality and sale. Orchids are also plentiful. Frost has put an end to outdoor stock. Society papers have published a list of November debutants and this, coupled with the weddings scheduled, looks as though November will be a continuous rush.

Judge J. D. Shafer has rendered a decision in favor of Elmer E. Siebert, superintendent of Highland Park. Mr. Siebert was appointed to this position several months ago but for reason of his lack of previous experience in this line, the city comptroller refused to sign his warrant for wages.

Robert Gonderman, foreman of the houses at Pennsylvania Reform School, has finished his new palm house which is 40x50.

Fred. Barki's early chrysanthemums are cut out. They happened to be the first on this market.

Phil. Langhans, of the Pittsburg Cut Flower Company, is confined to his home by illness.

John Bader has finished his new houses, five in number. E. L. M.

CHATHAM, N. J.—Samuel Lum is shaking hands with himself over the fact that he has coal enough to last all winter.

BAY CITY, MICH.—Boelinger Brothers have just built a new stack and set another new boiler. Their place is in fine shape.

Bargains FOR Florists.

We are headquarters for a general assortment of the necessary material and supplies that you are looking for. If you are about to improve or construct, consult us.

In connection with the dismantling of the Pan-American Exposition, we have for sale:

- 20,000,000 FEET of fine seasoned lumber, practically new, consisting of all sizes of joists, timbers, dressed and matched boards and flooring; also sash and doors.
- 50,000 FEET of roofing glass.

PIPE.

We are headquarters for pipe. We offer you:

- 100,000 FEET of 2 to 4-inch wrought iron, lap welded casing. We can furnish this material in three ways: Either with sleeve or jacket couplings, screwed ends and threaded couplings or with expanded cast iron flanges with bolts and nuts.
- 1,000,000 FEET of standard black wrought iron pipe, size 3/8 to 12-inch. It is second-hand but has new threads and couplings and is in first-class condition.
- 1,000 TONS of galvanized wire 9, 10, 11, 12, 13, 14 and 15 gauge.
- 50,000 FEET of 2, 3 and 4-inch cast-iron soil pipe and fittings.
- 100,000 FEET of garden hose, 3/4 and 1-in.
- 75,000 FEET of cotton rubber-lined fire-hose, (rubber-lined in and outside), ranging in sizes 1 to 2 1/2-inch.

- VALVES and fittings of every kind.
- BOX COILS for heating purposes.
- RADIATORS, new and second-hand.

We also offer the following bargains in

Heating Boilers

- 50 CAST-IRON sectional heaters, capacity from 450 to 5,000 feet.
- 1 NO. 2 Standard Kroeschell hot water heating boiler.
- FOUR 36x10 Horizontal Tubular.
- FOUR 36x12 Horizontal Tubular.
- FIVE 42x10 Horizontal Tubular.
- FIVE 42x12 Horizontal Tubular.
- SIX 48x14 Horizontal Tubular.
- TWO 54x16 Horizontal Tubular.
- FOUR 60x16 Horizontal Tubular complete with all fittings.

PUMPS of all Descriptions.

Baltimore.

GOOD STOCK GROWN IN PRIVATE PLACES.—
TRADE NEEDS STIMULUS OF FROST.—
VARIOUS NOTES OF LOCAL INTEREST.

Wm. Doyle, gardener to L. Strouse, at Arlington, has had a fine display of thirty-eight of the best aquatics. Their lily ponds and fine flower beds have been an attraction this summer. A canna bed of very large size is still in perfect condition and perhaps the finest bed in this locality.

The finest stock of chrysanthemums among the private places is found at C. R. Diffenderfer's, the standard specimens being the finest that have ever been seen in Maryland, showing very careful cultivation on the part of Chas. Wagner, the gardener.

At Patterson Park they have grown over 3,000 pompon chrysanthemums and 2,000 others, all of which have already been planted into the flower beds for an outdoor fall display in the city squares.

The Gardeners' Club of Baltimore will hold its chrysanthemum show the second week in November, at Schman's Hall, the same as last year. We are preparing to make this year's show a record breaker.

The supply of all kinds of stock is plentiful excepting roses, which are very scarce. Trade has been rather dull, owing to the fact that we have as yet had no frost.

E. A. Seidewitz is building two new houses and Hitchings & Company are building greenhouses for Edwin Warfield, of the Continental Trust Company.

Lehr Brothers' Col. Appleton chrysanthemums promise to surpass all others and even their efforts of last year.

J. Kider has planted three 100-foot houses in carnations. Stem rot has been very troublesome this season.

WINCHESTER, MASS.—Martin J. Carney has leased the McGregor place for a term of years and embarked in business. He was formerly gardener for Chas. H. Taylor, Boston.

ROCKVILLE, CONN.—Theo. Standt had charge of the arrangement of the floral department of the Rockville fair last week and made it the largest and best ever seen here.

"THE LITTLE MONITOR"

The Little Monitor is nothing more or less than a

MECHANICAL WATCHMAN

which stands guard against the terrors of changing temperature.

Bank the fires of your Greenhouse at night and go to bed, and "The Little Monitor" will let you know when the temperature has fallen, and your services are needed.

Will pay for itself in one week in the saving of coal bills, and its protection against "freeze outs." Something entirely new.

CROP INSURANCE.
Life insurance is valuable because it guarantees the outcome.

"Gurney" Heaters

"BRIGHT IDEA," "DORIC" and "400 SERIES" do the same thing for your hothouse: **THEY GUARANTEE THE CROP.** First of all they save 30 per cent on the coal bill and so keep expense at a minimum. Next, they produce an even heat and so do not imperil the life of the plant. Next, they are simple to operate and so require least attention. Lastly, they wear longer than others and thus perceptibly reduce the capital invested. Don't buy or exchange until you've investigated them.

Notes on Fall Potting.

The question when to pot, and when not to pot is one that requires the exercise of some judgment, for not only the season but also the conditions under which the grower is working must be taken into consideration, and it therefore appears that the successful grower of decorative plants must use some discretion in the matter.

Under ordinarily favorable conditions, such as exist in a modern establishment where properly built houses and well equipped heating arrangements are found, it is naturally much easier to conduct cultural operations to advantage, and the grower who is thus provided for finds much less trouble in growing good stock than the one who has to combat the inconveniences of poorly built greenhouses and insufficient heating apparatus.

Speaking in a general way, we find but little advantage in shifting on the majority of the ordinary palms and decorative plants between December 1 and March 1, and for that matter the greater part of the latter month, being frequently dark and stormy, is not likely to encourage the growth of foliage plants.

Among the commoner species of palms the two that probably gain the least by late potting are *Latania Borbonica* and *Cocos Weddelliana*, both of which are very slow in rooting during the winter months, and with these it is preferable not to repot after October, unless it may be some plants that are very much root-bound. It is understood that one may force either of these palms into growth to some degree by giving extra heat and plenty of moisture but the results are not likely to be nearly so satisfactory as though the plants have been treated more rationally, for though some gain may be made in size the quality is lacking, to say nothing of the greater risk of having the plants spoiled by insects.

Livistona rotundifolia is also somewhat impatient of having its roots disturbed during the winter season, but when grown in a night temperature of 68° to 70°, as is most congenial for this species, and at the same time given plenty of moisture, this palm will continue to grow to some extent during the early winter at least.

The fishtail palm, *Caryota urens*, is another that makes but little root growth during the winter, and when repotted too late in the season will sometimes lose some of its roots and consequently gets into bad condition, such trouble being much more likely to appear

if the plants are kept a little too wet and cold. In a night temperature of 65° there is seldom any trouble in growing this caryota, and under such circumstances it may be repotted safely during October. To those who have not tried this plan before it is suggested that made-up plants of the caryota are much more effective in decorative work than are the single specimens, the latter often becoming too tall and sparse in the foliage to be very ornamental.

Tall young plants of *Ptychosperma Alexandra* may also be grouped together to advantage, three plants in a pot, and so arranged that they will grow symmetrically, form a useful specimen in a 6-inch or 8-inch pot, and is also one that may be profitably sold for a less price than a kentia or an areca of the same size. The *ptychosperma* is a very free rooting and rapid growing palm, and consequently needs plenty of water and a rich soil, and during the time of greatest progress, the summer, will be benefited by some manure water once a week.

Areca lutescens grows with moderate freedom during the early part of the winter in a greenhouse kept at 65° to 68° and may be safely repotted somewhat later than some of the preceding under such conditions, but in case one has not full control of the temperature owing to defective heating apparatus it is safer not to disturb the plants in the fall.

Most of the phoenixes may be safely wintered in a lower temperature than that noted above and will retain their vigor and keep cleaner in the cool house, but they will not make much growth under such conditions, and therefore spring potting will be found much more advantageous for them, and avoids that over-potted appearance that is often in evidence with young phoenix.

The kentias, both *Forsteriana* and *Belmoreana*, are much more satisfactory as winter growing palms than either of those that have been already noted, and the repotting of these most useful species may thus be continued later in the season with good results. There is no special advantage in giving these kentias a very high temperature, a moist atmosphere and a night temperature of 60° to 62° producing a sturdier growth and better shaped plants than can be had by exposing them to more heat, and it is also much easier to keep down the insects in the cool house, for excessive heat gives great encouragement to red spider and thrips.

The advantages of firm potting for palms have often been noted in previous

writings, but as this is one of the essentials to complete success a few hints as to this simple operation may be again tolerated. When repotting young stock of this character in the spring or early summer it is the usual method to give a shift of two sizes, that is, for example, from a 4-inch to a 6-inch pot, or from a 6-inch to an 8-inch pot, provided the plants are well established and in good condition for a shift, and our custom is to select such stock for repotting as is in a fit condition for this liberal shift, and to leave the smaller plants of the batch for a later lot.

But in the fall it is sometimes better to content oneself with giving a smaller shift rather than to overdo the matter. As much of the old ball of earth is removed as may be done without injury to the roots, the old drainage material is removed from the bottom, and the plant placed in the new pot, the bottom of which has already been prepared with new drainage and sufficient earth well rammed down. This part of the potting operation is really one of the most important, for unless the bottom layer of earth is made firm before the plant is placed upon it, the rooting medium will always be loose and the plant will not start away so well. Then fill in the soil gradually around the plant, and ram the whole firmly.

This firm potting is very necessary in the case of plants that are to be taken out for decorating, else the plants will very soon become loose in their pots, a condition that is not only injurious to their roots by permitting too much air to get down to them and to dry out the growing tips, but also prevents the water from permeating the ball of earth evenly and in consequence the plant soon suffers. Immediately after repotting the plants should be given a thorough watering in order to thoroughly moisten the new pot as well as the ball of the plant.

When making up the compound plants that are so much used in our large cities at the present time, we sometimes wash out the roots with a strong stream of

during the winter as they may do in the spring or early summer.

As the season goes on and more fire heat is needed, some of these newly potted plants will utilize quite a lot of water and one needs to be careful in this detail, for there are undoubtedly many more palms that are ruined by lack of water than by overwatering.

W. H. TAPLIN.

CHRYSANTHEMUMS.

FROM A COMMERCIAL STANDPOINT.

Commercially the chrysanthemum seems to have lost something of its old-time popularity. But asked the special question as to why the flower is suffering in the wholesale markets, it is hard to say why it should not have been received as well as usual this year.

I do not know where the chrysanthemum originated, but I have heard that in the early times in Japan it was considered simply as a flowering weed. Well, to say the least, I believe it is still a rank weed, and from a strictly commercial standpoint ought to be treated as such. In the first place, in its season it practically puts all other flowers out of the market, not because it is superior to them but because it is so cheap and the buyer gets a great big bunch for little money. In the second place, with people who want flowers in the house all the time, after one buys a bunch of chrysanthemums he doesn't have to buy any more flowers for at least ten days. Once I went to a party where I heard they were going to have great decorations. I went to see how they did it. It was almost all chrysanthemums. When the evening was nearly over the caterer came up to me and said: "Pieser, we are going to have another big affair here next Sunday; kindly tell me the best way to keep these chrysanthemums and all I will have to do is to buy a little smilax and things to piece out with and I can charge just as much for the decoration." My answer was: "Put the confounded things

from the chrysanthemum cropis "velvet." This is not so, for it makes every other flower get cheap at the same time, and possibly where they make a few dollars on the chrysanthemums, they lose it on their other stock.

Allowing that a grower has the space, with no other use for it but to plant chrysanthemums, even in such a case judgment could be shown. It is a certain fact that when the poor man can buy anything, the rich man don't want it at any price. It is also a fact that chrysanthemums do not sell until within a day or so of the chrysanthemum show and from then on. So, as I say above, a great deal of judgment could be used. Cut out the early kinds altogether. If we must have them, limit it to a white, say Kalb as an early kind, so the retailer can have something that he can use in place of lilies or other white flowers, which are generally scarce about the time this one variety comes in.

If I had my way, strictly from a commercial standpoint, I would limit the chrysanthemums to not more than six to eight varieties, grow these as fine as one could grow them and never try to put one on the market until chrysanthemum show week, except as above stated, Kalb or early Ivory. It is a mistake to have so many varieties. I believe that if this subject was taken up by the S. A. F. some good would come of it. If it could be done, which of course it couldn't, I should like to see a committee appointed to select the best commercial varieties, surely not over a dozen kinds. I am certain that the growers would make more money if they discarded all the rest and the people would be better satisfied, for the people who buy flowers would buy what they wanted, no matter if the price was higher.

Another and most important trouble is that the growers, needing the space, often cut the chrysanthemums before they are ready, when they are neither good nor bad, and ship them to market to help make the entire day's receipts still cheaper. But that is a fault of the general flower producer. E. E. FISHER.

Anemone Japonica.

An indispensable subject for the home garden is *Anemone Japonica*. Planted in masses, what can be better at this season? Several varieties exist with three or four whorls of petals in each flower and in color from white to clear pink. *Anemone Japonica* var. *alba*, *Queen Charlotte* and *Whirlwind* are good ones. Strong clumps planted in the fall or spring become established at once in any good garden soil. A protection, not applied too early, of decayed leaves or long manure will insure them safety through the winter.

FRANCIS CANNING.

Economy in Fuel.

Dr. Fischer, the well known German chemist, has recently been making a series of tests to show that in the ordinary domestic stoves in use not more than twenty per cent of fuel consumed is really utilized for warming the rooms, whereas, with stoves burning gas eighty per cent and more of the possible effect is obtained. In a certain sugar manufactory at Elsdorf, it is stated, no steam engines have been used for several years. Gas is made at a cost of about 20 cents per thousand feet, and is used for lighting and driving gas engines. At the great Schultz Iron Works, at Essen, water gas

ANEMONE JAPONICA IN PENNSYLVANIA.

water, this method being much less likely to injure the roots than by attempting to shake the soil out, and permitting the placing of several plants in a pot that otherwise would not accommodate them, but I do not advise the washing out of the roots late in the season, as it may result in a check to the plants from which they do not so readily recover

in water in the cellar and you can't spoil them if you try."

Now, with all this, I do believe the grower could be made to look at this flower in the same way, for many reasons. A great many growers simply plant chrysanthemums in a house or houses that they intend for bulbous stock, and they figure that all they get

is made at a cost of 8 to 16 cents a thousand feet, and serves both for fire and lighting. For the latter purpose a ring is fixed over the burners, having rods of pencils of magnesia attached, these being made glowing hot by the non-luminous gas flame and emitting an excellent light. The abandonment of burning coal direct for heating will do away with all the disadvantages of smoke.—*American Stove and Hardware Monthly.*

Another New Canna.

The accompanying illustration shows a bed of cannas which Henry Morris planted on the lawn of former United States Senator Francis Hiscock, at Syracuse, N. Y. The variety is one raised by Mr. Morris which he has named Lord Charles William Beresford, from the English admiral who is now visiting this country. It is a sport from Robusta but of more erect habit and more pointed leaves. The bed on Senator Hiscock's lawn has attracted much attention. The foliage is bronze, or rather a wine color.

Philadelphia Wholesale Flower Market.

The first regular stockholders' meeting of the new market since a charter was granted was held in the Library Room, Horticultural Hall, Broad street above Spruce, Thursday evening, October 16, when about 480 shares of stock were represented and voted, out of 660 shares subscribed for. Edwin Lonsdale was chairman and David Rust secretary.

The board of directors, elected for the purpose of organization, reported that a state charter had been granted by Governor Stone, a room in which to conduct a market had been leased, a manager had been elected, that by-laws had been formulated, which were on hand for the stockholders to act upon, to ratify or amend. Amendments were proposed, but were afterwards withdrawn after explanations had been made, and the by-laws were eventually adopted as a whole without a dissenting vote.

The election of a board of nine directors, three for three years, three for two years and three for one year, was declared to be in order, and Robert Craig and George Anderson were appointed tellers and duly affirmed according to law. The result of the election was as follows: For three years, Joseph Heacock, William K. Harris and H. C. Geiger; for two years, David Bearn, Edwin Lonsdale and H. G. Tull; for one year, William P. Craig, John Welsh Young and R. G. Palmer. The terms for each director, as now elected to serve, were determined by lot at the first meeting of the regularly organized board, which met the following day in the Potts building, 1224 Cherry street, where the new wholesale flower market will be opened for business Saturday, November 1, 1902.

The officers as elected under the charter of the State of Pennsylvania at the meeting of the board of directors are as follows: President, Joseph Heacock; vice-president, William K. Harris; treasurer, R. G. Palmer; secretary, Edwin Lonsdale.

Manager Charles E. Meehan, who is hustling around in search of ice boxes and carpenters to build stalls, confidently expects to have everything in readiness for the eventful morning of Saturday, November 1, when a new era in the sale of cut flowers and plants for the Quaker City will be inaugurated.

At the stockholders' meeting it was also decided to authorize the board of

NEW CANNA LORD CHARLES WILLIAM BERESFORD.

directors to hold a reception in the market hall on Thursday evening, October 30. The invitations will go to growers, buyers and sellers of plants and of cut flowers at wholesale and growers and dealers in trees, shrubs, seeds, bulbs and dealers in florists' supplies. Committees were appointed by President Heacock as follows: On invitations, George C. Watson, John Welsh Young and Edwin Lonsdale; on decorations, H. C. Geiger, H. H. Battles and Julius Wolff, Jr.; on entertainment, William P. Craig, Charles E. Meehan and William K. Harris; on collation and refreshments, Past Master John Westcott, assisted by R. G. Palmer and Herbert G. Tull. It is expected that the choice of stalls will be sold to the highest bidder the same evening. The decorations are in capable hands, and the entertainment committee promises something unique. As to the refreshments, the veteran, Commodore Westcott, and his associates will take care of that end of the enterprise and an enjoyable and profitable evening is confidently expected.

The title agreed upon expresses as nearly as can be what the new step is to accomplish. It would, however, have been better in the opinion of the undersigned had it read "The Wholesale Flower Market of Philadelphia," in accordance with the name and title of a prosperous trade organization of the Quaker City, namely, the Florists' Club of Philadelphia, which has been in existence for the past seventeen years.

EDWIN LONSDALE.

Hints and Happenings.

I would like to point out to growers who are about to pot up their azaleas for Christmas and Easter forcing that they will do well if they put the majority of their plants in the special azalea pot or deep pan brought into prominent use a few years ago. There are many great advantages attached to these pots. The plants when in them look better and larger and it costs less to trim them, besides that they are more acceptable to the public. They can be used so for table decoration and in many other forms where it is impossible or undesirable to

use deep pots. Growers can make up combinations now that will sell well later on. We mean to put several plants into one pan, arranging them to form more compact and rounded shapes. Care should be taken to select harmonizing colors. Small azaleas can be used up in this manner, but it might be well to remember that consequent prices prevent the desired appreciativeness in many sections. Apropos of this question of small pots, it is well to remember that it applies to all plants intended for commercial uses. Esthetic taste and a comprehension of the necessities is no longer confined behind the counters of the florists' store, but extends to the potting bench. In fact, it is up to the grower to produce beauty requiring little or no adornment.

It may be a matter of interest to record that on last Monday there were no less than 20,000 fine cattleyas displayed in New York city windows. This represented more than the entire yearly cut twenty years ago. It is beyond understanding where all the flowers go to that are daily shipped into this city. To merely say that it is the greatest flower-buying, flower-loving city in the world is only to record cold facts.

J. I. DONLAN.

A Georgia Establishment.

The Fruitland Nurseries of the P. J. Berkmans Company, Augusta, Ga., is one of the famous horticultural establishments of the south; indeed it enjoys an international reputation, considerable stock having been shipped into South Africa and to other far distant points. They have a large range of greenhouses but grow no cut flowers. Not long since there was illustrated in this journal the original plant of the Climbing Clothilde Souper rose, then in bloom on their grounds. Although the firm handles large quantities of decorative plants and also of fruit and other trees, it is for its hedge plants that it has the most renown. Magnolia avenue, on the nursery, is shown in illustrations on the following pages. Another shows the building

occupied as offices and still another the block of *Biota aurea nana*, a specialty into which it can be seen they have gone heavily. The nursery is a short distance outside of Augusta and the surroundings are typically southern.

The venerable P. J. Berkmans, who may be seen standing on the side porch in the office building picture, has been president of the Georgia State Horticultural Society since its organization, more than a quarter century ago. Robert C. Berkmans, who was seated on the railing on the front porch when the picture was taken, served last year as president of the American Association of Nurserymen, and L. A. Berkmans is secretary of the Georgia State Horticultural Society.

New York.

VITALITY TAKEN OUT OF THE WHOLESALE SITUATION.—CHRYSANTHEMUMS INFLICT INJURY ON ALL OTHER LINES.—VALUES RECEDE IN THE FACE OF STEADILY INCREASING RECEIPTS.—SNYDER FORCING BULBS BY THE HALF MILLION.—LILIES FROM COLD STORAGE BULBS.—LARGE SIZES ONLY RECOMMENDED.—A VARIETY OF LOCAL DOINGS.

Most of the life seems to have deserted the business this week. Trade on Monday opened fairly good, mainly on account of the stores stocking up with fresh material, but the demand stopped there and now stock of all kinds is plentiful and the few days' inactivity has had a disastrous effect on prices all along the line. Chrysanthemums are coming in rapidly now and the finer qualities and varieties are showing up abundantly. Simpson, Robinson, Bonaffon, Owego, Harry Parr, Ivory, Pink Ivory and so forth are following close on the heels of the earlier sorts and the wholesale establishments are all well stocked with them. The increase in chrysanthemums has

decidedly in the dumps at present and the percentage sold at good figures is small and limited to the really fancy varieties and grades. All the stores seem to be over-supplied with them. Orchids of all kinds are also abundant, even the white sorts, such as *Dendrobium formosum giganteum*, which of late were in excessive demand, being now too plentiful. There are cattleyas, oncidiums, *Vanda cœrulea*, *Dendrobium Phalenopsis* and so forth in quantity, but for the present they must suffer the usual effect of the chrysanthemum invasion. Violets of the better quality have stiffened up in price, but the lower grades show no signs of improvement. Of course the prevalence of the above-described conditions has excited the Greeks to renewed activity and they swarm and jostle in and about the wholesale marts in large numbers. Johnnie Weir, too, has resumed his normal smile and, his mind being at rest as to the problem of cheap flowers, he is now ready to meet and beat anyone valorous enough to meet him at a checkergame any morning at Twenty-eighth street.

A. V. D. Snyder, of Ridgewood, who is one of the largest bulb foreers for the New York market, has evidently been hustling this season, for his place is in fine shape. Five hundred thousand bulbs will be grown this year and the first to bloom will be the Paper White narcissi, which are even now in bud. A large number of Bermuda Harrisii lilies in all stages of growth are to be seen here and they appear to be generally free from disease. Mr. Snyder grows a good many of the cold-storage stock, and very successfully in the large sizes, but recommends that nothing smaller than the "9 to 11" size should be attempted if full satisfaction is looked for, as the smaller grades lose their vitality in storage and make but a very spindling growth. Carnations are a large crop here. Without exception

increases and it is now the most fruitful theme wherever New York florists congregate. All doubt as to its magnitude and its success in every feature has gone and the outlook is very bright.

Pot plants of chrysanthemums are not selling as well as in former seasons. There is an abundance of them in white, yellow and pink, but the price hangs at from \$5 to \$8 a dozen, which is not very profitable to the growers.

Prof. A. W. Evans, of Yale University, and Percy Wilson, of the New York Botanical Garden, have gone to Porto Rico to enlarge the garden's collection of Porto Rican flora.

E. C. Horan is now located in his new establishment at 55 West Twenty-eighth street.

W. C. Mansfield left on Tuesday for a short business trip to Old Point Comfort.

Thos. W. Weathered arrived from England last Saturday on the Lucania.

In town: Gustav X. Amryhn, superintendent of parks, New Haven, Conn.; Mrs. C. Schoenhut, Buffalo, N. Y.

Boston.

USUAL AUTUMN OVER-SUPPLY.—LARGE SHIPPING DEMAND.—CONDITIONS TRACED TO SHORTAGE OF COAL.—VISITORS AND THEIR SEVERAL DOINGS.—TUOHY GETS A CLOCK.—AUCTION SALES SLOW.—VARIOUS NOTES.

The fuel scare, resulting from the coal strike, now of unsavory memory, is probably responsible in a considerable degree for the comparative scarcity of some kinds of flowers usually abundant at this season and for the very active shipping demand from outlying districts. Growers have been exercising enforced economy with their coal burning and hence, instead of overloaded ice chests, as in previous years, the wholesalers have little to show in the way of a surplus. There are some very presentable Bride and Bridesmaid roses in sight which seem to show by their sturdiness that the economy in heating houses has not been without some good results. American Beauty is not averaging as good as of late, there being an unusual proportion of third and fourth grade blooms in evidence, and buyers are expressing dissatisfaction thereat. Violets are somewhat overstocked, with little demand, but this is the normal condition at this date. Chrysanthemums sell fairly well and, although none command fancy prices as yet, there are some blooms now being received of very fine grade. Carnations get more plentiful as the season advances but, with a few exceptions, they are deficient in stem and not up to standard generally. No doubt there will be a marked improvement before many days.

Callers have not been many of late. E. Jacobsen, of Montpelier, came in with a beatific smile on his face, which was understood when he explained that he had just returned from California, whither he had gone to get a wife. The happy young lady who is now Mrs. Jacobsen was Miss Emma Kaufmann. Dan Macrorie, of South Orange, who was here last week, was compelled to go home on Saturday suffering from a very severe attack of rheumatism. Other visitors were H. B. McCullough, of Cincinnati, who is no stranger to Boston's highways and byways, having formerly attended the Institute of Technology here; G. H. Hill, of Haverhill, who shows the effects of a whole summer's illness, and C. F. Gibbs, of St. Johnsbury, Vt., who is as active as ever.

A BLOCK OF BIOTA AUREA NANA AT THE FRUITLAND NURSERIES, AUGUSTA, GA.

affected adversely the American Beauty and this specialty moves much more slowly than it did one week ago. There is some improvement in teas as to quality and more clean stock is in evidence, but prices are declining from day to day and very much of the ordinary stock received by the wholesalers changes hands at the rate of \$10 a thousand. Carnations are

they are grown inside all summer and consequently Lawson and Prosperity are being picked now of exceptional quality. Lorna, although long-stemmed, seems rather weak. Floriana, on the other hand, is superb in every particular.

As the date for the opening of the big exhibition at Madison Square Garden approaches, the interest in that event

A BIRD'S-EYE VIEW SHOWING THE FAMOUS "MAGNOLIA AVENUE" AT THE FRUITLAND NURSERIES, AUGUSTA, GA.

On the night of Tuesday, October 20, came the first frost in this locality. It was a severe one and put a finish to all garden bloom. The season has been an unusually long and uniformly favorable one for the garden. On March 6 snowdrops were blooming, one week later the crocuses followed, and early in April there was already quite a variety of outdoor flowers, since which time there has occurred no serious interruption of excessive heat, cold, wetness or drought. The season has been most favorable for the dahlia and it is many years since such a superb display of this popular flower has been seen in our gardens.

The first prize, \$50, for floral display at railroad stations on the line of the Boston & Maine has been awarded to Waltham. There were \$2,350 paid out in cash prizes, divided among 263 stations. In addition each agent was allowed \$10 for the purchase of bulbs and plants.

Auction sales of ferns, rubbers, and so forth, at McCarthy's have been exceedingly slow this season. Next Tuesday, however, a splendid lot of ornamental shrubs, shade trees, conifers and fancy evergreens will be offered and lively times are expected.

Martin Tuohy's new store at Charlestown was invaded on the evening of October 17 by a crowd of friends from South Boston, who presented Mr. Tuohy with a handsome Howard clock, so that he might always be on time with his orders.

J. T. Butterfield has just returned from the happy hunting grounds of Aroostook county, Me., but minus the moose he went to get.

Thursday night, October 22, was the date of the first session of the Horticultural Club for the season. Fred. S. Davis occupied the chair.

George A. Sutherland reports a phenomenal demand for the Koral letters ever since September 1.

Anderson & Williams are unpacking a big shipment of Crimson Ramblers for Easter forcing.

Wm. Sim is in with a large cut of elegant chrysanthemums.

JOLLET, ILL.—J. R. Hobbs is home again from New Mexico, after a two weeks' stay.

Philadelphia.

STOCK IN MORE ABUNDANT SUPPLY.—PRICES NOT SO STIFF.—DETAILS OF THE VALUES.—CHRYSANTHEMUMS COMING IN HEAVILY.—FLOWER MARKET TO BE OPENED WITH A SOCIAL.—EXHIBITS AT HORTICULTURAL MEETING.—VARIOUS LOCAL NOTES.

The stringency has eased up a little and it is not nearly so difficult to get flowers as two weeks ago. Each week shows an improvement in the stock, nearly everything being a grade better. Beauties, particularly, are fine and in good demand. Prices range from \$1 to \$3.50 per dozen, the latter price being for three-foot stems. Bridesmaids and Brides sell for from \$4 to \$6 and, a few, it is rumored, a trifle more per hundred. Bridesmaids are not yet satisfactory, as they are soft and seem to lose their color over night. Liberty and Kaiserin bring about the same as the others. Chrysanthemums are surely here and already some varieties are hard to move. Polly Rose is a pretty good early white but it

seems soft, as do many of the other sorts now coming in. This, I believe, is mainly the fault of the growers, many of whom do not soak their stock over night but wait until the morning to cut it and then send it in immediately. Such stock is bound to get soft and is sure to give trouble to all who handle it. Prices move between \$1 and \$2.50 per dozen. Wm. Moore offered the first Ivory on October 21. They were nice flowers and sold at \$1.50 per dozen. Carnations are moving fairly well at from \$1 to \$2 per hundred. Crocker, Joost and Hill are the best sellers. Violets are in good supply and the doubles sell at from 50 cents to \$1 per hundred. Singles are getting larger and from 30 cents to 50 cents is the price. Valley seems plentiful in all grades, the best being very fine and as compared with the common run well worth the \$5 that is asked for it. Green goods are in good demand. Asparagus sells for \$1 to \$2 per hundred sprays. Adiantum seems scarce while smilax is to be had at 15 cents a string.

The directors of the Philadelphia Wholesale Flower Market, at a meeting held last Thursday afternoon, decided to hold an introductory social reception in the new market room, 1224 Cherry street, on Thursday evening, October 30, from 8 to 11 p. m. At their request an invitation is extended through these columns to all connected with the business in its different branches in this city and vicinity, or indeed as far as this invitation is read, to be present on this occasion. Not only are the proprietors expected but their principal assistants as well, and, best of all, each man is to be accompanied by his wife or sweetheart. It is to be a large family gathering to open in a social way this new system of wholesaling the products of the many establishments that supply this city with flowers. There will be speaking by representative men in the trade, entertainment will be furnished by talent, refreshments will be served and there will be good music and dancing. The rooms will be elaborately decorated; in fact, nothing will be left undone to make the occasion one of the most delightful gatherings of the trade ever held in this city. Remember the date and hour, Thursday evening, October 30, at

OFFICE OF THE P. J. BERGMANS COMPANY, AUGUSTA, GA.

S. p. m. Make but this one engagement for the evening and keep it religiously.

At the October meeting of the Horticultural Society last Tuesday there was a nice display of flowers. Cosmos and chrysanthemums were the leaders and there were some fine flowers shown. The reports on the coming exhibition in November show that there promises to be an unusually fine display. Magnificent plants are to be seen at the private places and some choice seedlings will be staged for the first time.

Everyone is delighted with the news that the coal strike is over and if this means that coal will return to something like a normal price before cold weather sets in, there will, indeed, be great cause for rejoicing.

Robert Craig & Son's new carnation range is now completed and planted. They should cut an immense quantity of flowers, as the plants are very fine and the new Burnham houses are par excellence.

W. K. Harris has commenced to cut his early yellow chrysanthemum, Florence Harris. It is a fine, stiff, extra long-stemmed flower of a straw color. It is a great seller; \$3 per dozen is the price.

The small store on Eighteenth below Chestnut was opened by John Shellem, Jr., and not by his father as previously reported.

David Bearn, of Bala, is reported a victim of the film flam game to the extent of \$20. K.

St. Louis.

CLUB HOLDS CARNATION MEETING. — MANY GOOD BLOOMS EXHIBITED. — GROWER APPROVES OF EDGELY ROSE. — CHINA MERCHANT GIVES A FLOWER SHOW. — RETAIL FLORISTS DECORATE TABLES FOR PRIZES.

The attendance at the last meeting of the St. Louis Florists' Club, October 16, was very good and as usual a very pleasant afternoon was spent. The trustees' list of essays for the coming season was read and adopted with some additions. A vote of thanks was extended to the St. Louis *Star* for reminding the public that the pink carnation was Mr. McKinley's favorite flower. They sent out cards to be placed in the store windows a week before the anniversary of his death. No flower show of any size will be held this season. The members who have any specialties in chrysanthemums are asked to bring a few for exhibition purposes at the next meeting, which will be held on November 13. Outsiders who have new varieties are asked to send a few for exhibition. Three prizes will be offered for the best display, \$5, \$3 and \$2. They will be sold at auction after the meeting for the benefit of the club. At the last meeting several vases of carnations were displayed. One vase contained a bunch of Enchantress, exhibited by J. D. Thompson, of Joliet, staged by Frank M. Ellis, to whom they were sent. As the judges reported, they spoke for themselves. The St. Louis Carnation Company had a vase of fifteen different new and approved varieties each of which was good. A. S. Halstead, of Belleville, had several blooms of Beauty and Queen of Edgely. The two varieties are planted on the same bench, have the same soil, water and ventilation, yet the grower claims that the Queen of Edgely has two flowers to the American Beauty's one, both of the same quality. Some very interesting matters were brought up through the use of the question box. Most of the discussion was concerning

the carnation and its diseases. The meeting adjourned at 5:30 p. m. It is proposed that hereafter we meet at 2 p. m. instead of three o'clock.

The china department of the Simmons Hardware Company has for the last three days been the scene of a unique and beautiful floral display. The company offered two cash prizes of \$50 and \$25 for the best decorated dinner table, and four of the leading florists were entered in the competition, giving the public a very fine display. The table winning first prize was put up by Ostertag Brothers. The massive centerpiece was made up of pink and white cattleyas and lily of the valley and Asparagus plumosus. Additional color was given by a profusion of electric lights arranged among the flowers. Charles Connon carried off

JOHN D. THOMPSON.
(President-elect Chicago Florists' Club.)

the second prize with a table set for a golden wedding. The center piece was a vase of large white and yellow chrysanthemums in a very tall vase set on a mirror, bordering this was a circle of the same flowers and colors, while at intervals around the edge small bunches of three blooms held the smilax that was draped. Large bronze candelabra were used. Ellison & Tesson put up a fine table. The center piece was composed of orchids, lily of the valley, adiantums and asparagus set in a cut glass vase. Surrounding this were four larger or tall vases containing oncidiums, phalaenopsis and dendrobiums. On each of these vases near the top were small electric lights surrounded with smilax, which hid the wires. Scattered around the table were small vases with orchids and valley. The fourth table was on the same order as the first, that is low, so one could see over all the flowers when seated. It was the second most elaborate decoration. The centerpiece was of Golden Gates and adiantum, with a vase of cattleyas and valley in the center, with numerous colored electric lights. The napery was of the finest. R. J. M.

BATTLE CREEK, MICH.—Henry M. Burt, formerly with Eldred & Warburton, has opened a flower stand in Strain's restaurant, 20 Main street.

Chicago.

HEAVY RECEIPTS ON A WEAK MARKET.—OVER-SUPPLIES IN ALL LINES.—CHRYSANTHEMUMS SELLING MUCH UNDER LAST YEAR.—ROSES OF LOW AVERAGE GRADE.—EVEN WHITE CARNATIONS HANG FIRE.—CLUB MATTERS.—NOTES OF INTEREST IN THE LOCAL MARKET.

The market has been more than liberally supplied with stock during the past week. Cuts have been coming on with a majority of the growers and receipts are several times as great as they were in the first week of the month. For one thing, the chrysanthemums have been coming in very heavily. With a number of the growers the blooms have been maturing at such a rate that they are now pretty well cut out of all except the late varieties. There has been all kinds of stock offered, but little of it has been what would be classed as of the exhibition grade. Prices have been low all along the line, some well posted men estimating the value of chrysanthemums this season at all the way from twenty-five to forty per cent under a year ago. The stock which last year brought \$2 a dozen is now well sold at 10 cents per bloom. At these low prices it should be possible to move large quantities of chrysanthemums for All Saints' day next week and there are already some very large orders on for shipment to New Orleans Wednesday and Thursday of next week. The Beauty is the one item which seems to have held up in demand during the past week, and of this supplies have so increased that all requirements are met, both as to quality and price, with something to spare. Of tea roses there are thousands in the market, but only a small proportion of the stock grades up to the shipping requirements. One of the best posted wholesalers in the market said this week that he had never seen a time in October when the stock averaged so poorly as at present, which seems surprising, to say the least, for most growers report the season a very favorable one. There are oceans of short Golden Gates, and the call for funeral flowers is so well supplied by other things that these are very poor sale indeed. Carnations have taken a drop in price this week, even the whites hanging fire. Up to last Monday a white carnation was good property, but since then orders have been filled right along, and there has even been a surplus which has served to pull the averages down severely. Little really good stock is seen in the market at present, but there will be a steady improvement. Violets are also coming in heavily and the quality is good considering the warm weather, but sales have to be forced. The run of October weddings is supplying a fair demand for orchids, lily of the valley and smilax, but it cannot be said that the market has seen a shortage on any single item during the past week. With the growers throughout the whole Mississippi valley just coming into crop it looks as though the next two or three weeks would see unwieldy supplies on this market.

Nearly sixty made the trip to Joliet October 22, on invitation of the J. D. Thompson Carnation Company, and the popular manager left no stone unturned to make his guests feel at home. The penitentiary was visited during the forenoon and after dinner, at the Duncan house, the party was conveyed right up to the greenhouses by special car and engine. The stock and houses were in prime condition throughout, but, of course, Enchantress was the center of attraction. Little can be added to the

THE CHICAGO FLORISTS AT THE J. D. THOMPSON CARNATION COMPANY'S, JOLIET, ILL., OCTOBER 22, 1902.

praise already bestowed on this carnation, but it is pleasant to record that the variety appears to be even better than its sponsors have claimed. Well satisfied with the day of pleasure and enlightenment the party returned to town early in the evening by special car, refreshments being served enroute.

The regular meeting of the Florists' Club was held at Handel Hall October 22. Six new members were elected, namely, Philip J. Foley, of the Foley Mfg. Company; J. E. Jensen, John C. Ure, James P. Brooks, Roderick Mayer and Edward Satro. The special feature of the meeting was the election of officers, which resulted as follows: President, J. D. Thompson; vice-president, James S. Wilson; secretary, George Wienhoeber; financial secretary, Alex. Henderson; treasurer, Edgar Sanders; trustees, F. F. Benthey, George Woodward, John P. Risch, Philip J. Foley and Walter Kreitling. The sum of \$50 was donated to the premium fund of the Horticultural Society of Chicago. The next meeting of the club, which ordinarily would fall November 12, during the flower show, will be omitted.

The outing of the employes of Vaughan's Seed Store, which had been several times delayed on account of the weather, took place October 19, when a large party enjoyed the delightful day and fall scenery at Western Springs. Luncheon was served in the firm's extensive packing sheds, which were decorated for the occasion.

One of the good chrysanthemums coming in this week has been the Robert Halliday, from Gunnar Teilmann, Marion, Ind., who thinks it the best of all the yellows. Mr. Teilmann is a regular exhibitor at the flower show here and may be expected to show some particularly good stock this year.

Carnations are selling on the street stands at 5 cents a dozen, which will be cheering news to the growers. Roses, too, have become more of a glut each day as the week advanced.

Miss Hanke, for five years with A. Lange, and before that for a long time with the Art Floral Company, was married on Thursday to Frederick Klein.

Peter Reinberg has entered in thirty-five classes for roses and carnations at the Kansas City show. Leonard Kill will go out to stage the exhibits.

Kennicott Brothers say there is still good sale for choice chrysanthemums; they got \$4 per dozen for some really first-class yellow Wednesday.

The George Wittbold Company has a house of Begonia Gloire de Lorraine which is in fine shape. They report business excellent this fall.

This has been flower show week at A. Lange's. He sent out announcements to his trade and had many visitors and good business.

A. Dietsch left on Monday to spend the winter in Texas and Mexico. He has not yet succeeded in ridding himself of the asthma.

The meeting of the executive committee of the Horticultural Society of Chicago, called for October 20, was postponed.

Anton Then is at home from his New York trip. He has a son with John N. May, at Summit, N. J.

C. L. Washburn is now able to be at the store a few hours each day but is yet far from well.

Max Ringier, of Amling's, was operated on for appendicitis on Thursday.

Visitors: L. W. Wheeler, of Vaughan's Seed Store, New York; Mrs. W. A. Gontter, Battle Creek, Mich.; H. W. Turner, Redondo, Cal.

Cincinnati.

TRADE VERY DULL AND STOCK ACCUMULATING IN WHOLESALE HANDS.—NO QUOTABLE PRICES.—NOTES OF VARIOUS DOINGS.

There is a tremendous glut of roses in this city at the present time and it is a hard matter to move them at any price. Some very good chrysanthemums are being received and sell at from \$1.50 to \$2.50 per dozen, ordinary stock going at from 50 cents to \$1. Carnations are coming in more plentifully and if the bright weather continues, with as little business as at present, it is pretty hard to tell what prices stock will bring in a few days.

A visit to Gus Meier at Hyde Park shows his place to be in fine shape and the prospects good for a big cut of Bride and Bridesmaid this winter. His poinsettias are grand and he will be able to cut them with a six-foot stem, should any occasion require it.

Harry Altick, of Dayton, O., had a white sport of Glory of Pacific before the chrysanthemum committee last Saturday. This looks to be a good thing and for an early white it is pretty hard to beat in size and form.

Wm. Murphy has opened a city store at 130 East Third street, where he will have better facilities than formerly for handling his shipping trade, both cut flowers and cuttings.

C. J. McWilliams and Miss Ella C. Russell, daughter of Patrick Russell, the Price Hill florist, were married October 14.

Frank Ball is in Columbus attending the annual meeting of the grand lodge, F. and A. M., this week.

Louis Kyrk, formerly with McCullough's, has opened a new commission house on Third street.

L. M. Malcher, of Chicago, was in the city on business this week. D.

Toronto.

TRADE GOOD AND STOCK GENERALLY IN ADEQUATE SUPPLY.—QUALITIES GOOD ALL ALONG THE LINE.—CLUB HOLDS A MEETING.—FALL EXHIBITION ABANDONED.—EMPLOYEES FORM A UNION.—OTHER NOTES.

The Canadian Thanksgiving day, on Thursday, October 16, called for larger quantities of flowers than many of the florists expected. Chrysanthemums, which do not move any too freely, were much in demand, and towards evening almost everyone was sold out. The market, not being heavily supplied in any one line of stock, was pretty well cleaned up on everything. Business since has been very good and stock has been equal to the demand. The many orders for funeral work and weddings keep a surplus from accumulating. There are many chrysanthemums, but good demand, in both local and outside points, uses up all good blooms. Roses are good and the quality is nearly up to the winter average. Liberty is becoming very plentiful, the flowers have good rich color and stems are longer. Meteors are exceptionally fine and others well up to the average. Carnations are very plentiful, though white are still scarce. Lily of the valley has been scarce the last few days, the demand being so heavy that several lots had to be imported to fill orders.

The Florists' and Gardeners' Club held its first meeting at St. George's Hall, October 21. President Chambers being out of the city, First Vice-President Collins took the chair. Owing to the Pavilion having been burned the past summer, the special committee found no convenient hall in which to hold the chrysanthemum show, which has been postponed for this season. However, a special grant, which had been made by the Electoral District Society, has been applied for as prize money for the annual rose and carnation show which is to be held in the spring. At this meeting heretofore

there has been no prize money offered, but the coming season the show will be much more elaborate.

The florists' employes held a meeting in Richmond Hall last week for the purpose of forming a union. Twenty-eight members were enrolled and officers elected for the ensuing year. How this union is going to benefit its members, or what their intention is, seems a matter of some doubt, but the principal thing was to get the union started.

Frank Duffort, of Little York, has been cutting some very nice carnations, mostly Morning Glory and Glacier. His pink and white Ivory were the first in this vicinity and blooms were exceptionally fine for this early season.

W. Hill recently purchased the place adjoining and has taken out the partition, using one-half of the store for fruit and the other half for flowers. He has also built a conservatory at the rear of the store.

Thos. Plumb has remodeled his store. Plate mirrors and a new window have added materially to the appearance of the place and his Thanksgiving window of wheat was very attractive.

Azaleas have arrived in fine shape this season. The plants have retained all their foliage and seem well set with buds.

Ernest Collins, foreman of the greenhouses at the Horticultural Gardens, has returned from his trip to Europe.

Lowell, Mass.

WEATHER FAVORS INCREASED PRODUCTION.—ABUNDANT SUPPLIES FOR LARGE OCTOBER BUSINESS.—AN OPENING AND OTHER NOTES.

The weather man has been very kind to us the past week and we hope he will continue so. At present we are enjoying clear, sunny days, which have increased the supply of stock immensely. Roses, especially Brides and Bridesmaids that were recently short in supply, are now coming in by the thousands and the prices obtained for same are small when the quality is taken into consideration. Liberty and Balduin are about the only red roses that sell at present. Meteors are coming in but with no sweet fragrance like the other two. Some very fine Beauty and Queen of Edgely are to be had at from \$1.50 to \$5 per dozen, but the supply is still limited. Morgan of good quality but very short in stem is to be had in immense quantity and cheap. With the increasing supply of chrysanthemums other flowers must suffer for awhile. The cut of Glory of Pacific is about through, and no one is sorry, for after a few days they look washy, making them unsalable. Mrs. Robinson is coming in and it is up to Bergmann to move on. Vivian-Morel has showed up in all its splendor, being the only pink available here now. Monrovia holds its own for yellow but will soon have to vacate to make room for Col. Appleton. Business is keeping up in splendid shape and October promises to hold good to the end. Patten had two weddings last week which used up considerable stock. All through the month business has been good. Last Saturday Whittet & Company were extremely busy with funeral work, taxing their greenhouses for stock of good quality.

The past week was a busy one at the Highland Conservatories. Besides having to furnish several hundred plants for the opening of the Bon Marche, they were deluged with funeral orders. On October 16 to 18 Mr. Greene had his

seventh annual opening to the public. The houses, ten in number, were all dressed up in their best, and so were the men, under the leadership of Wm. Hodge, the foreman. Each visitor was presented with a souvenir in the shape of a plant. Over 2,000 Asparagus Sprengerii in 2-inch pots, were given away.

A recent ramble through some of the private greenhouses showed some very fine chrysanthemums, especially those grown by Frank Sladen, gardener to Geo. W. Fifield.

The demand for violets the past week has been enormous and the prices have jumped skyward, for this time of the season; 75 cents to \$1 per hundred has been obtained.

John J. McManamon has political aspirations and is a candidate for representative from the twenty-fifth Middlesex district. A. M.

Cleveland.

TRADE UNPRECEDENTED IN THE HISTORY OF THE CITY.—EVERY SOCIAL EVENT REQUIRES LAVISH DISPLAY OF FLOWERS.—GOOD MATERIAL AT HAND.—NO SEVERE FROSTS AS YET.—MOVEMENTS OF STORE-KEEPERS.

Business for the past week has been good to a remarkable degree. Never before in the history of the local trade has there been such a demand for cut flowers. The society people seem to vie with one another in entertainments and lavish display of flowers. The principal call seems to be for chrysanthemums and from \$3 to \$5 per dozen is the ruling price for fair to good flowers. Roses and carnations are becoming more plentiful and the quality improving right along. Chrysanthemums and orchids were in all the store windows last week. Smith & Fetters and the Gasser Company displayed some fine spikes of Oncidium Rogersii. These, mixed with white chrysanthemums and asparagus, make a very pretty showing. Carnations are good and violets are improving in quality. Dahlias are still in abundance and cosmos can be had in quantity at any price. The light frosts we have had did not damage outdoor stock to any great extent. Nearly all of the tender stock has been housed and all preparations for a killing frost have been completed.

C. M. Wagner has moved into his new store across the way in the Schofield building and is now in a position to bid for the best trade in the city.

Mrs. Walker and her sister, Miss Seaver, and Mrs. McLean, of Youngstown, are spending a few days with friends in Cleveland.

E. A. Fetters returned to his Arizona farm this week. His partner, Mr. Smith, is recovering rapidly from his recent illness. ECHO.

Washington.

DEPARTMENT OF AGRICULTURE FINDS IT IS GIVING A FLOWER SHOW.—MANY VARIETIES OF CHRYSANTHEMUMS ON VIEW.—TRADE NOTES.

At the Department of Agriculture they are making quite a show with chrysanthemums, using the grapery to good effect. They have about 120 varieties, some single-stemmed, and those in large pots have from twelve to eighteen flowers, including most of the latest introductions. Quite a number of them are at present in full bloom, among them the following: Mme. Philippe Roger, Honesty, Iora, Mrs. J. M. Wilson, John K. Shaw, Golden Harvest, W. J. Bryan, Edgar

Sanders, Mrs. F. L. Button, Mrs. Gordon Dexter, Robert Halliday, Col. D. Appleton, President McKinley, Mira, Mrs. Henry Robinson, R. Hooper Pearson and Louis Boehmer, but the majority of the best are just showing color. They did not intend to make a special exhibit but after the plants were housed and began to show color the newspaper men got hold of it and the public is flocking there and the officials decided to make as good a show as possible. At the propagating garden they have had as good a show for the last four or five years, but the people did not take much interest in it. They have two houses of violets there, each 10x140. One was planted with diseased plants to study the violet diseases. The other was planted with eighty-two varieties for comparison. The experiments are carried on under Dr. Galloway's personal supervision.

Willie Clark, eldest son of W. S. Clark, has been confined to his bed for the last three weeks with typhoid fever in a mild form. P. G.

Indianapolis.

CARNIVAL MAKES BUSINESS.—STORES DECORATE FOR PRIZES.—HAIL BRINGS LOSS TO A NUMBER OF GROWERS.—LOCAL NOTES.

Last week's carnival and horse show brought some business to the florists. A good many extra cut flowers were sold and many business blocks and show windows were decorated with greens and flowers in competition for prizes. The decoration of the "When" took first and that of the Kahn Tailoring Company second prize. The "When" decoration was a very costly one, done in flags, ribbons and other material in the dry goods line. With the Kahn decoration Irvin Bertermann, of Bertermann Brothers, secured excellent effect with very simple material, wild smilax, oak leaf garlands and a few ribbons.

In the afternoon of October 16 a hail storm struck this city, the first one for a good many years. Most of the florists escaped without loss of glass, but Bertermann Brothers and the Smith & Young Company were slightly damaged. A. Wiegand & Sons lost about 1,000 square feet, but are insured. The heaviest losers are H. W. Ricman, who estimates his loss at about \$150, and Fred. Huckriede & Son, who were damaged to about the same extent. The Hail Association will get quite a few members here as a result of the storm.

Between now and the Kansas City show a number of Indianapolis florists are planning a trip to some neighboring city of floricultural renown.

Mr. and Mrs. John Bertermann will visit the Kansas City show. H. J.

Columbus, O.

CHRYSANTHEMUMS GROWN BY MARKET GARDENERS.—GOOD STOCK SELLING LOW.—AFFLECKS SELL PLACE AND ARE LIKELY TO DISCONTINUE BUSINESS.

Large quantities of cut chrysanthemums are already making their appearance on our Central market, among which there is some pretty fair stock, but some of these are sold very low, since they are grown by truckmen as a side issue. Thus far but few pot plants are displayed and it is the opinion of our local growers that there is no more money in pot grown material. The chrysanthemum show, which was to have been given by a society of ladies in the interest of some worthy local insti-

tutions, has been declared off on account of lack of interest.

The Atleek place has been sold and the greenhouses of about 15,000 feet of glass will be torn down by the purchaser, who has bought this most beautiful place for residence purposes. Howard Atleek states that he will likely discontinue the florist business.

John Rhein, with J. R. Hellenhat, who suffered an attack of neuralgia of the heart, is back at work again, while Jacob Reihert, with the Franklin Park Floral Company, is still confined to his home, suffering from blood poisoning.

Some beautiful beds of the large-flowering cosmos are now in full bloom about here but, strange to say, there has been very little call for the cut flower.

CARL.

Omaha.

TRADE ACTIVE.—ALL STOCK SELLING AND PRICES WELL MAINTAINED.—CHRYSANTHEMUMS NOT BADLY WANTED.—DOINGS OF THE GROWERS.

Business has been good for the last few weeks and in consequence prices have kept up well and everything sold, no matter what flowers they were. Stock is now more plentiful and good, as we are having the finest kind of weather. Chrysanthemums are coming in but mostly of the larger size. There is no rush for them and smaller varieties could be used to greater advantage. Violets are showing up well this season. Messrs. Peterson and Sorenson, of Florence, Neb., are sending in some very good ones, double and single.

Chas. Ederer has been smiling for the last two weeks because of a new son at his home. Mr. Ederer has a fine lot of young roses in his two new houses erected this season, 18x125 each.

Lewis Henderson and P. B. Flth made displays of plants and cut flowers at the county fair and honors were evenly divided. S. B. Stewart made a fine display of bulbs.

Hess & Swoboda are cutting a fine lot of carnations. They are putting in a 100 horse-power boiler in place of two smaller ones.

A. Donaghue has finished remodeling his range of houses and added one new carnation house to it, 20x150.

Jos. Frey, of Frey & Frey, Lincoln, spent Sunday here and reports good business.

Some of the Omaha florists will attend the Kansas City flower show.

C. W. Scott, of Vaughan's, Chicago, was a recent visitor. GRIPPE.

Syracuse, N. Y.

GOOD STOCK IN ALL THE LOCAL HOUSES.—ANTICIPATIONS OF A BIG SEASON'S BUSINESS.—TRADE ACTIVE AND GOOD PRICES REALIZED.—PIGEON FANCIERS.

Henry Morris has had an excellent display of chrysanthemums for the past two weeks, the quality being better than in previous years. The retail prices range from \$3 to \$6 per dozen. Mr. Morris does not grow them in pots at all, although there is quite a demand for them. Carnations are not very good, there being many bursted calyxes, but bring 50 cents a dozen. Mr. Morris has had such good success with his American Beauty roses that he expects to build a new house 25x150 and has already bought the lumber for it. Beauties now sell for from \$3 to \$9 a dozen and other roses from \$1 to \$2. Mr. Morris is beginning to pick some violets outdoors and they bring \$2 a hundred.

P. R. Quinlan & Company have two houses of benched and two houses of potted chrysanthemums which are fully up to the standard. This firm considers the white Golden Gate rose as one of the finest on the market. Carnations are a little late on account of the wet weather. Mr. Quinlan is preparing for a big business in violets, which seem to grow in popularity every year. The sale at Christmas is especially large.

L. E. Marquisee is on a trip to New York city. His Marquis is just coming on. He receives many inquiries about his new white, Empire State, and has already booked many orders for cuttings. He has a house of this carnation planted in July and August which looks fine. Mr. Marquisee is also cutting chrysanthemums. He has recently completed a house 265 feet long.

Several of the Syracuse florists are raising homing pigeons as a pastime and they say that their work is well rewarded. H. Bellamy is vice-president of the Syracuse District National Association of American Homing Pigeon Fanciers. In the cup contest a few days ago he took sixth place. Another enthusiastic fancier is Robert Bard. A. J. B.

Pittsburg.

TRADE BRISK AND STOCK MOVING NICELY.—ROSES PLENTIFUL BUT PRICES SHORT.—LARGE RECEIPTS OF CHRYSANTHEMUMS TO BE FEARED.

Transient trade is good and business is steady. The weather has been delightful and growers have their outside work about cleaned up. Roses are much improved and the supply is long. Carnations are going to excel those of last year for size and, I suppose, popularity. Prosperity. Mrs. Lawson, Goethe, Crocker and Dorothy are the leaders now and they are generally above their usual quality for this season. The supply is short as yet. Chrysanthemums are steadily increasing in variety and improving in quality. While the sale is fair yet it looks as though we were going to have an over-supply for a short period. Too many will reach the market at the same time. Cattleyas are of a high standard and meet with a fair demand. Harrisii were short. Lily of the valley is firm. Violets are much improved and the sale is good.

Mr. and Mrs. Philip Langhans celebrated their tin wedding on Monday evening, October 20. They were the recipients of many presents suitable for that occasion. Among the number was a ehamois bag containing \$500 in tin.

J. B. Murdock & Company are still heating their houses with a temporary boiler. Their new battery of boilers are on the ground but owing to slight alterations they have been unable to get them into position.

A letter from Mr. Langhans, of Wheeling, W. Va., expresses his satisfaction with the progress of his new store. It has been an up-hill fight but it is worth while.

Charlie Hoffmeyer, of Carnegie, met with a painful accident on Monday, a sharp instrument falling on his left foot.

Miss Maxwell, of Wilkinsburg, has greatly improved her store and the general tone indicates prosperity.

A. M. Murdock is making an artistic orchid display. E. L. M.

DANVILLE, ILL.—Frank B. Smith & Son have secured a lease on a larger and better store, North and Vermilion streets, and will occupy it November 1.

Minneapolis.

SOCIAL AFFAIRS MAKE BUSINESS GOOD.—RED ROSES AND WHITE FLOWERS THE SCARCITIES.—VARIOUS NOTES.

A large number of weddings and social functions last week helped to cause an unusual demand for stock which at present writing is not at all plentiful. Meteor roses were the only tens that were exceedingly hard to get, although Bride, Bridesmaid, Liberty and Golden Gate were cleaned up daily. Beauties with long stems were scarce. Carnations are improving in quality and the cuts are increasing. Violets are appearing more plentifully and find ready sale at from \$1 to \$1.50 per hundred. Chrysanthemums are not seen in large numbers yet and the prevailing color is white, which insures a good sale, as white flowers are not plentiful.

John Monson had two large decorations last week, which took quantities of flowers and wild smilax.

H. Barsch has been supplying the market with tuberoses of very choice quality.

R. J. Mendenhall has given a chattel mortgage for \$4,274.00, it is said.

The growers have been busily engaged in boxing their Holland bulbs.

C. F. R.

Buffalo.

WOMEN DO SUCCESSFUL FLOWER BUSINESS.—TRADE BRISK AND STOCK IN SHORT SUPPLY.—NOTES OF LOCAL INTEREST.

Speaking of lady florists, in Buffalo we have four who are very active. Miss R. M. Rebstock, on Main street, Mrs. Schoenhut and Miss Reinhart, on William street, and Miss Donovan, on Elk street, are each doing a very successful business. Mrs. Schoenhut has four greenhouses, where palms and bulbous stock are grown. The man who opens a store in their locality would find pretty hard competition.

We were pleased to hear of Patrick Welch's anniversary and extend our best wishes. Everyone in Buffalo knows "P. W."

Trade is fair and stock good, what there is of it. There are a number of weddings but no large receptions this week.

The B. F. C. are about due for a meeting and I think one is to be called for next week.

Palmer & Son have appeared on the streets with fine new wagons.

W. F. Kasting is unusually busy with fall orders. BISON.

Nashville, Tenn.

STOCK NONE TOO PLENTIFUL FOR HORSE SHOW DEMANDS.—DOINGS OF THE GROWERS.—A BIG COAL PILE.

The horse show last week made a large demand for flowers, especially Beauties and white roses, the horse show colors being red, white and blue. The blue flowers to fill orders were scarce, violets not being in much supply yet.

Geney Brothers are rebuilding their greenhouses on higher ground, so as to have a dry boiler room. Their stock looks well, especially chrysanthemums.

McIntire Brothers are putting down a well for water. A hole 200 feet deep yields very little, but they hope for better results in the next 200 feet.

T. S. Joy wears a broad smile on his face these days; it is a big coal pile, thirty-five car loads, their winter's supply.

17x50.

Syracuse, N. Y.—Henry Morris, Beauty
house 25x150.

Essex, Conn.—Frederick Scholes, one
plant house.

Injured Carnation Blooms.

ED. AM. FLORIST:—I have a bench of
White Cloud carnations which are giving
a crop of diseased blooms; about seventy-
five per cent are of no use. The plants
are healthy and giving a good stem.
The soil is three parts sandy loam and
one part well-rotted cow manure. The
good blooms are of fine size; the others
show brown or dead spots as soon as the
buds begin to open and they never attain
their full size. There are good and bad
flowers on the same plant. What is the
trouble and the remedy? C. V. K.

It is pretty hard to tell what the
trouble is without seeing the blooms, but
from the description I should judge that
it is a very bad case of thrip. If that is
the case the remedy is to fumigate with
tobacco stems sprinkled with a small
handful of red pepper to each half bushel
of stems. Do this every evening for ten
days or two weeks, as there seems to be a
big lot of the thrip in the houses. Thrips

are very small insects, almost invisible
to the naked eye, but the matured insect
can be found in the heart of the flower or
bud and is a dull brown or black and is
very active, jumping as soon as he sees
the light. If this correspondent examines
closely he will likely find a good lot of
these fellows about the flowers but if a
careful investigation fails to find any,
then I could not suggest any remedy unless
I could see the plants growing.

ALBERT M. HERR.

Full of Information.

ED. AM. FLORIST:—I enclose \$1 for
renewal of my subscription to your paper,
which is hard to beat and full of informa-
tion, a paper I can not do without.
Pittsburg. GEO. J. LEARZOF.

Society of American Florists.

DEPARTMENT OF PLANT REGISTRATION.

Jacob Becker, Fifty-second and Market
streets, Philadelphia, Pa., registers new
rose Ideal, a sport from La France,
flower pink without the bluish tint or
tendency to curl the petals which are
characteristic of La France, foliage
heavier, darker green and not so large as
in the parent. W. J. STEWART, Sec'y.

Large Damages Obtained.

The suit of M. H. Walsh and Miss Fay
of Wood's Holl, Mass., against the N. Y.,
N. H. & H. railroad for injury to roses
has been settled for \$20,000. This suit,
which has been followed with great inter-
est by horticulturists, was for damages
resulting from the smoke and gas of
burning tar. The railroad company
demolished a round house and burnt up
the debris, including the tarred roof. Mr.
Walsh's valuable seedling roses as well
as the garden roses which have contrib-
uted so many prize winning displays at the
Massachusetts Horticultural Society's
shows, were practically ruined. The suit
has been in progress for some time.

Chrysanthemum Society of America.

Following are the reports of the com-
mittees judging seedlings and sports:

Cincinnati, October 18.—Harry M.
Altick, Dayton, Ohio, exhibited Estelle, a
Japanese reflexed, white variety which
scored 85½ points commercial scale. It
is a white sport of Glory of Pacific, differ-
ent from Pacific, Polly Rose or White
Pacific by being built up in center, one-
third deeper and petalage being more
irregular than above named. Mr. Altick
claims it to be earlier by a week than
Pacific grown under same conditions.
He began cutting same on October 4,
1902. EDWIN LONSDALE, Sec'y.

Session for Flower Growers.

ED. AM. FLORIST:—G. C. Creelman,
secretary of the Ontario Fruit Growers'
Association, has notified me that it is
proposed to add a new feature to the
programme at their next annual meeting,
to be held at Walkerton, Ont., on Decem-
ber 1 and 2. A special session will be
held for those interested in the cultiva-
tion of plants and flowers. Papers on
these subjects will be read and Mr. Creel-
man is anxious to secure the attendance
of other gentlemen who are interested,
trade or otherwise. This opportunity
should not be lost, as a full report of the
meeting is issued by the government.

A. H. EWING, Sec'y C. H. A.
Woodstock, Ont.**St. Louis World's Fair Buildings.**

A REPLY TO J. C. VAUGHAN.

MR. J. C. VAUGHAN, Chicago, Ill.

Dear Sir:—When I answered your letter
this morning I was not aware of the fact
that it had been printed in the AMERICAN
FLORIST as an "open letter." I have just
found such to be the case and beg to cor-
rect the wrong impression under which
your labor in two or three particulars:

You refer to the great prominence given
to horticulture at the Buffalo exposition.
Since that department was in my charge
I can speak with some knowledge of it.
I remember that you had no exhibit in
the horticulture building but that the
material you sent was planted at various
attractive and showy points upon the
grounds. You will doubtless remember
that in the central court of the exposi-
tion no horticulture exhibits were, with
one slight exception, permitted. At this
exposition there are about 200 acres of
land between and surrounding the build-
ings of the main group all of which will
be available for first-class floral exhibits.
This will be a much more prominent
space than was possible at either Buffalo
or Chicago, except perhaps the Wooded
Island at the latter exposition.

The partial block plan printed in the
AMERICAN FLORIST, on page 411, will
naturally be filled out later by giving the
details of the additional exhibits to be
located; this will show that all of the
ground west of the French Government
building is to be covered with foreign and
state buildings, thus bringing the hill
upon which is located the Agriculture and
Horticulture buildings very nearly into
the center of the grounds. Neither of
these buildings could have been placed
where the plat is marked "concessions"
by reason of the contour of the grounds,
unless there had been supplied for por-
tions of the buildings supports at least
fifty feet in height; this would have made
a rather awkward appearing building.

I saw a note in a St. Louis paper last
week to the effect that you were here and
regret exceedingly that you did not come
out and let me show you over the
grounds. I am sure that I should have
been able to show you, by ocular demon-
stration, that the very best location on
the whole grounds is that occupied by
the buildings for Horticulture and Agri-
culture. I should also have been able to
show you that there are acres upon
acres of ground available between and
around all of the buildings upon which
there may be planted floral and plant
exhibits of the kind in which you are
interested.

I sincerely hope that the next time you
are in St. Louis you will give me an
opportunity to show you all about the
arrangement of the grounds and build-
ings, after which, if you feel that there is
just cause for criticism, I shall not offer
the slightest objection. In the interest
of that harmony, however, which should
prevail and has always prevailed between
the department of horticulture and the
exhibitors in all of those expositions
with which I have been connected, I hope
that you will not offer criticism to the
public until such an opportunity has
been given you to know from a personal
examination what are the facts.

It is the desire of this exposition that
horticulture be presented in a better way
than it has ever been shown at any expo-
sition. I believe that both the opportu-
nity and the facilities have been provided
and that you would say so were you to
go to the bottom of the matter. With a
sincere desire to bring about this end,

and requesting the cordial and hearty co-operation of all horticulturists, I am, Yours very truly,
(Signed) **FREDERIC W. TAYLOR,**
Acting Chief, Dept. of Horticulture.
St. Louis, Mo., October 20, 1902.

OBITUARY.

HENRY MOORE.

There died in Memphis, Tenn., October 21, one of the pioneer florists of the south. Mr. Moore was a native of Pennsylvania and when a young man came south, before the war between the states. He enlisted in a confederate regiment and marched and fought all through the conflict. At the surrender he came to Memphis and engaged in the florist business. By a combination of fortunate circumstances coupled with an untiring energy and a love of his chosen occupation, he amassed a fortune sufficient for him to retire from business in 1892. He leaves a devoted wife, children and grandchildren. His funeral, under the charge of his brother Odd Fellows, was largely attended and numerous floral offerings from the trade attested his popularity with his fellow florists.

FREDERICA A. GUDE.

Mrs. Frederica A. Gude, of Washington, died October 15, of heart failure after a short illness at the residence of her son, Wm. F. Gude. The funeral was held October 17, interment being at Prospect Hill Cemetery. In respect to her wishes her six sons acted as pall bearers. They are Geo. A., Henry W., Charles, Adolphus, Alexander and William F. Gude. Mrs. Gude has been a widow since January 17, 1887, and when her husband died their six sons then acted as pall bearers. She was born in Bieblingen, Werthenberg, Germany, July 20, 1827, came to America in 1852 and was married in Lynchburg, Va., in 1853. She had nine children, seven sons and two daughters. Besides the six surviving sons there are twenty-two grandchildren. Mrs. Gude had only been a resident of Washington for about one year, having lived at Takoma Park, Maryland, for the previous thirty-one years.

Catalogues Received.

J. C. Williams, Montclair, N. J., nursery stock; Victor Lemoine & Sons, Nancy, France, miscellaneous plants; The Alabama Rose Gardens, Newbern, Hale county, Ala., roses; J. Bauscher, Jr., Freeport, Ill., seeds and floral designs; Samuel C. Moon, Morrisville, Bucks county, Pa., trees and vines; Thaddeus N. Yates & Company, Philadelphia, Pa., trees, shrubs, vines, etc.; Peter Lambert, Trier, Germany, roses; Harlen P. Kelsey, Boston, Mass., nursery stock; Jackson & Perkins Company, Newark, N. Y., nursery stock; Thomas Meehan & Sons, Germantown, Pa., trees and shrubs; Frank Banning, Kinsman, Trumbull county, Ohio, gladioli; H. Cannell & Sons, Swanley, Kent, Eng., nursery stock; Roustain Servan & Company, Saint-Remy-de-Provence, France, miscellaneous plants; Ernst Benary, Erfurt, Germany, flower seeds; Pinchurst Nurseries, Pinchurst, N. C., trees, shrubs, plants and bulbs; Gilbin & Company, Utica, N. Y., boilers and heating apparatus; Pittsburg Cut Flower Company, Ltd., Pittsburg, Pa., cut flowers and florists' supplies; Wm. Paul & Sons, Waltham Cross, Herts, Eng., roses, trees, etc.; P. D.

Hauser & Sons, San Antonio, Texas, plants, floral designs, etc.

ROCKFORD, ILL.—H. W. Buckbee expects to make extensive exhibits of plants and blooms at the Chicago and Kansas City flower shows.

ORANGE, N. J.—The New Jersey Floricultural Society will have no show this year. It was at first proposed to have a show and all necessary arrangements were made, schedules being printed and issued, but they did not succeed in raising a guarantee fund and the project was dropped for this year.

GRAND RAPIDS, MICH.—The *Herald* says: "Crabb & Hunter have leased the Robertson farm, adjoining the Masonic home property, for a term of seventeen years, from Trustee Charles W. Garfield. The firm will build large greenhouses and go into the nursery business on an extensive scale."

SITUATIONS, WANTS, FOR SALE.

Advertisements under this head will be inserted at the rate of ten cents a line (six words) each insertion. Cash must accompany order. Plant ads. not admitted under this head.

Every paid subscriber to the *AMERICAN FLORIST* for the year 1902 is entitled to a five-line WANT ADV. (situations only) free, to be used at any time during the year.

THE SEED TRADE.

AMERICAN SEED TRADE ASSOCIATION.

WALTER P. STOKES, Pres.; C. N. PAGE, First Vice-Pres.; S. F. WILLARD, Wethersfield, Conn., Sec'y and Treas.

SUNFLOWER seed is being offered at lower rates than for some years.

It is not thought that much shortage exists on the general list of water melon though a few are scarce.

SIMON LORENZ, of Erfurt, Germany, according to European papers, died September 14, in his 71st year.

VISITED CHICAGO: A. J. Brown and wife, Grand Rapids, Mich.; Robert W. Pommer, of D. I. Bushnell & Company, St. Louis.

HOLLY prospects in the older and central Delaware districts are not as good as usual. The Virginia crops are yet to be heard from.

WHITE onion sets are a poor sample in the west and prices the highest on the whole list. Egyptian or winter tree sets are a drug on the market.

THE outlook for bouquet green is better in the face of the past ten days of warm, bright, Indian summer weather. Reports indicate a goodly supply coming in at all points, but prices paid to pickers remain higher than last year, as stated in our former notes, and the bulk of the output will be owned at advanced rates.

LATE advices from the originators of the White Lady gladiolus would indicate that they are not able to fill any orders for the same for the coming season. Last year they lost almost their entire stock of this kind, and had to start over again with it, and the new stock, being too small yet, is not ready for dissemination. Gladiolus fanciers will have to depend for their supply for the coming season on the few White Lady which were carried over in this country.

Atlanta, Ga.

BUSINESS BRISK AND STOCK EQUAL TO THE DEMAND.—GOOD QUALITIES AND FINE RETAIL PRICES.

The weather is very fine, with a light frost on October 15, but nothing was hurt. Cosmos, dahlias and roses outdoors are at their best. The horse show the past week was quite a success. It was a boon for the florists. Everything in the way of cut flowers sold readily at good prices. The supply was equal to the demand. There were also a number of house decorations and enough funeral work to keep them all busy.

Carnations are not plentiful yet, but the outlook is fine. Chrysanthemums are coming in and there will be some fine stock soon. Beauties are scarce at present and sold well for the horse show. Brides, Bridesmaids and Kaiserins are plentiful and very fine.

Prices at present are good. Beauties retail for from \$6 to \$7 per dozen, tea roses at from \$1 to \$1.50; carnations for 75 cents and \$1; chrysanthemums for from \$3 to \$6.

The fall plant trade is picking up nicely.

Springfield, Mass.

DEPARTURE OF OUTDOOR STOCK AN AID TO BUSINESS.—CHRYSANTHEMUMS BRING LOSS TO ROSE GROWERS.

Since last writing we have had two hard frosts, which have cut off the outdoor flowers, making trade more brisk

and steadier in the stores. Chrysanthemums are coming in good quality and hurt the sale of roses. Carnations hold their own well. Violets do not go off as fast as usual, but we attribute this to the quality not being extra good as yet. There has been a fair amount of funeral work.

Some of our growers say they are going to close their places if coal does not come down in price. Others are trying oil and engine spark and some are breaking their backs sawing wood.

L. D. Robinson has just completed his new house, which he is to devote to miscellaneous stock.

L. Morgan, of Longmeadow, is cutting some fine carnations and some splendid Appleton chrysanthemums, which are unusually early.

Aitken had two good decorations last week, using up a lot of chrysanthemums, with which his houses are a fine sight at present.

Wm. Schlatter and C. F. Fairfield both report business as fair. A. B.

DAVENPORT, IA.—The local papers started the report that Otto Klingbiel had sold out to W. J. Orendorf. The fact is that merely a good order of stock was sold. There is no change in either place.

OVER 2,000 ACRES IN CULTIVATION.

Braslan Seed Growers Co.

THE NURSERY TRADE.

AM. ASSOCIATION OF NURSERYMEN.

CHAS. A. LIGENFRITZ, Pres.; D. S. LAKE, Vice-Pres.; GEORGE C. SEAGER, Rochester, N. Y., Sec'y. Twenty-ninth annual convention, Detroit, Mich., June, 1903.

The Stephen Crane nursery at Norwich, Conn., has been disposed of to Orman E. Ryther, who will conduct the establishment in his own name hereafter.

The Des Moines Nursery Company has been incorporated. The authorized capital stock is \$50,000 and the business of J. W. Hill is to be henceforth conducted under the new name.

E. W. KIRKPATRICK, of McKinney, and C. Falkner, of Waco, have been touring the state for the Texas State Horticultural Society, seeking to stimulate the pecan industry by spreading knowledge of its possibilities.

Vitis Coignetiae.

ED. AM. FLORIST:—We are mailing you under separate cover leaves of the vine sent out several years ago as Vitis Coignetiae and recommended at that time as a decorative vine producing very brilliant colored foliage in the fall. Until this season it has not met our expectations in this respect, but just now, either owing to the greater maturity of the vine, or a specially favorable season, or perhaps part of both, the vine in question is certainly a most beautiful sight, as the foliage has turned the most brilliant crimson and yellows, as you will note by the leaves sent you. If this plant will continue in the future to produce such magnificent color it certainly is well worth more free use.

ELM CITY NURSERY CO.

Baltimore.

GOOD STOCK SHOWN EVERYWHERE.—NOTES OF THE SPECIALTIES.—FLOWER TRADE IMPROVING.

Richard Vincent, Jr., & Sons' new houses are nearing completion and their great field of dahlias is, at this late date, as beautiful as ever. The double cactus dahlias, of which they have a very large collection, seem to be in general favor with the public.

Wm. Paul Binder, gardener at Willowbrook, H. A. Parr's beautiful country home, has some fine chrysanthemums and his seedlings are of exceptional merit. He has a very fine pink in the new variety, Mrs. Harry V. Casey.

A visit to Halliday Brothers was quite a revelation to me, for I have never seen such fine chrysanthemums and carnations. Their single violets are also very good. They are not growing the double variety any more.

Charitable organizations of this city will be given tickets for sale for the chrysanthemum show, and our committee will allow a most liberal percentage to aid charity.

I. H. Moss has a number of very good houses of carnations. He is doing a good business and his twenty-two acres are now filled with high class nursery stock.

Trade in Baltimore is now picking up somewhat. Cut flower business has improved considerably.

Akelhursts' new seedling carnation, a fine cerise in color, named Alice Lee Thomas, is very good.

Mrs. Lawson carnations are being grown in considerable quantity in this vicinity.

Peoria, Ill.

GROWERS GETTING CHEAP FUEL.—NOTES OF DOINGS IN THE TRADE.

Not all sections of the country are suffering for coal. Cole Brothers are buying good coal screenings, with some lump coal in it, for 1 cent per bushel and haul it themselves.

Miss Jessie Stevens, recently with Geo. A. Kuhl, is leaving for Aurora, where she has accepted a position with J. M. Smely.

The corn carnival attracted a great

many visitors and made some little business for the florists.

Chas. Loveridge is finishing repairs and new heating arrangements.

Geo. A. Kuhl, who has been ill, is improving.

PITTSFIELD, MASS.—John White and Mrs. Maria G. N. Grey were married October 20.

BARRE, MASS.—Warren H. Manning gave an illustrated lecture on landscape art in Library Hall on October 4.

OUR PASTIMES.

Announcements of coming contests or other events of interest to our bowling, shooting and sporting readers are solicited and will be given place in this column.

Address all correspondence for this department to Wm. J. Stewart, 79 Milk St., Boston, Mass.; Robt. Kift, 1725 Chestnut St., Philadelphia, Pa.; or to the American Florist Co., 324 Dearborn St., Chicago, Ill.

At New York.

On Monday afternoon the New York Florists' Bowling Club rolled to the following score:

Player	1st	2d	3d
Hansen	149	151	173
Browning	142	136	139
Traendly	132	192	148
Lang	171	159	160

At Chicago.

The bowling contingent met at McKellar & Winterson's on Thursday evening and mapped out a plan for the winter's campaign. A league of probably four teams was formed which will roll a series of weekly games. It was resolved that from the four teams the best five men be selected to represent Chicago at Milwaukee next August, it being distinctly understood that non-members of the bowling club will not be allowed to compete. A committee consisting of E. F. Winterson, Geo. Scott, Alex. Henderson and George Asmus was appointed to secure alleys and to prepare a schedule. E. A. Winterson, Charles Hunt and Walter Kreitling were appointed to secure trophies. The teams thus far assured to the enterprise represent the retailers, the wholesalers, McKellar & Winterson and Vaughan's Seed Store.

New Orleans.

CLUB SEES SHOW OF ROSES AND DAHLIAS.—FLOWERS NOW AT THEIR BEST.—CHRYSANTHEMUMS UNDER GLASS.—A BIG DAY AT HAND.

The last session of our club was a rose meeting. This is the time of the year when roses are at their best with us. Spring roses are also very good but the sun then coming heavy on them and June bugs, coming here in April, very often spoil the best blooms. From that time on and before frost they are almost perfect. Some of us had no trouble to bring very nice flowers to the October meeting. The greatest number of varieties were shown by H. Papworth and the Stecker Seed Company, represented by J. Newsham, J. St. Mard and M. M. Laponyade also had very handsome buds. F. Abele brought some of his dahlias, which are very odd in color. Discussion was opened on the beauty of the flowers. It is to be regretted that very little or almost nothing was said about the culture and the care of the roses. The manner of planting, trimming, marketing and the nature of the soil are the most important topics.

Our chrysanthemums are opening nicely and we are all looking forward to All Saints' day, November 1. Some attempt has been made this season to grow chrysanthemums under glass and so far we hear that it is quite a success. The next question will be to know if it really will pay to run greenhouses to produce a crop of flowers which has value for only a few hours in the whole year. That crop is only worth having at All Saints' day.

D. Newsham has been chosen as one of the judges of the next chrysanthemum show to be given at Crystal Springs, Miss. M. M. L.

Newport, R. I.

A VARIETY OF NOTES OF LOCAL INTEREST.—DOINGS OF THOSE IN THE CRAFT.

Several tradesmen here have supplied their greenhouses with oil stoves, believing that the supply of coal in this city may be exhausted. Overhauling, repairing and so forth seems to be the main occupation just now.

Siebrecht & Son have removed their plants to New York and closed their store here for the season. Their manager, Jos. Leikers, was given a "send off" by his friends.

W. Petersen, formerly a gardener, has

turned his abilities to the running of a hotel, now being the proprietor of the U. S. Hotel on Thomas street.

Harry Westley, formerly gardener for I. T. Burden, has accepted a position with the Hodgson Company, of New York.

Two of our prominent florists, Gibson and Butler, are in the political arena, seeking honors as city councilmen.

Robert Laurie, gardener for Cornelius Vanderbilt, is going to Colorado for a few days' recuperation. C. J. M.

WASHINGTON, PA.—Lloyd Swarthout has recovered from his illness with typhoid fever.

Dreer's Importations of Azaleas

Our importations of Azaleas have arrived and we have commenced shipments. If you have not yet placed your orders we would advise you to do so at once, in order to secure low fall prices, as well as to take advantage of low cost of transportation while shipments can still be made by freight.

We are in position to give you best qualities because our growers are among the most skilled specialists in Belgium. We can give you best values because we are not only the most extensive importers of these plants to the United States, but also because we buy for cash at best prices and give our customers the benefit of these important points.

10 to 12-inch crowns, bushy plants.....	\$4.50 per dozen	\$35.00 per 100
12 to 14-inch crowns, bushy plants.....	6.00 per dozen	45.00 per 100
14 to 16-inch crowns, bushy plants.....	7.50 per dozen	55.00 per 100
16 to 18-inch crowns, bushy plants.....	12.00 per dozen	90.00 per 100
18 to 20-inch crowns, bushy plants.....	25.00 per dozen	200.00 per 100
20 to 24-inch crowns, bushy plants.....	36.00 per dozen	300.00 per 100

We can still include in assorted lots ten per cent Mme. Van der Cruyssen, this variety being very scarce this season.

EXCEPTIONAL VALUES IN ARAUCARIA EXCELSA

The two sizes of Araucaria Excelsa offered below are the greatest values we have ever offered in this plant and you will make a mistake if you don't secure a supply for your Holiday trade:

6-inch pots, 20 to 24 inches high, 4 tiers.....	\$1.00 each
8-inch pots, 24 to 28 inches high, 4 to 5 tiers.....	1.25 each
7-inch pots, 30 to 32 inches high, 5 to 6 tiers.....	1.50 each

RUBBER PLANT—FICUS ELASTICA.

An exceptionally fine lot of 5-inch pots, plants well furnished, fifteen inches high, \$4.50 per dozen; \$35.00 per 100.

For a full and most complete line of Palms, Ferns and all Decorative Plants, see our QUARTERLY WHOLESALE LIST.

Hardy Perennial Plants, Paeonias, Phloxes, etc., etc., are one of our important specialties. We are carrying an immense stock of these popular plants. Write us for anything you may require in this line.

CHECK SWINDLER CAUGHT IN THE ACT.—WILL GET A TERM IN JAIL.—FALL FESTIVITIES ENCOURAGE FLOWER TRADE.—PROSPECT IS FOR A RECORD BREAKING EXHIBITION.

Fall festivities have come and gone. Upward of 100,000 visitors were in the city and as a result a considerable quantity of stock was moved, also creating a demand for small palms and ferns for country trade. Our big event, the Priests of Pallas ball, created a demand for Beauties and altogether the florists report an increase over last year for the same time. Prices advanced all along the line, with the exception of teas. Beauties led, not only in price but also in demand, wholesaling at from \$1 to \$5. Carnations jumped to \$3 and \$4 per hundred for fancy. Violets brought from 75 cents to \$1. Chrysanthemums were plentiful and prices dropped suddenly from \$3 per dozen to \$1.

A very smooth check swindler made the rounds of the Kansas City florists and as a result John Schneider and Arthur Newell are out an average day's profit. St. Louis florists may be glad to learn that we caught this fellow next day, after his operations here, and now have him where, as Newell remarked, his clock will be fixed. Rock was tried but he failed to be taken in, and he made an ineffectual effort to catch him. His plan was to order a funeral design delivered to a place where there was an actual funeral, give card of sympathy of some church society and tender a forged check for about twice the amount of the cost of the design and then walk off with the change.

The genial All-American Thorpe and his assistant, Mr. Lindsay, are now working in earnest on our big flower show. They are pleased at the prospect. For instance, they have a letter from one exhibitor saying that he has 140 varieties of chrysanthemums in sight for exhibition on mossed banks. It seems a prodigious number and when the premium list was first issued there were letters from several growers saying that the class for seventy-two varieties was the limit, that ninety-six was not to be thought of.

It required a carload of southern smilax, 2,600 yards of white bunting and 5,000 artificial Beauties to do Convention Hall for the ball. Rock handled this job.

Several good weddings are reported this week, also plenty of funeral orders, thereby keeping stock well cleaned up.

ATHOL, MASS.—The greenhouses and residence of the late James Sutherland, Jr., have been sold to James Sutherland, Sr., who will now carry it on in company with his son David, under the firm name of James Sutherland & Son.

TRADE VERY GOOD AND STOCK MORE PLENTIFUL.—CHRYSANTHEMUMS HELP OUT IN ALL DIRECTIONS.—SOCIETY PROSPERS.—SOCIAL EXHIBITIONS.

Business has been all that could be expected for this time of the year and good stock of carnations and roses has been exceptionally scarce right along. The storekeepers have had to do considerable hustling to get enough stock for their orders. But chrysanthemums have been coming in more freely and are now in full supply. They have been very late this year owing to a very cold and windy summer and are at least two weeks behind the time. Mrs. Botton, the earliest white on this coast, a large incurved and very pure flower, is at its best now. The Queen is appearing and Monrovia is about gone. The florists are smiling again this week, as chrysanthemums will go a long way towards decorating for weddings and social functions. The first crop of carnations is in but the stems are short and flowers of second quality. Roses are also offered more freely and prices reasonable. Violets are here to stay for five months to come. The early rains have not come, which will make the sowing of sweet peas late, as the ground cannot be worked as yet.

The Pacific Coast Horticultural Society had a very successful social and dahlia show for members and their families and friends a few weeks ago. To get the members more closely acquainted is a very good idea and this plan should be kept up. It has been decided to hold a social chrysanthemum show at the beginning of November. H. Plath was reelected president and Thomas Munro vice-president.

The State Floral Society has decided to participate in the Citrus Fair and will seek to make the flower display a prominent feature by enlisting the aid of the florists of the state. GOLDEN GATE.

ERIE, PA.—S. Alfred Baur has just completed the rebuilding of seven greenhouses which puts him in good shape for the winter campaign.

ASPARAGUS SPRENGERI

Field-Grown. These plants have short tops and extra strong roots; are cheaper and give quicker returns than pot-grown stock; \$4.00, \$6.00 and \$8.00 per 100, according to size. For 100

ADIANTUM CAPILLUS VENERIS—One of the best for fern dishes and other decorative work, 2½-inch pots. \$3.00

ADIANTUM CAPILLUS VENERIS IMBRICATUM—Excellent for filling fern dishes. Wide pinnae like Parlyense, 2½-inch. 5.00

ANEMONES—Japanica Alba. 6.00
Elegantissima, a new variety of exceptional merit. 10.00

Lady Ardilaun. 8.00
Queen Charlotte. 8.00
Rosen Superba. 12.00

BEGONIA INCARNATA—The most useful Begonia for winter flowering, 3-inch pots. 8.00

CAREX JAP VARIEGATA—A useful decorative grass, 2½-inch pots. 2.50

CINERARIA STELLATA—From 2 to 4 feet high. The plant makes a most effective display, either as a specimen or in groups, 3-in. pots. 5.00

CYPERUS ALTERNIFOLIUS—Bushy outdoor-growing plants, in 3-inch pots, extra strong, ready for a shift. 4.00

NEPHROLEPIS DAVALLIOIDES FURCANS—We consider this to be the handsomest fern in cultivation. Has no equal as a Christmas plant. Have a fine lot in 5 and 6-in. pans, \$5.00 and \$6.00 per dozen.

PHALARIS ARUNDINACEA VARIEGATA—Of the variety which retains its bright variegations of white and green throughout the season. Can highly recommend it as an effective border plant. Large field-grown clumps. 6.00

PRIMROSES—(Chinese) separate colors, white, light pink, scarlet and blue. From the finest imported seed, 3-inch pots. 5.00

PTERIS CRÉTICA ALBO-LINEATA—Variegated; very useful and pretty, 2½-inch pots. 3.00

PYRETHRUM (Hybridum)—Gives the best of satisfaction both as to variety of color and freedom of bloom: the colors range from pure white to deep blue; field-grown. 8.00

TRITOMA UVARIA GRANDIFLORA—An old standby; strong divisions. 5.00

VALERIANA OFFICINALIS (Garden Heliotrope)—Strong divisions. 5.00

VINCA MAJOR VARIEGATA—Large, field-grown clumps with 12 to 20 runners; a good seller during the winter. 8.00

VIOLETS, California—Field-grown, 2nd size. 3.00

NATHAN SMITH & SON, Adrlan. Mich.

Ficus Elastica

4 and 5-in. Pots.

Seattle, Wash.

TRADE IS BRISK AND STOCK NOT PLENTIFUL.—GOOD PRICES BEING REALIZED.—NO ROSES HERE.—LOSS OF VIOLET GROWERS.

Business is very good this month, with flowers very scarce and prices high. Chrysanthemums will not be ready for at least two weeks. Outdoor roses and carnations are about done for. Carnations are nearly all housed, only there has been so much greenhouse building this summer that most of the florists have been rather late. There has been quite a loss in the carnation fields this summer, with stem rot, and a good many are having the same trouble in the houses. Roses are not grown at all here on account of so much cloudy weather, but several will make a start to try them next year. What they need here is some one to start rose growing and then all will put up houses suitable for roses, but any kind of a house will grow carnations or chrysanthemums and violets. Violets were a failure here this summer, not from the violet disease but from red spider. The Woodlawn Park Floral Company lost two-thirds of its plants, and Bonnell has lost his entire crop.

Malmo & Company are cutting some fine longiflorum lilies from cold storage bulbs and will have some for Christmas. Everything looks favorable now for a good and prosperous winter season, with good prices. Nursery stock has begun to move, with a big demand for strawberry plants and small fruits, also ornamental and shade trees.

The Florists' Club met last Saturday afternoon, but the weather was so fine and so much work to be done that few were in attendance. J. C. R.

DURHAM, N. H.—The New Hampshire Horticultural Society is holding its eighth annual fair here from October 22 to 24 inclusive.

SALEM, MASS.—Dr. C. A. Buxton has disposed of his interest in the Salem Floral Company to E. F. Costeller, recently with Wax Brothers, Boston.

THE MODEL PLANT STAKE COMPANY, formerly of Brooklyn, N. Y., has removed to 208 Jersey St., Harrison, New Jersey, and is now The Parker-Bruen Mfg. Co.

The Model Extension Carnation Support.

Flushing, Long Island, Dec. 11th, 1901.
MR. THERON N. PARKER, Brooklyn, N. Y.
Dear Sir — I have used your Wire Carnation Support the last two years, in all about 12,000. They fill the bill in every particular. Nothing could be more satisfactory and would give me a great deal of pleasure if I can bespeak a good word for you to the trade and you are at liberty to refer to me at any time.

Very truly,
A. L. THORNE,
La Fayette, Ind.,
July 8th, 1902.

MR. THERON N. PARKER, Harrison, N. J.

Dear Sir: — After using your Model Carnation Support in two of our houses the past winter, we have come to the conclusion that it is perfectly adapted to supporting carnations, and shall use them on all our plants the coming season.

We were much pleased with the simplicity, strength and neat appearance of the support.

Yours truly

H. Bayersdorfer & Co.

50-56 NORTH FOURTH STREET,
PHILADELPHIA, PA.

New Bedford, Mass.

FARMERS' CLUB HOLDS EXHIBITION.—MANY FRUITS BUT FEW FLOWERS.—FINE AUTUMNAL WEATHER.—NOTES.

The weather is delightful and salvia and heliotrope still in full bloom, the majority of trees as green as ever. Providence is kind to us in this year of coal famine, for on account of the scarcity of coal there seemed a likelihood that several greenhouses would be shut up this winter. W. S. Brown will shut up two, E. G. Davis several. Arthur Ashley, who has been growing lettuce and cucumbers in two large hired greenhouses, has given them up and is running a woodyard. The others will try to get along with soft coal and wood until they can get anthracite again.

The South Bristol Farmers' Club had a fair in City Hall the last of September. There was a very good show of fruit and vegetables. The show of flowers was very slim. H. A. Jahn had his new white seedling carnation on exhibition, and there were a lot of palms and ferns from the greenhouses of N. H. Rodgers, Fairhaven. There was the usual quantity of grandmother's flowers. The club offers premiums but not in money. They save their money and have over \$3,000 in the treasury.

The demand for flowers is fairly good. Chrysanthemums are coming in now and are selling for \$1.50 and \$2 retail per dozen. Carnations are plentiful but the stems are rather short. There is not yet much demand for bulbous stock. Violets are blooming very nicely, especially out in the field. A. B. H.

Rhinebeck, N. Y.

The fact that Dutchess county is noted for its violets attaches special significance to the condition of the floral interests during the coal famine, says the *Kingston Express* of October 15. Already some of the violet houses at Rhinebeck and vicinity are preparing to use oil in heating the greenhouses while some in that neighborhood are said to be about to abandon the industry of violet raising altogether for this season, because of the expense which will attend the changing from coal to oil as a fuel.

ROCHESTER, N. Y.—After exclusion for more than a year the Greek flower merchants have again appeared on the streets and the florists are preparing a protest to the city administration.

66 MARION ST., NEW YORK CITY.

MOLLER'S

Deutsche Gartner Zeitung

The most widely circulated German gardening journal, treating of all departments of horticulture and floriculture. Numerous eminent correspondents in all parts of the world. An advertising medium of the highest class.

Moller's Deutsche Gartner Zeitung is published weekly and richly illustrated. Subscription \$3.00 per annum, including postage. Sample copies free.

LUDWIG MOLLER, ERFURT, Germany

Bargains FOR Florists.

We are headquarters for a general assortment of the necessary material and supplies that you are looking for. If you are about to improve or construct, consult us.

In connection with the dismantling of the Pan-American Exposition, we have for sale:

20,000,000 FEET of fine seasoned lumber, practically new, consisting of all sizes of joists, timbers, dressed and matched boards and flooring; also sash and doors.

50,000 FEET of roofing glass.

PIPE.

We are headquarters for pipe. We offer you:

100,000 FEET of 2 to 4-inch wrought iron, lap welded casing. We can furnish this material in three ways: Either with sleeve or jacket couplings, screwed ends and threaded couplings or with expanded cast iron flanges with bolts and nuts.

1,000,000 FEET of standard black wrought iron pipe, size $\frac{3}{8}$ to 12-inch. It is second-hand but has new threads and couplings and is in first-class condition.

1,000 TONS of galvanized wire 9, 10, 11, 12, 13, 14 and 15 guage.

50,000 FEET of 2, 3 and 4-inch cast-iron soil pipe and fittings.

100,000 FEET of garden hose, $\frac{3}{4}$ and 1-in.

75,000 FEET of cotton rubber-lined fire-hose, (rubber-lined in and outside), ranging in sizes 1 to 2 $\frac{1}{2}$ -inch.

VALVES and fittings of every kind.

BOX COILS for heating purposes.

RADIATORS, new and second-hand.

We also offer the following bargains in

Heating Boilers

50 CAST-IRON sectional heaters, capacity from 450 to 5,000 feet.

1 NO. 2 Standard Kroeschell hot water heating boiler.

FOUR 36x10 Horizontal Tubular.

FOUR 36x12 Horizontal Tubular.

FIVE 42x10 Horizontal Tubular.

FIVE 42x12 Horizontal Tubular.

SIX 48x14 Horizontal Tubular.

TWO 54x16 Horizontal Tubular.

FOUR 60x16 Horizontal Tubular complete with all fittings.

PUMPS of all Descriptions.

A carload of shovels and spades that we are selling at \$5.00 per dozen.

We carry a complete stock of hardware and farm implements, besides plumbing material of every kind.

Write for Catalogue No. 47.

Providence, R. I.

CHANGE IN MANAGEMENT AT POCASSET GREENHOUSES.—RANGE EVENTUALLY TO BE PUT INTO VEGETABLES.—GROWER CRUSHES FOOT.

Larned Williams has resigned charge of the Pocasset Greenhouses and the place is now controlled by his father, A. A. Williams, although Olney Williams is to be made manager and head salesman. Larned is to enter the woodcutting and teaming business throughout the Johnston district. Olney has considerable experience in greenhouse work, being engaged in the forcing of vegetables, and ultimately will convert the flower houses into a range adapted for radishes and so forth. He has an able foreman in Albert, who has been the mainstay for a number of years. The place is in good shape and will market a large lot of chrysanthemums this season.

E. E. King, of Attleboro, met with a painful mishap a short time ago. While engaged in repairing his boiler connections, a heavy metal piece crushed his foot and totally incapacitated him from further greenhouse work for some time. He now gets around on crutches.

M. M.

Worcester, Mass.

TRADE BRISK AND GOOD STOCK IN AMPLE SUPPLY.—WEDDING DECORATIONS COUNT.—LOCAL NOTES OF INTEREST.

The chrysanthemum is again with us in all its glory. Roses are now up to the winter standard and we are getting fine Beauty, Bridesmaid, Liberty, Bride and Carnot. Lange has a fine house each of Beauty and Liberty and is cutting some extra good Perle. Carnations are improving rapidly and, though still rather short stemmed, are good for this time of the season. Violets, both single and double, are plentiful and are selling well. Trade has held up steadily and we are getting some good wedding decorations. F. B. Madaus had the decorations for the Hart wedding, which were quite elaborate. The Buckingham wedding decorations were extensive and pink chrysanthemums were used exclusively. Lange did the work.

The weather so far has not been cold, which has helped the growers a great deal on the coal problem.

H. F. A. Lange is in the Maine woods after deer and moose.

H. F. Littlefield is cutting some fine chrysanthemums. A. H. L.

WATER.

If you want water only when the wind blows a windmill will do your work and cost less money than our Rider and Ericsson Hot Air Pumps, but if you want water every day while your flowers are growing and do not want your pump blown down when the wind blows too hard, no pump in the world can equal ours. We have sold about 20,000 of them during the past twenty-five years, which is proof that we are not making wild statements.

Our Catalogue "A 3" will tell you all about them. Write to nearest store.

CROP INSURANCE.
Life insurance is valuable because it guarantees the outcome.

"Gurney" Heaters

"BRIGHT IDEA," "DORIC" and "400 SERIES" do the same thing for your hothouse: **THEY GUARANTEE THE CROP.** First of all they save 20 per cent on the coal bill and so keep expense at a minimum. Next, they produce an even heat and so do not imperil the life of the plant. Next, they are simple to operate and so require least attention. Lastly, they wear longer than others and thus perceptibly reduce the capital invested. Don't buy or exchange until you've investigated them.

THE EXHIBITIONS.

The New York Exhibition.

Madison Square Garden never presented a more beautiful picture than was made by the combined exhibition of the New York Florists' Club and the Sculpture Society. The introduction of groups of statuary, fountains, latticed arches and other artistic accessories furnished the needed setting for the stately bays, groups of tropical foliage, towering tree ferns and palms, and color to enliven all was supplied by masses of chrysanthemums, carnations and other brilliant blooms staged by most skillful growers. The arrangements were somewhat tardy and the opening night found the exhibition decidedly the best ever seen in New York, but not finished in every detail. As a result the judges started so late that awards and other details of interest must be deferred till next week's report.

In general it may be said that the orchid groups from Lager & Hurrell, Siebrecht and Koehrs are superb. The plant groups from Siebrecht and Koehrs, Pandanus Sanderi and other plants from Dreer, groups of bamboos and Japanese curios from J. H. Troy are all in keeping with the magnitude of the occasion. Three new forms of the Boston fern are shown, Pierson, Foster and Scott each staging fine specimens of the varieties bearing their names. Bobbink & Atkins make a fine display of clipped box and other formal plants for topiary work.

Chrysanthemum plants are conspicuously few, but the flowers are superb, all the best show varieties being represented. The judges are at work on the cut flower classes at the time of making this report; they are Messrs. May, Lonsdale, Scott and Powell. They have a comparatively easy job on roses, for the entries are very few. Canadian Queen, from the Dale Estate, Brampton, leads in the novelty section. Carnations are very fine. Among the most interesting is Enchantress. The judges on plants are Messrs. Falconer, Nicholson and Taplin.

The trade exhibition under the charge of Manager Cleary includes comprehensive exhibits from Vaughan's Seed Store, Peter Henderson & Company, C. H. Joosten, Lucas & Boddington, Pierson-Sefton Company, H. W. Gibbons, Thos. Weathered's Sons, Reed & Keller and Wm. Elliott & Sons.

There are many visitors from out of town, including Peter Crowe, Utica; L. E. Marquisee, Syracuse; Wm. Scott, Buffalo; W. W. Edgar, Robert Edgar, Wm. Nicholson, Peter Fisher, M. A. Patten and J. Heurlin, of the Boston district; Edwin Lonsdale, G. C. Watson, John Burton, W. H. Taplin, Wm. Kleinheinz, Huebner and Graham, Philadelphia; Wm. Falconer, Pittsburg; L. W. Duggan, Brampton; H. Eichholz, Waynesboro, Pa.; Powell, Russell, Millbrook and many others.

The Exhibition at Lenox, Mass.

The exhibition of the Lenox Horticultural Society at the new Town Hall on October 23 and 24 was the finest floral display ever staged in western Massachusetts. There were 267 entries, all from the conservatories and grounds of the splendid private estates of Berkshire county, including chrysanthemums in stately array, orchids in bewildering profusion and superb palms and decorative plants. High society's favor was freely bestowed and the hall was crowded with enthusiastic visitors. Among the largest exhibitors were Girard Foster, Chas. Lanier, W. D. Sloan, G. H. Morgan, John Sloan, A. P. Stokes, Morris K. Jessup, Geo. Westinghouse, H. H. Cook, G. G. Haven, J. E. Parsons, F. K. Sturgis, R. W. Paterson and Jos. H. Choate. The judges were A. Herrington, Wm. Duckham and W. Anderson.

Some Flower Show Notes.

Having graduated from the position of active hustler to that of (more or less) disinterested observer, perhaps a few sage reflections on flower shows, akin to those of the mule, (pride of ancestry and hope for the future being eliminated) may be put up with by the long suffering public. By the way, it is astonishing what the aforesaid "L. S. P." will accept and swallow in the way of monumental bluff, if put forth with becoming gravity and earnestness by persons whose anatomical structure is like to that of a foot ball (rhinoceros hide outside and nothing but wind inside). I fear this is a slip—Brother Job will say foot balls are covered with pigskin only. Well, let it go. Here's

hoping Job will some day sell his microscope and buy a telescope.

To return to our sheeps, as the Frenchman says, how about this new flower show heresy so much in vogue of late—this holy scheme to defraud the public and save money for the penurious or impecunious flower show management at the expense of the grower, the man who must at last furnish brains, bone, sinew, and take all the kicks?

Your aforesaid wise gentlemen foregather on a committee, lift the safety valves and liberate a certain amount of hot air, labor strenuously, and finally put out a premium for a dozen or a hundred blooms, perhaps double what the same blooms would bring at wholesale in the open market. Then having done so much for the grower (forgetting or not knowing that he must sacrifice 300 fancy blooms to exhibit 100) they tack on a little clause to the effect that he must replace the blooms and keep his exhibit good until the end of the show.

This new scheme is a plain, rank case of double-barreled fraud. It is a fraud on the public in the first place. The blue ribbon or first premium card is kept on a vase when there is not a flower left in it which was passed on by the judges, a rank confidence game on the public. The exhibitor is compelled to replace and renew the blooms until he has wasted material which if sold would bring him more money than the total of his winnings, a rank fraud on the grower.

And all this is bolstered up and the "L. S. P." misled by remarks on what a shame it is to ask the public to view flowers which are faded and past their prime, and how it is for the exhibitor's own interest not to leave his flowers in the show after they have gone to sleep. O tush! Pish! Pshaw! Who is giving the show? Who is absorbing the gate receipts? Is it not the duty of every live show management to so arrange its premium list that there will be a constant succession, day by day, of new attractions for the public? Isn't it the duty of the management to provide each day new and fresh attractions for the citizen who pays his half dollar at the door? Has the management any right to delude the public into thinking that the vase which has been filled by fresh and (ninety-nine times out of a hundred) inferior flowers is the real Simon pure article which won the prize yesterday?

Let the public know that cut flowers are perishable and that if they wish to see chrysanthemum flowers at their best they must come chrysanthemum day, roses are only at their best on rose day and carnations have also a day of their own, and if they wish to see the whole show they must come every day. Give them new attractions every day to the full worth of their money, but don't play any confidence games. When an exhibit is no longer in shape to be worthy of the show, throw it out and provide enough new classes so it will not be missed. Some of these holy Willies make us tired.

There are a lot of other people that make us tired also. The man has no place on this planet who systematically "knocks" the show, curses the management, and never in his life exhibits, by any chance, even a 4-inch pot plant, and then shows up smiling with a gentle request for a hatful of free tickets because he is a florist. The retailer who stocks up with three times the goods, during flower show week, that he would buy at any other time and expects to sell them all at a fancy price, but can't afford

to exhibit, the grower who marks his prices all up fifty to 100 per cent during flower show week—and sells at those prices, too—but says "You can't expect me to waste flowers on the show when I can sell 'em all at a fat price," these, too, give us a Lydia E. Pinkham feeling.

Well, perhaps we have trespassed enough on the ginger jar man's special province and it may be well to turn to the purely speculative and philosophic consideration of our subject. There has been much discussion in the past as to why flower shows were only in rare instances successful. The fact has been universally admitted and the discussion confined to the whys and wherefores.

The successful showman is born, not made, and the same is true of the florist, whether grower or seller. The manager

POSTER FOR CHICAGO FLOWER SHOW OF 1902.

of a metropolitan opera house would probably be a poor investment at \$40 per month as a rose grower, and the converse would be undoubtedly true of the best rose grower in the country. Isn't the main reason why our flower shows are not successful, that we do not employ expert amusement men to manage them for us? Isn't interpreting the wishes of the public in the entertainment line, and catering to them, a profession in itself, and can we expect the man who has made a life study of the growing of flowers to turn in and compete successfully in the show business with a man who has made a life study of amusing the public?

The Kansas City show, which was reported so phenomenally successful last year, is a case in point. It is a commercial enterprise pure and simple and run on business lines. There is no horticultural society or florists' club back of it and no pretense that it exists except to make money and prestige for the commercial association back of it. If we can find more Taggarts there will be more successful flower shows.

W. N. R.

WHATCOM, WASH.—George Gibbs has already announced his intention of making a large display of Washington-grown bulbs at the St. Louis World's Fair.

The Chicago Flower Show Poster.

The accompanying illustration shows in outline the new Chicago flower show poster, which is lithographed in seven colors. The poster is much smaller than usual, the idea being to give it much wider distribution in store windows. The size of the poster is 14x21½ inches on heavy cardboard.

Why Not, Indeed.

"Why not?" That is the question before the flower show committee just at present. Why not have the greatest show on record in Chicago? It is a little late to make plans for this year, but why not make plans which will give the kind of a show we ought to have every year?

It is of course understood that flower shows seldom make expenses. They call them "shows," but there's nothing "showy" about them. What they need is red fire. Of course fireworks cost money and the Horticultural Society has not the finances to conduct a show as in my judgment it ought to be conducted. But it has plenty of rich men as members and a good guarantee fund back of a man who knows how to cater to society and the amusement public would easily make the show a profit winner.

Two or three times as much money ought to be offered in every department and as high as \$500 for table decorations. It seems that each year everything is expected of the retail man, to show the public at large how cheap he can produce a floral decoration. This is a great mistake, for flowers are a great luxury and ought to be treated as such, at least in the trade. The rich people should be made to open their eyes by seeing what our artists—or "makers-up," as we call them—can do. The cheaper flowers would sell just the same, as the class that buy them do so for the love of the flowers themselves, while the rich generally buy to out-do one another.

Why is the horse show such a great society event, and why is it that our flower show should not equal it? I will try and tell you. First of all, we do not get the right parties interested. Look at the windows of the great State street stores and see in every one some reminder of the horse show, also see how they boom fine clothes for the horse show in their newspaper advertising. I again say why is it? Is it because most of our connections are poor, or nearly so, struggling to make a living? No! No! A thousand times "no!" This is not the reason. We have rich connections. It is simply a fact that our general merchant is not made a party to the show as he ought to be. Our "big bugs" should be interested and such big premiums offered that every grower in the United States would open his eyes and in place of "knocking" he would at once become a "plugger." It not, why not?

Go at it from a purely business standpoint. For the trade it is the best thing one could wish for and there ought to be two shows a year instead of only one. Get the "big bug" to do the hustling and we, in our humble way, will walk or dance to the music that he makes. Make it a flower show, but have fashion rule and then the flower show, like the horse show, will be a success.

E. E. PIESER.

ST. PAUL, MINN.—There is a lively interest in the approaching fall show. All the local florists will exhibit and the pressure for space is great.

CHRYSANTHEMUM Mlle. MARIE LIGER.

Chrysanthemum Marie Liger.

Mlle. Marie Liger, illustrated herewith, is the new French variety which won the prize at the Paris exposition offered by the Chrysanthemum Society of America. It is one of the best varieties of recent years and will rank with Mrs. Robinson, Col. Appleton and Timothy Eaton. The flower is globular, incurved, measuring eighteen inches in circumference, and is perfect in fullness and contour. The plant is dwarf, June planted stock reaching barely three feet in height, and it

requires no support whatever. Plants benched earlier attain a height of four feet. The stems are fully covered with foliage from soil to bloom and every flower is perfected, there being no seconds among them. The flowering season extends from about October 20 onward through the season, according to date of planting. The color of the blooms is pearl pink, deepening to a brighter shade at the base of the petals. Mlle. Marie Liger is as easy of management as Timothy Eaton. The E. G. Hill Co., Richmond, Ind., is exhibiting it this season.

The Woods Holl Rose Suit.

Two suits, of interest to horticulturists and persons interested in floriculture, have recently been settled in the Massachusetts courts, as briefly mentioned in the issue of October 25. They are suits brought by Miss Sarah B. Fay and Michael H. Walsh against the N. Y., N. H. & H. R. R. Company to recover for injury done to their rose gardens at Woods Holl, Massachusetts, by the poisonous gases in the smoke from a fire set by the railroad. On May 13, 1901, the railroad

tore down and set fire to some old buildings on their premises at Woods Holl. Part of the material burned was tarred roofing and the smoke from this fire, containing carbonic acid gas and other gases injurious to plants, was blown over the gardens of Miss Fay and Mr. Walsh, and many of the rose plants killed and others seriously injured.

Suits were brought and the cases referred to Prescott F. Hall, of Boston, as auditor. At the hearings Miss Fay and Mr. Walsh were represented by Robert M. Morse and Henry M. Hutchings, and the railroad by Thomas C. Day. The auditor assessed the damages to Miss Fay at \$5,387 and the damages to Mr. Walsh at \$16,602. Before the cases were to be tried at Barnstable the railroad paid \$20,000 to settle both cases.

Mr. Walsh is recognized as a leading rose grower and hybridist. For over twenty years he had charge of the gardens of the late Joseph S. Fay, at Woods Holl. From 1887 until his death, in 1897, Mr. Fay devoted himself to the raising of roses, and Mr. Walsh had entire charge of the garden. The roses exhibited by Mr. Fay before the Massachusetts Horticultural Society, Newport Horticultural Society, and at other exhibitions, were awarded leading prizes. During this time Mr. Walsh originated many new varieties, receiving medals, special prizes of plate and money and certificates of merit. In 1896 the Massachusetts Horticultural Society awarded his Jubilee rose a gold medal. This is the only gold medal ever awarded for a new rose in this country. Besides the Jubilee rose he originated the Debutante, Sweetheart, J. S. Fay, Aurania, Miss Simplicity, LaFianza and others. For these new roses he was awarded four silver medals, besides certificates of merit and other prizes awarded for new plants of great merit.

After Mr. Fay's death Mr. Walsh actively began business as a grower and dealer in roses, hollyhocks, phloxes and other plants, making a speciality of roses, however. At the time of the fire, in May, 1901, he had about 4,000 rose plants. Besides the new varieties originated by himself, he had over 120 varieties of hardy roses, hybrid perpetuals, hybrid teas and other hardy sorts. It

was owing to this injury that for the past two seasons Mr. Walsh has not been able to make his usual summer exhibits at the Massachusetts Horticultural Society and other rose shows. He is now importing stock plants to replace those which were killed, and it is hoped that another season will find him exhibiting again.

In this connection, as showing the wide reputation which Mr. Walsh has, it may be stated that he had received special invitation to exhibit his roses at the Pan-American Exposition at Buffalo, in June 1901. This he was prevented from doing because of this fire. It will be of great interest to exhibitors of flowers and of plants to know that among the other items of damages awarded him was one "for loss of prize money and of advertising at exhibitions."

This case is of much interest to horticulturists, as it has been said to be the first case of its kind in this country in which the profession of horticulture has been recognized as having a distinct standard of value. The witnesses who testified for the plaintiffs are among the leaders in their special branch of business. They included Dr. Augustus H. Gill, of the chemical department of the Institute of Technology; Dr. George T. Moore, of Washington, who is at the head of the physiological laboratories connected with the Bureau of Plant Industry of the Department of Agriculture; Benjamin M. Watson, of the Bussey Institution; J. K. M. L. Farquhar, of Boston, of the firm of R. & J. Farquhar & Company; Robert Cameron, head gardener of the Botanical Gardens of Harvard University; J. Woodward Manning, the landscape architect, of the firm of Manning Bros.; William H. Elliott, of Brighton, the rose grower; Arthur H. Fewkes, of Newton; Lawrence Cotter, of Boston, now carrying on the Galvin greenhouses; and William N. Craig, head gardener for the Ames estate, at North Easton, Mass.

HENRY M. HUTCHINGS.

COLORADO SPRINGS, COL.—Wm. H. Evans and the Broadmoor Floral Company have consolidated their plants and business, organizing the Colorado Springs Floral Company. They have opened a store at 10½ East Pike's Peak avenue in charge of J. V. Phillips, Jr., of New York.

WITH THE GROWERS.

PETER REINBERG, CHICAGO, ILL.

No matter what the season or how frequently one visits the great producing establishment of Peter Reinberg, there is always something of interest for the grower or storekeeper. At present it is the "different" roses which are the principal attraction. Liberty is doing here as well as could be expected of any variety anywhere. Their experience warrants the use of grafted plants, for these make a stronger growth, with better buds and better wood, but the own-root plants give a little heavier cut. Mr. Reinberg had remarkable success with Liberty last year and all the plants were carried over, with some addition in the way of young stock, both grafted and own-root. Thus far the best plants on the place are the oldest ones, a small portion of them being in their third year. The growth is remarkably vigorous and the crop just coming on, with every prospect that the plants will keep going right through the winter, just as they did last year, when Liberty was the best money-maker on the place.

Probably the houses which catch the eye of the visitor most quickly are the three given to the new rose, Sunrise. These plants are very noticeable for the unusual color of the foliage, not unlike autumn leaves, but a moment's inspection serves to show that another characteristic is the strength of the growth. It has been said that Sunrise would be a most valuable rose if sufficient stem could be obtained, and certainly here it is all that could be asked in that respect. Many plants show shoots two feet or more in length. It is a heavy producer and at the wholesale store they say it is among the best sellers, it being seldom that an order goes out which does not include a few Sunrise.

Another section of interest is that in which Mme. Chatenay is grown. This is one of the heaviest producers on the place and the quality of the flowers is first-class, the stems being long and heavy and the foliage good. The buds have to be cut close. This rose also outsells the common sorts but it took some little push to work up a business on all these "new" things. The retailers had to see them for a while before they real-

THE GREENHOUSES OF PETER REINBERG EXTEND FOR FIVE BLOCKS ALONG ROBEY STREET, IN CHICAGO.

A NEW VIEW OF A PART OF THE GREENHOUSE ESTABLISHMENT OF PETER REINBERG, CHICAGO, ILL.

ized the possibilities which lie in varying the monotony of the usual stock in trade. Almost the same thing was true of Golden Gate when they first offered it, three or four years ago, when it was little known, but they made a hit with it and now everyone grows it.

Golden Gate is still planted here in good quantities, for they know how to grow it. They have strong growth on Perle and there are some very fine Kaiserins, which will before long be thrown out to make room for the propagators. Ivory is being tried, but if it makes a large place for itself, it will have to be at the producing end, for at the city store they say that it sells no better than Bride. Next year La France will be added to the list.

In one house there is a collection of new roses which includes a sport of Golden Gate which has quite a little more pink in its make-up than has Golden Gate at its best. One plant showing this tendency was found in the bench the first year Golden Gate was tried, and it has been propagated until now there is quite a stock on hand. There are two European roses, both yellow, of which there are only a few plants. One of them is Souvenir de Pierre Notting, which was disseminated by Souper & Notting last year. It makes a fine, vigorous growth and the flower is of excellent shape. It is expected that they will be able to show fifty blooms of it at the Kansas City exhibition next week and they are counting on giving a house to it next year. A trial is also being made of another European rose, cream white in color, with deeper and pink shadings in the center and at the base of its petals. It, too, is doing well.

Nearly every person in the trade who visits Chicago is acquainted with the house after house of Beauty, Bride and Bridesmaid which are a feature of this establishment. They never looked better than at the present. In past seasons the foreman, George Collins, has insisted on

assuming personal charge of one Beauty section, and certainly his was usually the best on the place, but this year he was induced to relinquish all detail work, undoubtedly to the benefit of the establishment as a whole, for everything is clean and healthy, and one of the most pleasing features, to the proprietor, at least, is the fact that it looks as though the crops would come along in succession on the various houses, giving a good cut from some part of the place at all times.

The north end of the establishment is given over to carnations. The five connected houses north of Mr. Reinberg's residence are all planted to Mrs. Lawson, and the section will be a sight when they get into bloom. These plants were all carefully disbudded when they were benched and they are cutting practically nothing there as yet. Over to the west there are ten houses in a detached range. Two of the largest of these are given to Estelle and the other eight to Mrs. Ine, on which they did remarkably well last year. Morning Glory occupies a great deal of space, but there are also three large houses of Mrs. Higinbotham. Mr. Reinberg planted a larger proportion of white than ever before, and as yet has seen nothing to displace Flora Hill in his estimation, unless it be Peru, of which quite a number are planted and doing finely. Dorothy has been gone into quite extensively and Mr. Reinberg thinks highly of it, both as a producer and a money getter. There is only one bench of Prosperity, and it required considerable persuasion on the part of the boys at the store to get him to give it even that amount of space. It was a good seller last year and the house made a wonderful showing, but the cut was very light in comparison with the number of plants, the development being so slow. Guardian Angel, or the Sport, as it is perhaps more frequently styled, is given a good deal of space.

One of the accompanying illustrations is from a photograph taken last week from

the roof of Mr. Reinberg's home. Although it may give one the idea that he has covered the countryside with glass, it still falls somewhat short of the whole truth, for the five big houses of Mrs. Lawson were at the back of the camera, several greenhouses west of the residence are not seen and the range of ten houses given to Estelle and Mrs. Ine were not in view. The only way to get the whole place into less than three or four pictures is to photograph it from a balloon. The other picture is a view on Robey street looking north from the south end of Mr. Reinberg's range.

CARNATIONS.

FERTILIZERS FOR CARNATIONS.

Page after page might be written on the subject of fertilizers; formula after formula might be given and yet each grower would have to experiment for himself until he found what elements were lacking in his soil to get the best results from his carnations.

Unless we do experiment, and do it continually, we are bound to fall back in our race for improvement. In making these experiments with different brands of what are known as chemical fertilizers, or with formulas of our own mixing, it is always well to go slow until we are sure of our results, and it is well even then not to risk our entire place to our newly found fertilizer until it has been tried and proven for a year, or better yet, for two years, and even then we can continue to experiment and try to improve on what we have already done.

For experimental purposes five or six rows, selected in that part of the bench or bed where those on each side of them are uniform in variety and growth, answers the purpose well enough and reduces the loss to a minimum if they prove a failure. In applying the formulas to these five or six rows it is well to begin right now and apply the same

formula all the season through, then note the results obtained every two weeks. This enables one to tell whether his formula is an all-season one or whether it needs to be varied as the season progresses. Do not undertake too many of these experimental plots for one season, as one is more likely to find what he is looking for by having but three or four of these experimental plots properly attended to, and the material used intelligently put together, than if he has a dozen or more plots to watch at once.

After having discovered the successful fertilizer, do not imagine that you can take "any old soil" from around the place, barren or otherwise, and get results by the use of the mixture. If you do you are almost certain to be disappointed. Use plenty of good manure in your soil and add chemicals only as an auxiliary. Scientists show us very plainly by analysis that the average stable manure is woefully lacking in fertilizing elements in proportion to its selling value. They also teach us that it contains, when properly cared for, millions of minute organisms that release and thus make available for plant food not only the nitrogen in the manure but what is contained in the soil as well, and these more than counterbalance the lack of real fertilizing elements. We may not all agree with these different analyses and these results; in fact, the men who make them very seldom agree among themselves, but all of us florists must agree to the fact that unless our soil contains a liberal proportion of stable manure we will not get the best results, no matter what we may add in the shape of special fertilizers.

Our soil must be in what we call a certain mechanical condition, so that the roots can develop properly and take up any chemical fertilizer that we may apply. If the soil is not in this condition, then the first aim should be to work into it enough rotted or ground manure to put it into proper shape. This can be done now; in fact it should be done at once, as even now there will be some injury done to the roots of the carnation by working this manure into the soil between the rows to the depth of two or more inches, as will have to be done in order to get it into the shape you will want it, but this injury to the roots will be overbalanced by the benefit to the soil. In fact, this injuring of the roots is not my own idea but that of the majority of the growers and I would hardly want to profess to know more than men who grow better carnations than I do. My own idea is that, as we are constantly cutting the flowers and cuttings from the plants, the breaking of a few rootlets by loosening the soil is rather an advantage than otherwise and especially so when it is done by a complete hooking up of the soil between the rows.

For general and sure results there is nothing equal to good well rotted cow, hog or sheep manure, a pure brand of bone meal, wood ashes and lime. These used with intelligence are sure to be satisfactory and there is little danger of one loosing his crop through a misapplication, as is often the case with more concentrated manures. First see that the soil has sufficient fertilizer in its make up, and as soon as you notice the plants are wanting a little more stimulation add a fairly liberal supply of wood ashes, or air-slaked lime. If the ashes are used first follow them up in about two weeks with the lime. There are very few soils that will not be benefited by the application of a light coat of air-slaked

AUTOMOBILE DECORATED FOR FLORAL PARADE, BY J. LOUIS LOOSE, WASHINGTON.

lime once every two months during the growing season. Where you have something in the way of a special fertilizer these remarks do not apply, as you will no doubt get better results from it. Do not apply anything unless the plants really need it, as there is more danger of over-feeding than there is of under-feeding; the over-feeding may give you large flowers but they are likely to be on weak stems and very poor from the point of view of keeping quality.

In judging the needs of the plants there are no set rules to follow and the only guide is the grower's own good judgment. As an illustration I might cite my own experience this season. I have a variety growing in quantity that I have been growing the past three years under exactly similar rules, with the very best of results. One of the rules was that it should have no extra feeding before the latter part of February or early in March, as experiments had shown me that it was a positive injury to the plants to feed them before the bright spring days came along. This season, in soil prepared exactly the same as last season and with plants as near like those of last season as it is possible to have them, I am compelled to feed it at this time or have a partial failure, whereas with feeding it is going to be even more of a success than it was last year, unless I have made a very wrong reading of its needs. I have other varieties that were fed in November last year that would be injured by anything at this time this sea-

son; in fact, most varieties are better without any extra fertilizing until the regular night firing begins, and with many growers that will be as late as possible on account of the cost of coal.

ALBERT M. HERR.

Pennsylvania Horticultural Society.

The meeting of the Pennsylvania Horticultural Society October 21 was well attended. The display of chrysanthemums for the Bodine prizes, consisting of twelve vases of six blooms each, was a curtain raiser for the coming chrysanthemum show in November. Some fine vases were shown, including mid-season varieties. Wm. Morton, gardener to Mrs. Craige-Lippincott, won first with Col. Appleton; Wm. Kleinheinz, gardener to P. A. B. Widener, second, with Mrs. Hurley. Other varieties seen were Glory of Pacific, Robert Halliday, Omega and Garden Queen.

The display of cosmos for the Michell prizes brought out twenty-one entries. A great many of them being of equal merit in quality and arrangement, it became a difficult matter to select the winners, and as naturally ensues some disappointment is felt in the work of the judges. The winners were W. H. Carey and Thomas Holland.

The Dreer prize for display of hardy perennials was won by Francis Canning, with some thirty vases, and illustrated the variety of decorative material to be found in the October garden. Aster

Tataricus, Anemone Japonica, tritomas, heleniums, chrysanthemums and the various grasses, vases of Hydrangea paniculata, Bocconia cordata with their autumn tints all helped to make a creditable showing. A similar exhibit by Dreer was commented upon by the judges as being instructive and was also appreciated by all gardeners present.

Prot. Stewardson Brown spoke of the recent hybridization congress in New York and of the possible ultimate result. He also favorably commented upon the papers read by C. W. Ward and E. G. Hill. The date for the spring show was announced to be March 24 to 26. John McCleary presided. F. C.

ROSES.

NOT A NEW ROSE.

ED. AM. FLORIST:—I send you to-day by American express, a box containing some blooms of a rose that a party is trying to palm off as something new. It has been on exhibition here and the different growers who have seen it, claim it is nothing more than the old Duchess of Albany. Will you please show it to some of the leading rose growers and get their opinions about it. CINCINNATI.

The box of cut roses came to hand to-day and though somewhat faded and dried up, the fragrance, shape of bud and color of flowers, form of foliage, etc., are all identical with the variety sent out some years ago under the name of Duchess of Albany, which was a sport from La France. I have shown the flowers to several growers who were quite familiar with the Duchess of Albany, without giving them any information whatever about these identical flowers, but simply asked them to say what they considered the variety to be, and each one immediately called it Duchess of Albany; this I did to confirm my own opinion. Undoubtedly the party referred to is mistaken as to its being a new variety. This might easily occur with any one not familiar with the variety in question, hence great care should be exercised before putting anything of the sort on the market that is not absolutely distinct from varieties previously introduced. JOHN N. MAY.

ABOUT THRIPS.

How to rid rose and other plant houses of thrips is a question one often hears propounded. Where the plants are not in bloom a good fumigation with tobacco stems every evening for a week will kill all these pests that may be developed at the time, but that does not imply that others may not come again later; hence it may be necessary to repeat the dose again three or four times during the season.

But where plants are in bloom the above method will undoubtedly destroy nearly all the crop then in sight, which in many cases would mean a serious loss. In such cases Persian insect powder of a good fresh quality should be substituted for the tobacco stems. One of the best means I have found for fumigating with this is to get several pieces of heavy iron about six or eight inches in diameter each way, place them in a good, live fire and let them get red hot. Then with a pair of tongs carry the first piece to the farthest end of the house, lay it on a couple of dry bricks, place about an ounce of the powder on the iron and retreat as quickly as possible. In the meantime have an assistant bring the

next iron in and place it twenty-five or thirty feet from the first, applying the powder, and so on until the house is filled, first of course closing all ventilators as closely as possible. Let the house remain closed tightly for several hours after the operation and if one dose has not killed all the pests, repeat it the next evening.

This method does not injure the flowers as badly as does the tobacco, but is a little more troublesome to apply. In doing it the irons must be heavy enough to retain the heat for some time or the powder will not all burn and the effect will be lacking. JOHN N. MAY.

Chicago.

MARKET RECOVERS FROM SAD STATE OF DEMORALIZATION.—COOL WEATHER AND BRISK SHIPPING DEMAND GIVE HEALTHY TONE.—ADEQUATE SUPPLIES STILL AT HAND.—CROPS RETARDED MUCH TO GROWERS BENEFIT.—FLOWER SHOW MATTERS PROGRESSING.—NO PREMIUMS FOR RETAILERS.—VARIOUS TRADE NOTES.—VISITORS.

Last week wound up with the market worse demoralized than it has been in many a day. Under the influence of summer skies receipts were doubled and trebled in all lines, with the absence of demand from out of town indicating that a similar condition prevailed throughout much of the territory tributary to this market. As a matter of fact there were many instances where buyers turned consignors and the market was gorged to repletion. Average returns to growers were probably never lower for the third week in October. But Monday found matters somewhat improved by cool weather, which has conserved the crops all week and put the market in a much more healthy condition. The crop is right in its height with many growers and was practically going to waste, but the change in temperature served to hold back the flood and, if the cold had continued, would put many a dollar in producers' pockets. By Wednesday there was big business in shipping, most of it going to New Orleans for All Saints' day. Practically every house in town had a share of this trade, with the exception of those which had their fill in previous years, for one or two of the leading concerns say that when one has made good on the "kicks" regularly coming out of thousand-mile shipments there is nothing left in New Orleans business. One of the leading commission houses which formerly did a large trade there, a couple of years ago went so far as to close all its New Orleans accounts and has not since sent a price list to that city. Their books showed that the losses ate too big a hole into the fifteen per cent. They still do some business with the Crescent city, with the express understanding that goods go out in good order and at buyer's risk, otherwise no shipment. Although New Orleans had larger home-grown supplies than usual this year, the total bought in this market probably came close to the best of past records, although fewer chrysanthemums were called for than had been expected in view of the reasonable prices at which large lots were offered. On the shipping days the market was well cleaned out on all roses of quality to stand a long journey, but low grade stock is not yet escaping the fate of a home with the Greeks, the street salesmen being also the largest buyers of chrysanthemums this season, a fact which many deplore. The white

carnation has resumed the lead; others hang fire. There are plenty of choice violets; the horse show made a big sale for them Monday, but since then the demand has been intermittent.

The prospects are that the offer of the chrysanthemum society to pay express on plants from a distance will bring some good specimens from the gardeners who have annually shown such remarkable plants in the east. Mr. Kanst is in correspondence with several interested parties. New roses will be in evidence, Souvenir de Pierre Notting and Alice Roosevelt. Fifty blooms of Ivory will get \$100, \$50 and \$25 in three prizes. There are prospects of good competition for violets, for all the growers have good stock at present. Kennicott Brothers offer \$25 for first and the society \$15 for second for exhibits of twelve bunches of fifty each and twenty-four bunches of twenty-five each. C. D. Peacock offers a silver cup for the best vase of chrysanthemums in the show. The medals include that of the French society and the two each of the American Rose Society and the S. A. F. There are no premiums in the schedule for retail florists. This state of affairs is causing considerable comment.

The assets of Walter Retzer, in bankruptcy, are to be sold at auction at 10 a. m. next Wednesday at the greenhouses. The stock of plants is to be put up in small lots to afford every buyer a chance.

On October 24 Albert Fuehs was assaulted and robbed of his watch as he was looking into a down-town show window. One of his assailants struck him in the face, cutting him quite badly.

The Ernst Wienhoeber Company is sending its patrons a neat memorandum booklet, with notes on "flower seasons," which will be preserved as much for its artistic merit as for its utility.

Weiland & Risch have a nice lot of plants of the new rose, Souvenir de Pierre Notting, from which much is expected later.

C. M. Johnson has closed out his place at 9601 Logan avenue and will rebuild at Donnellson, Ill.

J. A. Budlong has been in Indiana on a bicycle tour, going as far as Indianapolis.

Flora Hill carnations are unusually fine at Budlong's greenhouses just now.

Edgar Sanders is progressing as favorably as can be expected.

Andrew Miller is again on duty with John Mangel.

F. F. Bentley is working on jury this week.

Visitors: E. N. Burt and A. J. Santschi, Goshen, Ind.; J. A. Evans, Richmond, Ind.; J. F. Wilcox, Council Bluffs, Ia.; Geo. L. Stiles, Oklahoma City, Okla.; Ernst Asmus, West Hoboken, N. J.; A. Dimmock, New York; F. K. Sander, St. Albans, Eng.; A. T. Hey, Springfield, Ill.; S. A. Walcott, Batavia, Ill.; Mrs. Connon, St. Louis.

Philadelphia.

MARKET EXPERIENCES A RADICAL REVERSAL OF FORM.—FROM FAMINE TO FEAST.—ALL ABOUT THE TOP-NOTCH PRICES.—A BIG YELLOW CHRYSANTHEMUM.—MANY ENTRIES FOR FLOWER SHOW.—VARIOUS NOTES.

Quite a change has come over the state of affairs. Two weeks ago it was hard work to get flowers to fill orders, now it is difficult to find room to put the flowers that are forced on the market. Stock is accumulating in every line, but is most pronounced in chrysanthemums, which

are piling up very fast. Stock of a quality that would have brought \$3 two weeks ago is now going begging at \$1.50 per dozen. Among the varieties noticed are Maud Dean, Pink Ivory, Robinson, Col. Appleton, Robert Halliday, Ivory, Florence Harris and a lot of strangers that are not familiar and probably never will be. Prices range from 75 cents to \$3 per dozen. Speaking of chrysanthemums, I must mention the great new yellow that Robert Craig & Son have in Yellow Eaton. It certainly will be one of the winners this season. A large house of this variety is just bursting into bloom and looks very promising. Carnations are coming in much too fast and are being sold on the streets as low as 10 cents per bunch of twenty-five flowers, and stock not over one day old. Not much comfort in this for the grower. Fresh stock prices range from \$1 to \$2 per hundred. Double violets are fine, almost up to their best winter form; 50 cents to 75 cents, with a few double extras bringing \$1, is the price. Roses are also plentiful; prices for the teas are \$4 to \$6; and a few extras have sold as high as \$8 per hundred. The quality keeps on improving. Beauties are moving fairly well at from \$1 to \$3.50 per dozen.

Secretary David Rust is laying plans to enlarge the facilities of Horticultural Hall, as the prospects are that there will not be room for all proposed exhibits for the approaching show. The entries are coming in very fast and it is very evident that the show will be far ahead of any of its predecessors. It is a pity that a committee could not go out to the greenhouses of the exhibitors, particularly of chrysanthemum plants, and pass upon their eligibility. Such action would certainly raise the standard of the exhibitions and save some growers a lot of trouble.

"Turnbull & Crawford, importers and manufacturers of florists' ribbons and novelties" is the sign at 273 South Eleventh street, where John Q. A. Turnbull, late with M. Rice & Company, and Wm. W. Crawford, son of Robert Crawford, Jr., are to carry on the above mentioned business.

C. H. Grigg, late of the Century Flower Shop, has opened a flower store on Eleventh street above Walnut under the name of The Colonial. K.

Pittsburg.

STOCK OF HIGH QUALITY BUT TRADE ONLY FAIR.—COOL WEATHER AT HAND.—CLUB TO MEET.—DOINGS OF GROWERS AND OTHERS.

Stock is each day gaining in quality and now that snow has fallen we are sure that good business will follow, but buyers are apathetic as yet. Chrysanthemums are coming, selling with surprising rapidity, and dominate the market at present. The demand for double violets is increasing daily, but singles have no friends. Long and short Beauties are meeting with fair sale. The quality is fine. Tea roses are also much improved, carnations splendid and cactylas are meeting with liberal sale. Lily of the valley is fine and Sprengerii plentiful.

Loew & Roehrig are now negotiating for the purchase of green goods. They have encountered difficulty in securing a suitable building in a central location.

The Pittsburg Florists' and Gardeners' Club will hold its next meeting on November 12. Chrysanthemums will be the subject discussed and exhibited.

The Wheeling Greenhouse Company is reported to be planning the extension of

their plant. Their cut flower business has had large development.

The will of the late Jacob Beckert leaves his estate to his wife. He also directed that his body be cremated, which was done.

Charley Crall was unable to open his Monongahela City store on time, but will be open in a few days.

Lloyd Swarthout, of Washington, Pa., is sending fine chrysanthemums to this market.

Mr. Fotheringham of Pierson's, of Tarrytown, N. Y., is a visitor.

W. P. Minneley has opened a store at 5820 Penn avenue. E. L. M.

Boston.

MARKET BREAKS BADLY.—SLUMP COMES SUDDENLY.—UNWIELDY SUPPLIES AT HAND.—HOPE THREE WEEKS DISTANT.—MARKET MEN HOLD REUNION.—BANQUET AND BUSINESS.—ORATORY AS AN AID TO DIGESTION OF BOTH.—VISITORS AND OTHER NOTES.

Had it been practicable to write last week's report of flower market conditions here twenty-four hours later than it was written, its tone would have been widely different from what it was. Seldom do we experience a more thorough collapse within so short a time than was experienced last week. Between Tuesday and Wednesday the market went to pieces completely, not a single item on the list escaping, and varieties which were eagerly sought by buyers at excellent prices for the season, on Monday, could not on Wednesday be moved beyond the wholesalers' storage boxes. And these are the conditions that have prevailed ever since. Reports as published from other centers indicate, however, that this market held out the longest, and for this discrimination in our favor we should be deeply grateful. No doubt the usual stagnation of the chrysanthemum season will now be experienced and we might as well date our hopes ahead to Thanksgiving time.

The annual meeting of the stockholders of the Co-operative Flower Growers' Association was held at Young's Hotel on Saturday evening, October 25. The old board of officers, under whose efficient management the corporation has been so prosperous, was re-elected for another year, with the exception that Alex. Montgomery was chosen to fill the vacancy on the directors' board caused by the resignation of Peter Fisher. The crowded condition of the present market and the difficult question of more commodious but equally accessible quarters was the chief topic of discussion and it transpired from an informal expression of opinion that the stockholders are content to leave the selection of a new place and other problems involved therewith to the judgment of the directors, who have already devoted considerable time and thought to its solution.

Previous to the formal business meeting the annual banquet was served, about fifty gentlemen participating, among whom were the representatives of the trade press, who were present as invited guests. After the inner man had been appeased, President W. C. Stieckel, who occupied the chair, gave expression to a few words of welcome and then called upon Wm. J. Stewart, who, as the senior member of the press delegation, extended congratulations. Alex. Montgomery also responded briefly, as did "Bill" Anderson, who was very sorry to have been accused of selling roses to best advantage. Capt. Pierce contrib-

uted a dramatic recitation and W. H. Elliott enlarged upon the adaptability of the wilds of New Hampshire for rose growing. F. J. Norton extended kind compliments and F. R. Mathison recounted the rapid strides made by the flower business and expressed optimistic views regarding its future. J. S. Mantereinced due appreciation of the courtesies extended. Altogether it was a very enjoyable little reunion.

Visitors: H. F. Litterfield, Worcester; Ed. Fancourt, Philadelphia; H. S. DeForest, New York.

Tewksbury, Mass.

NOTES OF CONDITIONS WITH THE GROWERS.—ALL ESTABLISHMENTS IN GOOD SHAPE.—CARNATIONS THE SPECIALTIES.—JOTTINGS OF VARYING INTEREST.

Tewksbury is a great carnation center and one would have to travel a long way to find the equal of the blooms turned out here, nothing but the best varieties being grown. At the well kept establishment of Patten & Company the large range of houses is all planted to carnations. Considering the dull weather we have had of late the plants are in excellent condition; one of the 250-foot houses planted to Lawson is simply a sea of buds. With a few days of sunshine they will have a tremendous crop. Mr. Patten has a batch of Cressbrook and another of Fairmaid but at present he is not favorably impressed by them. Cressbrook does not seem to do in Tewksbury all that it does in some other localities. Here one may see all the leading varieties, Lawson, Roosevelt, Harry Fenn, J. H. Manley, Bradt, Dorothy Whitney, Estelle, Gaiety, G. H. Crane, Morning Glory, Prosperity, Boston Market, Gov. Wolcott and Lorna. They have a new variegated seedling, not on the market, named Mrs. M. A. Patten which promises to be in the first class. A large part of the cut here is handled by Thomas Galvin in Boston. During the past summer they made extensive alterations, changing over several of the old houses, making them a bench wider. At the end of the Sprengerii house, or rather inside of it, they built a cosy office 15x24, equipped with all the modern conveniences. They have a house full of coal and more standing on a spur track nearby.

A. C. Tingley has been badly handicapped this fall, being afflicted with rheumatism, which kept him indoors for a good many weeks. A new fifty horsepower boiler has been installed. The houses are all filled and the plants look very promising. His chrysanthemums are particularly fine this year, Glory of Pacific being especially good. Ivory has been planted extensively. Two houses planted to violets, single and double, look as if they ought to give a good account of themselves the coming winter.

At A. Roper's they have been busy with steam fitting. Nothing but carnations of his own creation are seen here. Here you can see Fairmaid in all its glory, for no one can grow it better than the originator. Mr. Roper has an unnamed red seedling that he has been growing for two years, and which promises to be good. The blooms are about the size of Crane but are softer in color. It is very prolific.

Lewis Small's place is back in the woods, away from town, and there are only five houses but what quantities of superb blooms he does send to the Boston market. His stock is all looking tip top. A. M.

St. Louis.

MARKET RECOVERS SLIGHTLY FROM ITS STAGNATION.—STOCK STILL GOING TO WASTE.—NOTES OF VARIOUS DOINGS OF THE GROWERS.

The market was very dull last week but the first part of this week things moved along. Chrysanthemums are coming in quite lively, but sales are at the cost of leaving roses on hand. Some very fine roses and carnations are being sent in and the latter are selling better than the former. Violets are showing a big improvement in size and length of stem but a large number go to waste. Some very fine cosmos are received but there is not much sale for it.

The Michel Plant and Bulb Company has things in general looking fine, especially the chrysanthemums. Their Timothy Eaton are the best that I have seen in this city; the foliage is very large and healthy and the stems strong. Some very fine pot plants of Mme. Bergmann were also to be seen. One house is devoted to roses that are used for stock but some very fine flowers are being cut from them at present. They have a very fine collection of geraniums here, as I mentioned in the spring, but out of 155 varieties only fifty-five have been retained as being the best suited for this climate.

E. A. Michel has moved out to Windsor Spring, near Kirkwood, with his family. He will keep in touch with the greenhouses at the springs and at Old Orchard and Eugene Michel will have full charge of the greenhouses at Flower Grove and Magnolia avenue. Mr. Michel has just returned from Kansas City, where he attended the Grand Lodge meeting of the Masons.

The Michel Plant and Bulb Company on October 25 filed with the recorder of deeds a certificate of increase of capital from \$10,000 to \$25,000. Assets are given as \$21,691.50 and liabilities \$11,691.50. Sixty per cent of the increase is paid. R. J. M.

Denver.

BUSINESS RUNS ALONG SMOOTHLY.—CHRYSANTHEMUMS MAKE OTHER STOCK APPEAR PLENTIFUL.—VALUES STILL HOLD.—GOOD DECORATIONS.—PERSONAL AND OTHER NOTES.

There is nothing startling in the flower line, although trade runs smoothly along, with an occasional spurt due to funeral work. Large decorations are scarce and the gay season has hardly opened yet. The Park Floral Company handled quite a fine job last week Wednesday, in which the decorations called for a good use of flowers, white chrysanthemums and valley predominating. The chrysanthemums have started in and a good variety may be had now. Robinson is best at present, but will soon give way to Timothy Eaton. Col. Appleton is showing up in small numbers, but the big cut will be in the latter part of the week. Owing to the big lot of chrysanthemums now on the market other stock is rather plentiful, but so far former prices have been maintained. Violets meet with good sale and are choice. Carnations are coming in good lots, with the best selling clean, the waste coming on the smaller varieties. Roses are beginning to show the effects of the heat, for it is more like summer than fall. A few good cold days would undoubtedly help business as well as stock. Pot chrysanthemums are plentiful and the sale on them is slow.

Frank Wolfe, with the Colfax Avenue

Floral Company, has gone to Pittsburg, his former home, for a visit after an absence of several years.

J. A. Valentine, of the Park Floral Company, will attend the Kansas City flower show. B.

St. Paul.

BUSINESS ON THE IMPROVE AND STOCK GIVES SATISFACTION.—ALL ABOUT THE SUPPLY AND PRICES.—CARNATIONS GAINING IN POPULARITY.—FLOWER SHOW AN ASSURED SUCCESS.—VARIOUS NOTES.

Since my last report trade has received a very gratifying impetus. Stock has greatly improved in quantity as well as in quality and fall business promises to be the best in many years. The social season, which somehow always waits for the chrysanthemum season, has commenced with renewed activity and florists are consequently busy. Shipping trade is fairly active, though there is an apparent dropping off in funeral work, both in city and country. In roses Beauties are still the leader, the local supply not meeting the demand. Retail prices range from \$3 to \$8 per dozen, at wholesale from \$8 to \$30 per hundred. Choice Liberty roses are in good demand, retailing at from \$2 to \$3 per dozen, but so few are choice that not many are sold at that figure. Meteors, Bridesmaids, Brides and Golden Gates are also in good demand at \$5 per hundred wholesale, \$1.50 per dozen at retail. Carnations are pushing roses hard for first place, good fancy stock being eagerly sought after and selling at nearly as high prices. Enchantress has created a most favorable impression. Gov. Wolcott, a large, bold, pure white blossom, is also attracting considerable attention. Prosperity is popular also and commands the highest market price. Some recent blooms of this variety grown in a semi-shaded situation were heavily marked with red. Violets are coming in slowly, are of fair quality and sell quite readily. Princess of Wales sells in preference to the double sorts when fresh. As a shipper, however, we hardly think it suitable. Chrysanthemums are coming along very rapidly now. Yellow Monarch, Robinson and Rose Owen are the best sorts at this writing.

At a meeting of the floral committee of the flower show directors, held in the Armory building, florists were present from Minneapolis and St. Paul, and spaces were assigned to Mendenhall, the Minneapolis Floral Company, and E. Nagel, of Minneapolis, and the Wind-miller Company of Mankato; also Aug. S. Swanson, L. L. May, E. F. Lemke, Vogt Brothers, Holm & Olson, Christ. Bussjaeger, Dr. R. Schiffmann and Como Park, of St. Paul. Judges were selected as follows: Frank Berry, of Stillwater, and two ladies, one from Minneapolis and one from St. Paul, on cut flowers. O. A. Nordquist, Oakland Cemetery, St. Paul; T. Hall, of the Lakewood Greenhouses, Minneapolis, and Prof. G. S. Greene, of the horticultural department of the state agricultural school, on plants.

While everybody breathes easier over the apparent end of the coal strike, the local situation remains unchanged. The best steam coal is no longer being sold, the second best selling at \$5.65 per ton in car lots.

Holm & Olson have their new range of houses completed and are rapidly filling it up with choice stock for the holiday and winter trade.

FELIX.

San Francisco.

CHRYSANTHEMUMS PLENTIFUL AND OF GOOD QUALITY.—PRICES WELL BELOW THOSE OF PREVIOUS YEARS.—CLUB TO HAVE AN INFORMAL SHOW.—A UNION.

The chrysanthemum season is now fully on and, taking everything into consideration, they can be bought and have been bought for a good deal lower figure than in any other year. No such fancy price as \$4 per dozen has been asked since the first chrysanthemums arrived, even with quality as good and better than last year. Good indoor blooms can be had for from 50 cents up to \$1.50 and outdoor stock for almost any price. Of course carnations and roses are suffering considerably and moving very slowly. The rainy season has set in now, with a good two-days' rain accompanied by lightning, thunder and hail, something almost unheard of in this part of the country. The Chinamen are the only losers from the hail, as they have all the chrysanthemums growing outside. What is good for one is bad for the other. The violet grower is all smiles since the cooler and wet weather has started and a considerable improvement in quantity and quality can be noted already.

The Pacific Coast Horticultural Society will hold its first chrysanthemum show in its hall on Mission street November 1. Several small cash prizes are offered. It gives promise of a good attendance as these complimentary shows have been quite a success and growers and storekeepers are getting better acquainted with one another through them.

The employees in the retail stores have formed a union for their betterment, with Messrs. Cappelman and J. Buean as the leading spirits. GOLDEN GATE.

Lowell, Mass.

CHRYSANTHEMUMS OCCUPY THE CENTER OF THE STAGE.—GOOD STOCK COMING IN EARLIER THAN USUAL.—STAPLE VALUES HURT.—VARIOUS NOTES.

The weather conditions are such that the growers have been producing stock of all kinds in excellent shape. The first killing frost of the season visited us on October 22 and laid low everything outdoors. Chrysanthemums are now seen on every side. Some of the varieties that are seen are about a week earlier than last year. Just now there is a tremendous supply of yellow and white, with a noticeable shortage of pink, but this will be remedied in a few days, when Pink Ivory will be ready. Viviani-Morel is in but they do not have good color. Ivory and Robinson are holding their own for whites, the blooms of Robinson this year being the best seen for a long time. Bonaffon is gradually coming to the front again for first-class blooms of yellow, making its appearance early last week. The growers of red chrysanthemums are holding them for the Harvard-Yale football game. With so many chrysanthemums coming in the carnations have suffered greatly in price, good flowers being sold for \$1 per hundred. Bursted calyxes are very noticeable, on Lawson especially.

Many a silent prayer of thanksgiving was offered by the small growers here when it was learned that the coal strike was ended. One grower in Chelmsford was preparing to close up for the winter, but with promises of coal he has taken on new courage.

M. A. Patten, of Tewksbury, will be at the Madison Square Garden show with some of his carnations.

A. M.

THE AMERICAN FLORIST

EIGHTEENTH YEAR.

Subscription, \$1.00 a year. To Europe, \$2.00.
Subscriptions accepted only from those
in the trade.

Advertisements on all except cover pages,
10 Cents a Line, Agate; \$1.00 per inch.
Cash with Order.

No Special Position Guaranteed.

Discounts are allowed, **only on consecutive inser-**
tions, as follows—6 times, 5 per cent; 13 times,
10 per cent; 26 times, 20 per cent;
52 times, 30 per cent.

Cover space sold only on yearly contract at
\$1.00 per inch, net, in the case of the two
front pages, regular discounts apply-
ing only to the back pages.

The Advertising Department of the AMERICAN
FLORIST is for florists, seedsmen and nurserymen
and dealers in wares pertaining to those lines *only*.

Orders for less than one-half inch space not accepted.
Advertisements must reach us by Wednesday to
secure insertion in the issue for the following
Saturday. Address

AMERICAN FLORIST CO., Chicago.

THE azalea shortages this year are
again greatest in such varieties as Van
der Cruyssen, Simon Mardner and Ver-
vænana.

THE railroads have made a rate of one
fare for the round trip for the Kansas
City flower show, applying within a
radius of 200 miles.

THE annual convention of the Chrysan-
themum Society of America will be held
at Chicago, November 11 to 15. All
should arrange to attend on this impor-
tant occasion.

THE mailing label on your paper shows
when your subscription expires; when
you send your renewal note that the
date changes within two weeks; it will
serve as your receipt.

WE are in receipt of Bulletin No. 97 of
the Pennsylvania Department of Agri-
culture, which is an eminently practical
treatise by Edwin Lonsdale on the man-
agement of greenhouses.

THIS is the season at which the florist
in the small city should take advantage
of the popular interest in the chrysanthe-
mum to attract a large number of visi-
tors to his greenhouses. A brief announce-
ment of a flower show, published in the
local paper, will do it.

THE advertisement will bring the cus-
tomer to the store, but the salesman has
a very important part to perform, says
Printers' Ink. He should see to it that
the customer gets just what he comes for,
and that the courtesy of his treatment
will prompt him to call again.

LAST year decorative plants packed in
cases were frozen in transit November 1,
the earliest date for many years. For
safety give plant shipping cases a double
lining of paper after this date and, in
addition, ship by express. If the plants
are shipped by freight, use refrigerator
cars.

Too Good to be Without.

ED. AM. FLORIST:—I think the AMERICAN
FLORIST too good a trade paper for any
florist to be without.
Springfield, Ill. BELLE MILLER.

Society of American Florists.

DEPARTMENT OF PLANT REGISTRATION.

Leonard J. Stankowicz, Niles, Cook
county, Ill., registers new carnation Mrs.
Phoebe Hearst, a cross between Lizzie Mc-
Gowan and Argyle; white, fragrant;
flower very large and partaking some-
what of the form of McGowan.

WM. J. STEWART, Sec'y.

Chrysanthemum Society of America.

The seedling committees of the C. S. A.
meet each Saturday until the end of
November, as follows:

Boston, Mass.—E. A. Wood, chairman,
care of Boston Flower Market, Park
street; James Wheeler, William Nichol-
son.

New York, N. Y.—Eugene Dailledouze,
chairman, care of New York Cut Flower
Company, Twenty-sixth street and Sixth
avenue; James W. Withers, William H.
Duckham.

Philadelphia, Pa.—A. B. Cartledge,
chairman, 1514 Chestnut street; William
K. Harris, John Westcott.

Chicago, Ill.—James S. Wilson, chair-
man, care of J. B. Deamud, 51 Wabash
avenue; George Stollery, E. Wienhoeber.

Cincinnati, O.—Albert Sunderbruch,
chairman, care of Cincinnati Cut Flower
Company, 437 Main street; James B.
Allan, E. G. Gillett.

Exhibits to receive attention from the
committees must in all cases be prepaid
to destination, and the entry fee of \$2
should be forwarded to the secretary not
later than Tuesday of the week preceding
examination.

Anyone having a variety in season
after dates fixed, can have the same
passed upon by specially notifying the
the chairmen of committees.

Following are the reports of the com-
mittees judging seedlings and sports:

New York, October 25.—The E. G. Hill
Company, Richmond, Ind., exhibited
Mlle. Marie Liger, an imported French
variety, light pink, Japanese incurved,
scoring 93 points commercial scale. John
N. May, Summit, N. J., had on exhibition
No. 15 M., pink, incurved Japanese on
terminal bud, which scored 74 points
commercial scale. No. 11 H., bright
clear yellow, Japanese incurved, scored
95 points commercial scale, also exhib-
ited by John N. May.

Philadelphia, October 18.—Wm. Paul
Binder, Rider, Md., exhibited No. 14,
white, incurved Japanese, which scored
84 points commercial scale. October 25.
—Ernest Schreiber, gardener to Wm. L.
Elkins, Ashbourne, Pa., exhibited Miss
Stella T. Elkins, dark red, reflexed Japane-
se, scoring 85 points commercial scale,
86 points exhibition scale. Mlle. Marie
Liger, exhibited by the E. G. Hill Com-
pany, scored 90 points commercial and
exhibition scales. No. 15 M., exhibited
by John N. May, scored 86 points com-
mercial scale. No. 11 H., by same exhib-
itor, scored 85 points commercial and
exhibition scales.

Cincinnati, October 25.—Mlle. Marie
Liger, exhibited by the E. G. Hill Com-
pany, scored 93 points commercial scale.

Chicago, October 25.—Mlle. Marie
Liger exhibited by The E. G. Hill Com-
pany, scored 87 points commercial scale.

Boston, October 25.—John N. May,
Summit, N. J., exhibited No. 15 M, sil-
very pink, which scored 86 points com-
mercial scale.

It is gratifying to note that the
imported French variety, Mlle. Marie
Liger, which was exhibited by The E. G.
Hill Company, Richmond, Ind., before
the Chicago, Cincinnati, New York and
Philadelphia committees, is the same
variety which was honored by the award
of \$25 offered by the Chrysanthemum
Society of America, competed for at the
exposition at Paris in 1900. On that
occasion it was exhibited by Monsieur
Liger-Ligneau, horticulteur, Orleans.

EDWIN LONSDALE, Sec'y.

The Chrysanthemum Season.

I love the rose that bloometh in its yellow, red or
white;
The hyacinth, whose fragrance fills the senses
with delight;
The velvet-petaled pansy and the aromatic pink;
The daisy and the dahlia, too, are fair to see, I
think.
For hollyhocks and tulips I've a special weak-
ness and
I always did consider the nasturtium was grand.
But adjectives run out, and I am simply stricken
dumb.
Confronted with the glories of the gay chrysan-
themum.

The sweetness of the william, the alyssum and
pen.
Of color irrespective quite, must still appeal to
me.

A little bunch of lilacs or a sprig of mignonette
Will send me into ecstasies; the modest violet
(A modest little dollar for a bunch they are just
now—

A luxury my means, alas, will by no means
allow)
Afford me (as I can't afford it, owing to that
sum)

A joy—but still I much prefer the the gay chrysan-
themum.

I love its drooping petals, long and slender, bright
and fair,
Of coleslaw reminiscent—or a virtuoso's hair.

In rich and flaming orange or in purple's royal
hue,
In snowy white, in crimson, or some combination
new;

Its stem erect and stately and its leaves of restful
green,
Of all the flowers blooming it's the bloomingest,
I ween.

Its smell I can't say much for, but I'm glad its
time has come,
For I am really daffy on the gay chrysanthemum.

Chicago Daily News.

Coming Exhibitions.

[Secretaries are requested to supply any omis-
sions from this list.]

BALTIMORE, MD., November 10-14, 1902.—Chrysan-
themum show Gardeners' and Florists' Club of
Baltimore. Jno. J. Perry, Sec'y, Gay and Eager
streets.

BOSTON, MASS., November 6-9, 1902.—Chrysan-
themum show Massachusetts Horticultural Soci-
ety. W. P. Rich, Sec'y, Horticultural Hall, 300
Massachusetts avenue.

CHICAGO, ILL., November 11-15, 1902.—First
annual exhibition Chrysanthemum Society of
America and twelfth annual exhibition Horti-
cultural Society of Chicago, to be held jointly. E.
A. Kanst, Assistant Secretary, 5700 Cottage Grove
avenue, Chicago.

MARKET LACKS VITALITY. — RETAILERS NOT COMPLAINING.—STOCK CHEAP AND THEIR TRADE FAIR.—LOW GRADE MATERIAL LOST BY WHOLESALERS.—ABOUT OIL BURNERS.—NOTES.

The wholesale flower market is greatly depressed this week and much complaint is heard from growers and commission men over the situation. Considering the quantity of material coming in, however, it is not clear that business is worse than, or even as bad as, it has been at a corresponding season in other years. The retail people, while asserting that trade is quiet, are not finding fault as a rule, and as conditions favor low values they are having a pretty good time of it. Chrysanthemums improve daily, the big fellows that tell of the approach of the height of the season being in evidence on all sides. Carnations have had a very serious set-back and must be very good to command \$1 per hundred or sell at all. Quite a percentage of the inferior grade stock fails to find a buyer and goes to sleep on the wholesalers' hands. There are also many unsold violets in evidence, these, too, being of the poorer class. The prospects, so far as second quality violets are concerned, are very dubious for the coming winter.

Regarding the appliances for the burning of crude oil as a substitute for coal in greenhouses, Messrs. Lord & Burnham state that they are not handling these burners as a business. They had so many calls by telephone and otherwise from customers who were in sore straits from shortage of coal that they took up the subject of crude oil burners to help out these parties if possible. They intend to further continue their investigations and make tests to ascertain what can actually be done.

The new rose Canadian Queen from the Dale Estate attracts much favorable comment at Thomas Young's, where the blooms are on sale. It is a light pink sport from Mrs. Pierpont Morgan, of very even tint and is an unexcelled keeper.

Ithaca, N. Y.

During the summer the Lord & Burnham Company put up a new greenhouse, 22x50 feet, for the department of grounds, Cornell University. This house was rendered necessary by the increased area devoted to bedding plants on the extensive grounds of the university. The houses of this department are well managed by Albert Shore, son of Robert Shore, the able superintendent of the university's botanical department.

Another of Mr. Shore's sons, Robert J., for some time in charge of Prof. Bailey's place, has recently been engaged to take charge of the greenhouses of the Experiment Station, University of Illinois, under A. C. Beal's supervision.

Des Moines, Ia.

I. W. and Alfred G. Lozier have just moved into their new store, 216 Sixth street, in the building north of the street car waiting room. The store is fitted up with fine fixtures, of oak with marble and mirrors. Miss Mamie Dorn has charge of the new store. She was formerly with W. L. Morris for many years. The Loziers are conducting two stores and a large range of greenhouses.

C. W. S.

SAVANNAH, GA.—A. C. Oelschig is laid up with a dislocated elbow.

OBITUARY.

MRS. ALFRED TILTON.

Mary Rieley Tilton, wife of Alfred Tilton, of A. Tilton & Son, of Cleveland, died on October 28, at the family residence, 261 Walton avenue. The funeral was held privately on October 30.

GEORGE GRAHAM.

George Graham, 81 years of age, for twenty years gardener at the Institute for the Blind at Indianapolis, was burned to death while sleeping in the building at 825 Fort Wayne avenue in which he roomed. He had a son, William Graham, who is employed in the Bellevue Conservatories at Broad Ripple, Ind.

GLEN COVE, N. Y.—Hitchings & Company are erecting a range of four fine conservatories for Percy Chubb.

SITUATIONS, WANTS, FOR SALE.

Advertisements under this head will be inserted at the rate of ten cents a line (six words) each insertion. Cash must accompany order. Plant ads. not admitted under this head.

THE SEED TRADE.

AMERICAN SEED TRADE ASSOCIATION.

WALTER P. STOKES, Pres.; C. N. PAGE, First Vice-Pres.; S. F. WILLARD, Wethersfield, Conn., Sec'y and Treas.

VISITED CHICAGO: Arthur G. Lee, of Arthur G. Lee & Bro., Fort Smith, Ark.

MARY A. RIELEY, wife of Alfred Tilton, of A. Tilton & Son, Cleveland, O., died October 28.

HOLLY groves in localities where this article has formerly been in good supply are reported to show but half an average crop of berries. The leaves are in good color.

OWING to the steady increase of business, Vaughan's Seed Store, Chicago, needs extended warehouse space and has leased three floors and a basement, 55x125 feet, at 117-119 Kinzie street.

BOUQUET green picking continues fairly good at the advanced prices, cold weather, rain and snow flurries having been the rule the past week. However, ten days more of bright weather should give the trade a fair average supply.

AMONG the first preliminary trade price-lists for 1903 is that of J. M. Thorburn & Company, dated October 24. Of cucumber seed they say, "Crop almost a failure." Of musk melon seed, "Very short crops." Water melon seed, "Crops very short." Peas, "The crop is generally a failure." Pumpkin, "Many kinds failed."

The English Seed Market.

Correspondents of the *Gardeners' Chronicle*, writing October 15, report that the most interesting feature of that week had been the considerable rise in the value of red clover seed. Scarcely any English seed can now be expected, whilst the advance Russian sales made to Germany, as well as the American sales to Europe, are being cancelled by the payment to the buyers of substantial smart money. Alsike and white hold well their own, but trefoil continues quiet. With respect to rye grasses the tendency is still upwards. Meanwhile, the rates demanded for Königsberg vetches are regarded as prohibitory. Canary seed, with light stocks everywhere, and poor crop prospects the world over, keeps very strong. Hemp seed, however, drops in price. Blue peas and haricot beans are in short supply, and must be quoted dearer.

European Seed Crops.

The following is the condition of European seed crops as reported by special correspondents by latest mail:

GERMANY.

The seed growers in the center of Germany are now very busy harvesting their crops; everyone is working hard to pluck the last flowers and vegetables in the fields, and the two or three fine days in the middle of October favored the harvest work. Almost all flowers are plucked and brought in, only the late sorts of asters, antirrhinum, zinnia, tagetes and scabiosa remain on the grounds; for the complete maturity of these, sunshine and dry weather are still needed.

The harvest of vegetables is finished as regards the greatest part; all the seed stores and magazines resound with the rattling of the cleaning machines working almost day and night to purify the immense lots of seeds. Parsley, leek and some runner beans are not in yet, and onions are still for the greatest part in the fields, but cucumbers, lettuce, beets, peas, radish and so forth are in and the cabbage varieties are cleaned and ready for sale.

In general this year has not been favorable for the growing of seeds, either for the vegetation or for the crops. Hot days were very rare; no one can remember more than a dozen. On the con-

trary we had plenty of rain, humidity, fog and frosty nights. The spring commenced with snow; even in southwestern Germany, which is famous for the mildness of its springs, the average temperature went 3° to 1° under the normal, in some districts even 5°. In Karlsruhe the meteorological observations can be traced to 1779, but a cooler May than the one of 1902 is not marked, and the observatory on the Brocken, near Quedlinburg, noted a snowfall on July 12, a phenomenon which has not been observed for many years.

Under these circumstances the vegetation did not progress sufficiently, the spring flowers opened late and the frost destroyed a great deal of the fruit tree bloom and damaged almost all early vegetables. Indeed, the crop is about three weeks behind the usual time, and I dare say that the seeds of early ripening varieties of the cabbage tribe, chervil, spinach, corn salad, turnips, pansies, summer flowers as clarkia, nigella and so forth have produced normal crops, while the later ripening varieties like peas, beans, lettuce, onions, mignonette, carnations, candytuft and so forth are under the normal, and the so-called autumn crops like carrots, leeks, parsley, asters and zinnia will yield bad crops. Cucumber is the worst of all and will surely fetch high prices, the quantities on disposal being far less than usual.

In consequence, the quotations on the early gathered seeds are cheap, but the late ripening seeds, and especially certain kinds of asters, will be far higher than last year. Beans and peas will go up considerably. Business has not commenced yet and prices will probably be issued later than ordinary, for it will be some time before the seedsmen are able to say definitely what are the exact quantities at their disposal. As there are in hand very meagre stocks, it is to be presumed that the trade will get brisk and, indeed, the inquiries for certain articles begin to come in already.

FRANCE.

The crop in France is going on under difficulties on account of excess of humidity; many seeds need artificial drying, so that in some cases the germinative power and the appearance of the seeds will probably suffer. In general the crop is satisfactory, especially in Anjou, with the exception of cucumbers, which are a failure altogether, both in the north and in the south. Lettuces are good everywhere, but prices are not too cheap, on account of the bad crop in Germany. Onions are on hand in sufficient quantities; the crop is good and prices cheaper than they have ever been, but the seed appears lighter than ordinary. Smaller plantations for next year. The growers are satisfied with cabbages; the red varieties especially gave very good quantities, the first time for several years. The plants for next year seem in good condition. Kohl rabi was ravaged a little by caterpillar, but large areas have been planted for next year.

Turnips were a good crop and cheap prices; this article will probably not be cleared. Parsley is not quite cleaned yet, but a good crop is estimated. Sufficient plants for next year. The south and Anjou announce a favorable radish crop and, as the growers near Paris seem also to have a satisfactory harvest, we may say that the general crop is good. This is the first time again

for many years. Leek is not quite plucked but promises good results. The growers in the Bretagne district pretend that they obtained insufficient crops of peas but the situation of this article is uncertain and business slow in consequence. Beans will furnish very small quantities, on account of the constant humidity which kept back the development of the plants. A great quantity of the beans are rotten and will germinate small percentage.

Carrots promise far better results than the last three years; and it is not too soon, for the growers seemed to be disgusted with this article, but the better crop in hand will surely encourage them to continue the culture of carrot seed. The crop is good in the environs of Paris, sufficient in the center districts but not so good in the south, where only fodder carrots are cultivated. Beets furnish a good crop, both in quality and in quantity. The plants for next year seem in good condition up to date and strong enough to pass the winter.

Nashville, Tenn.

WEATHER AIDS IN THE PRODUCTION OF AUTUMN FLOWERS. — FLORISTS HAVE OPENING AND GIVE BOUQUETS.

The fine fall weather of the past few weeks has served to continue in bloom all kinds of autumn flowers and there has been a profusion of dahlias and cosmos, which, while not helping the florist much in his sales, have served to keep the store windows resplendent. Roses are good. Some very fine Beauty are being cut and teas are coming in fine. Violets also are beginning to flower more freely and, as usual, meet with a general sale, there being a good demand for all that are in the market. Chrysanthemums are plentiful and fine. Geny Brothers, as well as Joy & Son, have good stock and are having good sales.

Joy & Son had an opening last week. For two days the handsomely decorated store was thronged and over 10,000 roses, carnations and chrysanthemums were given away. The schools were invited especially and long processions of school girls returned flower laden to their several seminaries. They had plenty for everybody, and that without money and without price. Joy & Son have now thirty greenhouses, three of them 400 feet long. Geny Brothers have also added largely to their greenhouse plant, and have built five new houses since last season.

THE ANNUAL Autumn Number

.....OF.....

THE AMERICAN FLORIST

.....WILL BE ISSUED.....

NOVEMBER 15th, 1902.

This splendid special issue of **THE AMERICAN FLORIST** will commemorate the first annual exhibition of the

CHRYSANTHEMUM SOCIETY OF AMERICA

While the leading feature will be the great exhibition at Chicago, this issue will fully cover the many other shows of the week and will be an invaluable record of the floricultural progress of the year. There will be many technical and timely articles, fully illustrated, and the issue will be all that the trade has learned to expect these great special issues to be.

Copies of this number will be mailed throughout the United States and Canada to every person in the trade whose business is worthy of consideration, also to leading foreign houses. Its business bringing powers will be great.

Advertisements in body pages will be taken at our ordinary rate, namely \$1.00 per inch, \$30.00 per page of thirty inches, with the usual discounts on time contracts. Advertisements on second, third and fourth **SPECIAL COVER PAGES** (printed on heavy enameled paper), \$30.00 per page net.

AMERICAN FLORIST COMPANY,

324 Dearborn Street,

THE NURSERY TRADE.

AM. ASSOCIATION OF NURSERYMEN.

CHAS. A. LOENFRITZ, Pres.; D. S. LAKE, Vice-Pres.; GEORGE C. SEAGER, Rochester, N. Y., Sec'y. Twenty-eighth annual convention, Detroit, Mich., June, 1903.

J. H. LEWIS, who was a pioneer nurseryman at Bonham, Tex., and later at Council Bluffs, Ia., died recently at Buena Vista, Colo., aged 69 years.

It is said by a good authority that the planting of nursery stock in Minnesota in the past year has been far ahead of any previous year. Most of it went into new orchards.

B. F. WILSON and W. F. Cyester, of W. J. Peters & Co., Troy, O., are in the east. They say the past season has been a good one for growing purposes and stock is in excellent shape.

FRED. WELLHOUSE, the king of apple growers, has in twelve years marketed 450,000 bushels of apples at an average price of 28 cents per bushel. He says Ben Davis is the most profitable variety.

THE Missouri State Horticultural Society will hold its forty-fifth annual meeting at Springfield December 2 to 4. There will be a large display of fruit. L. A. Goodman is secretary, 4,000 Warwick boulevard, Kansas City.

Habitat of Yucca Filamentosa.

ED. AM. FLORIST:—In your issue of October 11, W. A. Peterson, in answering "C's" inquiry about Yucca filamentosa, says: "The plant is a native of the southwestern United States and Mexico." This is so great an error that it ought not to pass uncorrected. Yucca filamentosa is native nowhere west of the Mississippi river except possibly in Louisiana. Britton and Brown in their "Illustrated Flora" give its habitat as "Maryland to Florida, Tennessee and Louisiana." Among the scientific papers contained in the Thirteenth Annual Report of the Missouri Botanical Garden is one on "The Yuccae," by Prof. Wm. Trelease, in which Y. filamentosa is referred to thus: "In a generalized sense, a species usually of the coastal plain of the southeastern Atlantic region, from Tampa, Fla., to above Charleston, S. C., and extending back to northwestern Georgia, west-central North Carolina, southwestern Alabama, and the gulf coast of Mississippi."

There is also a distinct species, Y. flaccida, found native from "Asheville, N. C., to Gadsden and Anniston, Ala., in and near the mountains," forms of which have been introduced into cultivation as Y. filamentosa and are probably more widely disseminated than the true filamentosa. Prof. Trelease says: "The filiferous-leaved 'bear grasses' of the southeastern United States are not easily disposed of in an attempt to monograph the genus to which they belong, partly because they are more commonly seen in cultivation than in a state of nature, partly because of their interblending characters, and partly because of generalized earlier descriptions. * * * That two species, Y. filamentosa and Y. flaccida, are separable, appears certain, * * * but I have found it possible to fix only an approximate geographical range for either, and the garden forms are not separated as sharply as is desirable, nor so as to prevent some of them from obscuring the demarkation line between the species. It is not improbable that some of them represent hybrids between

the latter." He describes several forms or varieties of both species and raises the Louisiana variety to the dignity of a species (Y. Louisianensis) of which he says: "Apparently a western derivation of the same stock as the eastern Y. filamentosa and Y. flaccida, to both of which it bears some relationship, while apparently distinct from either."

Yucca glauca (Y. angustifolia, Pursh), which is native from Iowa and South Dakota to Wyoming, south to Missouri, Texas and Arizona, and which is the

smallest of the yuccas and the most northern of the genus in its geographical distribution, is often referred to by correspondents of the region west of the Mississippi as Y. filamentosa; and no doubt many inhabitants of that region refrain from purchasing the latter most excellent garden plant because they suppose it to be identical with the species growing wild all about them. This is regrettable because the two plants are not only entirely distinct but filamentosa is in every way superior. W. N. PIKE.

Dreer's Importations of Azaleas

Our importations of Azaleas have arrived and we have commenced shipments. If you have not yet placed your orders we would advise you to do so at once, in order to secure low fall prices, as well as to take advantage of low cost of transportation while shipments can still be made by freight.

We are in position to give you best qualities because our growers are among the most skilled specialists in Belgium. We can give you best values because we are not only the most extensive importers of these plants to the United States, but also because we buy for cash at best prices and give our customers the benefit of these important points.

10 to 12-inch crowns, bushy plants.....	\$4.50 per dozen	\$35.00 per 100
12 to 14-inch crowns, bushy plants.....	6.00 per dozen	45.00 per 100
14 to 16-inch crowns, bushy plants.....	7.50 per dozen	55.00 per 100
16 to 18-inch crowns, bushy plants.....	12.00 per dozen	90.00 per 100
18 to 20-inch crowns, bushy plants.....	25.00 per dozen	200.00 per 100
20 to 24-inch crowns, bushy plants.....	36.00 per dozen	300.00 per 100

We can still include in assorted lots ten per cent Mme. Van der Cruyssen, this variety being very scarce this season.

EXCEPTIONAL VALUES IN ARAUCARIA EXCELSA

The two sizes of Araucaria Excelsa offered below are the greatest values we have ever offered in this plant and you will make a mistake if you don't secure a supply for your Holiday trade:

6-inch pots, 20 to 24 inches high, 4 tiers.....	\$1.00 each
6-inch pots, 24 to 28 inches high, 4 to 5 tiers.....	1.25 each
7-inch pots, 30 to 32 inches high, 5 to 6 tiers.....	1.50 each

RUBBER PLANT—FICUS ELASTICA.

An exceptionally fine lot of 5-inch pots, plants well furnished, fifteen inches high, \$4.50 per dozen; \$35.00 per 100.

For a full and most complete line of Palms, Ferns and all Decorative Plants, see our QUARTERLY WHOLESAL LIST.

Hardy Perennial Plants, Paeonias, Phloxes, etc., etc., are one of our important specialties. We are carrying an immense stock of these popular plants. Write us for anything you may require in this line.

OUR PASTIMES.

Announcements of coming contests or other events of interest to our bowling, shooting and sporting readers are solicited and will be given place in this column.

Address all correspondence for this department to Wm. J. Stewart, 79 Milk St., Boston, Mass.; Robt. Kift, 1725 Chestnut St., Philadelphia, Pa.; or to the American Florist Co., 324 Dearborn St., Chicago, Ill.

At New York.

The following are the scores made on the New York alleys on Monday, October 27:

Player	1st	2d	3d	4th	5th
Hansen	157	139	143	148	132
Mansfield	162	165	177	164	190
Lang	164	169	175	192	234
Siebrocht	142	151	138	200	204
Treadly	113	129	122	99	
Shaw	103	101	122		

At Chicago.

The Chicago bowlers have decided to begin the season's campaign next Tuesday evening and have selected a set of splendid alleys at 775 West Madison street. There will be weekly meetings, four teams rolling together, one representing the wholesalers, another the retailers, one McKellar & Winterson and one Vaughan's Seed Store. The alleys were inspected last Sunday. They are all that could be desired, are kept clean and the proprietors made a good offer to the prize fund; besides, they set up a nice little lunch every night.

Cleveland.

MEMBERS WIVES SUPPLY A SURPRISE FOR CLUB MEETING.—SUPPER AND BOWLING.—TRADE FAIR BUT STOCK ACCUMULATING.—A VARIETY OF PERSONAL AND OTHER NOTES.

The Florists' Club held its regular meeting on Monday night and was treated to a number not down on the programme. This was in the nature of a pleasant surprise party gotten up by a number of the members' wives. The meeting had only adjourned and bowling commenced when a lot of white robed masked figures suddenly made their appearance in the club room. Hung around the neck of the foremost figure was a large placard on which was printed the invitation, "Take your pick." The members were not slow in responding to the invitation and were conducted by their ghost-like partners to the supper hall, where a delightful repast awaited them. When all were seated the masks and ghostly apparel were discarded and a right jolly good time followed. Mrs. H. A. Hart, Mrs. A. Schmitt and Mrs. A. Graham and that prince of good fellows, Charlie Gibson, were the chief conspirators in getting up the delightful affair. The members of the club were taken entirely by surprise, for no word or sign had they of what was going to take place. President Gray, in a neat little speech, thanked the ladies for the very pleasant entertainment, and Mrs. Hart replied on behalf of the ladies. Quite a number of those present were called upon for a few remarks. After supper all repaired to the bowling alleys, which were given over to the ladies. Mrs. Fred. Aul easily carried off the honors by rolling up 101 in six frames.

Business continues good, but owing to the continued hot spell stock is piling up in such a manner as to become unwieldy and consequently prices have suffered. Chrysanthemums are to be had in any quantity and are selling at from \$6 to \$15 per hundred, only the extra fine

blooms bringing 20 cents. Roses have suffered; \$5 will buy the pick; \$1 to \$2 is the ruling price for carnations. All other flowers are in proportion. Cosmos can be had by the wagonload. A good frost would help matters greatly.

C. H. Turner was a visitor in town this week, having returned from Redondo Beach, California. He says there is a good opening for the palm-growing business on the Pacific coast, good palms bringing almost double the price obtained in the east.

The growers in and around Cleveland are thinking seriously of starting a cut flower market on similar lines to that of Boston and Philadelphia. The project is a commendable one and ought to be encouraged.

Isaac Kennedy has decided to remain in Cleveland, having purchased a tract of land at West Park, a suburb, where a range of houses will be erected as early next spring as possible. Echo.

Toledo, O.

PROSPERITY APPARENT IN ALL THE ESTABLISHMENTS.—STOCK IN GOOD SHAPE AND CUT FLOWERS IN DEMAND.—EARLY CHRYSANTHEMUMS FARED WELL.—JOTTINGS HERE AND THERE.

The early chrysanthemum, like the early bird, is having its chance, the supply here barely keeping pace with the demand. First-class blooms retail readily at \$3 and \$4 per dozen, while \$2 seems to be the standard price for the average cut. Another week will no doubt see an abundance of the midseason or tardy ones on the market. He who claims that there is no show for the carnation and rose at this season needs but visit the stores here to disprove such an assertion. Both are much in demand, despite their temporary rival, and what is equally encouraging is the fact that the stock is improving in quality from day to day. At the Scottwood Greenhouses roses are in fine condition, not a speck of mildew or a dried leaf to be seen on any of the plants. Mr. Magee, the proprietor, has a method of growing roses which brings him sure results. Begonia Gloire de Lorraine and poinsettias are also grown successfully and from all indications there will be enough of both to go the rounds.

George Bayer's model greenhouse range is complete and in working order. Two houses 20x365 each, equipped with all the modern appliances, such as tiled benches and solid beds of the most approved construction, may indeed be regarded as models. Although planted late in September, Mr. Bayer's carnations are very promising, and such varieties as Lawson, Joost, White Cloud and Crane could not possibly be improved upon. A white seedling of his own is grown in quantity and while not a "fancy" bloom it is a valuable acquisition. His chrysanthemums are equally good, Chadwick being his favorite white, with Timothy Eaton as a close second, while Appleton and Bonaffon hold sway among the yellows.

Krueger Brothers have their carnations in the pink of condition. Triumph is still a favorite here, and no wonder. With an abundance of blooms, averaging three inches at this season of the year they can afford to "let well enough alone" and grow it so long as it behaves. The Lawson, as everywhere else, does nicely and pays well. Crane is the favorite red, while White Cloud and Flora Hill are the only whites until something better takes their place.

Mrs. E. Suder, as usual, is kept busy

with decorative work of one sort or another. A glance at her general stock proved interesting. Everything about the place shows the result of good care and good, intelligent work.

Jos. Siegrist has no complaints to make. With a good stock and bright prospects for a good season, he has joined the ranks of the optimists.

George A. Heintz is recuperating at Mt. Clemens. Everything about his establishment is in splendid condition.

Mr. Magee reports business brisk and most encouraging. NOMIS.

TRADE BRISK AND STOCK MOVING SATISFACTORILY.—GOOD MATERIAL EASILY DISPOSED OF.—PERSONAL ITEMS OF VARYING INTEREST.

The excellent condition of business keeps the market from getting overstocked. There are plenty of good chrysanthemums, but roses hold up well. The few bright and mild days have made them a little more plentiful, but with the exception of second-rate stock, they are easily disposed of. Bridesmaid and Bride are in good condition, Liberty has shortened up a bit and Balduin seems to have lost a little of its color. Carnations are improving wonderfully. Some very fine Lawson and Prosperity are on the market. Morning Glory is to be had in quantities, most of the growers having planted this variety rather extensively this season, but they move well.

Jay & Son have about completed alterations. They handle a full line of flowers and there is always enough good stock on the premises to make the place look attractive.

Chas. Tidy & Son have some fine specimen plants of *Cattleya labiata* in the window, and the store is well filled with chrysanthemums.

J. Simmons has been brightening up the exterior of his place. He has a very cosy store and takes a personal pride in having things neat.

Louis I. Vair, of Barrie, has been sending in some very good violets, both single and double, being the best I have seen so far this season.

There seems to be a scarcity of small ferns for dishes. Although there are many seedlings, they are still too small to be of use.

Geo. Hollis has been cutting some good blooms of his unnamed pink seedling chrysanthemum. H. G. D.

UTICA, N. Y.—Peter Crowe has given his own name to the fine adiantum which has hitherto been known as Bardin.

DEFIANCE, O.—Christ Winterich has just completed a large water tank on a forty-foot tower. A hot air pump furnishes power.

CHARLESTON, ILL.—The Pierson-Sefton Company, Jersey City, N. J., has been awarded the contract for the conservatory at the normal school. The cost will be about \$4,000.

BUCKLEY'S October Special

Geraniums Extra strong, rooted cuttings, well-rooted and correctly labeled. Varieties: Jean Viaud, \$2.00 per 100; S. A. Nutt, Alphonse Ricard, Beate Poitevine, E. G. Albany.

SEASON OPENS WITH GOOD TRADE BUT EFFECT OF CAMPAIGN NOW APPARENT.—WEDDING DECORATIONS.—PERSONAL.

The season opened briskly, with numerous orders for weddings and social functions. The approach of the fall election is, however, quite noticeable and a falling off in business is reported for this week. H. G. Eyres had charge of the decorations last week for the Parker-Hun wedding. The ceremony took place in St. Peter's church. The church was decorated with autumn foliage, white and yellow chrysanthemms and palms. The home of the bride, where a reception was held after the ceremony, was beautifully decorated in white and green, the material used being white and pink chrysanthemms and Asparagus plumosus.

H. G. Eyres is one of the judges of exhibits for the New York flower show now in progress in Madison Square Garden. Mr. Eyres will leave for New York on November 3.

Samuel Goldring, who retired from business in Albany about two years ago, has lately established himself at 11 S. Pearl street, where he expects to build up a good trade.

W. C. King & Company have renovated their store on North Pearl street throughout. The largest plate glass window of any florist in town is now theirs.

Whittle Brothers have stocked four new houses, each 150 feet in length, with Sunrise, Pres. Carnot, Bride and Bridesmaid roses. D.

Houston, Tex.

W. W. Westgate has returned from Seattle, where he has been since the great September storm which damaged his place so severely. He has bought an interest in the Houston Nursery Company and the name has been changed to the Houston Seed and Nursery Company. S. T. Middleton continues as secretary and treasurer while Mr. Westgate becomes president and general manager. They will do a general plant, seed and nursery business and may add cut flowers later. Mr. Westgate's mother was in the retail flower business here for many years. She died about a year ago. Word reached here last week that L. D. False, who was also in the business here some time ago, died suddenly of heart disease while walking on the street at Raywood, Tex.

ROSES A GREAT GLUT.—THREE-FOURTHS RECEIPTS IMMOVABLE.—GOOD CHRYSANTHEMUMS FROM INDIANA.

Such a glut of roses as we experienced the past week has never been known in this market. With bright, warm weather, not much business and roses coming in by the thousands, it is pretty hard to move one-fourth of the stock received. To add to the misery some of the Fourth street retailers are said to have received boxes of roses from Chicago free of all charges, which is not at all encouraging for the local wholesalers. The weather, however, changed yesterday and it is dark and gloomy and growing cooler. We all hope that it will continue so for several days, to shorten the supply.

The E. G. Hill Company is shipping some very good chrysanthemums to this market. They sell well but at about twenty per cent decrease in price from last year; \$2.50 per dozen is about the limit this season. This firm also had a fine chrysanthemum before the committee last Saturday, called Mlle. Marie Liger. It is an immense pink on a good stem and will do for either commercial or exhibition purposes.

D.

Minneapolis.

STOCK NOW EQUAL TO ALL DEMANDS.—TEA ROSES MOVE SLOWLY.—WHITE CARNATIONS WANTED.—VARIOUS TRADE NOTES.

The weather has been somewhat unfavorable for social functions and so trade has continued along at the usual pace. Flowers are sufficient to meet demands. Roses, especially, have been very plentiful, although Meteor and Liberty are still limited. Beauties of good quality can be secured at all times. White carnations are much called for and the price is a little higher than for colors. Violets appear on the market in goodly numbers. Major Bonnaffon and white and pink Ivory are the chrysanthemums most frequently seen. Last week there was a shortage, but the cut is increasing so that supply will soon be heavy. The Ivory rose is observed in market.

John Monson, of the Minneapolis Floral Company, is cutting large quantities of Meteor and Liberty with short stems, which find ready sale on the Greeks' stands.

A. S. Rice has returned from Chicago and is on the sick list for a few days.

Jas. Lynes, of the New Store, reports trade to be improving steadily.

The Model Extension Carnation Support.

Flushing, Long Island, Dec. 11th, 1901.

MR. THERON N. PARKER, Brooklyn, N. Y.

Dear Sir:—I have used your Wire Carnation Support the last two years, in all about 12,000. They fill the bill in every particular. Nothing could be more satisfactory and would give me a great deal of pleasure if I can bespeak a good word for you to the trade and you are at liberty to refer to me at any time.

Very truly,
A. L. THORNE,
La Fayette, Ind.,
July 8th, 1902.

MR. THERON N. PARKER,
Harrison, N. J.

Dear Sir:—After using your Model Carnation Support in two of our houses the past winter, we have come to the conclusion that it is perfectly adapted to supporting carnations, and shall use them on all our plants the coming season.

We were much pleased with the simplicity, strength and neat appearance of the support.

Yours truly

Richmond, Ind.

CLUB NOW MEETS AT VARIOUS GREENHOUSE ESTABLISHMENTS.—INTEREST FOSTERED.—SHOWS PLANNED.—NOTES OF DOINGS OF THE GROWERS.—PERSONAL AND TRADE MATTERS.

The Richmond Florists' Club met in regular session October 19, every floral establishment in the city being represented. The meeting was at the greenhouses of Chessman & Schepman, the club having decided that the future meetings shall be at some one of the greenhouses, and if this meeting was a criterion, it was an excellent move. The club contemplates holding a carnation show locally some time this season and also the holding of a chrysanthemum show one year from now. Committees were appointed. Adjournment was taken to the greenhouses of the E. G. Hill Company, on the evening of November 21, when the election of officers will take place. After adjournment cigars and pipes and several decks of cards were forthcoming and the boys enjoyed themselves in a social way till a late hour, all agreeing that it was a decided improvement in the manner of holding the meetings.

At Fulle Brothers' the boys are excavating a pit in which to place the new boiler, which they found it necessary to put in. This and other repairs have kept them so constantly employed that they have not given their stock as much time as they would have liked, but from now on they will be able to bring it up to its usual good form.

On Wednesday, October 8, Benj. H. Schroeder and Miss Irene Smithmeyer were married at St. Andrews Church, which had been beautifully decorated. The groom is a very successful grower and is foreman for Chessman & Schepman.

G. R. Gause & Company have some fine Beauty and Liberty and a bench of Ethel Crocker carnation that were certainly fine enough for anyone.

Chessman & Schepman, have the old Beach place in good shape. There is a marked improvement in the quality as well as the quantity grown.

E. G. Hill & Company have a novelty in a pink chrysanthemum, Mlle. Marie Liger, that we can all take our hats off to.

At the Gift Floral Company's the visitor finds a well kept place and stock in good condition.

E. T. Grave has some Eaton that would be hard to excel, and their Appleton is immense. H. C. C.

GRAND RAPIDS, MICH.—Crabb & Hunter are preparing to build three Beauty houses 30x300 on their newly acquired property.

LAFAYETTE, IND.—H. Roth now has a range of seven houses and is planning to erect three more in the spring. He grows a general stock for retail trade.

Bargains FOR Florists.

We are headquarters for a general assortment of the necessary material and supplies that you are looking for. If you are about to improve or construct, consult us.

In connection with the dismantling of the Pan-American Exposition, we have for sale:

20,000,000 FEET of fine seasoned lumber, practically new, consisting of all sizes of joists, timbers, dressed and matched boards and flooring; also sash and doors.

50,000 FEET of roofing glass,

PIPE.

We are headquarters for pipe. We offer you:

100,000 FEET of 2 to 4-inch wrought iron, lap welded casing. We can furnish this material in three ways: Either with sleeve or jacket couplings, screwed ends and threaded couplings or with expanded cast iron flanges with bolts and nuts.

1,000 000 FEET of standard black wrought iron pipe, size $\frac{3}{8}$ to 12-inch. It is second-hand but has new threads and couplings and is in first-class condition.

1,000 TONS of galvanized wire 9, 10, 11, 12, 13, 14 and 15 gauge.

50,000 FEET of 2, 3 and 4-inch cast-iron soil pipe and fittings.

100,000 FEET of garden hose, $\frac{3}{4}$ and 1-in. 75,000 FEET of cotton rubber-lined fire-hose, (rubber-lined in and outside), ranging in sizes 1 to 2 $\frac{1}{2}$ -inch.

VALVES and fittings of every kind.

BOX COILS for heating purposes.

RADIATORS, new and second-hand.

We also offer the following bargains in

Heating Boilers

50 CAST-IRON sectional heaters, capacity from 450 to 5,000 feet.

1 NO. 2 Standard Kroeschell hot water heating boiler.

FOUR 36x10 Horizontal Tubular.

FOUR 36x12 Horizontal Tubular.

FIVE 42x10 Horizontal Tubular.

FIVE 42x12 Horizontal Tubular.

SIX 48x14 Horizontal Tubular.

TWO 54x16 Horizontal Tubular.

FOUR 60x16 Horizontal Tubular complete with all fittings.

PUMPS of all Descriptions.

A carload of shovels and spades that we are selling at \$5.00 per dozen.

We carry a complete stock of hardware and farm implements, besides plumbing material of every kind.

Write for Catalogue No. 47.

Chicago House Wrecking Co., W. 35th and IRON STS., CHICAGO, ILL.

New Bedford, Mass.

FROSTS CUT DOWN OUTDOOR STOCK.—FLO-
RISTS ARE GAINERS.—MUCH FUNERAL
WORK.—DEPARTMENT STORES DO PLANT
BUSINESS.

We have had several sharp frosts the
past week and all vegetation is now
brown or black. People who have been
getting along with dahlias, cosmos and
zinnias will now pay the flower stores
and greenhouses a visit in search of some-
thing else in the flower line. Business in
funeral flowers has been booming the
past ten days and the stores have been
crowded with orders. The sale of chrys-
anthemums has also been extra good.
Three of the four stores buy all their
flowers and they have had to send out of
town for a large part of their supply
lately.

The department stores sell more rose
bushes, rubber plants and ferns than all
the florists together. They sell good rose
bushes for 10 cents each.

The coal situation is improving. Hard
coal is \$10, soft coal \$7, with a prospect
of further decline. A. B. H.

Newport, R. I.

NO CHRYSANTHEMUM SHOW HERE THIS
FALL.—COTTAGERS AWAY.—VARIOUS
NOTES OF INTEREST.

The Newport Horticultural Society
will not hold a chrysanthemum exhibi-
tion this fall. The gardeners at the cot-
tages, whose productions have in the
past reached the highest standard, have
not grown chrysanthemums to any
extent because their employers are not
here for the exhibitions; besides chrysan-
themums are not so much sought after
here nowadays as formerly. In fact, it is
doubtful whether this society will again
hold another such show.

There has been a controversy in our
newspaper as to the originator of the
Katharine Duer dahlia. The late Wm.
Allan, for thirty years gardener for W. R.
Travers, was the original owner, grower
and namer of this dahlia, and his son, W.
Allan, is still gardener on the same
grounds.

Hard coal is offered at \$12 per ton but
not much of it. C. J. M.

ATCO, N. J.—The dahlia season came
practically to an end on the night of
October 21, when frost cut down the
stock. The Peacock place turned out not
far from 25,000 blooms a day for the
week or ten days before the frost.

THE EXHIBITIONS.

Kansas City, Mo.

The second annual flower show was ushered in with a blaze of flowers, flags and festoons. Convention Hall is a thing of beauty once seen never to be forgotten. Upon entering the hall one is confronted with two large pyramids of *Salvia splendens*, gorgeous in all their glory of brilliant scarlet flowers. These pyramids are twenty-five feet high by sixteen feet wide. At the base of each huge bank of chrysanthemums add a majestic and imposing appearance. On the top of each pyramid is clustered a large ball of incandescent lights, while tiny electric globes by the thousands are cunningly interwoven among the foliage and flowers. One can easily imagine the brilliant effect these produce.

The ceiling is all festooned with garlands of southern smilax and ropes of electric lights. Two large American flags, 20x40 feet, composed of 800 incandescent lights in each, are fastened horizontally to the rafters. Six flags 18x40 feet are stretched fan shape against the walls, while 400 small flags 6x10 gracefully festoon the balcony rail; 1700 yards of bunting is also used in the decorations. It required 140 cases of smilax and two carloads of evergreens to do this work.

Passing between the pyramids one's attention is attracted, at the far end of the hall, by an exact reproduction on canvas of Mount Vernon, the home of George Washington. This canvas is forty wide by 100 feet long. In front of this and on either side of the stage are two handsome booths or summerhouses. On the main floor directly underneath these and occupying about one-third of the entire floor space is a counterpart of the famous flower garden of Mount Vernon, hedge and all included. The hedge and the borders around the beds are made of pine branches. The beds are all filled with pot chrysanthemums and other plants.

To heighten the effect and to carry out the historic idea a large number of palms and other plants were contributed by the White House conservatories. This idea was capitally carried out. It is wonderful the amount of work accomplished by Mr. Taggart and Mr. Thorpe. The people of Kansas City may well be proud of their display.

The competition for the premium of \$400 for American Beauties did not bring out the entries it deserved. Only four parties exhibited. The first prize of \$150 went to Peter Reinberg, Chicago; second went to Bentley & Company, Chicago and New Castle; third went to the South Park Floral Company, New Castle, and fourth was awarded to Reinberg & Weiland, New Castle. The vases of bloom were magnificent.

The competition for the best vase of 100 chrysanthemums was close, there being four splendid entries. The E. G. Hill Company, Richmond, Ind., won first prize of \$75 for a vase of Mlle. Marie Liger. H. W. Buckbee, Rockford, Ill., was second with Col. Appleton, while third prize went to W. J. & M. S. Vesey, Fort Wayne, Ind., also for Col. D. Appleton.

The whole display of cut blooms is exceedingly fine. The plant display, while not large, is very select. Some well grown decorative plants were also exhibited. Pierson's exhibit of *Nephrolepis* Piersoni and Dreer's display of *Pandanus Sanderi* came in for a large amount of admiration. Among the trade visitors Vaughan's *Acalypha bicolor compacta* was thought to be a decided acquisition. The judging of cut flowers fell largely upon the shoulders of E. A. Kanst, of Chicago, and too much credit cannot be given him for the impartial manner in which this duty was performed. The plants were judged by Mr. Kanst, Elmer D. Smith and James Hartshorne. It was midnight on the opening day before this duty was completed.

The display of carnations the second day was very good but not quite up to the standard of last year. The J. D. Thompson Carnation Co., Joliet, Ill., captured the principal prizes. Their vase of *Enchantress* was the most beautiful exhibit in the carnation line in the hall. The Chicago Carnation Company and W. J. & M. S. Vesey contributed largely to the exhibit of these charming flowers. The judges on the second day's exhibits were E. A. Kanst and Isaac Kennedy. The chrysanthemum contests in special classes A, B, C, D and I were very close; some magnificent flowers were exhibited.

The rose display was of remarkable

quality although not so many entries materialized as had been anticipated. Peter Reinberg's Liberty were fine. The most striking feature of the day was the display for the big special prize for collections of roses, not less than twelve varieties, the South Park Floral Company winning over the Rock Heite Company. Samuel Murray's display for the special prize for Kansas City Star chrysanthemum plants and flowers was laid out in the form of a star and was very effective. It was composed of potted plants.

One of the leading features of Thursday's exhibition was a vase of the new rose, Franz Deegen, exhibited by the South Park Floral Company. This new rose will be disseminated in 1903. It is a beautiful golden yellow, shading to orange in the center. The bud is long and pointed, with strong stiff stem and fine foliage.

On Thursday evening a banquet was tendered John Thorpe, at the Coates House, when that venerable and popular manager was presented with a gold watch, F. J. Taggart making the speech and H. W. Buckbee serving as toastmaster. Among those who responded were Elmer D. Smith, Herbert Heller and Fred. Lemon.

The competition on Friday was keen on seedling chrysanthemums and the judging late.

Gold medals were awarded to H. A. Dreer, for *Pandanus Sanderi*; to F. R. Pierson Co., for *Nephrolepis Piersoni*; to Vaughan's Seed Store, for *Acalypha bicolor compacta*; to South Park Floral Co., for *Rose Franz Deegen*.

The attendance early in the week was somewhat disappointing to a sanguine

management, but by the middle of the week the crowds were enormous, fully up to last year.

Following are the awards:

CHRYSANTHEMUM PLANTS.

One bush plant, white, first, Samuel Murray, Kansas City, with Ivory; second, H. W. Buckbee, Rockford, Ill.; third, Rock Heite Co., Kansas City.

One bush plant, yellow, first, Rock Heite Co., with Golden Trophy; second, Samuel Murray; third, H. W. Buckbee.

One bush plant, pink, first, Rock Heite Co., with Louis Boehmer; second, H. W. Buckbee; third, Samuel Murray.

One bush plant, red, first, Samuel Murray, with Geo. W. Childs; second, H. W. Buckbee; third, Vaughan's Seed Store, Chicago.

One bush plant "any other color," first, H. W. Buckbee, with T. Carrington; second, Samuel Murray.

One standard, white, not less than 18-inch stem, first, Vaughan's Seed Store, with Miss May Foster; second, Samuel Murray; third, H. W. Buckbee.

One standard, yellow, first, Vaughan's Seed Store, with Mrs. T. L. Park; second, Rock Heite Co.; third, Samuel Murray.

One standard, pink, first, H. W. Buckbee, with S. T. Murdock; second, Vaughan's Seed Store.

One standard, red, first, Vaughan's Seed Store, with G. W. Childs.

One standard, "any other color," first, H. W. Buckbee, with Mrs. Geo. Magee.

Six bush plants, six varieties, first, Samuel Murray; second, H. W. Buckbee.

Grafted plant, first, Vaughan's Seed Store; second, Robt. Mueller, Chicago; third, Rock Heite Co.

Group to occupy fifty square feet, first,

Samuel Murray; second, Vaughan's Seed Store; third, Rock Heite Co.

Group of pompons, first, Samuel Murray; second, Vaughan's Seed Store.

Group of single and anemone-flowered, first, Samuel Murray; second, Vaughan's Seed Store.

Two plants with twined stems, first, Vaughan's Seed Store; second, W. L. Rock, Kansas City.

Largest plant with smallest flowers, first, Vaughan's Seed Store.

Single flowered variety, one plant, first, Vaughan's Seed Store.

Thirty plants, single-stemmed, white, first, H. W. Buckbee; second, Vaughan's Seed Store.

Thirty plants, yellow, single-stemmed, first, Vaughan's Seed Store; second, Samuel Murray.

Thirty plants, single-stemmed, four colors or more, first, Vaughan's Seed Store.

MISCELLANEOUS PLANTS.

Fifteen carnation plants in pots, white, first, Samuel Murray.

Six distinct species in flower, first, Samuel Murray.

Twenty-five plants *Begonia Gloire de Lorraine*, first, Vaughan's Seed Store.

Ten plants scarlet *salvia*, first, Samuel Murray.

Ten zonal geraniums, first, Samuel Murray.

Six cosmos, no first or second; third, Samuel Murray.

Group of crotons, first, W. L. Rock.

Six *araucarias*, first, Samuel Murray; second, W. L. Rock.

Six *kentias*, first, W. L. Rock.

Six Boston ferns, first, Samuel Murray; second, W. L. Rock; third, A. F. Barbe, Kansas City.

Twenty-five ferns of one species, first, A. F. Barbe.

Two *Asparagus Sprengeri*, first, W. L. Rock.

Two plants grafted, first, Robert Mueller.

Group of begonias, first, Samuel Murray.

Group of palms to occupy 100 square feet, first, W. L. Rock; second, Samuel Murray; third, A. F. Barbe.

Group of decorative plants, 100 square feet, other than palms, first, Samuel Murray; second, W. L. Rock.

CHRYSANTHEMUM BLOOMS.

Twenty-five blooms, one variety, white, first, E. T. Grave, Richmond, Ind.; with Timothy Eaton; second, Nathan Smith & Son, Adrian, Mich., with Mrs. F. A. Constable; third, Samuel Murray. Six entries.

Twenty-five blooms, yellow, first, W. J. & M. S. Vesey, Fort Wayne, Ind., with Col. Appleton; second, H. W. Buckbee; third, E. G. Hill Co., Richmond, Ind. Twelve entries.

Twenty-five blooms pink, first, Chicago Carnation Co., Joliet, Ill., with Vivian-Morel; second, H. Weber & Sons, Oakland, Md.; third, H. W. Buckbee. Six entries.

Twenty-five blooms, red, first, Nathan Smith & Son, with Geo. W. Childs; second, H. W. Buckbee; third, E. G. Hill Co. Six entries.

Twenty-five blooms, "any other color," first, H. W. Buckbee, with T. Carrington; second, Nathan Smith & Son; third, E. G. Hill Co. Four entries.

Twenty-five blooms, one variety, reflexed, first, E. G. Hill Co., with Yanariva; second, Chicago Carnation Co.; third, H. W. Buckbee. Four entries.

Twenty-five blooms, one variety, incurved, first, Nathan Smith & Son, with Pennsylvania; second, Gunnar Teil-

marn, Marion, Ind.; third, H. W. Buckbee. Four entries.

Six blooms, one variety, white, first, Nathan Smith & Son, with Alice Byron; second, Samuel Murray; third, E. T. Grave. Eight entries.

Six blooms yellow, first, E. G. Hill Co., with Col. Appleton; second, H. W. Buckbee; third, W. J. & M. S. Vesey. Nine entries.

Six blooms, pink, first, E. G. Hill Co., with Mrs. Chamberlain; second, Nathan Smith & Son; third, H. W. Buckbee. Nine entries.

Six blooms red, first, E. G. Hill Co., with G. W. Childs; second, Chicago Carnation Co.; third, H. W. Buckbee. Five entries.

Six blooms, "any other color," first, H. W. Buckbee, with Kate Broomhead; second, A. P. Barbe; third, Nathan Smith & Son. Six entries.

Six blooms, one variety, reflexed, first, H. W. Buckbee, with Mrs. Coombs; second, Vaughan's Seed Store; third, Nathan Smith & Son. Six entries.

Six blooms incurved, first, E. G. Hill Co., with Col. Appleton; second, Nathan Smith & Son; third, Vaughan's Seed Store. Seven entries.

Collection pompons, not less than ten varieties, first, Nathan Smith & Son; second, Vaughan's Seed Store.

Twelve anemones, first, Nathan Smith & Son.

One hundred blooms any one variety, first, E. G. Hill Co., with Mlle. Marie Liger; second, H. W. Buckbee, with Col. Appleton; third, W. J. & M. S. Vesey with Col. Appleton. Four entries.

Ninety-six varieties shown on mossed boards, first, Nathan Smith & Son; second, E. G. Hill Co.; third, H. W. Buckbee.

Seventy-two varieties on mossed boards, first, E. G. Hill Co., second, Nathan Smith & Son; third, H. W. Buckbee.

Forty-eight varieties on mossed boards, first, Nathan Smith & Son; second, H. W. Buckbee; third, Gunnar Teilmann, Marion, Ind.

Thirty-six varieties shown on boards, first, Nathan Smith & Son; second, E. G. Hill Co.; third, Gunnar Teilmann.

Twenty-four varieties shown on boards, first, H. Weber & Sons; second, Samuel Murray.

Twenty-four varieties, reflexed, shown on boards, first, Nathan Smith & Son; second, E. G. Hill Co.

Twelve varieties, reflexed, shown on boards, first, Nathan Smith & Son; second, E. G. Hill Co.; third, H. W. Buckbee; fourth, Samuel Murray.

Twenty-four varieties, incurved, shown on boards, first, E. G. Hill Co.; second, Nathan Smith & Son; third, H. W. Buckbee.

Twelve varieties, incurved, first, E. G. Hill Co.; second, Nathan Smith & Son; third, H. Weber & Sons; fourth, H. W. Buckbee.

Eighteen flowers, Boehmer type, first, H. W. Buckbee; second, Nathan Smith & Son.

Twelve flowers, Boehmer type, first, Nathan Smith & Son; second, H. W. Buckbee.

CARNATIONS.

Fifty blooms Flora Hill, first, Peter Reinberg, Chicago; second, H. W. Buckbee.

Fifty blooms White Cloud, first W. J. & M. S. Vesey; second, H. W. Buckbee; third, Peter Reinberg.

Fifty blooms Lorna, first, J. D. Thompson Carnation Co., Joliet, Ill.

Fifty blooms Norway, first, H. Weber & Sons; second, Chicago Carnation Co., third, Peter Reinberg.

Fifty blooms "any other white," first, J. D. Thompson Carnation Co.; second, H. Weber & Sons; third, W. J. & M. S. Vesey.

Fifty blooms America, first, H. W. Buckbee; second, Peter Reinberg.

Fifty blooms Crane, first, W. J. & M. S. Vesey; second, J. D. Thompson Carnation Co.; third, Gunnar Teilmann.

Fifty blooms "any other red," first, J. D. Thompson Carnation Co.; second, Chicago Carnation Co.; third, Peter Reinberg.

Fifty blooms Roosevelt, first, J. D. Thompson Carnation Co.; second, W. J. & M. S. Vesey.

Fifty blooms any other crimson, first, J. D. Thompson Carnation Co.; second, W. J. & M. S. Vesey.

Fifty blooms Marquis, first, J. D. Thompson Carnation Co.; second, Peter Reinberg; third, W. J. & M. S. Vesey.

Fifty blooms Lawson, first, J. D. Thompson Carnation Co.; second, H. W. Buckbee; third, W. J. & M. S. Vesey.

Fifty blooms Dorothy, first, E. T. Grave, Richmond, Ind.; second, W. J. & M. S. Vesey; third, Peter Reinberg.

Fifty blooms Morning Glory, first, J. D. Thompson Carnation Co.; second, Peter Reinberg; third, W. J. & M. S. Vesey.

Fifty blooms dark pink, first, J. D. Thompson Carnation Co.; second, Peter Reinberg; third, W. J. & M. S. Vesey.

Fifty blooms light pink, first, Chicago Carnation Co.; second, Peter Reinberg.

Fifty blooms Mrs. Bradt, first, W. J. & M. S. Vesey.

Fifty blooms Prosperity, first, J. D. Thompson Carnation Co.; second, Chi-

icago Carnation Co.; third, Peter Reinberg.

Fifty blooms "any other variegated," first, J. D. Thompson Carnation Co.; second, W. J. & M. S. Vesey.

Fifty blooms yellow, first, J. D. Thompson Carnation Co.

Twenty-five blooms white of 1902, first, H. W. Buckbee; second, J. D. Thompson Carnation Co.; third, W. J. & M. S. Vesey.

Twenty-five blooms dark pink of 1902, first, W. J. & M. S. Vesey.

Twenty-five blooms flesh color, first, Chicago Carnation Co.

Twenty-five blooms of light pink of 1902, first, Chicago Carnation Co.; second, H. W. Buckbee; third, E. T. Grave.

Twenty-five blooms red of 1902, first, Chicago Carnation Co.; second, J. D. Thompson Carnation Co.; third, H. W. Buckbee.

Twenty-five blooms any color of 1902, first, W. J. & M. S. Vesey; second, H. W. Buckbee.

ROSES.

One hundred Beauties, first, Peter Reinberg, Chicago; second, Benthey & Co.; third, South Park Floral Co.; fourth, Reinberg & Weiland.

Twenty-five Beauties, first, Peter Reinberg; second, Benthey & Co.; third, Reinberg & Weiland.

Forty Kaiserin, first, Peter Reinberg.

Forty Bride, first, Benthey & Co.; second, Reinberg & Weiland; third, W. J. & M. S. Vesey.

Forty Bridesmaid, first, Benthey & Co.; second, Peter Reinberg; third, Reinberg & Weiland.

Forty Meteor, first, W. J. & M. S. Vesey.

Forty Perle, first, Peter Reinberg; second, H. W. Buckbee.

Forty Golden Gate, first, H. W. Buck-

twelve varieties, first, South Park Floral Co., New Castle.

MISCELLANEOUS AWARDS.

The dinner table decorations were for two days, Thursday and Saturday. The first day the premiums were awarded in the following order: First, Samuel Murray; second, Rock Heite Co.; third, John Mangel, Chicago; fourth, L. P. Walz, Chicago.

Yellow flowers, ten vases, first, Samuel Murray.

Yellow chrysanthemums, not less than fifty, first, E. G. Hill Co.

Yellow roses, variety not heretofore exhibited, first premium to South Park Floral Co., for Rose Franz Deegan.

Yellow carnations, not less than fifty, first, J. D. Thompson Carnation Co.

Yellow roses, not less than fifty, first, Peter Reinberg.

VISITORS.

Among the trade visitors present were E. A. Kanst, Leonard Kill, Arnold Ringier, J. S. Wilson, C. W. Scott, W. N. Rudd, L. Coatsworth, Lee Walz and Philip Foley, Chicago; John Bertermann, Indianapolis; Herbert Heller, New Castle, Ind.; Mr. and Mrs. J. M. Gasser and Isaac Kennedy, Cleveland; J. D. Thompson, J. E. Jensen and James Hartshorne, Joliet, Ill.; H. Weber, Oakland, Md.; Mr. and Mrs. Fred. Lemon and E. T. Grave, Richmond, Ind.; Elmer D. Smith, Adrian, Mich.; Gunnar Teilmann, Marion, Ind.; J. R. Fotheringham, Tarrytown, N. Y.; F. W. Creighton, Philadelphia; Mrs. Richard Morrison, Decatur, Ind.; Miss Meinhardt, St. Louis, Mo.; George Swoboda, Omaha; Mr. and Mrs. H. W. Buckbee and C. W. Johnson, Rockford, Ill.; M. Stauch, Council Bluffs, Ia.; Christian Jensen, Topeka, Kan.; C. W. Stiles, Oklahoma City, Okla.; Mrs. M. S. Vesey,

New York.

The close of the Madison Square Garden exhibition came on Thursday night, November 6. The great exhibition was still in presentable shape, notwithstanding its long continuance, the cut flower exhibits having been renewed and added to daily so that, the impression of freshness remained until the end and the plants holding up well as a rule, under the trying conditions of the unaccustomed atmosphere. It is to be expected, though, that many of the stove plants will show the effect of their exposure for many months and it is a question if it would not be much wiser and more fair to exhibitors of such things to limit the continuance of a show to four days, at the outside.

While adding greatly to the effectiveness and finish of the affair, it appears that the statuary annex did not bring to the show the expected support, which is a disappointment to all concerned. The officials for the New York Florists' Club and the Garden management did faithful work from beginning to end. The veteran press agent, Mr. Chamberlain, did everything that could be done in the face of an exciting political campaign and election that occupied most of the space in the daily papers, as well as most of the attention of the public, and the programme designed by Manager Bunyard was a work of art throughout, for which the little Japanese saleswomen found many appreciative buyers.

The prize schedule was a long one and the report on awards will undoubtedly be considered more readable if condensed somewhat. In the classes for decorative foliage plants the exhibits were grand, comprising many stately specimens. For big group covering 400 square feet Julius Roehrs was first and Siebrecht & Son second. Roehrs was also first on small table of foliage plants, on six palms, pair of tree ferns, basket of Lorraine begonias, pair of pyramid bays, and second on specimen kentia, areca, nephrolepis and phoenix. Siebrecht was first on specimen kentia. A. Schultheis was first on group covering 200 square feet and second on small group. J. H. Troy was first on group of bamboos and second on latania specimen, David Clarke's Sons first on rhaps, D. O'Mara on ficus, F. Wienberg on group of cacti and Wm. Brenneke on group of geraniums, and this about covered the participation of the commercial men in the plant premiums, the private gardeners getting the balance. D. Willis James, Wm. Duckham, gardener, won four firsts with superb groups. S. Untermeyer, W. H. Waite, gardener, won four firsts and seven seconds, Mrs. Cnas. Pratt, Otto Manda, gardener, one each first and second and E. D. Adams, G. H. Hale, gardener, three firsts.

The orchid classes brought out exceedingly fine groups, Roehrs being first for group of orchids and foliage plants covering 150 square feet, and Siebrecht second. Lager & Hurrell were first and Siebrecht second for largest and most varied display and Siebrecht first on *Cattleya labiata* and *Oncidium varicosum* Rogersii. The display of specimen conifers and broadleaved evergreens from Bobbink & Atkins was one of the most comprehensive and effective ever shown in this country and added materially to the general effectiveness of the entire exhibition. They took six first prizes in this class. Chrysanthemums in pots were limited to a few specimens from J. Crosby Brown, Peter Duff, gardener, and Wm. Rockefeller, George Middleton, gardener.

PETER REINBERG'S \$150 PREMIUM VASE OF AM. BEAUTIES AT KANSAS CITY.

Photo by Davidson.

bee; second, Peter Reinberg; third, W. J. & M. S. Vesey.

Twenty-five Ivory, first, Peter Reinberg; second, H. W. Buckbee.

Twenty-five Liberty, first, Peter Reinberg.

Twenty-five "any other variety," first, Peter Reinberg.

A vase of Sunrise shown by Peter Reinberg received honorable mention, not entered for competition.

Best display of roses, not less than

Fort Wayne, Ind.; J. P. Coen, Lexington, Mo.; S. Humfield, Muncie, Ind.; F. M. Ellis, St. Louis; Fred. E. Dorner, Lafayette, Ind.

MORRIS, ILL.—A. B. Hull has sold the property of the Morris Floral Company to Nels P. Colberg, of Ottawa, Ill., for \$6,000. Mr. Colberg took charge at once. He is an old hand at the business, having been engaged in it for nearly twenty-five years at Princeton, Ill.

A silver medal was given to H. A. Dreer for a grand group of *Pandanus Sanderi* and one to J. H. Troy for Japanese plants. The S. A. F. silver medal went to F. R. Pierson for *Nephrolepis exaltata* Pierson and the S. A. F. bronze medal to the Dale Estate for the new light pink sport from rose Mrs. Pierpont Morgan, named Canadian Queen.

Certificates of merit were given to Wadley & Smythe for *Rhapis humilis*, pair of *Ficus elastica* and pair of *Ficus Indica*, to Chas. Zeller & Son for orange trees, to J. H. Troy for collection of Japanese plants and collection of ivies, to Bobbink & Atkins for clipped boxes, to L. H. Foster for *Nephrolepis exaltata* Anna Foster, to Perry Belmont for gardenias, the Dale Estate for rose Canadian Queen, and A. Schultheis for lily of the valley. E. Jenkins received honorable mention for nymphæas.

The cut flower classes were in many cases meagerly filled. This was especially the case with the roses and seems unaccountable, as the premiums were generous and there is no scarcity of roses in the market; \$100 for 100 Beauties seems liberal, but it did not bring out a single entry. Righter & Barton won first on twenty-five Beauty, J. H. Taylor on fifty Bridesmaid and the classes of twelve each were competed for by the private gardeners only, Messrs. Jenkins, Dieterich, Stow, Rockefeller and Adams being represented as winners by their respective gardeners. The American Rose Company's prize of \$100 for fifty blooms of Ivory went to E. G. Asmus. On Wednesday Jacob Becker's La France sport, Ideal, was shown in good form and attracted much attention.

In the chrysanthemum cut blooms the display was disappointingly small but this was atoned for in the quality of the blooms shown, which was superlative in the highest degree. Nothing finer can be imagined than the specimens of such sorts as Mrs. Weeks, Timothy Eaton, Golden Wedding, Col. Appleton, Mrs. Perrin, Mrs. Robinson and Mrs. Coombs. E. J. Taylor, Rowayton Greenhouses, Weber & Sons, J. Condon and A. Schultheis were the only commercial men represented in this section and they only in limited number. H. McK. Twombly, A. Herrington, gardener, was winner of first prizes in eight classes of twelve and twenty-five each. D. Willis James, Wm. Duckham, gardener, won two firsts, also first for sixty blooms in six varieties. C. F. Dieterich, W. C. Russell, gardener, won four firsts, also first for thirty-six blooms in six varieties. Other contributors were Messrs. Rockefeller, P. A. B. Widener, Wm. Kleinheinz, gardener; E. D. Adams and M. C. D. Borden, Wm. Turner, gardener.

The carnation classes were creditably filled and the display of splendid blooms, well arranged, attracted much attention. The greatest interest centered on the J. D. Thompson Company's Enchantress, Peter Fisher's famous beauty, which won on all its entries, and S. J. Reuter's Lillian Pond. In the open classes S. J. Reuter was first with fifty Lawson and 100 white. J. Reimels was first with fifty Scott, Morning Glory, Genevieve Lord, crimson, Flora Hill, and second with fifty dark pink, light pink, Crane, and yellow. C. W. Ward was first for best general display, for fifty blooms arranged for effect, fifty dark pink and second for Lawson and Prosperity. Dailedouze Brothers were first for fifty light pink (Miss Alice Roosevelt), Gov. Roosevelt, Harry Penn, white, fifty yellow and 100 yellow. E. V. D. Snyder

THE VASE OF CARNATION ENCHANTRESS EXHIBITED AT KANSAS CITY.

was first for fifty Crane, J. H. Taylor for fifty Prosperity. The J. D. Thompson Carnation Company was first for 100 blooms of a seedling variety, Weber & Sons for fifty dark pink and fifty white and second for fifty light pink. Patten & Company were first for crimson and scarlet, and second for white and Peter Fisher first for fifty light pink and for variegated. W. L. Stow, C. F. Bertanzel, gardener, won second in the "any variety" class.

The carnation classes limited to private gardeners also brought out Messrs. Waite, Kleinheinz, Middleton, Turner, Bertanzel and Duckham with most creditable displays. David Clarke's Sons and George M. Stumpp each contributed a fine basket of chrysanthemums artistically arranged with ferns, autumn foliage, etc., but not for competition. Lehnig & Winnifield showed a group of excellent cyclamens. A set of twenty flowers, distinct varieties, of chrysanthemums from W. W. Wells, Earleswood, Surrey, England, attracted much attention on account of the fine condition in which they arrived after their voyage on the Etruria, as well as for their quality.

Lenox, Mass.

The second annual chrysanthemum show held under the auspices of the Lenox Horticultural Society took place in the new town hall October 23 and 24. It proved to be by far the most successful and beautiful exhibition ever held by that society or any other in the county. The competition in all classes was very keen, as may be judged from the fact that it took the three judges, all of whom are experts, nearly eight hours to award the prizes. The five large groups occupying the main part of the floor were all particularly attractive, flanked as they were on one side by tables containing a grand display of orchids and on the other with cut blooms of chrysanthemums which seemed to be the acme of perfection in size, color and finish. The principal exhibitors were Girard Foster, Ed. Jenkins, gardener; John Sloane, A. J. Loveless, gardener; Charles Lanier, A. H. Wingett, gardener; G. H. Morgan, John Dallas, gardener; W. D. Sloane, G. T. Phileox, gardener; G. G. Haven, R. A. Schmidt, gardener; John E. Parsons, E. Edwards, gardener; Mrs. K. Winthrop, S. Carlquist, gardener; Anson P. Stokes, E.

Lundberg, gardener. There were other exhibitors but these were the principal ones in about the order named.

The class calling for groups of chrysanthemums, arranged with other foliage plants for effect, brought out four groups, the first prize going to John Sloane, second to Wm. D. Sloane and third to Chas. Lanier. A very pretty and artistic group shown by Mr. Foster was disqualified for occupying more space than the schedule called for. The fifth was from G. H. Morgan and was not for competition. This was awarded a first-class certificate.

For three specimen chrysanthemums G. Foster was first with good plants of Mrs. Coombs, Sunderbruch and Constable, Geo. H. Morgan being second and J. E. Parsons third. For one specimen J. B. Parsons was first, with Robinson, G. H. Morgan second and G. Foster third. On specimen stove plant G. Foster was first with a tremendous Dieffenbachia magnifica, about seven feet through, W. D. Sloane second and C. Lanier third. For specimen ferns, Chas. Lanier was first with six fine plants, and G. Foster second. For pompon chrysanthemums and six grown to single stem and bloom G. Foster was first. John Sloane was first for twelve single stems. G. G. Haven was first for six bush plants.

For group of twelve flowering plants other than chrysanthemums, Chas. Lanier was first. Shown in this group was a magnificent cosmos, which attracted much attention, and which the judges were pleased to honor with a certificate of merit. The display of orchids was exceptionally fine and the original and

filled and the competition exceedingly close. G. Foster and J. Sloane were the principal exhibitors and both staged a grand lot of flowers, most of them seeming to be done to perfection. Particularly noticeable were the Peter Kay and Mrs. Bruant from J. Sloane, while Mrs. Robinson, Rustique, Mme. Carnot, Carrington and others from G. Foster were simply grand. H. J. Jones was shown by all exhibitors who showed reds and most of them were very fine and seemed to prove that this variety has no rival in its color. Col. Appleton was shown by several but not in quite such good form as we have seen it. It seemed to have too many petals, which marred the center of the blooms to some extent. The exhibitors of cut flowers were G. Foster, J. Sloane, G. G. Haven, A. P. Stokes and C. Lanier, who took prizes in the order named.

Though early in the season, a fine lot of roses were shown in their classes, the vases of Beauties, Carnots and Kaiserins being particularly striking. Excellent Brides were also shown by J. Sloane. The new Baldwin did not show up strongly in comparison with some of the older varieties but we will hope it will do better later, for it is a handsome rose. The exhibitors in the rose classes were J. Sloane, G. Foster, Chas. Lanier and W. D. Sloane. Carnations were shown plentifully and of very good quality for this season of the year. Lawson showed up well, also Crane, Roosevelt, Manley and others. Prize winners in these classes were the same as those showing in the rose classes, with the addition of

G. G. Haven, Mrs. R. Winthrop and A. P. Stokes.

J. E. Parsons, G. H. Morgan, Mrs. Winthrop, Eden Hill Farm, G. Foster, and W. D. Sloane staged a fine display of violets, dividing the honors between them. The varieties shown were Marie Louise, Campbell and Princess of Wales.

The vegetable and fruit classes occupied the gallery and proved very attractive to the general public, who seemed to appreciate those things that appeal to the "inner man" as much as they did the gorgeous flowers that delighted the eye in the hall below. First for collection of vegetables was awarded to C. Lanier, second to Mrs. R. Winthrop and third to A. P. Stokes. Other prize winners in the other vegetable classes, besides the above were G. Foster, J. Sloane, M. K. Jessup, and J. E. Parsons. J. Sloane was first for collection of apples and first for pears, while Mrs. Winthrop was first for two bunches of grapes, with Muscat of Alexandria, and P. J. Donahue second. P. J. Donahue was first for outdoor grapes.

A grand display of water lilies from G. Foster attracted much notice and a beautiful deep pink seedling, raised by Mr. Jenkins and named Bellefontaine, was awarded a certificate of merit. The same exhibitor also showed a flower of Victoria regia. The new carnation Enchantress was shown by Peter Fisher, Ellis, Mass., and was accorded a vote of thanks.

The judges were Messrs. A. Herrington and Wm. Duckham, of Madison, N. J., and Wm. Anderson, South Lancaster, Mass., who spared neither time nor patience to do their part very thoroughly.

Madison, N. J.

The seventh annual exhibition of the Morris County Gardeners' and Florists' Society, which opened Thursday, November 6, at Madison, N. J., was as heretofore notable for the superlative quality of the chrysanthemum cut bloom and decorative plant exhibits and for good management throughout. Among the largest contributors were such chrysanthemum growers of wide repute as A. Herrington, Wm. Duckham and Peter Duff, also nearly a score of the most skillful commercial rose producers for the New York market. In the most important competitive class, for thirty-six chrysanthemum blooms in six varieties, Mr. Duckham led with a superb set, including Mrs. Weeks, T. Carrington, Merza, H. J. Jones, Lord Salisbury, a bronzy yellow, and Mme. Thirkall, yellow, the last two named being new vari-

THE STAND OF ROSES AT THE NEW YORK EXHIBITION.

effective arrangement of the display from W. D. Sloane, which took first, attracted everyone's attention and reflected great credit upon Mr. Herreman, who arranged it. This display consisted chiefly of Cattleya labiata, Oncidium varicosum Rogersii and Odontoglossum grande. J. Sloane was awarded second for a beautifully staged group of cattleyas, oncidiums, odontoglossums and some cypripediums. Conspicuous in this collection was a plant of Cattleya Dowiana, Phalenopsis amabilis and Dendrobium Phalenopsis and D. formosum. W. D. Sloane was also first for twelve Cattleya labiata and G. Foster, second. H. P. Wookey took the honors for twelve Oncidium varicosum Rogersii with an exceptionally finely flowered lot of plants, some of the spikes being four to five feet long, carrying from 100 to 200 flowers. W. D. Sloane was second. John Sloane was first for twelve cypripediums.

The cut flower classes were all well

(E. G. Hill and his exhibits in the foreground.)

GENERAL VIEW OF THE COMBINED SCULPTURE AND FLOWER SHOW AT MADISON SQUARE GARDEN, NEW YORK.

eties imported last May and which belong in the first class. Mr. Herrington was a very close second in this class and in the class for eighteen blooms in three varieties he defeated Mr. Duff but by an equally close margin, with Appleton, Barclay and Eaton.

In the remaining chrysanthemum classes Mr. Herrington had four firsts and one second, Mr. Duckham one first and two seconds, Mr. Duff four firsts and Mrs. J. Catlin and G. E. Kissell one each first and second, Frank Burnett and Geo. Bird, Jr., each two seconds. Among the new varieties the most striking was Mr. Duckham's Mabel Morgan, a fine yellow Japanese. L. V. Thenband, Edw. Regan, gardener, showed an elegant arrangement of blooms with autumn leaves and C. H. Atkins took a special prize for the largest flower in the show, with Mathew Smith, thirty inches in circumference. Splendid groups of chrysanthemums and decorative foliage plants were arranged by G. E. Kissell, H. L. Hand, gardener, Wm. Duckham and A. Herrington. Peter Duff had the best specimen plants.

For eighteen American Beauty roses L. A. Noe was first and Henry Hentz, Jr., second, and for twelve Beauty the same exhibitors won in reverse order. In the Bride and Bridesmaid classes there were many competitors, prizes going to Henry Hentz, Jr., the Chatham Rose Co., W. A. Ryan, D. Shannon, C. E. Holm, J. L. Quearney and L. A. Noe. In carnations Mr. Duckham won first and C. W. Ward second. In the general classes Lyons, Strickland, W. S. Herzog, G. E. Kissell and C. H. Blair, John Fraser, gardener, were winners. The Moore, Hentz &

Nash silver medals to employes growing the leading prize-winning exhibits went to S. Redstone for chrysanthemums, J. F. Ruzicka for Beauty, M. McGowan for Bridesmaid, and J. Milton for Bride.

Certificates were awarded to Mr. Duckham for a set of fifty named chrysanthemum blooms of remarkable finish and uniformity, for a pair of large *Kentia Sanderiana*, for specimen *Calamus Jamesi*; to Peter Duff for a set of perfect single-stemmed plants of *Merza*; to A. Herrington for specimen *Cocos flexuosa*, to J. N. May for seedling chrysanthemums; to F. R. Pierson for *Nephrolepis Piersoni* and Mr. Herrington for *Gerbera Jamesoni*. Lager & Hurrell made a nice exhibition of orchids and a number of other miscellaneous but meritorious exhibits came from several contributors who were given honorable mention. There was good music and a fair attendance. The school children attended in a body Thursday afternoon.

Exhibitions of Trade Value.

Again we have come to the time of year when the fall flower show is about to enter into the general run of business and on every hand I am asked the question, "What is the value of the flower show to the trade?" I believe it is the very best thing for the trade, and I am only sorry our western growers cannot be made to look at it in the same light. I also regret that as yet the western cities find it next to impossible to have a spring show, for it is the very cheapest advertising our producer can get. Look at the thousands of lines written in our

daily papers each season, when we are about to have a flower show, also see the many pictures and great head lines that stimulate the interest in flowers and keep them before the people. Each grower could afford to grow something for a show, even though there was no premium list.

Has the grower, the wholesale dealer, or the retail man ever thought why New York, Philadelphia and Boston do so much more business than is done in any city of the west, remembering that the greater part of the flowers grown around Chicago are sent out on shipping orders? Why is this? Simply because every retail man thinks, when he is asked to enter, that he personally has been picked out as a "sucker," as he terms it. The grower also has his "kick coming," for the defeated one seems to always think things were fixed for the other fellow to win the prize. Then the wholesaler files his little objection, for one reason or another, instead of all factions joining hands to make a show, and make one that would not only be an honest advertisement, but a credit to the trade at large.

I, for one, would say that if it could be so managed that every time a glut came on the market, or at a fixed time each thirty days during the season, a free flower show would be the cheapest and best thing that could be done for the future of our business.

In order to create interest in our shows I think that all growers and wholesalers could well afford to donate to the advertising committee, for the thirty days before a flower show, enough stock to

keep every editor, manager and high official connected with a daily paper, and other influential parties, reminded of the fact that we want their aid. This could be done in a nice way and the grower would not miss a cent, for any incidental small loss of sales would surely be made up by the success of the show helping everyone connected with the trade.

CONTRIBUTOR.

In the Plant Houses.

There are only about six weeks more in which to make preparations for Christmas. Many things are to be thought of and many preparations to be made. Tender stock in general is all under cover now, or should be, and to those who may not have brought in the Easter crop of lilies from the frame in which they have been making a start, it may be said that the sooner this is done the better, for while *Lilium longiflorum* will stand a touch of frost, it is not wise to get the tips of the leaves spoiled at this time, for this disfigurement is likely to appear soon enough in most cases.

It is at Christmas that berried plants of various kinds are most in demand, and bright red and green are the colors that seem best adapted to that season. Consequently we find that ardisias, oranges and solanums attract more attention at that festal time than at any other, this being simply another illustration of the association of ideas, by means of which the mention of Christmas brings to mind at once the bright red berries of the holly. But the question of berried plants also reminds us that there may be little sunshine during November, and unless all our crops are in a forward condition we must make the best use of the limited time that is before us, for the plants must have bright-colored, ripe fruit in order to realize the best prices.

people that it reminds very much of the birds' eye pepper of their youth.

The dwarf oranges still have many friends and admirers, but as these plants cannot be grown in a few months it naturally keeps the price up fairly well, and makes these plants better adapted for a select trade. These also are much more satisfactory to the purchaser when kept in a cool house for some weeks before being sold, both foliage and fruit lasting much better, but to keep the fruit in good condition in a low temperature it is best not to water overhead to any great extent, and especially so during cloudy weather.

From present appearances there will be a great quantity of *Begonia Gloire de Lorraine* in the market this season, and of very good quality. At this critical time of year much depends upon careful watering, this begonia being one that is easily satisfied with water, and particularly as the flowers appear, when a careless dashing of water overhead may do great injury.

Some azaleas are sold at Christmas, but it is rather early for many of the varieties, and there should also be some selection of the individual plants, for some specimens may be more forward in bud than others of the same variety. Bright colors are decidedly the most salable at this season, but even these are liable to come somewhat washy in color if forced too hard. A night temperature of 60° to 65° is usually quite high enough to bring azaleas into flower, and this should be reduced as soon as the flowers begin to open.

The making up of combination pans or pots of plants for the holiday trade should soon be looked after, for though it is not necessary to do this work a great while before the plants are sold, yet it is not well to postpone it too long. Poinsettias that are to be grouped together may be left until the bracts are

may be mingled with *Dracæna Sanderiana* with good effect.

Cyclamen persicum is now coming into bloom and the improved strains that are offered by the leading growers provide some charming effects in both foliage and flowers. The precautionary measure of keeping some fresh tobacco stems among the pots of cyclamens should be continued right along, it being much better to avoid attacks of green aphids by this means than to wait until the insects appear, and then attempt fumigating. The same precaution should be taken with *Lilium longiflorum*, primulas and cinerarias and neither of these plants require much water overhead during the short days.

Cold storage is a modern process that has proved quite useful to most florists who can have access to this convenience, and cold storage lily of the valley is decidedly the most satisfactory in quality for early forcing, and gives a more even crop and a better showing of leaves than may be had from pips of the new crop, but the extra expense of cold storage stock must also be considered, for the margin of profit is not large to the grower. *Lilium longiflorum* of last year's crop that have been retarded by the same means are now in flower and are quite useful for cutting, but as pot plants they are not attractive, the growth and foliage being in most cases below par, though the flowers are of fair size. This seems to be another proof of the assertion so often made that members of the lily family soon lose more or less of their vitality when the bulbs are kept out of the earth.

When the glass trust turns out only perfect material, or when all the poor growers can afford to use plate glass on the roofs of their greenhouses, then it will be safe to do without shading over the foliage plants from October 1 throughout the winter but under present conditions we often find plants with scorched leaves in houses from which the shading has disappeared and then proceed to form some good resolutions for the prevention of such occurrences in the future.

Some of the large retail dealers do not care to handle small-sized and cheap plants, arguing that in many instances it takes just as long to sell a 50-cent plant as one at \$5 and that in consequence their profits are reduced, but the small grower and retailer cannot afford to draw the lines so closely and he therefore must have some cheap plants also, and a few English primroses, violets in pots or pans and in fact a variety of comparatively low priced and easily grown plants must be provided.

As the bulbs arrive that have been ordered for forcing or for spring use do not delay the potting or boxing of them; the sooner they are in the soil the better.

W. H. TAPLIN.

DREER'S EXHIBIT OF PANDANUS SANDERI AT THE NEW YORK EXHIBITION.

Plenty of light is therefore needed for stock of this character, and also free ventilation.

If ardisias are in a forward condition it is best to keep them cool, the berries hanging on much better in a night temperature of 55°, and the low temperature also discourages the spread of scale insects, if any such are present. *Capsicum annuum* is one of the easiest plants to manage, and is really pretty, but it is whispered that this plant is just a little common, and that there are so many

fairly well developed, as they can then be grouped in just the form one desires.

An attractive combination plant may be made from nicely colored *Dracæna terminalis* of various sizes grouped together in a 9-inch or 10-inch pot, and some Boston ferns from 3-inch or 4-inch pots planted around them. The contrasting foliage of these two species makes a very pleasing arrangement. *Asparagus Sprengeri* may also be used as a filler in such combinations, while some small plants of *Asparagus plumosus*

Chrysanthemum Society of America.

Following are the reports of the committees judging seedlings, sports and new importations:

Boston, October 27.—The E. G. Hill Company, Richmond, Ind., exhibited Mlle. Marie Liger, an imported French variety, light pink, incurved Japanese, which scored 98 points, commercial scale, November 1.—Grove P. Rawson, Elmira, N. Y., exhibited Snow White, white, Japanese, which scored 80 points, commercial scale, 83 points exhibition scale. Nathan Smith & Son, Adrian, Mich., exhibited Globosa Alba, white, incurved, which scored 87 points, commercial scale,

86 points exhibition scale. No. 15-8-01, by the same exhibitors, a red, reverse chamois, Japanese reflexed, scored 80 points commercial scale, 78 points exhibition scale.

Cincinnati, November 1.—Nathan Smith & Son exhibited Ethelyn, beautiful shade of pink on the order of Daybreak carnation, only a little deeper in center, Japanese reflexed, which scored 85 points commercial scale.

Philadelphia, November 1.—John N. May, Summit, N. J., exhibited No. 231, pink, Japanese incurved, which scored 84 points commercial scale, 83 points exhibition scale. No. 86, by the same exhibitor, amber red, Japanese reflexed, scored 82 points exhibition scale. Nathan Smith & Son exhibited Sephia, bright yellow, Japanese incurved, which scored 87 points commercial scale, 86 points exhibition scale.

New York, November 1.—Nathan Smith & Son exhibited Algoma, light rose, silvery reverse, which scored 83 points commercial scale. John N. May exhibited No. 28, mahogany, gold reverse, gold tipped, Japanese reflexed, which scored 67 points commercial scale. No. 86, by the same exhibitor, scored 73 points commercial scale. Mirabeau, by the same exhibitor, bright clear yellow, Japanese, scored 77 points commercial scale. Amorita, also exhibited by Mr. May, rosy pink, lighter reverse, Japanese incurved, scored 84 points commercial scale.

VARIETIES CERTIFICATED.

Having had inquiries for a list of varieties of chrysanthemums which have been awarded the necessary number of points entitling them to a certificate by the Chrysanthemum Society of America since and including 1898, and thinking perhaps there may be others desiring same information, I herewith append said list. The Horticultural Society of Chicago, under the auspices of the Chrysanthemum Society of America, offers premiums for the varieties under consideration, a premium list of which may be had by applying either to Edwin A. Kanst, assistant secretary, 5700 Cottage Grove avenue, Chicago, or the undersigned.

EDWIN LONSDALE, Sec'y.

A Visit to Waban.

An annually recurring event, overflowing with a good-cheer peculiarly its own and deeply suggestive of the higher attainments and best ambitions of New England horticulture, took place on Tuesday, November 4. It was the time-honored visit of the Bostonians to Waban Conservatories, at Natick, an occasion which the florists of this section and many others from afar have come to recognize as an instructive and altogether delightful institution, unsurpassed by any other social event of the year. This year it had been questioned whether, in the absence forever of one who in the generosity of his heart had instituted these annual reunions and who had in the past entered into the spirit of the day with so keen an enjoyment, it might not be best to discontinue the time-honored custom, but the unquestionably wise decision of Mr. Montgomery and his colleagues was that they would more fully carry out what would have been Mr. Wood's wish and best honor his memory by sending out the usual invitations and making arrangements just as in the past.

In the party of forty gentlemen who went out from Boston were included W. R. Smith, A. Gude and W. F. Gude, of Washington; Henry Dailedouze, Flatbush, N. Y.; E. O. Orpet, South Lancaster; J. Fuller, Leominster, and H. F. A. Lange, Worcester. The tour of inspection through the long ranges of greenhouses disclosed no additions or anything special in the line of novelty, but rather a stride upward toward the ideal of perfection in commercial flower-growing, for, impressive as this place has

always been in this respect, yet, taken as a whole and in every detail, it is to-day finer than ever before. Bride, Bridesmaid and Liberty in large array and Bon Silene, Mrs. Morgan, Mrs. Ames, Golden Gate, Ivory, Mme. de Watteville and Balduin in lesser numbers are all equally an object lesson and an incentive delight to the eye of the rose-grower and rose-lover, while in the long ranks of chrysanthemums is seen the highest possible attainment under skillful culture, with Col. Appleton, Mirza, Mrs. Jerome Jones, Mrs. Coombs, Timothy Eaton, Golden Wedding, Mrs. T. L. Park, Maud Dean and other accepted favorites of the exhibition hall. None of this year's novelties in chrysanthemums are being grown.

Mr. Montgomery points with pride to two magnificent houses of grafted Liberty roses, luxuriant of growth and bristling with buds, showing not the remotest suspicion of black spot or other blemish and attributes the earlier trouble with this variety to the impaired vitality resulting from over-propagation. Bon Silene he looks upon as one of the most profitable roses, the local fancy for this prime old favorite being very pronounced. Several of the older rosehouses have been planted to asparagus, the output from which is now heavy.

A three-mile drive to South Natick was enjoyed by the visitors, who found on their arrival at Bailey's Hotel a substantial dinner awaiting them. Alexander Montgomery filled the place as host, so many times occupied by Mr. Wood, and in his brief words of welcome spoke feelingly and eloquently of him who had been to him more than an employer—a loved friend and companion. Ed. Hatch officiated in his customary dignified and graceful manner as chairman and called severally upon the long-distance visitors as well as many of the local lights for remarks. Although naturally reminiscent

to a degree, the tone of the affair, as reflected in the speeches, was cheerful and buoyant and so the Waban visit of 1902 passes into history, like its predecessors, a happy remembrance to all who participated.

English Plant Notes.

Early in the year it was anticipated that florists would have a very busy and prosperous season, but things have not gone quite so well as we could have wished; yet I think trade might have been worse. Cut flower trade suffered a good deal more than plant business. One grower told me that he cleared out the largest quantity of Crimson Rambler roses he had ever grown, and at best prices, some plants making as much as \$5 each. I have been expecting to see the market over-stocked with this useful rose, but there are not yet many growers who succeed well with it. The main point is to avoid growing it too vigorously and to fully expose the plants and keep them dry, so as to well ripen the wood in the autumn. More depends on preparing them in the autumn than on the spring treatment. Several other climbing varieties have been brought forward but they have not been great successes.

A new tea rose that has been shown in good form is named Peace. It comes from G. W. Piper, the raiser of Sunrise, which, though not a large rose, is now one of the leading market varieties. At the autumn auction sales, market growers bid high for Lady Battersea. It is certainly worth the attention of all rose growers. Liberty also sold well, but many growers already had this in stock.

Zonal geraniums are much more used by florists than formerly and any good, bright-colored varieties are looked after. I think King of Denmark has been the most prominent in the market. It makes

varieties are early this season and quite a grand lot were exhibited in October. Two very large flowered Japanese sorts were certificated, namely Sir W. Acland and Lady Acland.

Begonia Turnford Hall is doing well this season. It makes quite as good a plant as Gloire de Lorraine. I think we shall hear very little more of Caledonia.

Bamboos are now favorite plants for decorations, the best being *B. aurea* and *B. arundinaria*, or *Arundinaria falcata*. They are very accommodating; any temperature suits them, and they last well indoors. II.

WITH THE GROWERS.

STORRS & HARRISON CO., PAINESVILLE, O.

A visit to the Storrs & Harrison Company, of Painesville, O., is at all times a pleasure to the majority of florists, and more especially to the Cleveland florist, who regards it as the Mecca of all the trade pilgrims of his state. The writer, in company with a number of the craft, paid the annual fall visit last week. To mention all the good things we saw would fill several columns; therefore I will have to condense matters and try and give the meat in a nutshell. The ever genial Robert George and his equally genial son took the visitors in charge and explained the "why and wherefore" of everything of note.

The first range visited was filled entirely with begonias, moonflowers, allamandas and such-like stock. Sixty varieties of begonias are grown, including the flowering and Rex varieties. Allamandas and moonflowers are produced by the thousands for catalogue trade. In this range 6,000 pieces were in prime condition, ranging from cuttings to 6-inch pots. The next range is given over to tea roses in 2½-inch pots, of which 200,000 are grown annually. An equal number of

with a good-sized truss, carried well above the foliage. It is called Julia Marlowe and is claimed to be one of the best single scarlets for bedding, not being affected by wet weather, like most of the single varieties. Several houses of palms are grown. A lot of 30,000 young kentias were looking remarkably well. One house is given to *Cycas revoluta*, mostly in 5-inch and 6-inch pots. The demand for this stock has been rather slow this past season. The demand for Boston ferns has exceeded that of other years and consequently a shortage is in sight.

Several houses of azaleas arrived in fine condition. The demand for commercial varieties is increasing every year. There is a decided shortage in varieties like Mme. Van der Cruyssen, *Vervæneana* and Simon Mardner. The trade doesn't seem to "get onto" the fact that there are other kinds just as good and which would sell equally as well. Two more houses were filled with hardy outdoor-grown roses potted up for wood for cuttings later on. Carnations for cuttings occupy another section. All the leading varieties are grown, for cuttings only.

Their entire range of glass comprises over 125,000 square feet. The outdoor stock takes up 1,200 acres. This season forty-five acres were planted to roses, all of which are sold, and 100,000 more could have been disposed of, so great is the demand. Fruit trees occupy 350 acres while 200 acres more are given over to ornamental shrubbery. Cannas occupy five acres and almost an acre is given to anemone culture, and these were a sight to behold. The entire patch was one mass of bloom. A variety which attracted a great deal of attention is Queen Charlotte. The flowers measure three and one-half to four inches in diameter, color a beautiful soft pink. This variety would no doubt be an excellent kind for cutting. It blooms from September until frost.

The immense potting sheds on this place cover over 25,000 square feet of floor surface. A fumigating plant has been attached to their cold storage houses, where all incoming tree stock is subjected to fumigating by hydrocyanic acid gas, thereby eliminating all dangers from San Jose scale. ECHO.

To Rid Chrysanthemums of Rust.

ED. AM. FLORIST:—Will you please outline the best course to pursue to rid chrysanthemums of rust or to prevent its recurrence another season if once established. C. J. P.

The chrysanthemum rust is likely to be most severe the first season or two after its introduction into a new locality. It is not a disease, however, that should cause alarm. Watchfulness and perseverance will generally master it rather speedily and in time exterminate it from an establishment.

If taken in the early stages, removing the affected leaves and destroying them, together with the fungus in them, by burning or hot water, taking care not to scatter the spores, will be sufficient to hold the disease in check. Spraying with Bordeaux mixture at the same time will greatly assist in keeping healthy leaves free from contagion.

If plants are badly rusted before aggressive measures are begun, it would be best to wholly destroy them, being careful, of course, not to scatter the spores.

The next season only sterilized soil or soil from an uncontaminated source should be used for the houses. Every

THE EXHIBITS OF 100 CHRYSANTHEMUM BLOOMS AT KANSAS CITY.

(The second vase from the right was awarded \$75 first premium.)

Photo by Davidson.

a grand plant and the soft salmon shade is most distinct and pleasing.

While talking about market plants, early flowering chrysanthemums are worthy of mention. We have some grand improvements in these. One grower secured three first-class certificates at the October meeting of the National Chrysanthemum Society and his exhibit included several other good new things. I noted Black Prince, Nellie Blake, Murillo, and Miss B. Miller as among the best. Myclett Glory is a grand market variety for pots. Large flowering Japanese

hybrids are raised from hardwood cuttings. *Asparagus plumosus* and *A. Sprengeri* occupy several small houses. One entire house is given over to *Begonia Gloire de Lorraine* and its several sports, all looking healthy, raised mostly from leaf cuttings.

Zonal and ivy-leaved geraniums occupy a number of houses. All the new varieties are given a thorough trial and only the very best retained. A single scarlet among the lot attracted the visitors' attention, which no doubt will be heard from later. It is a very free bloomer,

A FIRST PRIZE DINNER TABLE DECORATION BY OSTERTAG BROTHERS, ST. LOUIS.

means should be employed to grow strong, healthy plants. They should receive ample ventilation, should not be suddenly chilled, and should only be sprayed on days when the foliage will dry off readily. The last precaution is especially important. There need be no lack of moisture. Thorough syringing of the plants is a good thing, but it must only be done on bright days or when the ventilators can be opened, so that the surface of the foliage will be dry in a short time. To have the plants damp over night with stray spores floating about might undo all that had been gained by a whole year's precaution and labor.

If the fungus can be kept in check for a time, so that new crops of spores cannot be produced, the spores in the soil will gradually lose their vitality, and the disease finally wholly disappear, a quite feasible thing to accomplish in any establishment.

J. C. ARTHUR.

CARNATIONS.

MORE FACTS ABOUT STEM ROT.

I have been greatly interested in the recent articles on stem rot and its treatment. I believe the dry rot, caused by the fungus fusarium, is the most dangerous disease the grower has to combat, and I am convinced there is no cure for it. As surely as with leprosy in human beings, once in the system it will eventually prove fatal. To illustrate:

In September, 1901, we were short of G. H. Crane and bought 1,000 from each of two growers. When the plants came they were well-grown, vigorous stock, apparently free from disease. We had 1,000 Crane of our own growing but not such large, vigorous plants as those we bought. They were all planted in the same house, in exactly the same compost and received exactly the same attention. About a month after the house was planted dry rot developed in the plants we bought. The plants died, a branch at a time, until by April over fifty per

cent of them were gone, while we lost none of our own growing. Whether this disease was caused by the check the plants received from shipping and transplanting, or whether the taint was in the sap, I do not know.

Without changing any of the compost on the benches we replanted these Crane with Crocker, and did not lose any plants from dry rot, but did lose a few with rhizoctonia stem rot. So from my experience I drew the conclusion that the fungus fusarium is not transmitted through the agency of the soil, though I may be mistaken.

We have never had the dry rot in any varieties other than Crane and Jubilee. In a field of 60,000 carnations grown here the past summer, dry rot did not develop at all, but plants of Crane propagated from apparently vigorous, healthy plants in the 2,000-lot have developed dry rot badly since housing, while the plants propagated from the 1,000 that had no dry rot in them last year are nearly free from it now. From my experience I am convinced that the only way to combat this disease is by careful, intelligent methods of growing.

If a variety develops dry rot we do not want to propagate from a batch that has any affected plants in it, no matter how healthy some of the plants may be. If the taint is in the blood of that batch of plants, it will develop in the next generation. If a pet seedling is subject to it, the originator does not want to do himself and the trade the injury of disseminating it. We do not want to breed from a variety that is susceptible to it, for this weakness will be transmitted to the seedling. We do want to make health and vigor of constitution equal in desirability to every other consideration in the coming varieties if the carnation is to continue a profit and a pleasure to the grower.

W. S. DAVIS.

LYNN, MASS.—S. A. Davenport has two houses of chrysanthemums which make a fine display and serve to attract many visitors.

Chicago.

WEEK STARTS IN SATISFACTORILY BUT BAD WEATHER CUTS OFF CITY TRADE.—LOW GRADES PILE UP ON WHOLESALERS' HANDS.—ALL LINES SHARE IN THE DEPRESSION.—BEST STOCK STILL GOING OUT ON NUMEROUS SHIPPING ORDERS.—FLOWER SHOW MATTERS.—A VARIETY OF LOCAL TRADE JOTTINGS.

The week opened with the market somewhere near its normal condition. Monday found good supplies of stock and a brisk demand, both locally and out of town, but Tuesday began a spell of exceedingly unfavorable weather for the local flower trade, and since then the market has been largely dependent upon orders from outside sources. There is some little social activity locally, but this serves to make an outlet for only the higher grade material, of which there is seldom any great surplus. The congestion comes in the lower grades, which are usually handled by street salesmen and those who cater to a purely transient trade. With three days of very bad weather the market became badly overstocked in all lines. The one item which continued to move with something like its accustomed briskness was the Beauty, and even here there was a tendency toward weakening prices. The stock of all growers is very good in this item and it is noteworthy that all the prize winners at Kansas City were those whose stock finds its outlet in this market. But in general the buds are not now up to the usual standard in color. There has been little doing in tea roses since the beginning of the week, and carnations, too, have accumulated badly. Good fresh stock is still held up to quoted prices, but clean-upsales of day-old material are at very low rates, not infrequently as little as 5 cents per bunch. The violet has suffered in common with other lines, the production being remarkably heavy and sales slow. Qualities are very good and the retailers who cater to high class trade are willing to pay fair prices for the comparatively small quan-

titles selected out for their use, but what to do with ninety per cent of the receipts has been a problem so long as the inclement weather kept people off the streets. If anything, chrysanthemums have made a better showing than other items this week, but that does not imply anything more than a very low average. One source of disappointment will be the returns on Appleton. Everybody is growing it this year, and while much of the stock is very good, well grown Bonaffon has sold in preference in many cases. Ivory, white and pink, has been held fairly stiff in price because few are growing it this season. E. C. Amling has been receiving from the E. G. Hill Company some good stock of the new pink, Mlle. Marie Liger, which finds a warm welcome. Mr. Amling gives it as his opinion that, quality for quality, the chrysanthemum is averaging as good returns to the grower this year as last, although such was not the case at the opening of the season, and a good many wholesalers are not able to see it in that light even now. The flower show next week promises to make a demand for good stock, particularly in the line of novelties in roses.

N. J. Rupp, of the John C. Moninger Company, returned a few days ago from Louisiana, where he went to close a deal for something like a half million feet of high grade cypress of which the trust had not yet secured control. He bought it in the log and it will not be delivered for nearly a year and a half. Incidentally it is worthy of note that the Chicago price of 1½-inch clear cypress is \$48 a thousand feet, an advance of \$14 in the past three seasons.

At the executive committee meeting of the Horticultural Society of Chicago, held October 31, the poster committee reported progress and announced that the posters were being displayed all through the city. The committee on examination of exhibits was named as follows: Plants, C. J. Reardon and F. F. Bentley; cut flowers, Geo. W. Wienhoeber and John P. Risch; exhibits, W. N. Rudd, P. J. Hauswith and Ernst Wienhoeber.

Miss Florence Emmett, cashier at Deanud's, while returning to her home Wednesday evening, during the heavy rain, was passing over the Wabash Railroad tracks at Thirty-ninth street and, looking both ways to see if a train was coming, stumbled over an object which was afterwards found to be the headless trunk of a man who had been run over. The fright was so great that on reaching home she fainted.

A. Lang will have the flower booth at the show again this year. He says that a large part of the profit from the booth comes in gaining the acquaintance and confidence of out of town people, for he is building up a good business on mail orders for delivery here in Chicago and also for shipment.

Otto Wittbold and his stock are waxing fat and healthy in the clear, pure air at Edgebrook. Mr. Wittbold comes to town once a week to keep in touch with the requirements of the firm but puts in the rest of his time in the management of the new range of houses.

Kennicott Bros. Company is now getting the very best of results from the new cool room built last summer. The temperature is maintained naturally at 54° without the slightest variation and as a consequence stock stands at its best there.

Although Bassett & Washburn sent nothing to Kansas City they will make their usual showing at our own show next week.

C. M. Dickinson, manager at E. H. Hunt's, says the Dutch bulbs cleaned up in good shape this fall. He is now giving his attention to green and holly as the next seasonable item.

Anthony Warnemont, gardener to the C. B. & Q. railroad, at Aurora, was a visitor last Saturday and left us a fine bunch of Burlington, his white seedling chrysanthemum.

The sale of the Retzer stock was begun in the downpour on Wednesday, but there was a good crowd present and fair values were realized, considering all conditions.

Lee Walz has been at Kansas City this week putting up work in the show there for John Mangel, who is catering to an out of town business.

Gunnar Teilmann, of Marion, Ind., was in town for a few hours Wednesday enroute home from a brief visit to Kansas City.

O. P. Bassett was at Aurora Tuesday, looking at a factory site to which he is thinking of removing his printing plant.

Daniel Branch is building two small iron frame greenhouses on the roof of his store at Fortieth and Indiana avenue.

Bentley & Company are having a fine cut of the prize winners. They will exhibit at the Art Institute next week.

John Schoepfle & Company have a neat place at 1431 Belmont avenue, with store and three greenhouses well stocked.

A. L. Randall says the horse show did not help the violet market anywhere near equal to his expectations.

Poehlmann Brothers are more than pleased with results in their new Beauty houses this dark weather.

Frank Garland has boxed up the usual incomprehensible number of bulbs for spring.

McKellar & Winterson are handling some good bouvardia, pink and white.

The Washington Floral Company has a neat store at 27 State street.

Weiland & Risch are getting Mrs. Lawson in mid-winter form.

George Reinberg's cut is remarkably steady this season.

C. L. Washburn begins to feel more like himself again.

Wietor Brothers are cutting extra La France and Ivory.

Mrs. C. A. Fiske has bought out I. C. Silliman.

J. A. Budlong is cutting some choice Meteors.

Philadelphia.

OPENING OF THE NEW WHOLESALE MARKET.—RECEPTION ATTENDED BY SEVERAL HUNDRED INTERESTED PEOPLE.—RETAILERS WISH THE MARKET WELL.—THE PRESIDENT SPEAKS.—BUSINESS FAIR BUT STOCK PILES UP.—VARIOUS NOTES.

The introductory reception of the Philadelphia Wholesale Flower Market, held Thursday evening, October 30, was a success in every sense of the word. The number of ladies and gentlemen present was estimated to be at least 500. The room was handsomely decorated, H. C. Geiger, of the Floral Exchange, being the artist. R. Craig & Son, Julius Wolf, Jr., H. H. Battles and Westcott Brothers contributed plants and flowers. Messrs. Jos. Heacock, H. A. Dreer and W. K. Harris arranged each a large group of plants for exhibition. The entertainment pleasure was enjoyable. The A. D. T., "all day tired" messenger boy, was very realistic. Horace Dumont sang his solos in fine style; his voice is certainly a treasure. Albert G. Campbell also sang well. Pres-

ident Jos. Heacock read his address, which was as follows:

It gives me great pleasure to welcome you here to-night in the name of the Philadelphia Wholesale Flower Market. We are glad to see you take so much interest in an enterprise, the beginning of which I believe to be the mark of a new era to the Philadelphia florist, be he grower or retailer, and the advance of which will be as great as that of fifteen or twenty years ago, when the steam boiler and steam pipes superseded brick flues. We are told by those older in the business than I am, of the good old time when all one had to do was to grow the flowers and at sunrise he found the retailers at his gate begging for a chance to buy them. We all know how things have changed since then, until now the grower goes around seeking the man who wants to buy, and how often he misses him. You have doubtless all had the experience, after having hunted for someone in a crowd, and having at last given it up in despair and stood still, of having the one whom you sought all at once find you. This is just our case. While we have been hunting someone to buy our flowers, and have found him with more or less success, we have frequently missed him, much to the loss of both parties, and now we propose to have the product of our greenhouses in this beautiful, well lighted room at 7:30 next Saturday morning, and on every morning thereafter, Sundays excepted.

We have all felt the need of just such a market—a central place where buyer and seller could find each other and do far more business in an hour than could heretofore be accomplished in a forenoon, and do it far more satisfactorily to both parties. New York has two and Boston one such market. Philadelphia, proverbially slow, is at last awake and has the experience of her sister cities by which to profit. Philadelphia, with her million inhabitants, is going to support such a market. There is no question about that, and any grower who is not here at the start will be ashamed to let his descendants know it.

Our enterprise is of a healthy growth. Little did we think of such a company as this three months ago, chartered by the state of Pennsylvania, with a capital of \$20,000. Our plans were humble. We said if we could only get half a dozen growers to bring their flowers to a central place, the market would be a success. Whomever we talked with about it seemed to be in favor of it. We then decided to have some capital, and thought \$5,000 would be ample, and then it developed into \$10,000, and finally stopped at the present figure. It seemed the larger we made it the more determined the growers were to have some of the stock, until now there are but a few shares left, and all the shares sold are held by those actually in the business of growing flowers, or growing or dealing in plants, trees, shrubs, seeds, bulbs and other merchandise of the general flower business for purposes of commerce, and our by-laws are so drawn that no other person can ever hold shares of stock in the company.

I feel that I would not be just to whom honor is due if I did not speak of the valuable work done by Samuel S. Penock at the beginning of this project. Indeed, if it had not been for his earnest co-operation and services this market would not be started at this time. It seems like the irony of fate that Mr. Penock should be excluded from any part in the company, after having done so much for it, and all because he is a dreaded commission man! David Rust also rendered us most valuable assistance at a time when it was very difficult to get.

In conclusion, allow me to congratulate all interested in this market on our having procured the valued services of Charles Meehan as manager. Mr. Meehan is well known to all of you, and his character, ability and impartiality means success to the enterprise.

Robert Craig was the orator of the evening and reviewed the business from his coming into it until the present and predicted great success for the market. Robert Kift spoke for the retailers. He said that while he felt the market was sure to come, yet he had hardly hoped to live long enough to see it. As an evidence of what other retailers thought of the movement he presented a number of baskets and bouquets with cards bearing appropriate remarks and best wishes, some fifteen in all. The reception wound up with refreshments, dancing and all present voted that it was the finest gathering of the trade ever held in this city.

The November meeting of the Florists' Club came near being a two-day affair, but was finally pulled off about 11 p. m. The feature was the address of Samuel C. Moon, whose subject, "The Importance of Hardy Plants to the Florists' Trade," was handled in a very interesting manner. Mr. Moon is a very magnetic speaker and held his audience until

the end, when he received rounds of applause. His remarks were mainly on the planting that should be done for the future and not so much just for the present. He said that oak trees in a series of years would catch up and pass those of apparent quicker growth, such as poplars and sugar maples. He also spoke of how necessary it is for the retail florist to know something about the evergreen trees that enter so largely into the decoration of city houses during winter. He closed by inviting the club to take an outing and visit his nursery at Morrisville next June.

While there is quite a little business doing, on account of the great stock of flowers now coming in, it seems dull, as the flowers will pile up. Carnations are hard to move and are sold at very low prices, from \$1 to \$1.50. Beauties still hold up; \$1 to \$4 is the price. Teas range from \$4 to \$5 per hundred. Chrysanthemums move fairly well at from \$6 to \$16 per hundred.

Wm. C. Smith, of Sixteenth and Market streets, met with a serious loss by fire on Sunday morning, November 2, his dwelling house being thoroughly gutted, although most of the furniture was saved. His wife was giving their two children a bath in the second story and had barely time to escape. The loss is covered by insurance.

The Market opened November 1 at 7:30 with eighteen growers in attendance and all sold out in a short time. Each day shows an addition to the growers' ranks and also brings more buyers, and when flowers get a little scarcer there will certainly be some hustling about Thirteenth and Cherry streets.

Secretary Rust says the show is going to be a record breaker and that it will be worth coming miles to see. There is to be a smoker on Wednesday, November 12, free to members of the club and visiting craftsmen.

Herbert Steinmetz, of Jos. Kift & Sons, was married October 5. Barney Goldriek, George Anderson's hustler, has also entered into wedded bliss.

S. A. Baur, of Erie, Pa., was a visitor to the market last Saturday. K.

New York.

MARKET CONTINUES BADLY DEMORALIZED.—LITTLE STABILITY TO VALUES.—A CHILDREN'S EXHIBITION.—MANY VISITORS.—VARIOUS NOTES.

The unfortunate stagnation noted in last week's report of the cut flower market in this city continues in an aggravated degree and wholesalers who handle any large quantity of stock are exceedingly despondent over the prevailing conditions. The trouble is due to a number of causes and will, it is hoped, be remedied as soon as election excitements, chrysanthemum surplus and beautiful balmy weather are things of the past. In the meantime prices are completely demoralized on everything, regardless of quality, and the retailers are able to make perfect dreams of beauty of their windows at a trifling cost.

In addition to the list of visitors at the exhibition, as given last week, were the following: E. Lundberg, A. H. Wingett and E. J. Norman, Lenox, Mass.; Chas. Scrim, Ottawa, Ont.; John Chambers, Toronto, Ont.; Phil. Breitmeyer, Detroit; J. F. Huss and Theo. Wirth, Hartford, Conn.; and S. Alfred Baur, Erie, Pa.

A very successful exhibition of plants grown by children was made last Friday afternoon at the Berkeley Lyceum. Out of 4,000 plants distributed last spring by

the Plant, Flower and Fruit Guild, several hundreds were returned for exhibition and prizes consisting of buttons and badges were lavishly awarded to the little gardeners.

A man who has been stealing flowers from J. Donaldson and other Long Island growers has been arrested and held for the grand jury.

Henry Weber, of Oakland, Md., had the misfortune to have his overcoat stolen at the Madison Square Garden exhibition.

George Valliano, who has been conducting a flower business at 2391 Broadway, has gone into bankruptcy.

Next week the American Institute chrysanthemum show will be on at the Berkeley Lyceum building.

Boston.

MARKET BADLY DEMORALIZED.—FEW ITEMS MAKE ANY SORT OF ADEQUATE RETURN.—CARNATIONS SUFFER MOST OF ALL.—FINE FALL WEATHER MAKES PARKS ATTRACTIVE.—VARIOUS NOTES OF VARIED INTEREST.—PERSONAL AND OTHER JOTTINGS.

Boston is undergoing a deluge of flowers this week such as rarely comes, even at this, the full-tide of chrysanthemum time. The queen of autumn has smashed the market completely for every flower, including itself, but if any one specialty can be named as suffering a worse relapse than all the others it is the carnation. It is not possible to find a market for the cut at present and the stock sold is disposed of at a figure that will bring little comfort to the grower. In roses the same conditions prevail, except in the case of Bride, which manages to do a little better than the others. Dealers make an effort to maintain nominal prices on fresh goods of the first grade and a few are sold accordingly but a large percentage of the stock is held over for one or two days before being unloaded and then it has to go at rubbish values. Although there is no question but that a change to appropriately cold and cheerless November weather would bring a little life to the business, yet it is generally accepted that but little real improvement can be looked for until the rampant chrysanthemums are out of the way, so a few weeks of patience must be exercised.

The salubrious weather we have been enjoying has been bringing forth quite a showing of precocious spring flowers. Forsythias at the Arboretum are blooming to some extent and wild strawberries, blueberries and other spring bloomers of like character are frequently found. The fruiting shrubs are well covered with fruit this fall. Barberries, euonymuses, celastruses and hawthorns are remarkably fine along the parkways.

The Floral Emblem Society of Massachusetts met at Faneuil Hall last Friday and discussed their favorite theme in the old-fashioned Boston way, with speeches, music and recitations. It transpired that the popular candidate for state flower at present is the mountain laurel.

It is announced that Wellesley College, ever-progressive, contemplates the establishment of a department of gardening for young women. Certainly no other institution of its kind in America has better facilities for the successful conduct of such a work.

It is pleasant to learn that Lillian Pond, the sterling white carnation of this market, came out on top at the New York exhibition. This carnation is manifestly worthy of all the confidence reposed in it last year, being even finer this year than last.

On Sunday morning, November 2, a storage shed and contents belonging to E. D. Kaulback was burned. The loss is partially covered by insurance.

The chrysanthemum show of the Massachusetts Horticultural Society opens on Thursday of this week. Particulars next week.

David Robinson, an old-time gardener, died at his home in Everett on October 30, aged 81 years.

Visitors: S. J. Reuter, Westerly, R. I.; Wm. R. Smith, W. F. Gude and A. Gude, Washington, D. C.; Henry Hurrell, Summit, N. J.; H. Dailedouze, Flatbush, N. Y.

Pittsburg.

BUSINESS FAIR AND MANY ORDERS BOOKED AHEAD.—STOCK PLENTIFUL IN ALL LINES.—A VARIETY OF PERSONAL AND TRADE NOTES.

October was a good month for us, as there were many occasions that required elaborate decorations. November will be a record breaker, as many wedding orders have been booked and transient business is good. There are liberal quantities of all kinds of stock to be had and the prices are generally right. The home growers are doing nobly, for in many respects they have the upper hand on the shippers, particularly as to rose qualities. Chrysanthemums are plentiful, including all the best varieties. Carnations are larger and the stems longer. Paper White narcissi are beginning to appear. Greens of different kinds are plentiful but a little higher in price.

Carl Klinke, chief bookkeeper for the Pittsburg Cut Flower Company, is confined in the Mercy Hospital with typhoid pneumonia.

Randolph & McClements have received from Europe a number of Kentia Belmoreana ranging in height from eight to twelve feet.

Florists will profit by a visit to H. C. Frick's houses, which will be open to the public for a month or so.

Frank Wolfe, of Denver, a former employe of P. S. Randolph, is visiting friends in Pittsburg.

It is claimed that 30,000 people visited the show in Schenley Park last Sunday.

Blind Brothers are in with an early lot of fine Gloire de Lorraine begonias.

Charley Hoffmeyer's chrysanthemums are of the prize-winner class.

Arthur Hall, of A. W. Smith's, is down with typhoid fever. E. L. M.

Grand Island, Neb.

Brewster & Williams have just completed an addition to their range, a house 18x116 for vegetables. In the four years this firm has been in business they have increased their glass from 2,000 feet to 10,000 square feet. They are now cutting some fine single-stemmed chrysanthemums, of which they grow 1,500 and 900 for pot plants. They are getting ready to put up horse radish, for which there is a good demand. Trade has been fair. Funeral work has kept stock cleaned up.

BINGHAMTON, N. Y.—Augustus Osier has opened a flower store at 72 Court street.

NORWALK, CONN.—John W. Curnow has closed up his greenhouse on Fair street and gone out of business.

EVANSVILLE, IND.—Wm. Blackman has been in the flower business for thirty years. He has a range of eleven greenhouses, containing 40,000 feet of glass.

THE AMERICAN FLORIST

Subscription, \$1.00 a year. To Europe, \$2.00.
Subscriptions accepted only from those
in the trade.

Advertisements on all except cover pages,
10 Cents a Line, Adage; \$1.00 per inch.
Cash with C. order.

No Special Position Guaranteed.

Discounts are allowed, only on consecutive inser-
tions, as follows—6 times, 5 per cent; 13 times,
10 per cent; 26 times, 20 per cent;
52 times, 30 per cent.

Cover space sold only on yearly contract at
\$1.00 per inch, net, in the case of the two
front pages, regular discounts apply-
ing only to the back pages.

The Advertising Department of the AMERICAN
FLORIST is for florists, seedsmen and nurserymen
and dealers in wares pertaining to those lines only.

Orders for less than one-half inch space not accepted.

Advertisements must reach us by Wednesday
to secure insertion in the issue for the following
Saturday. Address

AMERICAN FLORIST CO., Chicago.

THE daily press seems determined that
there shall be a trust in the cut flower
business.

EVERY florist, wholesale or retail,
should seek to build up a business beyond
the limits of his own city. A shipping
trade is among the most valuable assets
of any firm.

The mailing label on your paper shows
when your subscription expires; when
you send your renewal note that the
date changes within two weeks; it will
serve as your receipt.

WHILE it may be true that the chrys-
anthemum takes a part of its value
out of other flowers in the market, and
not a little of it out of the American
Beauty, were it not for breaks in the
monotony would not the public tire of
the staples?

THE new yellow rose Franz Deegen
exhibited at Kansas City November 6, by
the South Park Floral Company, and at
Boston November 7, by E. G. Asmus,
won a gold medal for the former and a
silver medal for the latter. It is to be
next season's candidate for public favor.

servatory.

South Sudbury, Mass.—Frank W.
Goodnow, eucumbur house.

Fairhaven, Mass.—H. H. Rogers, con-
servatory.

Solid Soil for Roses.

ED. AM. FLORIST:—Would it be advis-
able to tramp down the soil on our rose
benches? It does not seem to get solid
enough for roses and the grub worms
are working into it, but it is also loose
where there are no grubs. If this should
be tramped down would it be best to wet
it a little first to make it more solid, or
would it harm the rose roots or bushes?
B.

The soil in rose beds should be made
firm by either tramping with the feet or
pounding it with a brick or block of wood,
whichever may be most convenient. Roses
require a good, firm soil for their roots
and when the whole is made fairly solid,
which should be when the soil is slightly
on the dry side, the surface should be
lightly raked over with a blunt, short-

toothed rake, just enough to make the
surface even, after which a good soaking
of water might be given to start the
roots into active work.

JOHN N. MAY.

Hail Losses in October.

The Florists' Hail Association has
adjusted and paid during the month of
October, 1902, the following losses:

D. Grimes, Denver, Colorado.....	\$ 75.04
Wm. M. D. Eggling, St. Louis, Mo.....	560.10
Mrs. Margaret Ballard, Perry, Iowa.....	5.95
C. Hutchinson, Des Moines, Iowa.....	22.90
Wm. Mackle, St. Louis, Mo.....	10.26
Henry Johann, Collinsville, Ill.....	82.20
Michel Plant and Bulb Co., St. Louis, Mo.....	155.70
Chas. A. Juengel, St. Louis, Mo.....	25.50

To Rid Rose Bushes of Thrips.

ED. AM. FLORIST:—Kindly inform me
through your paper what can be done to
clean rose bushes in the field which are
infested with thrips. My Kaiserins, in the
open near Philadelphia, are as fine as
possible but out of hundreds of buds cut
practically none were salable on account
of thrips.
J. H. B.

To destroy thrips in the open air is
rather a difficult matter, particularly
during a wet season. So far as my expe-
rience goes, the best remedy is to make a
solution of tobacco in which some Per-
sian insect powder is mixed and keep the
rose bushes thoroughly syringed with it
every other day for two or three weeks,
or until the pests are exterminated, which
usually takes five or six applications.
To make the above, take a good bunch

of tobacco stems, steep them in cold
water for twenty-four or thirty hours,
drain all the liquid out and add half an
ounce of the powder to each gallon of
liquid. Keep it well stirred while apply-
ing and syringe every part of the plants
thoroughly after the sun has gone down.
If applied when the sun is shining brightly
the leaves are apt to be burned.

JOHN N. MAY.

Chrysanthemum Society of America.

The seedling committees of the C. S. A.
meet each Saturday until the end of
November, as follows:

Boston, Mass.—E. A. Wood, chairman,
care of Boston Flower Market, Park
street; James Wheeler, William Nichol-
son.

New York, N. Y.—Eugene Dailedouze,
chairman, care of New York Cut Flower
Company, Twenty-sixth street and Sixth
avenue; James W. Withers, William H.
Duckham.

Philadelphia, Pa.—A. B. Cartledge,
chairman, 1514 Chestnut street; William
K. Harris, John Westcott.

Chicago, Ill.—James S. Wilson, chair-
man, care of J. B. Deamud, 511 Wabash
avenue; George Stollery, E. Wienhoeber.

Cincinnati, O.—Albert Sunderbruch,
chairman, care of Cincinnati Cut Flower
Company, 437 Main street; James B.
Allan, E. G. Gillett.

Exhibits to receive attention from the
committees must in all cases be prepaid
to destination, and the entry fee of \$2
should be forwarded to the secretary not
later than Tuesday of the week preceding
examination.

Anyone having a variety in season
after dates fixed, can have the same
passed upon by specially notifying the
the chairmen of committees.

Poor Results With Phalaenopsis.

ED. AM. FLORIST:—I have a house of
Phalaenopsis Schilleriana and P. amabilis
which make fine growth, this summer
being no exception to the rule, each plant
having from six to seven leaves and now
showing flower spikes. But I don't get
a nice spike of flowers. There are twelve
to fifteen buds on each spike, but only
four or five open at the same time and
fade after four days, where they should
last for weeks. What could be the cause
of this?
L. H.

The symptoms described point to a lack
of something in the way of nourishment,
to put vigor into the plants to enable
them to produce good spikes and support
them when on the plants. The case is
usually reversed in the experience of most
cultivators of phalaenopsis; that is to
say, the plants produce spikes of bloom
beyond their power of supporting and,
owing to being without the physical
support of pseudo-bulbs, the leaves are
often cast off to enable the plant to
recuperate.

If in this case good healthy leaves are
produced, proving that atmospheric con-
ditions are all right as far as tempera-
ture and moisture are concerned, the
experiment should be tried of atmos-
pheric feeding, a sprinkling once a week
underneath the plants, of drainage from
the horse or cow barn, preferably the lat-
ter, as it is not so pungent and still con-
tains four-fifths of the manurial elements
or salts that come from that source.
Before using it may be diluted consider-
ably, though it may be used for vaporizing
at a strength that would kill everything
it touched if applied directly to the plants.

The Cookson formula might also safely and profitably be used for watering; it nourishes and provides just the needed amount of stimulus to keep orchids on the up grade, and is suitable for all kinds.

There is no reasonable doubt that most of the thousands of orchids imported that have deteriorated have been literally starved to death, especially *Laelias* and *cattleyas*, which are gross feeders, if cultivators could only realize it, and apply the doses in a homeopathic way by making the same easily assimilated and applying every time the plants need water. We keep Cookson's stock solution in a tank under the benches and a Kinney pump is attached to the faucet over it, so that even when spraying overhead the plants are treated to food and drink at the same time. If anyone doubts the value of it they should see how seed and seedlings of orchids thrive under this system. E. O. ORPET.

OBITUARY.

CHARLES H. MILLER.

Charles H. Miller, landscape gardener, of Philadelphia, died November 2 at his home in Mount Airy. Mr. Miller was born in Manchester, England, in 1829. He studied landscape gardening and was graduated at the Royal Gardens, Kew. Mr. Miller came to America in 1858, his first charge being in South Carolina. Before long he removed to Philadelphia, where he made his home permanently. Mr. Miller was an expert in his profession, as evidenced by the many beautiful private estates which were planned and laid out under his supervision something over twenty-five years ago. He was appointed consulting landscape engineer at Fairmount Park. For the Centennial Exposition he was made chief of the bureau of horticulture, which gave him an opportunity to display his talents, and the grounds were laid out under his directions. The sunken terrace in front of Horticultural Hall, planned by him, has always been much admired. Mr. Miller founded the tree and nursery business of Yates & Company, the firm name being Miller & Hayes, then Miller & Yates. Mr. Miller finally withdrew in 1887 and devoted his whole attention to his profession. He was always prominent in the affairs of the Pennsylvania Horticultural Society and was a vice-president at the time of his death. He leaves a widow and two daughters.

K.

Denver.

VISIT TO A BUSY AND SUCCESSFUL YOUNG GROWER.—SPLENDID CHRYSANTHEMUMS.—STATE OF TRADE.—PERSONAL AND OTHER NOTES.

Geo. Brenkert, one of our hustling young growers, invited several of his friends among the trade to spend an evening with him last Wednesday. We took occasion to look around and found his place in tip-top shape for the coming season. His best thing is a house of chrysanthemums containing about 8,000 flowers of the best varieties, Timothy Eaton, Appleton, Robinson, Viviani-Morel and Golden Wedding being grand. They are the finest lot to be seen in the city and he is particularly fortunate in having them late, as aside from Robinson he would not have to cut till Thanksgiving day. Eaton and Appleton will hold on till Christmas. His carnations look

good and strong, with a small cut at present but very promising later on. Mr. Brenkert is a Detroit boy and came here about six years ago, going to work for the Colfax Avenue Floral Company, with whom he staid for four years, when he took the Waterbury place at University Park. With his ability to hustle he has the place in grand shape and deserves a good season for his work. We were treated to a liberal spread besides an enjoyable evening of music.

J. A. Valentine, president of the Park Floral Company, is confined to his bed with a very painful illness. He had intended taking in the flower show at Kansas City this week, but began ailing about ten days ago and the last week has been in bed. It will be some time before he is around in good shape again.

Trade is fair, with supply of stock ample, chrysanthemums being in rather heavily at present, although as the season advances and the better ones come on, they go better. What few Eatons and Appletons have come in sold well.

The Daniels & Fisher Stores Company will hold their chrysanthemum show at their store Wednesday and Thursday of this week. B.

CLARINDA, IA.—R. L. Wilson has purchased the John Glazby greenhouse property here for \$4,000.

WHITMAN, MASS.—David B. Younger, an employe of Robt. E. Moir, died at the home of Mr. Moir on October 28, after an illness of several months.

SITUATIONS, WANTS, FOR SALE.

Advertisements under this head will be inserted at the rate of ten cents a line (six words) each insertion. Cash must accompany order. Plant ads. not admitted under this head.

Every paid subscriber to the AMERICAN FLORIST for the year 1902 is entitled to a five-line WANT ADV. (situations only) free, to be used at any time during the year.

SITUATION WANTED—By a gardener, on a private place; competent grower of cut flowers, plants and exhibition stock. Address A. O. W., care American Florist.

WANTED—Man for general greenhouse work; state wages wanted. Address F. BEP., 2780 North 40th Ave., Chicago.

WANTED—Single man for general greenhouse work; must have experience. State wages, with board. M. I. O'BRIEN, Sharon, Pa.

WANTED—An artistic floral decorator used to first-class trade. Must have best reference. Address A. WARENDORFF, 1193 Broadway, N. Y.

WANTED—A young man that understands the care of palms and ferns. Apply at once to SMITH & FETTERS, 148 Euclid Ave., Cleveland, O.

WANTED—Experienced carnation grower at once. Good wages and steady position to the right party. Address J. P. THOMPSON CARNATION CO., Joliet, Ill.

THE SEED TRADE.

AMERICAN SEED TRADE ASSOCIATION.

WALTER P. STOKES, Pres.; C. N. PAGE, First Vice-Pres.; S. F. WILLARD, Wethersfield, Conn., Secy and Treas.

VISITED CHICAGO: A. G. Samuel, manager Missouri Valley Seed Company, St. Joseph, Mo.; H. A. Johns, Sioux City, Ia.

Stocks of Alaska peas grown by farmers under ordinary field crop conditions are being offered at reduced prices.

ARMOUR & COMPANY are advertising in Chicago papers for celery packers in their produce department at the Union Stock Yards.

D. L. SLOAN, of Palo Alto, and Chas. G. Kimberlin, of Santa Clara, are the first of the California seed growers to visit Chicago this year.

St. Louis.

NOTES OF AFFAIRS AT THE MISSOURI BOTANICAL GARDEN.—GOOD STOCK IN THE HANDS OF GROWERS.—CEMETERY PEOPLE WANT RAIN.—TRADE NOTES.

The Missouri Botanical Garden has a very fine collection, some 250 varieties, of dahlias that are all in full bloom and all colors and shapes are to be seen. They have been under the direct care of Mr. Barnes and W. Nebeling. The garden will have a very complete collection of gladioli next year. From sixty-five to seventy species will be represented by some 1,500 to 2,000 varieties and hybrids. These will be under the care of Frank K. Balthis, who will also at the same time gather as complete a collection of fuchsias as possible. The eight new houses are all filled and as fine a range of low greenhouses cannot be found in this section of the country. The orchid houses, under the care of Geo. McClure, are very fine. He has also the fern, cycad and bromelia houses under his supervision. There are Cycas revoluta with from sixty to 100 leaves and stems several feet in length. The cacti are under the care of Fred. Luke, and the chrysanthemums under the care of Mr. Schmidt and Mr. Bonas. Mr. Gurney is in his usual good health and always glad to see his friends.

The market has picked up a little but is still quite slow. Some very fine Meteor and Liberty are coming in and as high as \$8 has been paid for very select flowers. Other varieties bring up to \$5. Roses have slacked up to a very noticeable extent this week, owing to the dark weather. Carnations are very plentiful. Violets are a glut and 20 cents per hundred is about the average price. Chrysanthemums are fine and coming quite lively. The best price is \$3.50 per dozen. The city parks are giving away chrysanthemum plants to those who should be good buyers. It will be brought before the next club meeting, at which there will also be a showing of cut chrysanthemums.

At the Koenig Floral Company's greenhouses everything is looking nice and a fine show of chrysanthemums is on. Among them are such varieties as Mrs. Perrin, Mrs. H. Robinson, J. H. Troy, Homestead and V. H. Hallock, principally in pots although a bench is planted out and these are looking very fine. They have sold a large number of potted plants this fall. They have also a very nice collection of geraniums, of which they use a large number in the spring. English ivies are to be seen in large numbers at this place.

The Meinhardt greenhouses show fine

potted chrysanthemums and Boston ferns. There is a very large demand for English ivy and myrtle in the adjacent cemetery. They are crowded with orders which they have been holding back on account of the dry weather. R. J. M.

Springfield, Mass.

STOCK PLentiful AND TRADE FAIRLY ACTIVE.—PLANTS ARE MOVING RATHER SLOWLY.—FLORIST GOES ONTO THE STREET.

The weather has been ideal the past two weeks. Cut flowers are plentiful, with a steady demand. Chrysanthemums were never better and find a ready sale. Carnations and roses have improved in quality, also violets. Potted plants do not move very fast, excepting Boston ferns, for which there is a steady demand. Now that the coal question is about settled greenhouse men are more contented and are getting plants ready for holiday trade. Stock looks well considering that there has been very little firing.

Springfield is getting a taste of the street fakir. One of the florists sends a man on the street every Saturday night, selling carnations for 15 cents per dozen, which I think is bad policy and does the trade no good; 35 cents is low enough if you are going to pay the grower anything. The worst part of this street selling is that the man gets between two of our best florists, who have to pay large rents. It is bad enough when the Greek gets on the street, but worse still when one of the oldest florists resorts to such measures.

F. Vetter, who has been the past four years with M. Aitken, has resigned his position, having gone to Mr. Carmichael, of Wellesley, to take charge of his ranges of houses. A. B.

Joliet, Ill.

The Joliet Improvement Association, of which F. S. Allen is president, has arranged for its first flower show on November 20—22, at which a list of cash prizes will be offered. The Chicago Carnation Company and J. D. Thompson

Carnation Co., of this city, as well as the private conservatory of Col. Ino. Lambert will each make large exhibits, while there will be a number of exhibits from out of town growers. From present indications the show will be quite a success.

New Orleans.

ALL SAINTS' DAY MAKES A NEW RECORD FOR BIG BUSINESS.—HOME GROWN FLOWERS LARGELY IN EVIDENCE.—NOTES.

The florists of New Orleans do not have a chrysanthemum show this year. They complain that the public does not patronize them enough to justify the expense. It is no wonder when we have every season, on November 1, such a fine exhibition of flowers as we have. This year has been the banner All Saints' day. For the last fifteen years never was such a quantity of flowers disposed of on that day. Our home grown chrysanthemums were offered in profusion. The prices were from \$1 to \$4 a dozen and it was a clean sweep. This year some very fine chrysanthemums were raised under glass and no doubt they will be more plentiful another year. We must still admit that for some time to come we shall have to depend on the north for some kinds of fancy flowers offered here and at a high price. Some people will always think that the more they pay the better it is, but no doubt the bulk of our supply for that day will never again come from the north; we can raise most of what we need.

Artificial flower designs are in very poor demand. Made up designs of any kind are also out of date. Bunches of loose flowers are what are wanted. Dahlias are going out of fashion.

M. M. L.

ANSONIA, CONN.—Messrs. H. Schlottman and G. E. Crane have leased the Elm street greenhouses.

MENLO PARK, CAL.—S. E. Slade is building a large range of glass for carnations, palms and ferns. George Munn is in charge.

Wholesale Price List for Florists and Market Gardeners.

THE NURSERY TRADE.

AM. ASSOCIATION OF NURSERYMEN.
 CHAS. A. LOENFRITZ, Pres.; D. S. LAKE, Vice-Pres.; GEORGE C. SEAGER, Rochester, N. Y., Sec'y.
 Twenty-eighth annual convention, Detroit, Mich., June, 1903.

J. K. HENLEY & SON, Greenfield, Ind., report this the busiest fall season and the best year on record.

THE expanding markets for American fruits are an assurance of continued prosperity in the nursery trade.

THE U. S. Department of Agriculture is aiding in experimental shipments of various fruits to European markets.

CHARLES E. GREENING will hereafter conduct the nursery business at Monroe, Mich., his brother, George E. having retired after twenty-five years with the firm.

THERE is a good sale on grape vines, including the fancy table varieties for home consumption. This is an item in which florists could work up a good trade with a little effort.

PROF. W. B. ALWOOD says that the San Jose scale matter is of much more importance in Virginia than in states further north, because of climatic conditions which favor the spread of the pest.

Minneapolis.

CHRYSANTHEMUM IMPAIRS VALUE OF ROSES AND CARNATIONS.—STOCK PLENTIFUL.—NOTES OF GROWERS AND RETAILERS.

Trade conditions show no decided change except that the chrysanthemum has carried down the market on tea roses and carnations. The chrysanthemums are of superior quality this season and plentiful, bringing from \$5 to \$15 per hundred. White carnations, which have heretofore been in limited supply, are sufficient to meet all demands and red is now scarce.

The Wm. Donaldson Company made their annual greenhouse fete a great success. There was a large attendance and the greenhouses made a remarkably fine appearance. There were refreshments and music. Under the supervision of James Souden no detail of the affair was lacking.

Northrup, King & Company open their new flower store this month. It will rank as one of the most attractive retail cut flower stores of the northwest.

Thomas Hall, of the Lakewood Cemetery Greenhouses, and Thos. Lynes, of the East Side Floral Store, were out for a duck hunt a few days ago. C. F. R.

Providence, R. I.

CHRYSANTHEMUM CROP MOVING TO GREAT SATISFACTION TO GROWERS.—RETAILERS FIND IT DIFFICULT TO REALIZE USUAL PRICES.—VARIOUS NOTES.

On the whole business was not satisfactory last week. Chrysanthemums are moving from the growers' hands in good quantities, but the retailers find it hard to obtain the customary profit; in fact, it sometimes becomes necessary to take the best offer. From a growers' standpoint this is going to be an excellent year locally, for it is evident that good fortune has so arranged it that there will be no serious glut. Everybody seems to have planted at just the right time to insure a ready sale in a normal market. At this moment it looks as if chrysanthemums will come in regu-

larly and not in any great overplus for the entire season.

Carnations and roses are depending upon design work to move them regularly. Chrysanthemums range from \$5 for Ivory to \$7 and \$8 for Bonaffon and \$15 for Eaton and Appleton.

L. B. Williams has a crop of Ivory ready to cut, which would flood the market at any other time, but this year he has struck it right, for white stock is in demand at present.

J. G. Jensen never had better flowers, with a mixed crop, probably lasting till fall Thanksgiving. His pink varieties are especially good. Incidentally it might be mentioned that we have not been favored by any respectable pink chrysanthemums thus far.

Ernst Carl has a fine display not quite ready, but promises to be all right by November 10. The foliage is good, although the plants are very close together. M. M.

OUR PASTIMES.

Announcements of coming contests or other events of interest to our bowling, shooting and sporting readers are solicited and will be given place in this column.

Address all correspondence for this department to Wm. J. Stewart, 79 Milk St., Boston, Mass.; Robt. Kift, 1725 Chestnut St., Philadelphia, Pa.; or to the American Florist Co., 324 Dearborn St., Chicago, Ill.

At Chicago.

The Florists' League got down to business on Tuesday evening, November 4. The Retailers defeated Vaughan's Seed Store three games and the McKellar & Winterson team beat the Wholesalers three. The two latter rolled with six men. Quite a number of ladies were present. Following is the score:

GROWERS SHOW GOOD PROGRESS DESPITE OBSTACLES.—NOTES OF A VISIT TO HYDE PARK.—MARKET SHOWS LITTLE CHANGE.—CHRYSANTHEMUMS SELLING BELOW PROFIT LINE.—VARIOUS LOCAL NOTES.

The writer spent a pleasant afternoon last Monday at George & Allan's establishment at Hyde Park. Notwithstanding the fact that the grub worms played havoc with their roses, the place is in first-class shape. Mr. Allan at present is visiting his parents near Boston and incidentally the growers about that city. He gives some glowing descriptions of some of the places he has seen, in the letters he writes to the boys. He has been absent for a month and of course all the responsibility of their large and increasing business rested on the shoulders of "Benny" George, who was equal to the task. Because of the grub worms they had to throw out one house of roses, which has been filled with Harrisii and longiflorum lilies. The former stand about twelve inches high and are free from disease. It seems strange to see 4,000 or 5,000 plants and not a dozen affected, as in former years, when about twenty-five or thirty percent had spotted

leaves. They are very strong on Paper White narcissi, having about 80,000 bulbs to force, some of which they now have in flower. One house of Beauties and Perles is grand. Two houses of carnations look healthy and promising. One house of smilax is now being cut out and Mr. George says has yielded exceptionally good returns. Another house coming along will be ready to cut in about two weeks. A fine lot of Adiantum cucucatum fills one entire house. Chrysanthemums, grown three to four blooms to a plant, are exceptionally early this year, their Bonaffon being all cut out on November 3. The whole Hyde Park establishment is now used for growing cut flowers, they having transferred all the pot plants to the Walnut Hills greenhouses.

The glut of roses has diminished to some extent and business is about the same as at last report. There was a big lot of flowers used for All Saints day and Sunday found the commission houses pretty well cleaned out. Chrysanthemums are coming in more abundantly and I believe for the next two weeks there will be more than enough to meet all demands. The writer saw a vase of chrysanthemums this week in one of the store windows, which looked like exhibition blooms, and I took the liberty of asking the proprietor what he had paid for them. He showed me the bill and \$1.50 per dozen was the price. It is impossible for any grower to produce this article at that price less fifteen per cent commission and make anything unless he gets his labor for nothing. Carnations are in good supply and enough for all orders. Beauties are in fair demand and not enough to go around. Lily of the valley is fine and sells fairly well. Paper Whites have made their appearance but do not sell well. Adiantum and smilax are in good supply, with fair demand.

Nathan Smith & Son, of Adrian, had a very fine chrysanthemum before the committee last Saturday; the flower was fine in form and a beautiful shade of pink but the stem was a little weak. "Tom" Hardesty was very enthusiastic over it. The name is Ethelyn.

Saturday, November 8, we will have an exhibition of chrysanthemums at the club rooms in the Jabez Elliott Flower Market and to read some of the descriptions given in the daily press, there will be some wonderful varieties on exhibition.

Hardesty & Company had a unique dinner table decoration last Saturday at the St. Nicholas for a party of race horse owners. The table was set in the form of a race track, with paddock, stables and all the rest made of flowers.

Paul Berkowitz was a caller the past week.

PEORIA, ILL.—J. C. Murray has stock in fine shape at present. Joseph B. Feldman is the grower in charge.

Columbus, O.

NO FROSTS TO KILL OUTDOOR STOCK.—LOADS OF CHEAP CHRYSANTHEMUMS HURT FLORISTS' TRADE.—DOINGS OF GROWERS AND OTHERS.

The weather continues warm, with geraniums and cannas in full bloom November 1 where buildings protected them from north winds. There are even a few coleus beds doing fairly well at this writing. Chrysanthemums are in full bloom in the open gardens and wagon loads are carted to the public market places, where they are sold at any price. While a great proportion of this stock is of the small type, it cannot help but have a damaging effect on the sale of the better stock produced by our growers. Notwithstanding this glut our local trade last week was very satisfactory and there are few complaints.

George Miller, of Newark, O., has purchased the Affleck greenhouses and will move them to Newark, where they will be added to his already large establishment. Mr. Miller made some extensive improvements during the past summer, in the way of a fine office with entrance into a modern palm house. He reports his fall seed trade the largest in the history of his place.

Miss Charles has opened a new store in the Park Hotel block. This is the first cut flower store of consequence opened north of the viaduct and it is the unanimous wish of all the members of the craft that this young lady will prosper.

The Underwood Bros., whose stock was not quite up to their usual standard last fall on account of delay in building, have made up for last time, as everything is now in prime condition.

There are but few violets as yet in this market. C. A. Roth and the Livingston Seed Company are handling most of these.

Gravett & Son, of Lancaster, O., report carnations as moving slowly although the stock is of the very best. CARL.

COLORADO SPRINGS, COLO.—Wm. Clark is building eight large greenhouses on his ranch at Roswell, to be used for carnations, roses and violets. Mr. Clark expects in the near future to move his entire plant to Roswell, his city property being most too valuable for greenhouse purposes. Roswell is just outside of the city limits of Colorado Springs.

BUCKLEY'S November Special.

Smilax Do you need Smilax? If so, forward your order at once and we will furnish you extra fine 2 1/4-inch at 50c per 100; \$5 per 1000.

Geraniums Extra strong, rooted cuttings, well-rooted and correctly labeled. Varieties: Jean Viaud, \$2.00 per 100; S. A. Nutt, Alphonse Ricard, Beante Poitevine, E. G. Hill, Mme. Jaulin, Mme. Bruant Morton, Dutchess of Orleans, \$1.50 per 100; \$12.50 per 1000, in variety.

Verbenas Our 20th Century Collection, 25 new mammoth varieties, all labeled, strong plants from 2 1/4-inch, \$1.50 per 100; \$12.50 per 1000.

Asp. Sprengeri Strong, 2 1/4-inch, \$2.00 per 100; 2-inch, \$1.25 per 100; \$10.00 per 1000.

Petunias Ten novelties from Dreer's latest sets, strong R. C. \$1.25 per 100.

OUR DIRECTORY FOR 1902 WILL BE MAILED TO YOU PROMPTLY UPON APPLICATION. PRICE TWO DOLLARS.

Louisville, Ky.

A VARIETY OF JOTTINGS OF TRADE CONDITIONS.—PERSONAL MOVEMENTS AND OTHER NOTES.

Cut flowers are wholesaling here as follows, just now: Golden Gate, Bride, Bridesmaid, \$1.50 to \$2.50 per hundred, according to quality; Kaiserin \$3 to \$5; Beauties, average stock, \$1.50 per dozen; chrysanthemums \$6 to \$15 per hundred; carnations \$1 to \$1.50 per hundred.

The weather has been exceedingly warm this fall, and business rather slack, but the last week the temperature was lower and business has kept all the florists busy, so that few flowers have gone to waste.

Rudolph Schelm, Jr., for a number of years employed by F. Walker & Company, at their Fourth avenue store, died recently of typhoid fever, aged 21 years.

C. W. Reimers recently supplied 1,700 cut chrysanthemums in a wedding decoration. He is cutting a fine lot of Beauties and finding ready sale for them.

C. H. Kunzman and Louis Kirch, the two carnation specialists, are cutting fine carnations for this season and find ready sale for them.

Chas. Rayner has just completed planting his new range of carnation houses and is cutting very good blooms.

The sale of bulbs and nursery stock has been rather slow up to this time, owing to continued warm weather.

T. B. Rudy has added another story to his residence. H. G. W.

Hamilton, Ont.

The Hamilton Gardeners' and Florists' Club held its regular meeting on Tuesday, November 4. It was the yearly business meeting, for the election of officers. The following were elected: President, Thos. Lawson; vice-president, E. J. Townsend; secretary, Charles M. Webster; treasurer, Dave McLeod; auditors, Samuel Aylett and Jay C. Jenks.

The club has been organized only one year and has made very satisfactory progress. The treasurer reported a balance of \$14.65 on hand. There are a very large number in and around Hamilton engaged in the trade and the prospects for a big club are good.

AURORA, ILL.—A. J. Erlenborn has bought the interest of Fred. Grometer in the paper and seed business of Erlenborn & Grometer.

FINE AUTUMNAL WEATHER.—OUTDOOR STOCK NOT YET GONE.—MANY GOOD CHRYSANTHEMUMS AVAILABLE.—VARI- OUS NOTES.

With the continued fine weather and not much frost, quite a number of out- door flowers find their way to the mar- ket. In the stores trade is picking up a little of late. There has been quite a number of weddings, but most of the decorations were on a small scale. The American Rose Company made the bou- quets for the wedding of State Senator Brown's daughter at Crisfield, Md., using about 8,000 violets. They are cutting some fine chrysanthemums, Mrs. F. L. Button, Robert Halliday and a few vari- eties of the latest pompons.

The show at the Department of Agri- culture is drawing large crowds of visi- tors. They fitted up the house with electric lights and have it open until 10 o'clock at night. At the propagating garden they have opened their chrysan- themum house to the public and are giv- ing a rival show with a fine lot of flowers, all on single stems.

J. H. Small & Son, J. R. Freeman, A. Gude & Brother, C. Schellhorn and J. Louis Loose are all cutting fine chrysan- themums.

The growers are feeling somewhat casier about the coal question. P. G.

Mansfield, O.

BERNO FLORAL COMPANY PROSPERING.— GOOD STOCK AND HEAVY CUTS.—PER- SONAL NOTES.

The Berno Floral Company has added a splendid carnation house to its already extensive range and has made various other improvements about the establish- ment. While growing a general stock for their retail trade, it is the intention to pay especial attention to roses and carnations. Their stock is in fine condi- tion, yielding considerable for present use and promising fine crops for the near future. Their chrysanthemums have never looked finer.

Young Mr. McKellar, of Chillicothe, has accepted a position with the Berno Floral Company.

Mr. Berno, who has been on the sick list during the past summer, is improving in health. NOMIS.

COLORADO SPRINGS, COL.—J. R. Coryell, manager of Gen. Wm. R. Palmer's fine estate, has just completed two fine iron- frame greenhouses, one 25x111, the other 28x111.

The Model Extension Carnation Support.

Flushing, Long Island, Dec 11th, 1901.

MR. THERON N. PARKER, Brooklyn, N. Y.

Dear Sir - I have used your Wire Carnation Support the last two years, in all about 12,000. They fill the bill in every particular. Nothing could be more satisfactory and would give me a great deal of pleasure if I can bespeak a good word for you to the trade and you are at liberty to refer to me at any time.

Very truly, A. L. THORNE, La Fayette, Ind., July 8th, 1902.

MR. THERON N. PARKER, Harrison, N. J.

Dear Sir: - After using your Model Carnation Support in two of our houses the past winter, we have come to the conclusion that it is perfectly adapted to supporting carnations, and shall use them on all our plants the coming season.

We were much pleased with the simplicity, strength and neat appearance of the support

Toronto.

NEW CARNATIONS DOING FINELY AT DUNLOP PLACE.—ROSE HOUSES MAKE FINE SHOW.—MANY CHOICE CHRYSANTHEMUMS IN MARKET.—OCTOBER THE BANNER MONTH.

At John H. Dunlop's, I find the place is in splendid shape and all evidence of building is over for this season. In the rose ranges stock was looking very vigorous, American Beauties on several benches being particularly good, the foliage having that healthy, glossy appearance so desirable in growing stock. His house of Liberty is producing very good blooms, at which Mr. Dunlop is more than pleased, this variety having been a conundrum with him for the past two years. The plants are mostly grafted and have been carried over from last season. Balduin and Ivory have done well and the older sorts have all made good breaks. In the carnation range nearly all the newer varieties of the past season are seen, and are mostly doing well. The dark sort, Harry Fenn, is very fine and its productiveness seems about two to one compared with others. In white Governor Wolcott, Norway and Lorna are doing exceptionally well. Alba has shown a few good blooms but the plants are small and have not made the growth of the other varieties. In fancies, Gaiety is also doing well, while Viola Allen and Stella are noticed in very good shape. J. H. Manley, Mrs. Potter Palmer, Higginbotham, Golden Beauty, Cressbrook and Mrs. Nelson are promising well.

October was the busiest in many years and reports on all sides are satisfactory, most firms having exceeded the record month of last year, when the visit of royalty was so favorable for florists. The first few days of this month have not been so brisk, made more noticeable by the large amount of stock which is coming in. Very fine chrysanthemums are in evidence everywhere and, as there is to be no show, the best flowers are now making the stores attractive. Prices of cut stock are uneven, many bargains being offered. The most favorable weather has oversupplied the market with exceptionally good roses. Carnations are also in heavy crop and the sales hanging somewhat. Violets are becoming plentiful, singles selling more readily than doubles.

The union of the florists' employes is progressing rapidly. They have affiliated with the American Federation of Labor and at the last meeting, at Richmond Hall, four new members were enrolled. Jas. Atkins, of Government House, was elected president, and G. Cooper secretary.

A new addition to the family has been the cause of Andrew Frost's bright demeanor. H. G. D.

NORRISTOWN, PA.—Robert Hull has a fine show of chrysanthemums.

Bargains FOR Florists.

We are headquarters for a general assortment of the necessary material and supplies that you are looking for. If you are about to improve or construct, consult us.

In connection with the dismantling of the Pan-American Exposition, we have for sale:

20,000,000 FEET of fine seasoned lumber, practically new, consisting of all sizes of joists, timbers, dressed and matched boards and flooring; also sash and doors.
50,000 FEET of roofing glass.

PIPE.

We are headquarters for pipe. We offer you:

100,000 FEET of 2 to 4-inch wrought iron, lap welded casing. We can furnish this material in three ways: Either with sleeve or jacket couplings, screwed ends and threaded couplings or with expanded cast iron flanges with bolts and nuts.

1,000,000 FEET of standard black wrought iron pipe, size $\frac{3}{8}$ to 12-inch. It is second-hand but has new threads and couplings and is in first-class condition.

1,000 TONS of galvanized wire 9, 10, 11, 12, 13, 14 and 15 gauge.

50,000 FEET of 2, 3 and 4-inch cast-iron soil pipe and fittings.

100,000 FEET of garden hose, $\frac{3}{4}$ and 1-in. **75,000 FEET** of cotton rubber-lined fire-hose, (rubber-lined in and outside), ranging in sizes 1 to 2 1/2-inch.

VALVES and fittings of every kind.

BOX COILS for heating purposes.

RADIATORS, new and second-hand.

We also offer the following bargains in

Heating Boilers

50 CAST-IRON sectional heaters, capacity from 450 to 5,000 feet.

1 NO. 2 Standard Kroeschell hot water heating boiler.

FOUR 36x10 Horizontal Tubular.

FOUR 36x12 Horizontal Tubular.

FIVE 42x10 Horizontal Tubular.

FIVE 42x12 Horizontal Tubular.

SIX 48x14 Horizontal Tubular.

TWO 54x16 Horizontal Tubular.

FOUR 60x16 Horizontal Tubular complete with all fittings.

PUMPS of all Descriptions.

A carload of shovels and spades that we are selling at \$5.00 per dozen.

We carry a complete stock of hardware and farm implements, besides plumbing material of every kind.

Write for Catalogue No. 47.

 W. 35th and IRON STS., CHICAGO, ILL.

Albany, N. Y.

PARK DEPARTMENT MAKES GOOD SHOWING OF CHRYSANTHEMUMS. — LARGE PLANTING OF BULBS.—TWO NEW CUT FLOWER GROWING ESTABLISHMENTS.—VARIOUS NOTES.

The annual exhibition of chrysanthemums held under the auspices of the park department opened on Monday in the Lake House, Washington Park, and will continue daily until the season closes. The exhibit this year includes 600 plants, comprising a very complete collection of varieties and ranging from the golden yellow Earl of Arran to the largest white, Timothy Eaton. The exhibit will be kept fresh in appearance by frequent replenishment from the conservatories on Lake avenue.

W. W. Hannell, formerly employed as gardener for Sambrook & Son, Water-vliet, has started a place of his own at Colonie, a suburb. He has two new houses, 24x150 feet, erected by the Lord & Burnham Company. One house is stocked with Bride, Bridesmaid and Golden Gate roses; the second with carnations, including Lawson, Queen Louise, Marquis and Prosperity. Mr. Hannell has in all five acres of ground and will grow for the wholesale trade.

The park department has just completed the planting of 51,000 tulip and hyacinth bulbs in Washington and other smaller city parks. The Willett street garden, Washington Park, made up of forty-eight beds, required 45,000 bulbs. Supt. Egerton has adopted the plan of saving all the bulb stock for at least two years, replanting and buying each year only so much as is required to make up for the losses in handling.

Arthur Cowee, the gladiolus specialist of Berlin, has secured the services of a competent grower from Saratoga and will raise chrysanthemums, carnations, violets and roses for the market this winter. Mr. Cowee has just planted one house with American Beauty.

Whittle Brothers have secured the contract to supply the Hotel Ten Eyck with palms, potted plants and cut flowers for the dining rooms until March 1, 1903.

G. W. Goldner, representing Reed & Keller, New York, was in town early in the week. R. D.

MONTREAL, QUE.—S. S. Bain has had a chrysanthemum show at his greenhouses at Verdun and the street car people helped it along by carrying passengers the entire distance for one fare.

CROP INSURANCE.
Life insurance is valuable because it guarantees the outcome.

"Gurney" Heaters

"BRIGHT IDEA," "DORIC" and "400 SERIES" do the same thing for your hothouse: **THEY GUARANTEE THE CROP.** First of all they save 20 per cent on the coal bill and so keep expense at a minimum. Next, they produce an even heat and so do not imperil the life of the plant. Next, they are simple to operate and so require least attention. Lastly, they wear longer than others and thus perceptibly reduce the capital invested. Don't buy or exchange until you've investigated them.

The Chrysanthemum.

Not in the joyous spring,
When every living thing
Is filled with joy and hope anew,
And all the earth takes on the hue
Of emerald—when e'en the trees
Burst into blossom, and the breeze
Is laden with their sweet perfume—
When crocuses and snowdrops bloom—
Not then you come,
Chrysanthemum.

Not in the summer time,
When honey-suckles climb
About the arbores—when the rose
Is queen, and all her buds disclose
Their beauties—when the world is fair
With loveliness, the former bare—
And ugly ground is carpeted
With flowers in profusion spread—
Not then you come,
Chrysanthemum.

But in the dull, drear day
Of autumn's sombre sway,
When coldly, cheerlessly, the rain
Beats mournfully against the pane,
And naked branches thwart the sky,
Wave drearily and make us sigh
For spring's soft days or summer's sun—
When winter's near, and life seems dun—
Ah, then you come,
Chrysanthemum.

And so we homage pay,
At your great shrine—o day:
Nor rose nor lily can displace
Your shabby beauty in our grace.
You are the grandest and the best;
Your coming is the welcomest;
Your reign is all your own, and now,
About your throne we humbly bow—
We're glad you've come,
Chrysanthemum!

—W. H. C., in the Kansas City Journal.

CHRYSANTHEMUM SOCIETY Of America.

FIRST ANNUAL
CONVENTION
CHICAGO, NOV.
12-13, 1902.

The first annual convention of the Chrysanthemum Society of America, held at the Art Institute, Chicago, November 12 and 13, has proved more successful than many of its best friends anticipated. It has proved beyond doubt that there is still vast interest in this flower, and that the national society may well look forward to a serviceable career. When the project was first launched at Asheville, N. C., last August, there were many who thought it was doomed to failure, but the assurances of support from the Horticultural Society of Chicago gave the movement an impetus which encouraged all its friends. These warm friends have never really wavered in their support of the society and they have always been willing to devote much time and work to the interests involved.

It is, therefore, highly gratifying to know that these persistent efforts are now in a fair way to be rewarded. It is true that some have fallen from the line in the many years of apparently futile work, but it should be remembered that even these are entitled to a share of any glory or triumph which may come to their successors. It was the pioneers in the organization's struggle for existence that made possible the large amount of good work it has accomplished in curtailing the dissemination of inferior varieties and the increase of synonyms. We trust the good work will now go on with the hearty co-operation and assistance of every chrysanthemum grower throughout the country.

With the largest and most representative gathering ever brought together of those interested in the society, it was soon after the appointed time, 10 a. m., that President Herrington called the convention to order. In the absence of Edwin Lonsdale, C. W. Johnson was appointed secretary pro tem. After waiting for a considerable time, however, it was found that the secretary of the convention committee had not put in an appearance and the meeting was adjourned until 2:30 p. m.

On re-assembling shortly after that time the meeting was called to order with President Herrington in the chair. The minutes of the previous meeting hav-

ing been read, President Herrington delivered his address. The reading of the report of the secretary was dispensed with as being familiar to most of those in attendance, but some suggestions of Secretary Lonsdale were presented. John N. May's report as treasurer was then read and referred to the executive committee.

Reports of committees having been called for, that on convention was presented, in the following excellent programme of essays, and adopted: "American Chrysanthemums in Europe," by C. Harman Payne, London, Eng.; "The Color Scheme in Chrysanthemum," by John F. Cowell, Buffalo, N. Y.; "Border Chrysanthemums," by Patrick O'Mara, New York; "Pompon Chrysanthemums," by John N. May, Summit, N. J.; "A Type and Its Treatment in the South," by F. P. Davis, Mobile, Ala.; "Foreign Chrysanthemums in America," by E. G. Hill, Richmond, Ind.; "Houses and Other Structures for Chrysanthemums," by Wm. Scott, Buffalo, N. Y.; "The Use of Chrysanthemums in Decorative Work," by Robt. Kift, Philadelphia, Pa.; "Hybridizing Chrysanthemums," by Elmer D. Smith, Adrian, Mich.; "Cut Bloom Chrysanthemums," by C. W. Johnson, Rockford, Ill.; "Chrysanthemum Exhibitions," by Grove P. Rawson, Elmira, N. Y.; "Chrysanthemums in Canada," by John H. Dunlop, Toronto, Ont.; "Specimen Plants," by T. D. Hatfield, Wellesley, Mass.; "History of the Chrysanthemum Society of America," by Edwin Lonsdale, Chestnut Hill, Philadelphia, Pa.; "The Future of the Chrysanthemum Society of America," by Wilhelm Miller, Ithaca, N. Y.; "Packing, Shipping and Storage of Cut Blooms," by E. E. Pieser, Chicago.

The committee in its report, owing to the large number and valuable character of the papers presented, and insufficient time in which to read them, recommended that only those of Mr. Payne and Professor Cowell be read, and that the entire list be printed and preserved in permanent form. After some discussion of this matter, during which Elmer D. Smith tendered the society his record of all new chrysanthemums introduced in America

since 1880, it was, on the motion of W. N. Rudd, seconded by John F. Cowell, resolved that the offer of Mr. Smith be accepted, and that the records be printed with the proceedings of the meeting, the papers presented thereat, and such other matters as the executive committee may consider of value to the members of the society.

This was followed by the reading of invitations to hold the next annual meeting at various points, one each from Dr. Hexamer, of the New York Institute, Niagara Falls and Buffalo. An invitation was also received from the World's Fair authorities at St. Louis for the meeting of 1904. After some discussion this matter was also referred to the executive committee.

The election of officers resulted as follows: A. Herrington, Madison, N. J., president; F. R. Pierson, Tarrytown-on-Hudson, N. Y., vice-president; John N. May, Summit, N. J., treasurer, and Fred. H. Lemon, Richmond, Ind., secretary.

Mr. Payne's paper, which appears in this issue, was then read and followed by an interesting discussion regarding the essayist's reference to the susceptibility of American varieties to mildew when grown in Europe. President Herrington attributed this infirmity to the difference in climate, a view shared by Messrs. Cowell and Hill. Referring to the size of the flowers, Elmer D. Smith said that exhibition varieties could be produced in this country with blooms equally as large as those of Europe, but that a different standard had to be maintained.

E. G. Hill advocated the trial at exhibitions of supplementary stems, well furnished with foliage, to support the weak-necked varieties with the large blooms which proved so attractive. The subject was freely discussed, Messrs. Cowell, Smith, Herrington, Wallace, Buettner and Johnson participating. As a result of the discussion it was resolved that the national society recommend exhibition managers to provide classes for such exhibits as a trial measure.

On the second day Prof. Cowell delivered an instructive address before a highly appreciative audience on "The Color Scheme in Chrysanthemum," illustrated with pigments extracted from flowers and plants, in solution. This valuable contribution to our knowledge of the colors in vegetable life and their causes will appear in a later issue and should be read by every reader interested in the growth and development of flowers and plants.

After the address some reference was made to the blue color sometimes seen in hydrangeas, and Emil Buettner stated that he had once tried Bride and Bridesmaid roses with iron, to produce blue flowers, without result.

During the executive session which followed, on the motion of Elmer D. Smith, seconded by E. G. Hill, an important resolution, governing the award of certificates to sports, was adopted, to go into effect on that date, as follows:

That all sports from existing varieties be submitted to three out of the five committees the average of the three scores to regulate title to certificate.

A committee was then appointed, consisting of W. N. Rudd and Elmer D. Smith, to draw up suitable acknowledgment of the gold medal and diploma donated by the French Society of Chrysanthemum Growers.

Reference was also made in appreciative terms to the expression of sympathy received from the National Chrysanthemum Society of England and the conven-

tion adjourned, subject to the call of the executive committee.

Thus far only two members of the executive committee have been appointed, viz., James S. Wilson, of Western Springs, Ill., and Wm. Duckham, of Madison, N. J., the other vacancy being left open for the present.

Treasurer's Report.

Treasurer John N. May submitted the following report:

Balance, August, 1901.....	\$520.32
Receipts.....	131.59
Disbursements.....	137.64

Balance November 10, 1902.....	\$514.27
--------------------------------	----------

President Herrington's Address.

The Chrysanthemum Society of America was organized at Buffalo in 1889, with the following aims: "To increase the general interest in the cultivation of the chrysanthemum. To improve the standard of excellence in the flower. To improve the methods of cultivation and

C. HARMAN PAYNE.

to increase its use as a decorative flower. To properly supervise its nomenclature; to keep a register of seedlings in order to prevent duplication of names; and to stimulate the growing and introduction of improved seedlings in every legitimate way."

The constitution under which we organized provided for an annual meeting to be held each year in November, but this proviso has been respected in the breach rather than in the observance, till to-day, after the lapse of a dozen years, the hope some of us have long cherished has, thanks to the munificence of the Horticultural Society of Chicago, been consummated, and we are in convention assembled with a specific purpose, and that is to be more active, more aggressive in the pursuit of our object and aims.

Through the years that have elapsed since organization the Chrysanthemum Society of America has done a lot of quiet but effective work, so as a prelude it is eminently fitting to review the past at this initial November meeting, to give an account of our stewardship before we attempt to anticipate the future and lay out plans for greater activity in the years to come.

Looking back, down the vista of years that have passed, the year 1894 marks an important epoch in the existence of our society. The faithful few that from its inception to date have maintained its continuous existence met during the convention of the Society of American Florists, held that year at Atlantic City, and devised the plan of having committees appointed in the following cities: New York, Chicago, Philadelphia, Boston and Cincinnati, these committees to meet and pass judgment upon any new varieties submitted to them, to gauge their merit by a standard scale of essential requirements, and to endorse those found worthy. The best testimony that can be adduced to demonstrate the wisdom of this action is the fact that these committees have met uninterruptedly ever since during the chrysanthemum season, that their endorsement of new varieties has been and is still eagerly sought after, and their judgments when rendered have been well sustained. By our works we are known, and it may in full truth be asserted that to this particular act the Chrysanthemum Society of America owes its past span of life, its existence to-day; and though many here present may be unconscious of the fact through not having given thought to the matter, the benefits that have accrued to chrysanthemum growers resultant from the labors of these committees have been of a lasting character and a strong safeguard against imposition. Intentional imposition is not by this implied; but a salutary check has been in existence that has prevented the foisting upon the public of an excessive number of new varieties, many of doubtful use or merit.

During these years the results have been as follows in certificates awarded by the C. S. A.: 1894, 28; 1895, 34; 1896, 54; 1897, 25; 1898, 33; 1899, 23; 1900, 17; 1901, 17. In eight years 131 varieties have gone out endorsed by the Chrysanthemum Society of America. Many of them, you will say, "like leaves on a stream, have come and gone and left no trace behind." We admit it; no judgment is infallible, but you will at least concede these judgments were conscientiously rendered, and if they did not eliminate all the chaff, the good grain was made more easy of discovery.

A fair percentage of the varieties certificated each year we are cultivating yet. For example, from the 1894 list we have Jeannie Falconer, J. E. Lager, Philadelphia and Helen Bloodgood, and from 1895 Mrs. Perrin, William Simpson, Modesto and Western King.

So much for the past. It is a record that stands, needs no apologies, justifies our existence as an organization, amply sustains our belief in the need of such an organization, and on this basis we stand to-day, asking more support and a stronger, more united effort in the pursuit of a work that must be continuous and can never be considered complete, for the chrysanthemum is here to stay. It has outlasted the short spau of popularity certain pessimists in this country presumed to concede it, is permanently enthroned as "queen of autumn" in the hearts of thousands of flower lovers, and has a history and a literature surpassing by far that of any other flower. It behooves us, therefore, as sponsors for the chrysanthemum in America, not only to maintain unimpaired its historical continuity, its ancient and honorable lineage, but as a precious heritage from the past, to hand it down to the future with the pages of its historical record amplified by good work performed in our day and

A VIEW IN THE MAIN HALL AT THE OHICAGO EXHIBITION, NOVEMBER 11-15, 1902.

time, so that American contributions to chrysanthemum lore, American production of new varieties, may be on a par with those of the orient, whence the flower first originated; of Europe with its 115 years of continuous work in the chrysanthemum field, and of the antipodes, whence comparatively new workers are now sending us new varieties surpassing any heretofore obtained.

So much to show how broad the field, and as a national society we should heed well the fact and so broaden our sphere of labor as to command the support of all who love this flower.

The cited record of work accomplished is good as far as it has gone, but the lines have been constricted; and commercialism has dominated it all. The chrysanthemum as a cut flower for the market must, of course, be adjudged by the qualities that benefit it best for this special purpose; and what we have accomplished along these lines may be summed up in a few words. We have made amazing progress. The commercial aspect of the flower is not in danger of neglect; it must be maintained to insure its profitable cultivation.

But, coincident with the growth in popularity of the chrysanthemum, in fact, the most striking feature thereof, is the number of chrysanthemum exhibitions held each year in almost every state in the Union, no other flower being so universally exploited in this manner. Visit any of them, and if you have had an opportunity of visiting similar exhibitions in Europe, you have an admirable standard for comparison and should find much to reflect upon, and to our dis-

advantage. The same varieties that are in the cut flower market are dominant; in fact, almost wholly constitute our exhibitions. From an exhibition point of view, the paucity of variety and the similarity of type are most disappointing. Perhaps there is some connection between this and the lack of public patronage that many deplore who arrange otherwise attractive exhibitions. Is it not worth while trying to make the chrysanthemum exhibition more attractive, and might not popularity follow as a sequel? We can not tell until we make the effort, and we must begin by systematizing our work, or rather pursuing it along divergent lines centering on a special objective point. By giving more attention to the varied types of exhibition flowers, we might enhance amateur interest; we might create a little army of amateur growers who would cultivate for their own pleasure hundreds of lovely varieties, whose only shortcoming is they are not amenable to commercial cut flower requirements, because they cannot be packed in a box, shipped to market and arrive in presentable form.

If it were possible to estimate all that has been lost, all the varieties that have been rejected in the past through appraising them from the commercial standpoint, it might surprise us.

A century of continuously increasing interest, love, and enthusiasm that marks the history of the chrysanthemum in Europe has not been fostered and sustained by restriction of variety and type. The European cut flower markets have their limited few adapted to this special need, but the gardens and greenhouses of

thousands of amateur growers are replete with collections of hundreds of varieties, and their annual exhibitions are self-sustaining by large attendance. Continuous change prevails. The varieties of a decade ago are not there to-day.

It is this inherent infinite variety of the chrysanthemum that attracts with the everlasting anticipation of seeing something new. It is needless to enlarge upon the possibilities before us in this direction but we cannot continually ignore them.

Again, over a large area of our country the chrysanthemum as an open-air flower should have attention. Here, indeed, is a new and wide field wherein to labor, and effort intelligently directed along this special line would be most advantageous to many. It should have the consideration and support of our society.

Another matter of importance is how as a society we may be truly national, the central and recognized head of chrysanthemum work in America. This is an executive matter and the initiative must come from within our own ranks. "Tis not in mortals to command success, but we'll do more, deserve it." Our committee work now commands universal respect. Let us devise ways and means to the end that all our work may do so. It should not be necessary for the Chrysanthemum Society of America to organize exhibitions every year. They are abundantly provided for, but the Chrysanthemum Society of America should be officially identified with some important exhibition each year, and in that place let the record of the year's work be made up and prospective lines laid down for the labor of the next year.

Cannot some arrangement be devised whereby the many existing local societies, the sole aim of which is the giving of a chrysanthemum exhibition, may by the contribution of a certain sum from their treasury become affiliated with the national society, which in return should offer medals or other suitable awards at the exhibitions of those societies in affiliation and in other ways assist in systematizing all that is done in the chrysanthemum field? Some such plan exists with the National Chrysanthemum Society of England and works to the mutual interest of all.

Our society, too, should take its place with other national societies in the matter of keeping records and publishing matter pertaining to its flower. We may regard lightly what we have done to date, but it will be of inestimable value if it is available to the future historian who writes up the record of the present time. Some of our faithful officers have this matter tabulated and compiled, but it loses half its value while unavailable for public reference. Our co-workers in England want to know what we are doing, and in one of their horticultural publications recently expressed a wish that we would publish a catalogue of American chrysanthemums, as was done some years ago, and by them found very useful.

These are some of the matters now respectfully submitted for your consideration, and there are doubtless others that will occur and be suggested, for "in the multitude of counselors there is wisdom," and we want to have the best thoughts of the brightest minds concentrated upon the cause of the flower we love.

American Chrysanthemums in England.

BY C. HARMAN PAYNE, LONDON.

[Read before the Chrysanthemum Society of America at the Chicago convention, November 12-13, 1902.]

Having been invited to contribute a paper, to be read at the first convention of the Chrysanthemum Society of America, on a subject likely to interest American growers of this popular autumn flower, it seems that we may usefully consider some of the facts relating to the almost utter extinction of American varieties from our English exhibitions.

It is remarkable that while we had a large number of really meritorious American seedlings annually exhibited on the show boards of our leading exhibitions some few years ago, there remain to-day scarcely half a dozen that continue to find favor with our largest growers. There is, as most of us are aware, no question as to the ability of American seedling raisers to produce varieties of sterling merit. That fact has been proved over and over again, and is beyond dispute to those of us who have watched the progress of the chrysanthemum during the past twenty years.

To go back to the earliest attempts on the part of our American friends to supply European cultivators with novelties it is necessary to remind this meeting that one of the first chrysanthemum raisers in the states was Dr. Walcott, of Boston. John Thorpe, Mr. Waterer, of Philadelphia, and W. K. Harris were next heard of here as being engaged in the work and many of their varieties were imported into England about 1884-5.

I well remember somewhere about that date visiting my old friend, Norman

Davis, then of Camberwell, and seeing for the first time many of these American novelties which he was probably the first to introduce, and the interest that their appearance then caused. Up to that time the French growers had enjoyed the sole monopoly for some years of raising new seedling chrysanthemums, as they appear almost to have done during later years. Many of these early American varieties being very distinctive in form, soon become popular with our growers and figured at English exhibitions in goodly numbers.

A few of them can be readily recalled to memory, viz: Bicolor, Christmas Eve, Fimbriatum, Gloriosum, Gorgeous, Jessica, Moonlight, Mrs. C. W. Wheeler, Mrs. James R. Pitcher, Mrs. Vannaman, Mrs. Wm. Meneke, Sam Henshaw, White Dragon and so forth. Of course I am fully aware that some precise critics here at home will say that many of the first American novelties were really importations from Japan but that has little to do with our present purpose, inasmuch as we received them from American sources.

Interest having been excited in these new comers, our trade importers were not slow to appreciate the fact that to keep in the front they must each lay in a store of the American novelties year by year and so in due course other Americans were brought into the line of expansion. The novelties distributed by such growers as T. H. Spaulding, Peter Henderson & Son, Fewkes & Son, E. G. Hill, Nathan Smith & Son, Messrs. Hollis, Allen, Surman, Dorner, Pitcher & Manda, J. C. Vaughan, May, and for all I know, many more beside, were annually added to the ever increasing collections of our large trade growers and importers.

When one remembers the names of these men and the numerous seedlings that they raised and distributed, a large proportion receiving recognition of their merits by the awards of first-class certificates from our leading societies, it is difficult to understand the reason of their present non-existence as show flowers. Everyone of course knows that improvement has been made, but as time went on American seedlings did not remain stationary any more than did the seedlings of their rivals.

Let us recall a few names extending over that period and in order of their appearance: Puritan, Beauty of Castlewood, Coronet, Miss Anna Hartshorne, Florence Percy, Lizzie Cartledge, Elmer D. Smith, Eda Prass, Col. W. B. Smith, C. B. Whitnall, Mrs. E. D. Adams, Julius Roehrs, Geo. W. Childs, W. G. Newitt, Golden Wedding, Good Gracious, Niveus, Mrs. E. G. Hill, Eugene Dailedouze, Mutual Friend, Mrs. Henry Robinson, Miss Georgiana Pitcher, The Egyptian, Modesto, Western King and Simplicity.

Now, to be properly understood, I do not mean to say that these and similar sorts are nowhere to be seen in England, but I do say that these and many other equally fine varieties have been entirely discarded by the most prominent of our exhibitors in the leading shows. And further that for several years past little or nothing of American origin has been sent over here to compete with the French and more recently the Australian seedling growers. The consequence is that the English thirst for novelties has to be assuaged by other means, and that instead of there being a steady flow of novelties from the other side of the Atlantic to occupy a portion of the space vacated by varieties that are pushed aside for various reasons, nothing new

or attractive has come before our notice for a long time past.

The chief places where public opinion on such matters is formed is undoubtedly at the trade displays and at the floral committee meetings where novelties are staged by growers and importers. So keen is the competition for supremacy that unless a new variety obtains a certificate or gives great promise it is hardly worth anyone's while to grow a new variety a second year, the number of novelties being so large.

There is, however, some consolation, but it is one that does not appeal to a raiser's pocket. At many private establishments and in the interesting collections that are gratuitously provided by the London County Council in the public parks many varieties, American as well as others, are included and are grown year after year. I think in an article on this subject which I wrote for the AMERICAN FLORIST some time since special reference was made to this fact. But the average chrysanthemum grower for exhibition in England hardly ever pays a visit to such places, which are intended for the pleasure of the inhabitants in the district where these parks are situated. Consequently the authorities, not having to appeal to critical trade in such matters, often keep in their collections many

notice, as I did last year, blooms of many American varieties that once occupied a much loftier position. Many of them were in their turn exhibition blooms; to-day they are rejected as such. Yet although not grown in such fine form as they were when in the hands of our expert cultivators they may live on for years giving pleasure to many, whose only opportunity of seeing such flowers at all, is a quiet stroll through the greenhouse of a London park on a Saturday or Sunday afternoon in mid-October or early November.

Survivors of these American introductions are as follows: Mrs. E. G. Hill, an early useful variety for the back row of a group of pot plants; W. H. Lincoln, Delaware, the anemone; Wm. Tricker, a capital pink variety when grown for decorative purposes; Gloriosum, Modesto, Col. W. B. Smith, Niveus, Western King, The Egyptian, Simplicity, G. W. Childs, always bright and effective but rather small. There may be a few others but these are all that appear in my notes of last year's visits to the London parks.

While these remain the originators have some satisfaction in knowing that their efforts have not been entirely obliterated. But mere honors will scarcely console a man who undertakes the raising of any kind of plant for a livelihood.

Only to-day I have been inspecting the collection of a well known introducer of new chrysanthemums, a man with little or no sentiment in relation to the origin of the new chrysanthemums he has to sell. Upon finishing the work I expressed surprise that new American seedlings were practically non-existent in his collection and had been for some years. His remarks may be instructive and perhaps of service to American growers and are briefly as follows:

"Taken as a whole the American seedlings are, as regards the blooms, quite as fine in color as any others. The foliage is good but very subject to mildew, at least five out of every six suffering from this disadvantage. For quality in respect to seedbearing they are of a high order of merit, George W. Childs having been the parent here of many of our best dark-colored kinds. Most of the plants have the disadvantage of being too tall when grown in our style for exhibition blooms and, generally speaking, they are much later in blooming than the Continental varieties, an immense disadvantage when connoisseurs are eagerly on the lookout early in the season for novelties for the following season.

"Again, many are rather coarse, and I remember this was the fault in the case of some of the first we ever had. They do not lend themselves to stopping for refinement and the difference in bud selection is a matter of paramount importance. If attempts are made to get them early by taking early buds the flowers come rough, and that is one of the greatest bars to successful exhibiting in this country."

Another factor in the case is the question of transport. My informant tells me that in getting young plants from the States in past years it was never possible to get them over soon enough in the year to flower them well the first season after arrival, and that means that they were often knocked out of the running for up to date exhibitors.

How far these opinions are shared by the general body of our trade importers I do not know but it is not the first time similar complaints have been made to me when going the rounds of our trade displays. If anything contained in this paper should tend to a revival of commerce in chrysanthemums with this country and to American chrysanthem-

LAGER & HURRELL'S DISPLAY OF ORCHIDS AT THE CHICAGO SHOW.

old kinds of ordinary merit that are only fit for general decorative display. To the exhibitor for prizes, however, the early possession of the finest novelties means success or failure and he will willingly pay the price for any new addition likely to secure him the fullest number of points. For that means a considerable amount of prize money in his pocket or an array of silver cups for his sideboard.

Whatever may be said to the contrary, growing prize chrysanthemums in England is mainly a matter of profit and not honor. And the proof of this is easily found in the fact that where substantial prizes are not offered there will only be found growers of average ability. And it is also noteworthy that whatever varieties are included in the winning stands of our cleverest exhibitors are eagerly sought after by the numerous small amateurs who hope to follow in the greater one's steps. Hence the sale of some peculiarly striking novelty will often run into thousands the first year it is shown.

Going back to the subject of local display at the London parks, it is curious to

NEPHROLEPIS PIERSON AS STAGED AT THE CHICAGO FLOWER SHOW.

ROSE EXHIBIT OF BENTHEY & COMPANY AT THE CHICAGO FLOWER SHOW.

mums once again occupying something like their old position, both I and many other lovers of the autumn queen will not fail to do them justice and American growers will once again share in the honor of producing varieties that will help materially to increase their fame and pecuniary advantage. To this end the present paper has been compiled and the time devoted to its compilation will be considered well spent if such a result can be brought about.

THE EXHIBITIONS.

Chicago.

Success is, at best, no more than a relative term, but certainly the twelfth annual exhibition of the Horticultural Society of Chicago, combined with the first exhibition under the auspices of the Chrysanthemum Society of America, was relatively a better success in many of its details than any of the previous Chicago flower shows. Staged in the Art Institute, that notable center of aesthetic life proved in some respects admirably adapted to the needs of the occasion, but it is a regrettable fact that Chicago has no public hall in all respects adapted to the requirements of a successful flower show. The alliance with the Art Institute accrued greatly to the financial advantage of the Horticultural Society. The attendance was good, but the evenings saw proportionately fewer admissions, probably due to the location being in a building not ordinarily frequented by the public after nightfall.

The great Hall of Statuary was found all but inadequate to meet the needs of the exhibition. Certainly the general effect suffered from the simplicity of the rectangular chamber, the bare whiteness of the newly completed walls of which was relieved only by the liberal use of Alabama

smilax. While it may be said that there was room enough, yet a very moderate attendance sufficed to give the hall a well-filled appearance, and in the busy hours it was badly crowded. Twice as much space might have been utilized to the enhancement of the general effect of the show and the increased comfort of the patrons. The cut blooms were mostly placed in the long gallery and the space for the visitors, as on the main floor, was very meager.

Chrysanthemum plants were not largely represented, nor by so large specimens as on some previous occasions, but the plants were good, and more of them would have proved a puzzle to the superintendent. The principal exhibitors in this department were J. J. Mitchell, M. A. Ryerson, Vaughan's Seed Store and H. W. Buckbee. In decorative plants there were the splendid groups of Mrs. Geo. M. Pullman, Harry G. Selfridge, E. G. Uihlein and others. In this department the usual exhibit of the Geo. Wittbold Company was missed, and in the plant line Mount Greenwood Cemetery was unrepresented. Klehm's Nursery showed a nice group of autumn foliage.

One feature in which this week's exhibition far eclipsed its predecessors was in the matter of orchid displays. There were four very fine groups, that of A. Herrington, however, being composed entirely of cut blooms. Lager & Hurrell showed one of the choicest collections ever seen in the west. E. G. Uihlein was represented by his usual fine display, but not this time frozen in cakes of ice, and Harry G. Selfridge was a new contributor to this department with a collection which was a surprise to many of his friends.

There is not a dissenting voice when it is said that in respect to cut chrysanthemum blooms no exhibition held west of the Alleghenies ever compared with the

present in the quality of the chrysanthemum blooms, and few have been the exhibitions where the display has been so extensive. In a number of classes, particularly those for six blooms of one variety, there were as many as a dozen entries, in some classes fifteen. Nathan Smith & Son, the E. G. Hill Co., and H. W. Buckbee were the principal exhibitors, but blooms of superior finish were shown in many classes by the Poehlmann Bros. Co., Weiland & Risch, Mrs. E. T. Grave, Anton Then, Fritz Bahr and others. The classes for collections of named varieties showed many novelties of superior merit, among the best being Yellow Eaton, Hero of Mafeking, A. B. Richardson, Mrs. F. J. Taggart, Convention Hall, Mlle. Marie Liger and Ville de Bordeaux.

The vases of 100 blooms arranged for effect were a revelation. The first prize was awarded to a vase of Mrs. Jerome Jones, exhibited by H. W. Buckbee, of Rockford. The blooms were the consummation of C. W. Johnson's highest art, and the arrangement showed the flowers and foliage to wonderful advantage. Entered against this were two vases of Timothy Eaton, one from Mrs. E. T. Grave, of Richmond, Ind., consisting of blooms which many experienced cut flower handlers declared to be the best ever seen in this city. They were arranged to give a massive effect and made little display of green. The judges placed them second to the Buckbee exhibit but it is safe to say that they attracted more attention than any other single exhibit in the show. The third vase was also of Timothy Eaton, rather larger and purer in color than the second prize display, but arranged with asparagus and the widest of white satin ribbon. These flowers were grown by Weiland & Risch, who took the first prize on Eaton in the class for white, but were exhibited by the Fleischman Floral Company.

On the second day the roses made their debut, and here, too, the display eclipsed all previous records. They were given the smaller room opening out of the main exhibition hall, and it was admirable for the purpose. Probably the main interest centered on the Beauties, of which there were five entries in the class for fifty blooms. Better blooms are rarely seen, and it was a close decision on the four leaders, for size of buds, color, stem and foliage were not far apart on any of the entries. The decision fell to Benthey & Company, the Poehlmann Brothers Co. and Peter Reinberg in the order named, and Benthey & Company were also first in the class for half as many blooms. The competition in the classes for Bride and Bridesmaid was not so keen, for here the Benthey exhibits left a question only as to the second premiums. While Benthey's Brides were excellent in every particular, their fifty Bridesmaids were the finest ever exhibited before the Horticultural Society of Chicago. It would be difficult to improve on this stock at any season of the year.

Wietor Bros. were easily first in the class for fifty Ivory, this being the special premium offered by the American Rose Co. The vases of Liberty, Chatenay, Kaiserin, Sunrise, La France and Perle

their best stock. Nothing like it has ever before been seen in Chicago, where the importance of the carnation display has been growing year by year. There was a big showing of new sorts, full of interest to the grower and a revelation to the visitors.

Among the new things in the show, much attention was bestowed upon *Nephrolepis Pieroni*, from Tarrytown, N. Y. It is the first time this plant has been exhibited in Chicago, and its reception here was as favorable as that which has been accorded it wherever shown. Vaughan's *Acalypha bicolor compacta* was also scrutinized with interest by those in the trade. The new rose, Franz Deegan, was awarded the gold medal offered by the American Rose Society. It is to be introduced to the trade next season, the stock being in the hands of three or four prominent rose growers east and west. The Dale Estate, off Brampton, Ont., displayed a fine vase of the new rose Canadian Queen, which was the subject of much comment. J. A. Peterson, of Cincinnati, exhibited only one plant of *Begonia Gloire de Lorraine*, but it was unusually fine.

The judges were J. F. Cowell and Emil Buettner; their full list of awards follows:

CHRYSANTHEMUM PLANTS.

Specimen plant, white, first, J. J. Mitchell, Geo. Woodward, gardener, on Mutual Friend; second, H. W. Buckbee, Rockford.

Specimen plant, yellow, first, J. J. Mitchell, on W. H. Lincoln; second, H. W. Buckbee.

Specimen plant, pink, first, J. J. Mitchell, on Louis Boelmer; second, Vaughan's Seed Store.

Specimen plant "any other color," first, Martin A. Ryerson, John Reardon, gardener, on The Bard; second, H. W. Buckbee.

Best plant of above, first, J. J. Mitchell, on Mutual Friend.

Three standards, thirty-inch stems, first, H. W. Buckbee; second, Vaughan's Seed Store.

Five standards, not less than twelve-inch stems, first, Vaughan's Seed Store, on Chito, Louis Boelmer, The Bard, Georgiana Pitcher and Beauty of Truro; second, H. W. Buckbee.

Best standard, first, H. W. Buckbee; second, Vaughan's Seed Store.

Five specimen plants, first, Vaughan's Seed Store on The Bard, Marion Newell, May Forster and Golden Chain, the latter said to have 10,000 flowers; second, J. J. Mitchell.

Five specimen plants anemone varieties, first, Vaughan's Seed Store, on Surprise, Garza and Descartes; second, Anton Then.

Five specimen plants, single varieties, first, Vaughan's Seed Store on Mispah and Yellow Daisy.

Ten specimen plants pompon varieties, first, Vaughan's Seed Store.

Twenty-five plants grown to single stem, first, Vaughan's Seed Store on Mrs. Perrin.

Ten plants grown to single stem, first, Vaughan's Seed Store.

MISCELLANEOUS PLANTS.

Grafted plant, first, Vaughan's Seed Store on chrysanthemum bearing twenty-eight sorts; second, Robert Mueller.

Three standard geraniums, first, M. A. Ryerson; second, J. J. Mitchell.

Fifteen geraniums, first, M. A. Ryerson, on Heteranthe; second, Anton Then. Collection of orchids, first, H. G. Selfridge.

Collection of ferns, first, Vaughan's

CHRYSANTHEMUM PLANTS AT THE PHILADELPHIA EXHIBITION.

were all of highest quality. It was a close competition, particularly on Liberty, in which Bassett & Washburn and Peter Reinberg each staged beautiful vases of blooms. Details of the awards will be found under their proper heading.

Although the showings of cut blooms of both chrysanthemums and roses were noteworthy for extent and quality, in neither respect were they more commendable than the display of carnations on Thursday, which was never excelled anywhere. The blooms were staged on the balcony, which was utterly inadequate to the purpose, the popular interest in the flower serving to make the display the center of attention in the exhibition. Competition was close in all the classes and the judging occupied much time. Rivalry was keen among the growers. The J. D. Thompson Carnation Company staged a vase of *Enchantress* which carried everything before it and this firm was one of the principal winners. Bassett & Washburn were leading exhibitors, as of old, and the Chicago Carnation Company, Peter Reinberg, Wietor Bros., Mt. Greenwood Cemetery Association, Dorner, Buckbee, Witterstaetter, and many other growers were represented by

A. HERRINGTON'S DISPLAY OF ORCHID CUT BLOOMS AT CHICAGO.

SPECIMEN PLANTS AT THE BOSTON EXHIBITION, NOVEMBER 6-9, 1902.

Seed Store, including Boston fern, *Adiantum Farleyense* and *Cibotium Schiedeii*.

Five foliage plants, first, E. G. Uihlein, H. Skoldlager, gardener, second, Vaughan's Seed Store.

Palm, Guardian Angel Orphan Asylum, on kentia; second, E. G. Uihlein.

Croton, first, J. J. Mitchell; second, J. J. Mitchell.

Dracena, first, E. G. Uihlein; second, J. J. Mitchell.

Best other decorative plant, first, E. G. Uihlein on *Anthurium Veitchii*.

Boston fern, first, Vaughan's Seed Store.

Adiantum Farleyense, first, Vaughan's Seed Store.

Best other fern, first, H. G. Selfridge on *Nephrolepis Philippensis*; second, Vaughan's Seed Store.

Six araucarias, first, Vaughan's Seed Store.

Five *Begonia Gloire de Lorraine*, first, E. G. Uihlein; second, Vaughan's Seed Store.

Flowering plant, first, E. G. Uihlein; second, Bertermann Bros., Indianapolis.

Groups of stove and decorative plants, first, Mrs. George M. Pullman, Frank Howard, gardener; second, E. G. Uihlein; third, J. J. Mitchell.

Display of flowering plants, first, Anton Then; second, Vaughan's Seed Store; third, H. G. Selfridge.

CHRYSANTHEMUM CUT BLOOMS.

Twenty-five white, first, Weiland & Risch, Chicago, on Timothy Eaton; second, Mrs. E. T. Grave.

Twenty-five light yellow, first, H. W. Buckbee, Rockford, Ill., on Yellow Mrs. Jerome Jones; second, Mrs. A. M. Schafer, Chicago.

Twenty-five deep yellow, first, E. G. Hill Co., Richmond, Ind., on Col. Appleton; second, W. J. & M. S. Vesey, Fort Wayne, Ind.

Twenty-five light pink, first, Nathan Smith & Son, Adrian, Mich., on Iora; second, E. G. Hill Co.

Twenty-five deep pink, first, Nathan Smith & Son, on A. J. Balfour; second, E. G. Hill Co.

Twenty-five red, first, Nathan Smith & Son, on Intensity; second, Anton Then, Chicago.

Twenty-five bronze, first, Nathan Smith & Son, on Rustique; second, E. G. Hill Co.

Twenty-five "any other color," first, Nathan Smith & Son, on T. Carrington; second, H. W. Buckbee.

Six white, first, Chicago Carnation Co., Joliet, Ill., on Eaton; second, W. J. & M. S. Vesey.

Six light yellow, first, Chicago Carnation Co., on Bonnaffon; second, H. W. Buckbee.

Six deep yellow, first, Fritz Bahr, Highland Park, Ill., on Appleton; second, W. J. & M. S. Vesey.

Six light pink, first, E. G. Hill Co., on Bentley; second, Vaughan's Seed Store, Chicago.

Six deep pink, first, Nathan Smith & Son, on Vivian-Morel; second, E. G. Hill Co.

Six red, first, E. G. Hill Co., on Intensity; second, Chicago Carnation Co.

Six bronze, first, Nathan Smith & Son, on Kate Broomhead; second, E. G. Hill Co.

Six "any other color," first, E. G. Hill Co., on Ville de Bordeaux; second, Anton Then.

Twelve blooms, three varieties, white, first, Nathan Smith & Son.

Twelve blooms, three varieties, yellow, first, Nathan Smith & Son.

Twelve blooms, twelve varieties, first, Nathan Smith & Son; second, E. G. Hill Co.

Forty varieties, one bloom each, first, E. G. Hill Co.; second, Nathan Smith & Son; third, H. W. Buckbee.

Ten blooms, one variety, C. S. A. silver cup, first, Poehlmann Bros. Co., Chicago, on Appleton.

One hundred blooms, one variety, arranged for effect, first, H. W. Buckbee, on Mrs. Jerome Jones; second, Mrs. E. T. Grave on Eaton.

One hundred blooms not more than four inches in diameter, first, Chicago Carnation Co., with Bonnaffon.

Twenty-five sprays pompons, first, Nathan Smith & Son; second, Vaughan's Seed Store.

Twenty-five anemone pompons, first, Nathan Smith & Son.

Twenty-five anemone varieties, first, Vaughan's Seed Store; second, Nathan Smith & Son.

Thirty-six blooms, not less than six varieties of French origin, first, E. G. Hill Co., winning French Society's gold medal.

CUT FLOWERS, ORCHIDS

Best collection of cut blooms of orchids, first, A. Herrington, Madison, N. J., on collection embracing cattleyas, cypripediums, vandias, dendrobiums and oncidiums.

ROSES

Twenty-five blooms Beauties, first, Bentley & Co.; second, Poehlmann Bros. Co.

Forty Liberty, first, Weiland & Risch; second, Wietor Bros.

Forty Golden Gate, first, Pochlmann Bros. Co.

Forty Kaiserin, first, Wietor Bros.

Forty Bride, first, Pochlmann Bros. Co.; second, Benthey & Co.

Forty Bridesmaid, first, Pochlmann Bros. Co.; second, Benthey & Co.

Forty Meteor, first, Pochlmann Bros. Co.; second, Wietor Bros.

Forty Perle, first, Pochlmann Bros. Co.; second, Bassett & Washburn.

Twenty-five "any other variety," first, Peter Reinberg, with Chateaufort; second, Bassett & Washburn, with Carnot.

Fifty Beauties, first, Benthey & Co.; second, Pochlmann Bros. Co.; third, Peter Reinberg.

Seventy-five Liberty, first Peter Reinberg; second, Bassett & Washburn.

One hundred Golden Gate, first, Peter Reinberg; second, Bassett & Washburn. One hundred Kaiserin, first, Bassett & Washburn.

One hundred Bride, first, Benthey & Co.; second, Peter Reinberg.

One hundred Bridesmaid, first, Benthey & Co.; second, Peter Reinberg.

New rose not yet disseminated, American Rose Society's gold medal to Franz Deegan, exhibited by South Park Floral Co. and E. G. Asmus.

Fifty Ivory, first, \$100, Wietor Bros.; second, \$50, South Park Floral Co.; third, M. Winandy.

Best vase of roses in the show, special prize to Benthey & Co., for Bridesmaid.

CARNATIONS.

In carnations all the classes for standard varieties were for exhibits of fifty blooms.

Flora Hill, first, Sinner Bros.; second, Wietor Bros.

White Cloud, first, Bassett & Washburn; second, Sinner Bros.

Norway, first, Bassett & Washburn; second, Chicago Carnation Co.

Queen Louise, first, Guardian Angel Orphan Asylum; second, M. Winandy.

"Any other white," first, J. D. Thompson Carnation Co., on Governor Wolcott; second, W. W. Coles.

America, first, Bassett & Washburn; second, Wietor Bros.

Red Bradt, first, Bassett & Washburn; second, Anton Then.

G. H. Crane, first, Bassett & Washburn; second, Mt. Greenwood Cemetery Association.

"Any other red," first, Peter Reinberg, with Estelle; second, J. D. Thompson Carnation Co., with Apollo.

Gen. Maceo, first, Bassett & Washburn; second, Joseph Labo.

Governor Roosevelt, first, Mt. Greenwood Cemetery Association; second, J. D. Thompson Carnation Co.

"Any other crimson," first, J. D. Thompson Carnation Co., with Harry Fenn.

Marquis, first, Mt. Greenwood Cemetery Association; second, Bassett & Washburn.

Mrs. Lawson, first, Bassett & Washburn; second, J. D. Thompson Carnation Co.

Genevieve Lord, first, Peter Reinberg. Ethel Crocker, first, W. W. Coles.

Frances Joost, first, Peter Reinberg; second, Anton Then.

Morning Glory, first, Bassett & Washburn; second, Wietor Bros.

"Any other deep pink," first, Sinner Bros., on The Sport; second, Wietor Bros.

"Any other light pink," first, Chicago Carnation Co., on Mrs. Higinbotham; second, Guardian Angel Orphan Asylum.

Mrs. Bradt, first, Bassett & Washburn; second, Anton Then.

Prosperity, first, J. D. Thompson Carnation Co.; second, Bassett & Washburn.

"Any other white striped," first, F. Dorner & Sons Co., on Stella; second, W. J. & M. S. Vesey, on Gaiety.

Gold Nugget, first, Bassett & Washburn.

"Any other yellow," first, J. D. Thompson Carnation Co., on Golden Beauty; second, F. Dorner & Sons Co., on Dorothy Whitney.

The classes for introductions of 1902 called for only twenty-five flowers to the vase.

White, first, J. D. Thompson Carnation

Co., for Governor Wolcott; second, H. W. Buckbee.

Deep pink, first, J. D. Thompson Carnation Co., on Mrs. E. A. Nelson; second, W. J. & M. S. Vesey, also on Nelson.

Light pink, first, R. Witterstaetter, on Enquirer; second, Bassett & Washburn, on Gloriana.

Red, first, J. D. Thompson Carnation Co., on Apollo; second, F. Dorner & Sons Co., on Apollo.

"Any other color," first, F. Dorner & Sons Co., on Stella; second, Bassett & Washburn, on Gaiety.

One hundred blooms white, first, J. D. Thompson Carnation Co., on Wolcott; second, R. Witterstaetter, on Albatross.

One hundred blooms light pink, first, J. D. Thompson Carnation Co., on Enchantress; second, Mt. Greenwood Cemetery Association, on seedling.

One hundred blooms dark pink, first, Bassett & Washburn, on Mrs. Lawson; second, Mrs. E. T. Grave, on President McKinley.

One hundred blooms crimson, first, Chicago Carnation Co., on Harlowarden; second, J. D. Thompson Carnation Co., on Gov. Roosevelt.

One hundred blooms red, first, J. D. Thompson Carnation Co., on Apollo; second, Bassett & Washburn, on Crane.

Best vase of 100 blooms among the above, first, J. D. Thompson Carnation Co., on Enchantress; second, Chicago Carnation Co., on Harlowarden.

Best vase in show, first, J. D. Thompson Carnation Co., on Enchantress.

CHRYSANTHEMUM NOVELTIES.

Six white, Nathan Smith & Son, with Convention Hall.

Six yellow, not darker than Bonnaffon, E. G. Hill Co., with Yellow Eaton, and Vaughan's Seed Store, with Golden Chadwick, equal.

Six yellow, darker than Bonnaffon, Nathan Smith & Son, with H. W. Buckbee. Awarded S. A. F. bronze medal.

Six pink, lighter than Viviand-Morel, E. G. Hill Co., with Columbia.

Six pink not lighter than Viviand-Morel, E. G. Hill Co., with A. B. Richardson. Awarded S. A. F. silver medal.

Six "any other color," Nathan Smith & Son, with Mrs. J. J. Mitchell.

SEEDLING CARNATIONS.

Twenty white, F. Dorner & Sons Co., with No. 123 (00).

Twenty red, E. T. Grave, with Elsie Martin.

Twenty pink, not lighter than Wm. Scott, J. D. Thompson, with Nelson Fisher.

Twenty pink, lighter than Wm. Scott, F. Dorner & Sons Co., with Fiance.

Best in foregoing classes, F. Dorner & Sons Co., with Fiance. Silver cup.

VIOLETS.

Thirty-six bunches, first, Robert Klagge, Mt. Clemens, Mich.; second, Eli Cross, Grand Rapids, Mich.

FLORAL ARRANGEMENTS.

Basket chrysanthemums, first, John Mangel; second, T. D. Mosconesotes.

Basket orchids, first, T. D. Mosconesotes; second, E. G. Uhllein.

Bridal bouquet, first, A. Lange; second, T. D. Mosconesotes.

Bridesmaid's bouquet, first, A. Lange; second, T. D. Mosconesotes.

VISITORS.

Among the trade visitors during the week were:

W. S. Fosgate, Santa Clara, Cal.; J. R. Horn, San Francisco; Miss Bessie Hor-
top and Miss D. E. Gross, Denver; Chas. E. Gullett, Lincoln, Ill.; Henry Gaethje and Emil Bochans, Rock Island; H. W.

HELICONIA SANDERI.

Buckbee, C. H. Woolsey and C. W. Johnson, Rockford; John Willius and wife Danville; Thos. Hewitt and daughter, Monmouth; G. Schaffer, Lake Forest; Jos. B. Feldmann and Erle W. Metz, Peoria; Geo. A. Kuhl and wife, Pekin; J. A. Kenyon and Jacob Rohr, Naperville; Wm. Swinbank and Roy M. Orton, Sycamore; F. A. Belt, Sterling; J. R. Holland, Pontiac; J. M. Smely, Aurora; J. F. Ammann, Edwardsville; Geo. Souster, Elgin; D. Hill, Dunlee; A. C. Brown and A. C. Canfield, Springfield; A. Peterson, Paxton; J. T. Anthony, Geneva, Ills.; H. W. Riemann and E. J. Bertermann, Indianapolis; E. G. Hill, Henry Shephard, E. T. Grave, Richmond; Mrs. M. S. Vesey and W. J. Vesey, Fort Wayne; W. W. Coles, Kokomo, Ind.; Fred. Dorner and Fred. Dorner, Jr., La Fayette; Irving Gingrich, South Bend; J. D. Carmody, Evansville; Meyer Heller, New Castle, Ind.; J. O. Kemble, Marshalltown, Ia.; P. L. Larson, Ft. Dodge, Mrs. M. E. Eaton, Lyons, Ia.; J. C. Rennison, Sioux City, Ia.; Miss B. Meinhardt, Fred. A. Meinhardt and wife, Otto G. Koenig, H. G. Berning and wife, R. T. Windt, John Steidle, C. A. Kuhn, J. J. Beneke, Frank Ellis, F. C. Weber, Theo. D. Miller, C. C. Sanders, G. J. Foster and James Gurney, St. Louis; A. Jablonsky, Wellston, Mo.; A. Helfrich, Burlington, Mo.; Frank W. Robinson, Kansas City; Geo. Allard, Lawton, Mich.; Elmer Smith and wife, Adrian; Geo. A. Rackham, Walter Taepke, Robt. Flowerday, Theo. Mielch, H. Schroeter, L. Beimb, Thos. F. Browne, Fred. Breitmeyer and Frank Beard, Detroit; Mrs. L. H. Stafford, Marquette; A. E. Crooks, Harry Gentle and W. J. Scott, Benton Harbor; A. H. Bunde and wife and F. Gustafson, St. Paul; Joe. Milton and Miss Whittet, Minneapolis; Miss Pauline Windmiller, Mankato; H. Weber, Oakland, Md.; A. Herrington, Madison, N. J.; John R. Fotheringham, Tarrytown; John F. Cowell, Buffalo; J. A. Peterson, W. F. Lautenschlager and R. Witterstaetter, Cincinnati; C. W. McConahy, Van Wert, O.; J. J. Hellenthal and H. H. Hellenthal, Columbus, O.; Ed. Holland, J. S. Schraman, Chas. A. Schmidt and J. M. Gasser and wife, Cleveland; S. S. Skidelski, Philadelphia; C. E. Schaffer, La Crosse, Wis.; C. C. Pollworth, Wm. Dilger, W. A. Kennedy, Alex. Klokner, Jos. Chacons, Miss Josephine Seikert and H. V. Hunkel, Milwaukee; Otto Speidel and Siegfried Dahlgren, Oconomowoc; C. Gebhardt, Lake Geneva; H. Levenhagan, Manitowoc, Wis.; T. S. Joy, Nashville, Tenn.

Boston.

The annual chrysanthemum show of the Massachusetts Horticultural Society was in most respects fully up to its predecessors in merit and greatly superior to that of last year in arrangement. The large hall was given over to the groups of trained plants which were as usual unrivalled examples of gilt-edge cultivation which, so far as can be learned from the news columns of the trade journals, might as well, outside of Boston, be classed among the lost arts. In the groups of eight plants, unlimited as to size of pots, J. S. Bailey, A. J. Lowell, gardener; Mrs. B. P. Cheney, John Barr, gardener, and E. S. Converse, D. F. Roy, gardener, were the competitors. Mr. Lowell scored first and Mr. Barr second. The winning group comprised Pink Ivory, Black Hawk, Theo. R. Hooper Pearson, John Shrimpton, Col. D. Appleton, Mrs. Tainkler (?) and Arethusa. In the groups of ten in pots not exceeding

ACALYPHA BICOLOR COMPACTA.

nine inches, Walter Hunnewell, T. D. Hatfield, gardener, and E. S. Converse were the winners in order as named.

In the classified groups all the above-mentioned competitors were entered, Mrs. Cheney winning three firsts, E. S. Converse, one first, three seconds and one third; J. S. Bailey two firsts and one third, H. H. Rogers, James Garthley, gardener, one second, and Mr. Hunnewell one third. Particularly well done in these classes were Mrs. Cheney's Mrs. H. Weeks, Mrs. E. B. Freeman, Georgienne Braumball, Red Warrior, Shilowa, Silver Cloud and Marion Henderson, Mr. Bailey's Ivory and Golden Trophy, Mr. Converse's Red Warrior and Pink Ivory and Mr. Hunnewell's Mrs. Traintor. In the classes for plants grown to single stem and bloom E. A. Clark took all the first prizes and E. S. Converse the balance. For group of foliage plants and chrysanthemums there was only one exhibit, that of Mrs. J. L. Gardner, Wm. Thatcher, gardener. E. S. Converse showed a good number of standard plants.

The cut flowers were staged in the lecture hall and made a glorious show, which would have been vastly improved, however, if the tables on which the long-stemmed flowers were shown had been at least a foot lower. In the class for twenty-five blooms for twenty-five varieties Mrs. Cheney and Miss E. J. Clark, John Ash, gardener, were first and second respectively. In six vases of ten blooms each, long-stemmed, A. W. Spencer, Alex. McKay, gardener, and Miss E. J. Clark were first and second respectively. In the classified displays Mrs. Cheney won

four firsts, one second and two thirds; E. S. Converse three firsts and one third; Miss Clark two firsts, three seconds and two thirds; C. D. Sias one first, two seconds and one third; J. J. Albright two seconds, A. W. Spencer four firsts and two seconds, Peter B. Robb four thirds.

Among the best of Miss Clark's were the following new ones: Mme. Gustav Henry, white; Calvat's 1899, pink; Chas. Longley, dark wine; Bessie Godfrey, yellow; Lillie Mountford, cream, and Miss Lucy Evans, deep pink. The same exhibitor also staged the only lot of 1902 introductions as follows: Queen Alexandra, A. J. Balfour, Philip Revoire, Godfrey's King, Godfrey's Prize and Purity. In Mrs. Cheney's collection the following were particularly fine: Merza, Eureka, Leonidas, Peter Kay, Mme. Duse, Mrs. Magee, Mme. Carnot, Mrs. Potter Palmer, Gold mine and Marguerite Jeffords. Merza, Col. D. Appleton, Vivian-Morel and Mutual Friend in the A. W. Spencer display of long-stemmed blooms were the limit of perfection.

E. N. Pierce & Sons filled four of the large vases with excellent blooms of commercial varieties but they were not in competition and the towering vases of big blooms arranged for effect which have been so conspicuous a feature of previous Boston exhibitions were entirely absent from the show this year, probably because of inadequate premiums, and the general effect was weakened accordingly. It was also noticeable that certain classes in the schedule, once popular, were practically deserted this year, particularly the classes for incurved varieties and anemone-flowered plants, the compe-

tion in the latter class having narrowed down to one variety, Garza. Of pompons there was but one example in the plants, Mr. Converse's Savannah, but in cut flowers this exhibitor staged a very comprehensive and interesting collection of pompons. A little more care in labeling might, with good reason, be observed by some exhibitors. The same variety was variously marked by three different exhibitors as Mrs. Traintor, Mrs. J. Trainor and Mrs. Tainkler.

The disposition seems to be, in these exhibitions, now, to drift away from chrysanthemums as an exclusive attraction, as the following notes will show. That it is a move in the right direction was evident in the interest shown by visitors in the roses, carnations and particularly the orchids. Messrs. Lager & Hurrell staged a very attractive group of cattleyas and other orchids of commercial value. In the competitive classes Mrs. F. L. Ames, W. N. Craig, gardener, won the silver-gilt medal and Oakes Ames, R. M. Grey, gardener, the silver medal. Besides these were some good blooms from Col. Chas. Pfaff, George Melvin, gardener, also two American seedlings, *Cattleya Rothwelli* (C. Bowringiana × C. Eldorado) from J. E. Rothwell and *Cattleya Wheeleri* (C. Gaskelliana × C. superba) from J. H. White, a silver medal being awarded the gardener, James Wheeler, for the latter.

The showing of carnations was excellent for the season, Patten & Company staging a large collection of the latest introductions and Peter Fisher his Enchantress, for which a well-merited silver medal was awarded. A silver medal was also given to Fairmaid. L. E. Small showed a vase of Lawsons of splendid quality. From S. J. Reuter came Lawsons and Lillian Pond, from S. J. Goddard, The Queen, and from H. A. Stevens & Company, Gov. Wolcott. Norris F. Comley showed a very fine lot of violets in seven varieties.

Two new roses claimed recognition and were the center of much admiring interest. Ernst Asmus received a silver medal for new yellow rose, F. Deegan, a flower which is lovely enough to deserve a more romantic title, and the Dale Estate was accorded honorable mention for Canadian Queen, their light pink sport from Mrs. Pierpont Morgan. Carl Jurgens sent a vase of fine American Beauties, the F. R. Pierson Company specimens of *Nephrolepis Piersoni*, L. H. Foster *Nephrolepis Anna Foster*, W. Hunnewell a group of *Oncidium ornithorhynchum*, Mrs. J. L. Gardner a seedling asparagus resembling a dwarf *A. tenuissimus* and R. & J. Farquhar a large group of bays, palms, ferns and other ornamental-foliaged plants which was one of the most effective features of the exhibition.

Philadelphia.

The old and time-honored Pennsylvania Horticultural Society is just now filled with pride, and with good reason, for its annual fall show, which opened November 11, is the best in its history. It is the best for several reasons. First, because it is the largest display; the exhibits, after taking up passages and extra space never before used, have overflowed to the covered driveway at the rear of the building, which is completely filled. Second, on account of the general excellence of all the entries, and, again, it excels in the perfection shown in quite a number of specimen plant exhibits which could not be equaled anywhere else.

The feature of the exhibition is the magnificence of the ferns exhibited by Thomas Long. It is surprising how adiantums, which are so susceptible to damping off, can be grown to such size. It must require the very best of care. Many of the ten plants exhibited measured from four to five feet in diameter and are of perfect form. His large specimen plant of *Gleichenia dichotoma* measured

thirty-one feet in circumference and is without a spot or blemish of any kind.

As this is considered mainly a chrysanthemum show, I shall deal more particularly with that flower. At the head of the first landing of the main staircase Hugh Graham placed two vases of his Philadelphia and Pennsylvania chrysanthemums. These flowers were arranged in the form of a panel, as one vase was much higher than the other, and both were trimmed with autumn leaves and asparagus. They were the first flowers to catch the eye and were much admired. On either side of the steps up to the main hall were placed vases of twelve, twenty and twenty-five, all superb blooms. The varieties prominent were Col. Appleton, Timothy Eaton, Pennsylvania, Vivid-Morel, Maud Dean, Merza and Goldmine.

In the yellow and white entries Col. Appleton and Timothy Eaton were almost the whole show. For the best twelve white there were nine entries, eight of them Eaton. F. Canning received first with Eaton. In the class for six blooms it was the same, all Eaton, with Canning again winner. There was no yellow to beat Appleton. One of the best commercial varieties is Major Bonnaillon, yet as an exhibition flower it has almost dropped out, there being a very few entered and these only to make up variety. There were very few Golden Wedding, which is also one of the best yellows. Quite a few kinds that were considered wonders in their time are still shown on account of the special prizes offered by persons after whose name or place they are called. These kinds are useful as showing by comparison what an advance there has been in the past ten years, but if possible the prizes should be turned over to the society to stimulate growers of better varieties.

The cut blooms were arranged on tables about the foyer. The tables could be six inches lower to advantage. There were several fine seedlings shown. A fine Bonnaillon-like flower of the same color received a silver medal. It was grown by Robt. Carey, who has sent out many good ones. Robert Craig & Son have a fine pink in A. B. Richardson. It is a beautiful flower, of the Maud Dean type, only it does not show a center, but is of fine form and, while larger, not so heavy as to develop a weak neck. Its color is about equal to Mrs. Perrin. I believe it is as good as any and better than most pinks up to date. It received a certificate of merit.

The chrysanthemum plants were better than last year, better shaped and better flowered. Still there is considerable room for improvement. If they were kept smaller and only contained one-half to one-third the number of flowers they would come nearer the ideal. There were several groups of foliage and flowering plants along the walls, arranged for effect. To say the least there was nothing artistic about the arrangement. For the most part they were so crowded that only the tops of the plants were shown and none of the natural grace of the plant given play.

Dreer's collection of *Pandanus Sanderi* was beautifully arranged in a setting of Farleyense ferns. It attracted considerable attention. On the stage was a fine collection of cacti, which was admired as much, perhaps, as the more highly colored plants. They were from the greenhouses of President Paul.

The lower hall, hitherto given over almost wholly to vegetables, held an excellent and choice assortment of medium-sized foliage and flowering

LINOSPADIX MICHOLITZII.

KENTIA COMPACTA NANA.

plants. There was one table of fine cyclamen, Robert Craig & Son having twenty-five of very well formed stock, not for competition, while William Fowler and Frank Ibbotson received first and second prizes, respectively, for twelve plants each. A Cocos Bonnetii from Craig & Son graced the center of the hall, while around it was placed an assortment of fine decorative foliage plants in 6-inch to 8-inch pots, John Hobson being the principal exhibitor.

John Shellem staged seedling coleuses of the broad-leaved variety which were brilliantly colored, also six choice dracaenas. H. H. Battles had a table of Farleyense ferns which captured several premiums. R. Craig & Son's Begonia Lorraine was fine, as was also a pan of the variety labeled Lonsdale's.

There are many other features that will have to have mention next week, but I must speak of the rose and carnation display of Wednesday. There was a vase from the J. D. Thompson Company, of Joliet, Ill., of their fine new carnation Enchantress, the flowers of which were probably larger than those of any other pink ever exhibited here. Peter Fisher, of Ellis, Mass., however, captured the prize for the best fifty blooms with a vase of the same kind. It certainly is a fine variety. Dailedouze Brothers staged a vase and plant of their new pink seedling, for the Craig silver cup for the best seedling, but it was won by Craig & Son with Adonis. The Dailedouze seedling is a bright Pay-break pink with a fringed edge and of a most delightful fragrance.

In the rose exhibit Mr. Asmus' new rose F. Deegan made a fine showing. It resembles Perle at night but has a beautiful distinct coloring, giving it a distinctive appearance in the day time. It is very fragrant. Beauty prizes were divided between Joseph Heacock and John Burton. Honors were even as Mr. Burton captured the prize for twenty-

five, while Mr. Heacock won first for six flowers. Adolph Fahrenwold had the Liberty prize to himself, but he deserved it, as his flowers were very choice.

There was an exhibit of violets, Aiken & Gillmet winning first with Luxonne and Prey, of Kinkora, N. J., first for 100 violets with double white, while Zimmer, of Collingdale, was first for Princess of Wales. Knott & Potter, of Fox Chase, had fine pansies and won first easily.

We must not forget F. R. Pierson's table of his *Nephrolepis Piersonii*. Six gold medals! He should melt them down and retire.

The show is evidently going to be a record breaker in point of attendance, as the papers are doing good work in giving large space to descriptions of choice varieties, and the weather promises to be fine. K.

Kansas City.

The second annual flower show at Convention Hall made as fine a success as did the great display in 1901, which opened the eyes of exhibition managers throughout the land. On Friday the attendance was close to 20,000 and on Saturday the crowd was great.

A gold medal was awarded the J. D. Thompson Carnation Company for Enchantress. Through a misunderstanding as to date of staging the two seedlings of H. W. Ricman, of Indianapolis, arrived too late to enter into competition in the seedling chrysanthemum classes. Both are incurved, Adelia, white, scoring eighty-five points and Miranda, pink, scoring eighty-two points. These look like good commercial sorts, the white resembling Ivory, although the foliage is better than this variety.

John Bertermann and Mrs. M. Flint judged the cut flower work and H. W. Buckbee, James Hartshorn and Isaac Kennedy the seedling chrysanthemums. The final awards were:

American flag in flowers, first, W. L. Rock; second, A. Newell; third, Samuel Murray; fourth, A. F. Barbe.

Best vase of Beauties, first, John Mangel, Chicago; second, W. L. Rock; third, Samuel Murray.

Best vase of chrysanthemums, first, J. Mangel; second, W. L. Rock; third, Samuel Murray.

Best vase of carnations, first, J. D. Thompson Co., for Enchantress; second, Samuel Murray; third, J. Mangel.

DRACÆNA BROMFIELDI.

Best vase mixed flowers, first, Samuel Murray; second, J. Mangel.

Best vase pompon chrysanthemums, first, W. L. Rock; second, Samuel Murray.

Best vase single flowers, first, W. L. Rock; second, Samuel Murray.

Three largest and three smallest chrysanthemums, first, Nathan Smith & Son.

CHRYSANTHEMUM SEEDLINGS.

White, first, Nathan Smith & Son, on No. 49-4-00.

Yellow, first, Vaughan's Seed Store on Yellow Chadwick.

Pink, first, E. G. Hill Co., on Mlle. Marie Liger.

Red, first, Nathan Smith & Son, on 15-8-01.

Bronze, first, Nathan Smith & Son, on 27-8-01.

Best of above, first, Nathan Smith & Son.

Best fifty flowers, variety of European origin, first, Nathan Smith & Son; second, E. G. Hill Co.

Best fifty flowers, foreign other than

Co.; second, E. T. Grave, Richmond, Ind. Twenty dark pink, first, J. D. Thompson Carnation Co., Joliet, Ill.; second, E. T. Grave; third, F. Dorner & Sons Co.

Twenty light pink, first, J. D. Thompson Carnation Co.; second, F. Dorner & Sons Co.

Twenty "any other color," first, Chicago Carnation Co.; second, Henry Eichholz, Waynesboro, Pa.; third, F. Dorner & Sons Co.

Named but not in commerce, 100 blooms, scarlet, first, Chicago Carnation Co.

White, first, Chicago Carnation Co.; second, H. Weber & Sons.

Flesh color, first, J. D. Thompson Carnation Co.

Light pink, first, J. D. Thompson Carnation Co.

Dark pink, first, E. T. Grave; second, J. D. Thompson Carnation Co.

Crimson, first, Chicago Carnation Co.

Variegated, first, J. D. Thompson Carnation Co.

Best variety of above, first, Chicago Carnation Co.

Manager Louis Shouse, of Convention Hall, gives out the following list of the cash premiums awarded:

Samuel Murray, Kansas City.....	\$ 906 00
Nathan Smith & Son, Adrian, Mich.....	531 00
W. L. Rock, Kansas City.....	461 00
H. W. Buckbee, Rockford, Ill.....	352 00

Tarrytown, N. Y.

The fourth annual exhibition of the Tarrytown Horticultural Society was held on November 12 and 13. The opening of the show was most auspicious. Outside was one of the most beautiful autumn days. Indoors was one of the best shows ever put up, an attendance far beyond the ordinary of gardeners of wide repute and throngs of admiring visitors who appeared to take the deepest interest in the enterprise. The judges, Alex. McKenzie, Wm. Russell, Peter Duff, G. H. Hale and Wm. Turner, each an expert of more than local fame, worked five hours before their task was finished. The only feature of the affair that could possibly be criticised was the limited capacity of the hall for such an extensive exhibition, but it is the largest hall in the town and so this could not have been remedied.

Three pyramidal groups of one-bloom-plant chrysanthemums, edged with ferns were prominent and effective features, perhaps a little too formal in outline, as these groups always are. They were from Wm. Scott, gardener to Joseph Eastman, who took first prize; George

CORONATION CARPET BEDDING IN BATTERSEA PARK, LONDON, ENG.

European, first, E. G. Hill Co.; second, Nathan Smith & Son.

Best fifty flowers of American origin, first, Nathan Smith & Son; second, E. G. Hill Co.

Six most distinct kinds, first, E. G. Hill Co.

Best European novelty, first, E. G. Hill Co.

Most novel and distinct American seedling, first, Nathan Smith & Son for F. J. Taggart, very large yellow.

SATURDAY AWARDS.

Dinner table decoration, first, L. P. Walz, Chicago; second, W. L. Rock; third, Samuel Murray; fourth, John Mangel, Chicago.

Seventy-five Liberty roses, first, Peter Reinberg, Chicago.

Rose sport not heretofore exhibited, first, Peter Reinberg on sport of Golden Gate, named Uncle John.

SEEDLING CARNATIONS.

Twenty blooms, white, first, F. Dorner & Sons Co., Lafayette, Ind.; second, Chicago Carnation Co., Joliet, Ill.; third, H. Weber & Sons, Oakland, Md.

Twenty red, first, Chicago Carnation

CORONATION CARPET BEDDING IN BATTERSEA PARK, LONDON, ENG.

CORONATION CARPET BEDDING IN BATTERSEA PARK, LONDON, ENG.

Middleton, gardener to Wm. Rockefeller, who took second, and Thos. Cockburn, gardener to Louis Stern. On trained bush plants Wm. C. Roberts, gardener to T. Potter, was the main exhibitor, taking all premiums except two seconds that went to Mr. Middleton. Mr. Middleton had the standard class all to himself and on single stem and bloom plants Jos. Howarth, gardener to Mr. Oppenheimer, and W. C. Roberts were the only competitors.

The decorative plant groups and specimens were of the highest type. Howard Nichols, gardener to Mrs. J. B. Trevor, put up a 100-foot group of elegant palms and other decorative material. The Henry Siefke special prize for table of ornamental foliaged plants brought out two entries of great beauty, from Wm. Scott and W. H. Waite, gardener to T. Untermeyer, Mr. Scott winning first with a group of perfect little gems of highly colored crotons, dracaenas, grasses, asparagus, pandanus, etc. The same competitors won in the same order in class for six plants dressed for table decoration. The fern entries brought out numerous specimens of enormous size, of adiantums, davallias, etc., plants measuring six or eight feet in diameter. In this class Mr. Scott won three firsts and one second, Ernest Townsend, gardener to C. A. Gould, one first, Howard Nichols two firsts and one second and Jas. Ballantyne, gardener to Mrs. Geo. Lewis, two seconds. Cyclamens were shown by Messrs. Townsend, Roberts and Howarth. A special prize from the president of the society, Mr. Scott, brought out a plant of *Asparagus Sprengeri* such as your humble servant never even dreamed of. Raised on a stand away above one's head, the luxuriant masses of green dragged on the floor, forming a dense column five feet through.

Chrysanthemum cut blooms were shown in great profusion, table after table of wonderful Merzas, Golden Weddings, Eatons, Goldmines, Weeks, Appletons, Kays, Morels, Barclays and other top favorites greeting the visitor on all sides. The class for thirty-six blooms of six varieties brought out magnificent exhibits from Geo. Middleton, Wm. Smith, gardener to Robt. Mallory, Wm. Nye, gardener to Miss Blanche Potter, and W. H. Waite. Mr. Middleton won first prize and Mr. Smith second.

In the class for twenty blooms of twenty distinct varieties Mr. Scott was first and George Middleton second, and on twelve ditto Mr. Scott again led, with Ernest Townsend second. Other fine sets were staged by Thos. A. Lee, gardener to W. A. Sand, and Samuel Riddle, gardener to F. A. Constable. The giants all competed in the classes for special colors, W. C. Roberts, S. Kiddle and Wm. Nye participating in the first prizes and W. H. Waite, Jas. Ballantyne and W. C. Roberts in the seconds. John Henry, gardener to S. Goodman, won on a vase of twenty-five handsome long-stemmed blooms, with autumn foliage, Mr. Waite being second.

The F. R. Pierson Company got a certificate of merit for an extensive exhibit of blooms. The Pierson special prize, a handsome silver cup, for twenty-four blooms in eight varieties was won by Wm. Scott with an unexcelled exhibit, Messrs. Middleton and Nye being also represented in the competition with fine entries. President Scott's prize for largest flower in the show went to Jas. Bell, gardener to R. T. Burton, for an enormous bloom of Merza. The C. P. Johnson special for pompons went to L.

A. Martin, gardener to W. H. S. Wood, Mr. Waite being second.

Carnation displays were extensive and of high quality. George Middleton was first and W. H. Waite second for thirty-six blooms in six varieties, Robt. Allan, gardener to E. C. Benedet, first and W. C. Roberts second for eighteen in three varieties and in the vases classified as to color. Messrs. Roberts, Allan and Waite participated in the first prizes and Messrs. Waite, Nye and Middleton in the second, while among the other exhibitors who were close thirds were Messrs. Smith, Henry, Scott, Townsend, Bradley, Wahlquist, Boshard and Howarth. F. R. Pierson Company got a certificate for Enchantress and honorable mention for Boston Market.

The rose classes were also well filled, the winners of first prizes for Beauty, Bridesmaid, Bride, Perle and Liberty being Messrs. Waite, Middleton, Ballantyne, Nye and Middleton respectively, J. S. Wahlquist, gardener to Mrs. J. D. Archbold, coming in second on Liberty and Geo. Draycott, gardener to W. H. Parsons, winning in the "any other" class with a vase of fine Sunrise. A certificate was awarded to Jas. Ballantyne for a blush-pink sport from Liberty. In violets there were a dozen competitors, Richard Lange winning in the commercial class with A. W. Williams second, John Johnson, gardener to B. S. Clark, and Wm. Nye in the private gardener class. There was a fine display of fruit and vegetables on the stage.

English Carpet Bedding.

In the public parks and in many private gardens in London the various emblematic designs having reference to the coronation of the king and queen were carried out with great effect, although, owing to so much wet and little sun, the colors have not been quite so bright as usual. The illustrations from photographs of some of the work in Battersea Park may give an idea of what has been done. In one part of the park there is a sunken garden and the sloping bank, about two feet high, is neatly covered with a bordering and letters, the plants used being chiefly alternantheras and echeverias. This sunken garden also contains beds of other subjects which break up the flatness.

Battersea Park has long been celebrated

CORONATION CARPET BEDDING IN BATTERSEA PARK, LONDON, ENG.

for the variety and tasteful arrangement in its bedding and Mr. Rogers, the present superintendent, more than maintained the reputation this season. H.

New and Rare Plants.

DRACÆNA BROMFIELDI.

This is one of the most beautiful dracenas in cultivation. The white variegation is pure and the green is dark, producing a combination of coloring that is exceptionally pleasing. The stock of this novelty is at present limited. It has been exhibited at two important English exhibitions this season, its presence in a group of plants being very effective and much admired. (See page 549.)

HELICONIA SANDERI.

When grown into a large specimen *Heliconia Sanderi* makes a very striking ornamental plant. It has already been described in this journal (August 12, 1899). The specimen illustrated on page 546 was among the group recently exhibited by Sander at the Temple Show in London. It is grown most successfully at Madison, N. J., by Wm. Duckham, gardener to D. W. James. It is a rapid grower and, like other heliconias, enjoys great heat during the summer, but should be half retarded in mid-winter and started again early in spring.

KENTIA COMPACTA NANA.

Comparatively few distinct kentias have appeared from among the millions of seeds that have been sown of the well-known *K. Belmoreana* or *K. Forsteriana*. The one shown on page 549 is a very striking departure from either of the two named varieties. The foliage of the plant is very vigorous, hard and the pinnae overlapping, and when the plant attains a few more feet it will be a unique object. It is now in the D. S. Brown collection at St. Louis, where many rare and beautiful palms have found a home. There are several amateurs in Europe whose chief hobby is in forming a collection of kentias and other palms. There are also some very distinct specimens at Madison, N. J., in the collection of D. W. James, several of them quite unique and well cultivated.

LINOSPADIX MICKOLITZI.

This very rare plant is represented in one or two collections in America. The specimen shown on page 548 was utilized for exhibition only this spring, and is undoubtedly the largest in cultivation.

The foliage is clear green but the general habit is interesting and it is well worthy of a place among stove plants, but unfortunately it may never become a plant universally grown, as its native home is remote and the locality not generally known. It was discovered by Mr. Mickolitz, after whom the plant is named, and distributed by Sander, of St. Albans, England.

ACALYPHA BICOLOR COMPACTA.

The new plant for which Vaughan's Seed Store was awarded a gold medal at the Kansas City exhibition has been grown at the firm's greenhouses at Western Springs, Ill., since 1899. It is entirely distinct from all other acalyphas and is a fine addition to the list of greenhouse plants, but it is as a bedder that it will find its greatest popularity. It will stand bedding out like a coleus, in fact it is in the sunniest places that it produces its highest coloring. It surpasses the finest coleus or begonia in its color markings, the leaves being bright green, margined with a wide, irregular band of lemon yellow and having wide yellow bars running lengthwise of the leaf and also thickly dotted with yellow blotches. The leaves are large, some of them as much as eight inches long and more than half as wide. The plant is compact in growth, with free branching habit, rarely going over eighteen inches high. It is illustrated on page 547.

Out of the Ginger Jar.

The last time I looked in the jar it was pretty empty, but since convention time a few nibbles have been maturing and a nibble at this condiment may stimulate us for a passing minute.

A great cry has gone up recently about the production of florists' specialties in the south. Fred Mathison, W. R. Smith and others have told us how good a thing it would be if the southerners would take up the growing of azaleas, bays, rhododendrons, Manetti stocks, hybrid roses, and bulbs, especially bulbs. They have dilated eloquently on the soil and climate of North Carolina and confidently predicted that if we would only go at the thing energetically there would be no necessity for going abroad for stock. "Look at the tuberose bulb," they say triumphantly. "See the millions of these now grown in the south for home use and also for export! Why not many other bulbs?"

I notice they are always amazingly vague on the "other bulbs." When pressed to specify they will say, "Well, er, Easter lilies, and Romans, and Paper Whites, and all that sort of thing." As for the three subjects mentioned, I believe they have been tried at several points in North Carolina, Texas and Florida, but I have yet to learn of anything very solid resulting from the experiments. Even Professor Massey, sanguine as he always has been on this subject, admits in his paper read at the convention that even candidum lilies are uncertain and *Harrisii* lilies are a failure in his section, although he thinks they can be grown farther back.

I feel sure that a live seed firm can accomplish ten times as much as the S. A. F. and the department at Washington and the amateur enthusiasts. Why? Simply because such a concern goes at things with a purpose. It knows what it wants and goes for it in a practical way. Take the tuberose that they all talk so glibly about. Wasn't it a seedsman who started that industry in the south? Take the gladiolus. They have a great deal to say about that! Where would that have been without V. H. Hallock?

My point is that the bulb business and the seed business may safely be left in the hands of those who have devoted their lives to those lines and to rest assured from past experience that wherever a special crop does best there it will be grown. You might as well insist on our growing our radish seeds in Pennsylvania when we can get them better from France, or our aster seeds in Michigan when we can get them better in Germany, as to tell us that we ought to get our Romans and Easter lilies grown down south when those whose business it is to know consider the matter very problematical at the present stage of the game.

I am not familiar enough with the trade in bays, azaleas, rhododendrons and so forth to have a decided opinion on that part of the subject, but the probabilities are that these might also be safely left to private enterprise. Broadly speaking, public bodies should not meddle with private business. They should confine themselves to such things as can only be done by a public body. And they should never try to benefit one section at the expense of another. What they do should be for the good of the whole. There's a whole lot of molly-

RANGE OF TWENTY-ONE GREENHOUSES 225 FEET LONG RECENTLY ERECTED BY THE DALE ESTATE, BRAMPTON, ONT.

CROSS SECTION SHOWING CONSTRUCTION OF THE KING AUTOMATIC STOKER.

coddling paternalism around at present that has no place in the arena of straight business.

Speaking of the gladiolus reminds me that John Farquhar, careful and correct as he always is, forgot to give credit to Mr. Hallock on the gladiolus. This was during an address at Asheville. Mr. Farquhar spoke fittingly of the work of Van Fleet and Groff but failed to mention Mr. Hallock at all and if I am not greatly mistaken the latter gentleman was not only fifteen years ahead of the others but greater than either in the practical work he accomplished. I feel sure Mr. Farquhar will be grateful to me for nudging him on this point, as he is quite familiar with Mr. Hallock's work.

The convention is fading from our memories a little, or rather the chief features of it are taking on that mellowness which is so charming in a jar of preserves, even although these may have been produced from unpromising materials. What was peppery then is mellow now. I can remember without the twitch of an eyelid even the dose that W. R. Smith poured into me on account of my lack of appreciation of the ideal and the beautiful. I never realized until then what a miserable misfit I was. There was a group of a dozen or so around his venerable and towering figure listening to his glowing words. In an unguarded moment I dropped some drivel about our being business men first and poets afterwards. Then you ought to have heard him! How the floodgates of his wrath opened and overwhelmed me in their irresistible force! One wave boiled me alive; the next congealed me in its icy embraces! I was tossed and buffeted, deafened and stunned in the mighty turmoil and had only recovered from the shipwreck when I found myself washed up on the Battery Park hill a quarter of a mile away from the whirl-pool.

However, now that I am a safe distance from Leviathan, I say it again, that the S. A. F. is a business organization, and has no call to teach aesthetics to the multitude and forget the business part. We are all out to see how we can make a dollar, all except "W. R. S." and Patrick O'Mara. As for the Humbugs, I suppose I am one of the Humbugs myself, for I would most shamelessly preach aesthetics and idealism or any other harmless "ism" if I thought it for the

good of business, but I would reserve the right to be honest with myself and my colleagues. As for the Humbugs, they have one virtue at least, for they draw the line at humbugging themselves. Of course after this declaration I will go down a side alley if I see "W. R. S." approaching in the near future. I don't want "the water cure" again.

Mr. O'Mara said "a grower must feel an enthusiasm born of a love of the beautiful, as otherwise he could not know the needs of a plant or supply its wants." And bye and bye Mr. Ward came on and talked for an hour or two on experiments with fertilizers. It seems he had been struggling with the problem of what the plants needed for several years. If he had only had "an enthusiasm born of a love of the beautiful" look what a lot of trouble he would have been saved!

I can smile as I think of that, and also at Patrick's reference to "Joe" Wheeler's rebel yell on the hills of Cuba. He is an adroit politician, is the doughty Patrick, and if they don't make him governor of New York some day it will be because he has gone down to Washington to a bigger job.

The late Major McKissick, peace to his

ashes, was perhaps the best hated man in Asheville for about forty-eight hours. The Battery Park is a fine hotel, but its advance booking arrangements were execrable and the head of the house naturally got all the blame. But after the shoot, and when many of us came to know him personally, his affability and courtesy were so pronounced as to largely dispel the thunderclouds of aversion. The true character of the man shone out at last and accounted to us for the remarkable reputation he held all over the country as a Boniface so magnetic and charming that people were always eager to give his house the preference.

The Deacon's chum, George Anderson, of Darby Road, among the other streaks (or strokes) of adverse fortune which came his way at Asheville, had the bad luck to lose a shoot against the Major and with it a case of V. O. P. It took eight men four hours to present this trophy to the winner and at the wind-up each of the eight carried away with him a tappit hen of genuine South Carolina moonshine donated by Major McKissick. The one that came under my observation had this legend on the outside:

This whiskey is good
As ever yet stood
Steaming on table in glass or pot.
It came from a still
Right under a hill
Where the eye of the gauger saw not.
And he who is talking
A word about walking!

Out of the window at once with him!

So far as I have heard, nothing serious has since happened to any of the eight, indicating complete silence on the subject of "walking."

The general features of the convention were so well done by the reporters that there is nothing much of interest to be added by a lay member at this late date. The best thing I read in that connection was Wm. Scott's review of the occasion. That account was one of the best things Scott has ever done, and that is saying a good deal. I heartily agree with the opinion that so successful a convention at such a distance was a sure test of the stability and importance of the society and would have been quite impossible ten years ago.

KING AUTOMATIC STOKER AT THE DALE ESTATE GREENHOUSES, BRAMPTON ONT.

In closing the jar I want to send a word of greeting to the Greenwood Philosopher. Far from considering him a trespasser, I welcome most cordially his cheerful and stirring company among the preserves. And let me say in all sincerity that the flavor of his jar is so far ahead of mine that I hope he will take the lid off at very frequent intervals.

But he's all wrong about the fill-up-scheme. They do the best they can with the funds at their disposal. They give the grower all they can and they also try to give the visitor his 50 cents worth. Don't blame the poor fellows who are running the show. They can't help it. It's the system that's wrong.

And the correct system? There are two that I know of:

(1) The Massachusetts Horticultural Society system: Money to pay handsomely for a show, independent of the box office.

(2) The red fire system, on the Barnum plan: Simply to make money and eliminating the "advancement of floriculture" idea entirely.

We may discuss it until the cows come home and that's about where we'll land. I have been wrestling with it for fifteen years and that's where I have "arrove" finally and definitely. It must be either number one or number two. No middle way. Furthermore, I don't echo that wail about the scarcity of Taggarts.

There are Taggarts in every city of any size. I'll bet you could get half a score of them right here in Philadelphia if you took the trouble. I don't say in our business, but near enough the "hoop-skirts" of it, as Sam Pennock says, to be quite available.

I dearly love to agree in my opinion with the people who stand up and say something. But when you come to think of it this "Me Too" role is very useless and a great waste of breath. You will therefore notice that I only speak up

A Canadian Enterprise.

The illustrations of the new greenhouses and devices at the Dale establishment at Brampton, Ont., to be found in this issue, serve to remind us of the marvelous progress which has been made at that place within a comparatively few years. It was, indeed, a modest beginning in floriculture that was made by the late Harry Dale, about 1880, and now one block of rose houses alone covers an area of three acres. At the time of a recent visit, a new plant was in course of construction containing, in two unequal sections, twenty-three houses, 17x225 feet, each house being designed for extension to 500 feet in length. In the power house twelve water-tube boilers were being installed, the house itself having capacity for thirty-six such boilers, arranged with modern conveyers for carrying coal to boiler, each boiler being fitted with King's automatic stoker. The cold storage building has a capacity of 3,500 tons, and a brick coal shed 58x108 feet, thirty feet high to the ridge, was being fitted with all modern appliances for handling coal and preventing spontaneous combustion. The coal used is Reynoldsville slack, costing about \$2.35 per ton, delivered. It is the automatic stoker employed which renders possible the use of this slack.

Heating and structural ideas, as developed in the new houses of the Dale establishment, are thoroughly modern, as will be found from an examination of the illustrations. In a cross section showing construction of the new houses the principal dimensions are as follows: Length, 225 feet; span, seventeen feet; height to gutter, seven feet; height to ridge, eleven and one-half feet; width of walk, two feet. Battered glass is used throughout. Automatic ventilation has been extensively employed in both rose and carnation houses. The illustration shows the

hopper, H, by a tube leading from a storage bin above the boiler. The screw, S, forces the fuel to the coking plate, P, where it is exposed to the action of the flame from the lower part of the furnace, which is deflected toward it by the fire-brick arch, A. The result is that the smoke and more volatile gases are burned out, the fuel coked and smokeless combustion secured. After the fuel has been coked it is carried on down by the cokers, P, to the alternately reciprocating grate bars, B, and by these delivered to the ordinary grate bars, O. Ashes and clinkers are dumped by the hinged grate, D, worked from the front of the furnace. There are in all forty-four stokers and an equal number of water-tube steam boilers. The stokers burn from twenty to twenty-five pounds of fuel per square foot of grate surface per hour, using the natural draught of a 60-foot chimney.

The product of this concern is mostly shipped to such points as Montreal, Toronto, Quebec, Ottawa, Prince Edward Island, Halifax and Winnipeg with occasional shipments to the United States. The stock grown consists chiefly of roses, carnations, violets, lily of the valley chrysanthemums, Asparagus plumosus nanus and smilax. *Lilium Harrisii* is forced to the extent of 3,000 and *L. longiflorum*, 5,000; Roman hyacinths, 30,000; daffodils, 10,000, all Von Sions; lily of the valley, 500,000. Violets are grown to the number of 20,000, Farquhar and Princess of Wales. This concern has never been able to make a market for Campbell, and Marie Louise has always been diseased. One house 350 feet long is devoted to asparagus, and one 200 feet long to smilax. The chrysanthemums grown include Fitzwygram, Glory of Pacific, Marion Henderson, J. E. Lager, Ivory, Pink Ivory, Vivian-Morel, Niveus, Timothy Eaton and a few others in lesser quantity. About 100,000 carnations are grown regularly, including White Cloud and Glacier (said to be one of the best here) for white; Crane, for red; Roosevelt and Maceo, for crimson; Lawson, Marquis, Morning Glory and Melba. Varieties under trial are Governor Wolcott, Mrs. Potter Palmer, Mrs. Higinbotham, Gaiety and Estelle. This concern is also Canadian agent for Adonis and Enchantress.

The roses grown include American Beauty, 12,000; Bride, 20,000; Bridesmaid, 25,000; Liberty, 4,000; Perle, 3,000; Morgan, 6,000; Sunset, 4,000; Meteor, 5,000, with a few Cusin and Sunrise. Edward Dale, manager of the greenhouse department, stated that he had kept Bride, Bridesmaid, Perle, Sunset, Cusin and American Beauty two or three years in the same tile benches, removing annually as much of the top soil as possible without injury to the roots. The soil is allowed to dry out only enough to be handled easily, and the plants are pruned back to six inches. With old grafted plants Mr. Dale found that he had more blooms of first quality when carried over two or more years. About 35,000 plants were grafted last year, including Bride, Liberty, Bridesmaid, Morgan, Cusin and American Beauty. Grafted stock of Perle and Sunset does not succeed here, while grafted Liberty does much better than stock on its own roots. Stock carried over this year for the first time on tile beds looks better than any ever grown one year in benches. This stock includes Bride, Bridesmaid, Perle and Sunset. The new rose, Canadian Queen, was not in bloom when the place was visited last September, but the stock of 2,500 plants was in

SECTION OF IRON GUTTER EMPLOYED IN DALE ESTATE GREENHOUSES.

when I think I have a little contribution to make to the discussion. That's the idea, and not a malign devil of contradiction possessing me, as some of my dear friends would have you think. Neither do I believe in tucking my good humor under the bed when I tackle a knotty problem. You may contradict this child all you want to, he'll never get mad on account of the other fellow not agreeing. I am full of sins and back-slidings, but a love of "contr'ing" people is not one of them.

GEORGE C. WATSON.

automatic machine attached to an iron pipe post, H, connected to the shutter shaft, D, by the crank 3 and connecting rod 5. The machine is provided with the usual rubber and iron thermostat. It works like a small, well balanced controlling valve, water entering either below or above the piston in cylinder, 1, to push up or pull down the ventilators as the temperature changes.

Two of the illustrations show the automatic stoker employed for burning the soft coal screenings known as Reynoldsville slack. The fuel is brought to the

excellent condition. In tying, wires are used, suspended from the rafters by means of strings. The soil is a medium clay. Steam heat is employed throughout.

The executors of the estate, Wm. Algic and Thomas W. Duggan, have every reason to feel proud of the success which has attended their efforts since the demise of the founder of the establishment, and their further endeavors will be watched with lively interest by every grower in this country as well as their own.

Herbaceous Plant Notes.

Hardy plants in the borders or shrubbery should have a little attendance before winter sets in. The more vigorous growers, especially, should be seen to and if they are crowding their neighbors by spreading out too far, part of these unruly plants should be removed and planted elsewhere if wanted. The borders should have a general cleaning. All old stems should be removed first and then you should proceed to fork over all the spaces between the plants and wherever you notice that a clump has extended crowns or roots beyond its allotted space part of such clumps should be cut away with a sharp spade, thereby allowing their perhaps weaker neighbors a chance to develop more perfectly another season.

Planting ordinary stock may still go on, but the weaker and choicer things should not be disturbed so late in the season; they are too apt to succumb to dampness and are not likely to withstand the oft repeated changes from freezing to thawing when not established. The late plantings of all stock must have winter protection of some description, straw, litter, leaves or long manure. The latter is preferable, enriches the ground and is not likely to be blown about by the wind, as is the lighter material. The spaces between the plants should be covered snugly up to the crowns, but the plants themselves must have air; a very slight shading is ample protection for them.

The covering of the ground around the base of the plants will prevent the heaving out of the unestablished plants, otherwise crowns and roots would stand exposed to the dangers of alternate freezing and thawing. Evergreen foliage should never be covered under a layer of leaves or litter of any sort. A mere shading may in some cases be required, but almost all of our sheet-forming, dense-growing perennials are better off without it; the foliage needs all the air it possibly can get. Iberises, arabises, aubretias, the creeping phloxes, alysums, helianthemums, erinus, arenarias, linneas, sedums, Veronica rupestris and its allies, armerias, drabas and the like will winter safely without shading and

if covered at all, evergreen boughs are preferable, and even these should be used but sparingly.

I have often said we should avoid early covering, as plants do not suffer during the early part of the winter, and I repeat here that more harm is done to our hardy plants by covering than by the severity of our winters. Even the new,

AUTOMATIC VENTILATING MACHINE USED IN DALE ESTATE GREENHOUSES.

late plantations should not be covered until the ground is frozen hard; then, under this covering, the earth will remain frozen unless a prolonged spell of mild weather thaws it out. Toward spring, in February or March, is the most dangerous time; before then but very little damage is done to the dormant plants and if we protect them then they would be safe enough, while early protection often causes decay, among the dense mat of growth especially, destroying stems and foliage in patches or sometimes even

the plants themselves. But even if we save the plants we cannot expect flowers, for the season, at least.

The past summer has been a favorable one for vigorous growth of all the hardy plants, and young stock especially has made remarkable growth. The moist summer has caused many of the spring-flowering plants to make a second start and many of them have bloomed again or are still in flower, even though we had several quite heavy frosts. The early aconitums, for instance, have come out with a profuse crop. A. Tauricum and A. Napellus album are now in flower with the latest bloomers, A. autumnale and A. Japonicum. Veronica rupestris and V. montana show numerous blue spikes. Caltha palustris fl. pl. is making a show almost as good as in spring time, also various trollises and Papaver orientalis has opened quite a number of its large, brilliant flowers. Polemoniums of various species, aubretias, dwarf phloxes, delphiniums, digitalises, geums, erigerons and a number of other things have bloomed a second time and there is still a fair show of asters, veronics, echinaceas, erodiums, geraniums, Iceland poppies, physostegias, hybrid lobelias, scabiosas, coronillas, Plumbago lar-pentae, stokesias, Eupatorium eclectinum, gaillardias, tunicas, anemones, saponarias and coreopsises, which may last well into November, as it has done often before.

In a lot of Rudbeckia purpurea seedlings, blooming for the first time this fall, we discovered a number of flowers with longer and broader, drooping petals and much brighter in color, a variety which I knew years ago under the name of R. serotina and which I could not find advertised in any of the catalogues lately. It certainly is a great improvement on the ordinary R. purpurea, vigorous in growth, free flowering and the flowers of great size and substance. We shall take good care not to lose it again.

J. B. K.

Epiphytes of Florida.

The moist and tropical climate of southern Florida produces a very dense and luxurious growth, consisting of mangrove, mahogany and rubber, as well as live oak, cypress and numberless other kinds of southern forest trees. Among these are the graceful Oreodoxa regia and many other beautiful palms.

The presence of these dense swamps and forests bordering the everglades, as well as the climatic conditions are peculiarly conducive to the growth of all the epiphytes that are native to Florida. In the swamps here are found no less than twenty kinds of orchids, and as many or more of tillandsias and ferns, some of which are very rare and beautiful. Such

CROSS SECTION SHOWING CONSTRUCTION OF THE NEW GREENHOUSES OF DALE ESTATE, BRAMPTON, ONT., 21 IN RANGE

is the beautiful *Asplenium serratum*, which I have found quite rare.

Among the orchids I find the showy *Oncidium* and the *Cyrtopodiums*, as well as many beautiful small *epidendrums*. And I have also found one, resembling the *epidendrum*, a large and very showy plant, having small yellow flowers, for which I have not been able to find a name. I have sent a specimen of it to the Smithsonian Institution for classification, but so far they have not named it.

Most of these plants I have found here, and many others in the great swamps along the coast, where I have been making collections of all of them for botanical gardens and orchid fanciers in various parts of the country. But many of them are found only in very remote regions bordering on the everglades. Some of these plants are not generally known to exist in the United States which, of course, adds to their value from a botanical standpoint, and may be of commercial value to orchid dealers.

J. E. LAYNE.

Some New French Roses.

The following new roses will be put in commerce this autumn by J. Pernet-Ducher, the well-known French rosarian, who raised such beautiful roses, as *Soleil d'Or*, *Prince de Bulgarie*, *Mme. Caroline Testout*, *Mme. Abel Chatenay*, *Souvenir du President Carnot*, *Marquise Litta* and many others:

Mme. Paul Olivier.—Very vigorous, upright, with large bronzy leaves and long oval buds; the flower is very large, full, globular, and salmon shaded with pink. Very free flowering.

Monsieur Leide.—Very vigorous and of branching growth, with fine, deep green leaves and very large, full, cupped flower of a superb pink-carmine tint, shaded with yellow. Very sweetly scented. Has a long season.

Senateur Belle.—Very strong in growth, producing straight shoots. The leaves are light green and the flower large, very full and globular in shape. Color rosy-white salmon, the center deep yellow; outer petals shaded with rosy carmine; free flowering.

Monsieur Joseph Hill.—Shrub very vigorous, branching habit; fine green bronzed leaves, superb long bud oval shaped. Flower great, full, of the best shape, color pink salmon, shaded with yellow, the outside petals pink-copper hued. Very fragrant and free flowering.

These four varieties are all hybrid tea roses, and the descriptive particulars have been kindly supplied by the raiser.

It Is to Laugh.

"Women in need of money-making occupation ought to read up on violets. First prepare a plot of ground 100 feet long by eighteen feet wide and then plant violets in it. If you fail to clear \$1,000 the first year blame George Saltford."—*Boston Times*.

Referring to the government's flower show at Washington, the *Washington Post* says that "the 'kissing-palm' naturally was a favorite here and many persons stood around the plant and wondered at the peculiar power for which it has been named. Many others visited the 'mother-in-law plant,' a small, insignificant specimen, harmless to the touch, but poisonous if scraped."

The *New York Sun* devoted a whole column of its evening edition on October 23 to a description of the war of exter-

mination which the United States government is waging against the "Dutch hyacinth, the pet of the European aristocrat and the pride of the Dutch florists," making the ludicrous blunder of confounding the *Eichhornia crassipes*, sometimes known as "water hyacinth," with the spring-flowering garden bulb.

According to the *Boston Post*, Frank P. Sawyer, of Clinton, has a pink that "awoke to find itself famous" one recent morning. "Mr. Sawyer," it informs us, "took slips of the Lawson and slips of the Chicago. The pollen was procured from one and the polozoned from the other." In the east it is believed that a "polozoned" from Chicago should be a winner.

According to the *Manchester* (N. H.) *Union* a rare plant recently found has been identified at Harvard Botanical Garden as "circum palcustris of scopeti." Fortunately it is no worse.

Chicago.

CLUB BANQUET.—ROSE CROP OFF AND MARKET STIFF.—LIBERAL SUPPLIES ON ALL OTHER ITEMS.—DEMAND PROVES VARIABLE.—PROSPECTS FOR THANKSGIVING.—THE GROWERS.—A VARIETY OF TRADE AND OTHER JOTTINGS OF FLOWER SHOW WEEK.

The trade visitors to the meeting of the Chrysanthemum Society of America and the exhibition of the Horticultural Society of Chicago were tendered a banquet at the Auditorium, November 13, by the Chicago Florists' Club. Nearly a hundred sat down to the feast and in calling the assembly to order at 10:15, President Winterson expressed great pleasure at the presence of the numerous visitors from distant cities and regretted the absence of our dear friend Edgar Sanders, as the only drawback to an ideal reunion. He then introduced President Chadwick, of the Horticultural Society, as the toastmaster of the evening. Mr. Chadwick felicitated the company on the progress of our trade during the past twelve years of the existence of the society. He called upon President Herrington to respond to the toast, "The Chrysanthemum Society of America." Mr. Herrington said he responded to this with much pride and pleasure. He felt that the indebtedness of the Chrysanthemum Society to the Horticultural Society of Chicago was of great and lasting character. In concluding his remarks Mr. Herrington presented to John Poehlmann the silver cup offered by the society for the best ten flowers shown by any grower. President Chadwick then introduced ex-President E. Gurney Hill, giving him the toast, "The Progress of Horticulture During the Past Ten Years." Mr. Hill's advice to the young men in horticulture was very interesting. He alluded to the progress in carnations, but thought we could properly charge ourselves with remissness in developing the roses. In carnations he felt that the advance was much more commendable, in fact might be called tremendous. The Enchantress, as seen here, he said was a notable example. Elmer D. Smith answered with the toast, "The Flower Which is the Backbone of All Our Shows." About 1886, Mr. Smith said, the first chrysanthemum show was held in New York, and from this the shows had spread to nearly every state in the Union. No matter how remote, nearly every city in every state holds its annual exhibition. Compare here to-day the giant blooms of Eaton and Appleton with Jessica, Mrs.

Frank Thompson and *Gloriosum* of fifteen years ago. While keeping in view the grand commercial forms, we as true horticulturists must not overlook those unique and striking types that appeal to the tastes of the general public. Prof. John F. Cowell spoke for "The Botanical Garden." The botanical garden, Mr. Cowell said, may be credited with the introduction of the seedless orange and has done more to improve the yield of wheat during the last fifteen years than all the agriculturists of the world. "Horticulture in a Democratic District," was responded to by Judge Vesey, of Indiana, who spoke very poetically of the fragrance of the violet, the carnation and the rose, which he said gave in his district as delightful odors, flushed as rich a pink, or burst into as glorious bloom as in any republican territory. Frank T. Robinson responded to the toast, "Kansas City." Alex. Wallace responded to the toast, "The Horticultural Press." Mr. Wallace prefaced his remarks by congratulating the two societies on their grand joint exhibition, which he said he believed excelled any yet held in this country. Mr. Wallace credited the trade papers with much of the enthusiasm and interest which had been shown by the trade in carnations and other leading flowers. Among others who responded with brief remarks were J. D. Carmody, G. A. Rackham, W. N. Rudd, Philip J. Foley and F. S. Allen. Songs were rendered during the evening by Frank Carter, Anton Then and the Florists' Club quartette. The arrangement of the banquet hall, the decorations and the menu reflected much credit on the committee, P. J. Hauswirth, who had the matter in charge. The Geo. Wittbold Company contributed decorative plants and Peter Reinberg a profuse display of his finely grown Sunrise roses.

The week opened briskly with the rose market well cleaned out; in fact supplies in this line had so shortened that by Friday prices had stiffened and Saturday found the best stock in the market worth \$7 and \$8 per hundred, with the fakirs' grade at \$2. Seldom has the crop dropped away so quickly. Warm weather this week has helped to bring in everything that could be expected of the plants, so that stringency has been avoided, but wholesalers have frequently been pushed to fill orders. The receipts of Beauty have held up better than on teas and the stock is first-class. It is getting its color back again, lost in the recent protracted period of rain. But Brides and Bridesmaids have lost something in quality. *Mme. Chatenay* was never better and *Ivory* and *Liberty* are superb. Carnations are coming along heavily, steadily and of improving quality. Violets have been abundant but for the past couple of weeks the supply has not been well distributed, the receipts being lightest when the demand was greatest and heavy on the days when bad weather kept people off the streets. There are practically unlimited quantities of chrysanthemums, including every seasonable variety and all degrees of quality. Prices have ranged from 2 cents apiece to \$4.50 per dozen, but the ordinary run of stock has been held at from \$1.50 to \$2.50 per dozen. Eaton seems to have the call for white, and yellow has not moved as rapidly as usual. There is good business on the choicer stock for wedding work and wild smilax is beginning to move. Trade is variable as yet, Tuesday seeing a dull market. Since then demand has been more steady,

but, despite the weather forecaster's daily prediction of snow and cold, the weather has continued too warm for a good fall business. The prospects for Thanksgiving are now engaging attention. The indications are for adequate supplies except on the item of roses, and the advance quotations are about on last year's list.

Mrs. C. L. Washburn is suffering from another impairment in health and her condition is giving much alarm. On Wednesday Mr. Washburn took her to Alma, Mich., for treatment. In the event of the hoped-for improvement he will be back at the store on Monday.

J. A. Budlong is ready for cold weather; he has a coal pile on hand which cost him \$5,000. Another item on hand is 550 boxes of glass laid in at a cheap price, but it presages further additions to his range in the early spring.

Wietors will plant La France more extensively next year, finding a big call for the present cut of choice buds. Several others who once discarded this rose will plant it again next year.

H. Bauske doubled his space for Beauty this year. He has also thrown out Meteor to give room for Liberty, and is well pleased with the move. Randall gets the cut.

Gunnar Teilmann, of Marion, sent some fine exhibits for the show, but failed to enter them in season, so Amling sold them. The Goldmine were great.

The Fleischman vase of 100 chrysanthemum blooms at the show was Timothy Eaton grown by Weiland & Risch. The stock was very fine.

J. A. Peterson, of Cincinnati, is at the Palmer house with some good Pandanus Veitchii and Gloire de Lorraine begonias.

A. Dietsch & Company have been given another patent, covering recent improvements in their new plan of construction.

Deamud is congratulating himself on the wild smilax he supplied for the show. It was up to exhibition grade.

Mrs. C. M. Dickinson, wife of the manager at Hunt's, has recovered from a trying three weeks' illness.

Emil Buettner became the proud father of twin daughters on Tuesday.

Toronto.

TRADE SHOWS CONSIDERABLE IMPROVEMENT.—ALL ABOUT SUPPLIES.—GROWER HAS FINE NEW RANGE.—STOCK IN GOOD SHAPE.—NOTES.

Trade, which has not been very encouraging, is again picking up. Quite a number of funeral orders and brisk transient trade is relieving the market of the over-abundant supplies. The weather still remains pleasant and the good growth the plants are making is favorable to a good winter crop; the quality of stock is very fine. Roses are to be had in unlimited quantities and the past week has seen a drop in price. First-class Beauties at \$20 per hundred are plentiful and the buds are well colored. Kaiserin is holding up well. Bridesmaids, Meteors and Brides are good, quoted at \$6. Carnations are even more plentiful but prices remain unchanged. Lawson and others of the finer varieties sell well but the seconds hang on. Col. Appleton has been arriving in large quantities but this variety is disappointing, for after being cut a day or two, they become soft. Retail customers have also complained of its keeping qualities. Several seedlings from Geo. Hollis take well; two of the pink varieties hold certificates.

W. J. Lawrence has added 16,000 feet

of glass to his place in Eglinton, to be devoted to roses. The new section is of the modern kind, with tile benches and iron gutter. Six weeks' delay was caused by the scarcity of glass and the plants suffered some, but the warm sun lately has helped them considerably. Lilies and a little mixed stock and a few chrysanthemums form the stock for the other 7,000 feet of glass at this place. A model packing room has also been added. A bulb shed about twelve feet high, with three tiers of shelves, contains the bulbs after they have been planted in boxes. At the other place in Mimico Thos. McKim, late of Grainger Bros., now has charge. The entire seven houses are planted in most of the standard varieties of carnations, which are doing well.

The Horticultural Society held a chrysanthemum show in its rooms on November 4. Quite a showing was made by both amateurs and professionals. The meeting was well attended and prizes were awarded to amateurs only.

A shipment of Lillian Pond carnation arrived in splendid shape and was much admired at Jno. H. Dunlop's.

Cincinnati.

CLUB HOLDS A SUCCESSFUL CHRYSANTHEMUM SHOW.—GOOD STOCK EXHIBITED.—BUSINESS VERY DULL AND MUCH GOOD STOCK GOES TO WASTE.

The chrysanthemum show at the club rooms last Saturday brought out a big display, although in quality the flowers were not up to last year's. A tremendous crowd of spectators viewed the different exhibits. Messrs. Hardesty, Kelly and Jones were the judges and awarded the premiums as follows: Twelve white, first, Witterstaetter, with Chadwick; second, E. G. Hill Co., with Eaton; third, Witterstaetter, with Eaton. On pink, J. W. Rodgers received all the prizes with Perrin. In yellows Witterstaetter was first and second with Appleton, the Hill Company third with Yellow Eaton. In the class for twenty-five Bonnaffon the competition was very keen, there being five good vases. The Hill Company received first, Witterstaetter second and Rodgers third. Witterstaetter received first for best general display. George & Allan were awarded a special prize for their table of miscellaneous stock. Will Murphy had a vase of Murphy's White and J. A. Peterson showed Begonia Gloire de Lorraine and a handsome vase of Lawson carnations. Other exhibitors were Wm. Schuman, Henry Schwarz and Thomas Jackson. At the meeting in the evening there was scarcely a quorum present and it was decided to hold a special meeting for Saturday night, November 15.

Business, owing to the very warm weather, seems to drag, and flowers of all kinds are plentiful. It is impossible to move one half of the stock received and great quantities of good stock find their way to the barrel. Chrysanthemums, carnations and roses are simply a glut, while lily of the valley and violets are just about equal to the demand. Just think of Timothy Eatons, and good big ones, too, selling for 10 cents apiece.

Richard Witterstaetter says that any one who claims that the exhibitions given in the club rooms do not benefit the standholders in the market house speaks without knowledge of the facts.

J. W. King, of St. Louis, is with J. M. McCullough's Sons as manager of their wholesale cut flower department.

Indianapolis.

STATE ASSOCIATION GIVES AN INFORMAL FLOWER SHOW.—MANY EXHIBITS AND QUALITY OF THE BEST.—NOTES.

The Indiana State Florists' Association held a small fall show at the agricultural rooms of the State House on Wednesday, November 12. The show was a success in every respect. The exhibits were of fine quality, tastefully arranged and there were just enough of them to fill the hall comfortably. Although the show was not extensively advertised there were many visitors, and they all seemed to take a great interest. The exhibitors will be well paid for their trouble by the advertising which they received. The South Park Floral Company contributed a fine vase of their new yellow rose, Franz Deegan. On Stuart & Haugh's table were fine vases of Mrs. Weeks, Appleton, Eaton, Golden Wedding and Mrs. Jerome Jones. They also showed Avondale and Lawson carnations and Golden Gate, Bridesmaid and Bride roses. Henry W. Rieman had on his table a display of carnations and chrysanthemums. The latter were of the well-known Rieman quality, especially his new seedling, Majestic, which took everybody's eye. Philip Conway had two immense vases of Major Bonnaffon. John Hartje showed some good blooms of Appleton and a fine display of carnations, among them about a dozen seedlings. He expects to make another hit shortly in the carnation line. W. A. Klaubke and Huckriede & Son showed pot plants. The latter also had a very fine display of cut flowers, consisting of about eight varieties, among them Golden Wedding and Eaton, very fine. E. A. Nelson had a very nicely arranged table, made up of roses, carnations and chrysanthemums in the cut flower line, cyclamens, Boston ferns and Lorraine begonias representing the pot plants. Baur & Smith showed Eaton, May and Mary Hill of good quality, besides a large and beautiful display of carnations, mostly seedlings of their own raising. Smith & Young showed their violets and Bertermann Brothers made a fine display of cut flowers and plants, most artistically arranged.

Certificates were given to H. W. Rieman for his white seedling chrysanthemum, Adelia, and honorable mention for Majestic. Honorable mention was made of Stuart & Haugh's fine display of cut flowers.

H. J.

St. Louis.

The regular meeting of the Florists' Club was postponed one week, so that the next meeting will be held November 20.

The annual banquet to gardeners, florists and nurserymen, provided for in the will of Henry Shaw, will be given at the Mercantile Club November 19.

SALT LAKE CITY, UTAH.—J. L. Maxwell is very ill with a complication of indigestion, kidney and lung troubles.

GALENA, ILL.—B. F. Vandervate rented a vacant store down town for his annual chrysanthemum show and attracted a good crowd.

STAATSBURGH, N. Y.—The Pierson-Sefton Company has contracted to erect a fine palm house in the spring for the Dinsmore Estate.

DES MOINES, Ia.—Fire recently destroyed the office at the greenhouses of Frank E. Pease. The greatest loss was in the books which were consumed.

THE AMERICAN FLORIST

EIGHTEENTH YEAR.

Subscription, \$1.00 a year. To Europe, \$2.00. Subscriptions accepted only from those in the trade.

Artificial Manures for Chrysanthemums.

M. Truffaut, as a result of his chemical investigations, says the *Gardeners' Chronicle*, recommends the use of a manure containing:

Sulphate of ammonia	30 per cent.
Sulphate of potash.....	26 per cent.
Double superphosphate containing 44 per cent of acid.....	40 per cent.
Ordinary superphosphate containing 13-15 per cent of acid.....	4 per cent.
	100

The date of Easter, 1903, is April 12.

It has been a season of successful flower shows.

It is worthy of note that Major Bonaffon, erstwhile leader of yellows, has passed out of the prize-winning class of chrysanthemums.

DORNER's Fiance, a fine light pink seedling carnation, exhibited at Chicago this week, has been sold to the Chicago Carnation Company.

WHEN cut flowers are plentiful send a box of seasonable stock to the editor of your local paper and see the nice little notice he will print in return.

THE scarcity of Manetti stocks will interfere with the grafting of Liberty roses for next season's planting; otherwise few own root plants would go in.

GROWERS of chrysanthemums should carefully note the important resolution adopted by the Chrysanthemum Society of America, with regard to sports, during the second day's proceedings at the Chicago convention.

It might not require all the millions of a J. Pierpont Morgan, but it would certainly necessitate the exercise of all his astuteness to reconcile even a small part of the varying interests and organize a "trust" in the flower trade.

CONTINUOUS advertising creates confidence. The prevailing opinion is that one cannot be constantly before the public without being found out and known for what he is. *Printers' Ink*, the little schoolmaster in the art of advertising, says the people believe in a man who can stand trial by the public.

Society of American Florists.

DEPARTMENT OF PLANT REGISTRATION.

H. Weber & Sons, Oakland, Md., register new carnation Governor Lowndes, color pure white, size three to three and one-half inches in diameter; stem strong, one to two and one-half feet during the season; odor spicy; vigorous grower but makes very little grass and will stand close planting.

The H. Dale Estate, Brampton, Ont., registers new rose Canadian Queen, a sport from Mrs. Pierpont Morgan, color shell pink; foliage dark green, clean cut; habit vigorous; free flowering.

WM. J. STEWART, Sec'y.

Chrysanthemum Society of America.

Following are the reports of the committees judging seedlings, sports and new importations.

New York, November 8.—Nathan Smith & Son exhibited Convention Hall, pure white, incurved Japanese with reflexed guard petals, scored 97 points commercial scale. E. G. Hill Co. exhibited Yellow Eaton, canary yellow, a sport from Timothy Eaton, scored 86 points commercial scale.

Chicago, November 8.—Nathan Smith & Son, Adrian, Mich., exhibited No. 5, a yellow variety which scored 75 points commercial scale.

Philadelphia, November 8.—Wm. Paul Binder, Rider, Md., exhibited Mrs. Harry V. Casey, silver pink, Japanese incurved, which scored 87 points commercial scale, 87 points exhibition scale.

Cincinnati, November 8.—Nathan Smith & Son exhibited Jersey Cream, cream, incurved Japanese, Bonnaffon type, which scored 87 points commercial scale. Algoma, by same exhibitors, pink,

Japanese incurved, scored 86 points commercial scale.

The varieties exhibited under number by John N. May on October 25 have been named as follows, No. 11, Henry Sinclair; No. 15, Amorita.

EDWIN LONSDALE, Sec'y.

American Carnation Society.

H. Weber & Sons, Oakland, Md., register Governor Lowndes, pure white, size three to three and one-half inches; a strong vigorous grower; will stand close planting, making very little grass; stem strong and from one to three and one-half feet during the season. Odor very spicy and is extremely productive.

Isaac A. Passmore, West Chester, Pa., registers Marian, white, flowers like Hill, stronger stemmed, a free bloomer from early until late and never bursts a calyx; plant of McGowan type, exceptionally strong and healthy. The same grower registers Dora, white, flowers of Queen Louise type, but better size and form and calyx never bursts; extra free bloomer and grower says it is the best mid-winter carnation he knows of; plants of strong and rapid growth, producing stiff-stemmed flowers of the best commercial value.

Baur & Smith, Indianapolis, Ind., register Indianapolis, bright pink without the least tinge of blue or salmon; flowers large, a free and early bloomer; has good form, a strong stem and never bursts; keeps the same shade of color from time of opening until it goes to sleep. Plant is a strong grower. The same growers register John Mitchell, pure white, flower very large, borne on strong stems; it has a good calyx, is a strong grower and a free and early bloomer. The same growers register Indiana Market, a pure white of good size and form, an early and heavy bloomer; never bursts and is a good grower. The same growers register Fascination, Daybreak pink, a fine even shade; a fine, large flower on a strong stem and never bursts; strong grower and an early and free bloomer.

Note.—The names Marian and Fascination have been previously used, but not being in use at this day by any known grower, both parties claimed the right and privilege to use them for a carnation of to-day.

ALBERT M. HERR, Sec'y.

New York.

MARKET SHOWS SIGNS OF RENEWED ACTIVITY.—ROSE MARKET IN BETTER FORM.—GOOD STOCK SELLING WELL IN MOST LINES.—CHRYSANTHEMUMS A DRUG.—UNWIELDY ACCUMULATION.—CLUB MEETS.—MADISON SQUARE GARDEN SHOW A FINANCIAL FAILURE.—INSTITUTE SHOW NOW ON.—NOTES.

A little more life is apparent in the cut flower trade this week. Prices have stiffened up somewhat on roses and are now back in the neighborhood of where they were when the cave-in occurred two or three weeks ago. The receipts of roses are light considering the very favorable weather which has prevailed without interruption since November 1 and any change to more wintry conditions will no doubt furnish the rose industry with a considerable backbone while it lasts. The carnation situation is practically unchanged so far as common grades are concerned, but the marked improvement in the higher grades of the fancy varieties finds a weak but noticeable response and their tendency is to walk away from the ordinary market values. The same holds

true as to violets, the great mass of which find difficulty in realizing anything beyond the fifty-cent rate, while the choicest selection of gilt-edge picking has taken a jog upward to \$1.25. As to chrysanthemums, the wholesalers cannot tell where they stand. There is no standard of value and things are badly demoralized. The bulk of the stock is far away in advance of the average of former years, much of what is coming in as ordinary grade being such as would, not many years since, have commanded recognition on an exhibition table. The unwieldy boxes, many of them large enough to pack a man in, encumber the passage ways and floor space of the wholesale markets and storage cases and cellars are packed to the limit with stock awaiting any sort of an offer.

On Monday evening the regular November meeting of the Florists' Club was held. But little interest was manifested, there being only thirty-eight members present. Reports on the outcome of the Madison Square Garden show were in order and were, as expected, very disappointing in their summing up and disheartening to its promoters. Reports on the results of the trade exhibit department and the souvenir catalogue show that the hard work done in both these directions had counted for nothing, the receipts therefrom having been swallowed up in the general expense account and the club will have to depend upon the guarantee fund for means to pay the premiums. This guarantee fund will be ample to meet any deficiency without an assessment on the club members. About one-quarter of it was paid in in cash to the treasurer at this meeting. A communication was received from Gov. Odell acknowledging receipt of the club's "coal strike" resolutions. Four applications for membership were received. Officers were put in nomination for the coming year as follows: For president, W. H. Siebrecht, Lawrence Hafner, J. H. Troy; vice-president, F. H. Traendly, A. H. Langjahr; secretary, John Young, H. A. Bunyard; treasurer, C. B. Weathered, S. S. Butterfield; trustees, Henry Hentz, Jr., C. H. Allen, W. F. Sheridan, John Birnie, J. Austin Shaw, Theo. J. Lang.

The American Institute show, in progress this week, is the best ever given by the society. Especially fine are the chrysanthemums from D. Willis James, Wm. Duckham, gardener, and H. McK. Twombly, A. Herrington, gardener. There is an extensive showing of orchids from the Roebling estate, H. T. Clinkaberry, gardener. Julius Kochrs has a fine group of decorative plants. A. Herrington won the silver cup offered for exhibits of fifty blooms of one variety.

SITUATIONS, WANTS, FOR SALE.

Advertisements under this head will be inserted at the rate of ten cents a line (six words) each insertion. Cash must accompany order. Plant advs. not admitted under this head.

Every paid subscriber to the AMERICAN FLORIST for the year 1902 is entitled to a five-line WANT ADV. (situations only) free, to be used at any time during the year.

SITUATION WANTED—By German, 35, single, 19 years' experience, first class worker.
WORKER, care American Florist.

SITUATION WANTED—By a gardener, on a private place; competent grower of cut flowers, plants and exhibition stock. Address
A O W, care American Florist.

THE SEED TRADE.

AMERICAN SEED TRADE ASSOCIATION.
WALTER P. STOKES, Pres.; C. N. PAGE, First Vice-Pres.; S. F. WILLARD, Wethersfield, Conn., Sec'y and Treas.

LA CROSSE, Wis.—Henry A. Salzer returned from his Idaho gold mines last week.

SLUIS & GROOT, of Enkhuizen, offer two new cabbages, Zenith (red) Enkhuizen's Glory (white).

COLD and wet weather is reported in the tuberose districts, delaying the harvesting of the crop.

FREDERICK ROEMER, of Quedlinburg, has a strain of dwarf Machez mignonette which should prove useful for pot culture.

It is currently reported that more uniform contract rates have been tacitly agreed on by most of the prominent California seed growers for the season of 1903.

DENMARK growers report unfavorable weather conditions for cabbage and cauliflower seed during the past summer and fall and estimate the crop at about fifty per cent of an average one.

RELIABLE French authorities tell us that the information contained in our foreign letter, issue of November 1, page 484, was incorrect in regard to red cabbages, these not having yielded half a crop.

REPORTS from the tuberose districts indicate that the final outcome is approximately 70 per cent of a crop, the September and October rains improving the situation, which looked unfavorable in August.

J. C. SCHMIDT, of Erfurt, is offering a number of attractive novelties in flower and vegetable seeds, among them the Long Podded American Wonder pea, which is said to have larger pods than the original variety.

VISITED CHICAGO: Lester L. Morse and W. J. Fosgate, Santa Clara, Cal.; A. Emerich, of Vilmorin, Andrieux & Company, Paris, France; John R. Horne, of the Cox Seed Company, San Francisco; J. C. Sufern, Decatur, Ill.; S. Y. Haines, Tompkinsville, Mich.

BOUQUET green picking in the Wisconsin districts has progressed steadily; prices, while a shade easier, are not materially lower because all stocks are owned on a basis of higher costs than usual and owners will not accept a loss until they are shown beyond a doubt that weather conditions will continue against them.

SAN JOSE, CALIFORNIA.—The Braslan Seed Growers Company has rented the McKissick ranch, fourteen miles south of San Jose, toward Gilroy. This consists of 450 acres of diversified soil with an inexhaustible supply of water within four and one-half feet of the surface, assuring convenience in irrigation. With this leasehold the Braslan Seed Growers Company now controls over 800 acres for growing garden seeds.

CAREFUL investigation of the holly conditions show that the trees in Delaware are but poorly berried and most of the supply will be procured from southern Virginia and possibly some from Maryland points. There will also come to market some fairly good stock from the Southwestern points, both smooth and prickly leaved. On the whole the

chances are that strictly fancy holly will command more than average prices.

The Catalogue Trade.

In a communication received some time ago, W. Atlee Burpee writes as follows on this subject: "The catalogue trade the past year showed, as did all other branches of the seed trade, a very great growth over the year previous and demonstrated conclusively to our mind that when one branch of the seed trade is good all branches are good. We do not really think that the increase in trade of local dealers is to the permanent injury of the mail trade and yet we are quite convinced that there is not the same opportunity to-day to build up a mail order seed trade that there was twenty, or even ten years ago."

Italian Seed Report.

The last winter in Italy brought milder weather than usual the spring was late and damp but the summer has been, throughout the whole of Italy, a quite abnormal one (as everywhere in Europe) and the consequences thereof are found in bad crops. Our spring commences generally with April, which is a very pleasant month and from then we can expect constant fine weather without any long interruptions. All our cultures need these conditions and if it is otherwise they are more or less a failure. For instance, seeds having been grown in low and fresh positions suffered greatly from the heavy rains which lasted until the middle of June and which were followed by periods of excessive heat, thus interrupting or spoiling the normal development of vegetation. This great excess of moisture in the beginning of the summer was quite balanced in the autumn, for during three months we were without a drop of rain. In consequence of the wet weather our winter cultures could not be brought in at the usual time and thus make room for the summer cultures which therefore had to be sown later. This delay kept back the development of many articles.

Of vegetable seeds the onion crop is very bad again. During the last five years this article has brought only losses, so that it would not be at all astonishing if its cultivation ceased altogether in Italy. Of cauliflower all foreign sorts gave a very weak crop, also the early home varieties. Lettuce yielded a crop under the average; in cer-

tain districts they succeeded better and chiefly in situation, where the famous fogs are less prevalent. The bean crop is quite unsatisfactory and principally in naturally fresh situations. Cabbage and kohlrabi, especially the fine sorts, suffered greatly by the wet winter. Look furnished an average crop, also egg plants, tomatoes, cucumbers, gourds, etc. Of tomatoes only the late sowings came to perfect development on account of the frosts on April 8 and 19, which damaged these cultures to a great extent, also beans and potatoes. Runners gave a small crop as regards quantity. The other vegetables are grown here in too small quantities to call for a special report. Agricultural seeds, like red clover, lucerne etc., gave good crops.

The crops of the principal flower seeds grown in Italy have been satisfactory, with the exception of asters, of which some varieties have yielded almost a thing. Mignonette has given a good and heavy crop of seed. Marguerite carnation has given better results than for the last three years, owing to the rainless summer and constant weather in Italy. Centaurea candidissima is bad again. Dahlias and cannas have a satisfactory standing; the excess of humidity has damaged them a little but they are still flourishing.

A Note on the Sweet Pea.

Harry Eckford first started crossing and selecting from Lathyrus odoratus and its few primary varieties in the year 1873. Though now over 80 years of age, says the *Journal of Horticulture*, he is able to fly about on a bicycle, and still offers improved novelties each year. One of Eckford's early surprises was when Sweet Pea Mrs. Sankey, a pure white flower, yielded black seeds. Before that time white flowered sweet peas gave light-skinned seeds, but crossing here again mixed up the characteristics and showed how thoroughly infusion becomes.

Cucumber Seeds, FIDDLER'S SEEDLING,

The finest cucumber for table use and for pickling. Superior to all other varieties for forcing. A prize winner and seller. House of it illustrated in AM FLORIST July 26, page 930. \$2 Per 100 Seeds.

Mrs. C. N. Richardson, Waverly, Ill. Please mention the American Florist when writing.

Very BEST for FORCING

LIVINGSTON'S BEAUTY TOMATO.

Prof. W. J. Green, of the Ohio Experiment Station says:

"I am fully satisfied that Livingston's Beauty Tomato is the most profitable variety of all for growing under glass."

Prof. W. B. Alwood, of the Virginia Experiment Station says:

"Your Beauty Tomato was superb, and as usual, gave us magnificent fruit. We are using it now exclusively for winter forcing."

THE NURSERY TRADE.

AM. ASSOCIATION OF NURSERYMEN.

CHAS. A. LOENFRITZ, Pres.; D. S. LAKE, Vice-Pres.; GEORGE C. SEAGER, Rochester, N. Y., Sec'y. Twenty-eighth annual convention, Detroit, Mich., June, 1903.

THE inquiry for Elberta peach trees continues unabated.

THE national congress of apple growers meets at St. Louis next week. Many nurserymen will attend.

THERE will be few surpluses for nurserymen to wrestle with when the fall shipping season ends.

IRVING JAQUAY, of Benton Harbor, Mich., has paid \$16,000 for 295 acres of land three miles south of Buchanan, for nursery purposes.

THE Elizabeth Nursery Company, of Elizabeth, N. J., E. Runyan, president, has enlarged its capital to \$100,000, of which \$58,000 is paid in.

HIGH rates are driving the nurserymen to the consideration of a plan of mutual insurance somewhat on the order of the Florists' Mail Association.

THE prospects are for several pronounced shortages before the end of the spring planting season. Peach, cherry and plum trees are sure to be higher.

It is said that conservative nurserymen are already exercising considerable caution in the booking of orders for certain hybrid perpetual roses for spring delivery.

SEVERAL nurseries have had storage cellars or sheds since the trade was in its infancy, but the majority of nurserymen are only now awaking to the advantages afforded.

FOR apple growers in the northwest Patten's Greening is recommended as reliably hardy. It is a seedling of Duchess and the Rhode Island Greening, raised by Charles G. Patten, of Charles City, Ia.

San Francisco.

HORTICULTURAL SOCIETY HAS VERY SUCCESSFUL SHOW FOR MEMBERS AND THEIR FAMILIES.—GOOD BLOOMS EXHIBITED.—TRADE FAIR BUT CHRYSANTHEMUMS OCCUPY MOST ATTENTION.

At the Pacific Coast Horticultural Society's chrysanthemum show November 1 Sidney Clack, of Menlo Park, exhibited Timothy Eaton, the best ever seen here. It was a surprise, as Mr. Clack has not sent his stock to the San Francisco market, but has shipped every one of 5,000 blooms north and south of this city. H. Goertzheim, of Redwood City, had the best yellow at the meeting. Col. Appleton, the stems stiff and measuring seven feet in length, with perfect flowers almost ten inches in diameter. Mr. Carbone received first for a vase of mixed varieties. On outdoor-grown stock Wm. Kittlewell, gardener to G. A. Pope, received seven prizes on blooms almost as perfect as the indoor ones. The Golden Gate Park made a very creditable showing of outdoor flowers not for competition. H. Pottet had a couple of vases of Bonmaffon and Daillidouze, and Wm. Munro and John Davie, of Burlingame, had good stock. The hall was certainly much too small for the crowd that came to see the show. Next to the show hall was the entertainment hall, also crowded to the doors. A nice programme was provided, followed by refreshments and dancing.

Chrysanthemums of any color, quality and quantity are at hand, driving all other flowers into the background. But after another couple of weeks the carnation and rose growers will breathe a little easier. Appleton and Eaton are the leading chrysanthemums in size and price, \$3 per dozen. Ordinary stock sells down to 50 cents per dozen, to say nothing about the Chinese stock from outdoors. One sometimes wonders where all these flowers go to, but go they will as long as business keeps up as it is at present.

H. Goertzheim, of Redwood City, has his houses in fine shape and the chrysanthemums are attracting many visitors. This may also be said of S. Clack, of Menlo Park. Domoto Bros. are the leaders across the bay in that line of stock, some six or seven houses being devoted to this flower. Mr. Domoto says he will be at the next show.

F. Abe, of Berkeley, is home from a trip to Europe and is greatly improved in health. He found on his return that his better half can manage a nursery as well as himself, for the stock, mostly American Beauties, never looked better than at present.

Fick & Faber's new seedling carnation, Miss Louise Faber, is commencing to bloom, but the stems are not as long yet as they were last year. Orders for a little over 15,000 cuttings have been booked so far.

F. Young's stock of American Beauties is in prime condition and a good cut is expected for Christmas.

GOLDEN GATE.

LANCASTER, KY.—J. C. Thompson has started in ginseng growing, having bought a stock of 6,000 plants.

NILES, MICH.—The present Michigan Central greenhouses here will be replaced by a new range early next spring.

DES MOINES, IA.—W. L. Morris has built up his establishment until it now comprises 55,000 feet of glass. He reports trade fair.

OAKLAND, CAL.—H. M. Sauborn reports that business is good on the Pacific coast, most dealers finding it much better than a year ago. Stock is plentiful and good. The wholesale price of violets is only 75 cents per dozen bunches of 100 flowers each.

THE GLENWOOD NURSERIES

E. C. AMLING

WANTS YOUR BUSINESS

CONSIDERABLE number of buyers have found that there is no other source of supply, so dependable as Amling's on all matters which go to make satisfactory service in wholesale cut flowers.

WE HANDLE one of the largest cuts of Beauties in this market, averaging best goods the season through. The same applies to Tea Roses, Brides, Maids, Meteors, Gates, Ivory, La France, Cusin, etc. We have all grades, and on Brides and Maids certainly the best in Chicago. Carnations, too, all varieties, large supplies from best growers.

WHILE IT IS BUSINESS for every day that we seek, we want to impress the whole trade with the fact that this is the place to look for specialties. We at all times have the seasonable stock for choicest work. Best Cattleyas, Choicest Valley, Asparagus, Adiantum and an unlimited supply of Smilax.

WE HAVE, and always aim to have, besides the stock to be found in the ordinary commission house, various seasonable specialties to be found nowhere but here. Such an item during the present month has been the cut blooms of the sensational new chrysanthemum, Mlle. Marie Liger.

WE CATER especially to the shipping trade, finding it to give a steadiness to demand in times of large supply which compensates for the effort necessary to meet requirements in time of scarcity. Our space is large, our facilities adequate to all needs in the line of prompt service and the experience of our employes is a guarantee of careful selection, packing and shipment.

WE HAVE TWO long distance telephones and suggest their use in cases where an answer is required. Usually night rates (after 6 p. m.) for telephoning are not higher than telegraph rates for message and reply. Send for our weekly price list, mailed free.

E. C. AMLING,

THE LARGEST, BEST EQUIPPED AND MOST CENTRALLY LOCATED WHOLESALE CUT FLOWER HOUSE IN CHICAGO

32-36 RANDOLPH ST. Long Dis. Phones 1999 and 1977 Central. CHICAGO, ILL.

OUR PASTIMES.

Announcements of coming contests or other events of interest to our bowling, shooting and sporting readers are solicited and will be given place in this column.

Address all correspondence for this department to Wm. J. Stewart, 79 Milk St., Boston, Mass.; Robt. Kift, 1725 Chestnut St., Philadelphia, Pa.; or to the American Florist Co., 324 Dearborn St., Chicago, Ill.

At Chicago.

In the league games on November 11 the McKellar & Winterson team defeated the Retailers three straight, and the Vaughan's Seed Store team beat the Wholesalers two out of three. The ladies played three games. Following are the scores:

Minneapolis.

DARK WEATHER REDUCES ROSE RECEIPTS. —MARKET NEARLY NORMAL.—VARIOUS JOTTINGS OF LOCAL INTEREST.

The cut of stock is again normal and good prices are secured. Last week the supply of roses was heavy but continued dark weather has reduced it somewhat. Carnations still remain in good supply.

Violets are abundant and there does not seem to be the call of former days. Chrysanthemums, Eaton, Bonaffon, Appleton, Morel, Ivory and other choice varieties, can be had in any quantity, but they have not affected the sale of other stock so much as usual this season. Wm. Donaldson & Company are cutting some choice smilax in quantity.

Carl Johnson, of the Powers Mercantile Company, reports a good trade, above that of last year. The call is for the best of stock.

A number of the prominent florists took part in the charity ball decoration at the West Hotel last week.

E. Nagel & Company have been very successful with their chrysanthemum cut. C. F. R.

Montreal.

CLUB CHANGES ELECTION NIGHT.—A BANQUET PLANNED.—A BIG SHOW FOR NEXT YEAR.—LOCAL NOTES.

The Florists' and Gardeners' Club will hold its election of officers at the first meeting in December and the annual banquet on the night of the installation, the first meeting night in the new year. There was a little private chrysanthemum show at the last meeting, November 3, some good specimens being shown. The principal exhibitors were Jos. Bennett, with a vase of fine Carnot; P. McKenna & Son, with fine Idavan and Orizaba; C. Craig, with some well grown plants. A proposition to hold a first-class chrysanthemum show next year was adopted and several members have already promised to grow specimens for it. At the close of the meeting Fred. Bennett read a witty paper upon his trip to the convention at Hamilton.

Trade is not bad. Chrysanthemums are going well and the early varieties brought better prices than in past years. A summer week in autumn has improved the roses and carnations, in quality and quantity. Violets are scarce yet. In general all the retailers report good business.

Fred. Bennett has taken the position of secretary-treasurer of the Lachine

Horticultural Society, in place of C. A. Smith.

Hall & Robinson have rebuilt and replanted since their recent fire.

E. Mepsted, of Ottawa, was a visitor last week. G. V.

NEENAH, WIS.—Louis Otto was recently injured in a collision between a Northwestern train and street car. He is improving.

BALTIMORE, MD.—W. D. Hamilton, head gardener at Druid Hill Park, has had excellent success with his chrysanthemums this year. It is estimated that on the opening day of the annual exhibition, 20,000 people visited the conservatory.

White Carnations

WILL soon be in demand when 'mums are gone. **MURPHY'S WHITE**, the coming commercial Carnation, is standing the test on long shipments to Chicago, Buffalo, Pittsburg and St. Louis. It is a bloomer or we could not keep up the supply we have since August 15th to date, and still plenty of buds in sight for the Holidays. You will not make a mistake in stocking up on this variety.

ROOTED CUTTINGS. \$6 per 100; \$50 per 1,000; \$45 per 1000 in 5,000 lots and \$40 per 1000 in 10,000 lots.

WIETOR BROS., 51 Wabash Ave., Chicago

Terre Haute, Ind.

GROWERS HAVE EXCELLENT RESULTS WITH CHRYSANTHEMUMS.—ALL PLACES IN MODERN SHAPE.—JOTTINGS OF VARIOUS DOINGS.

At no time have the local growers had better success with chrysanthemums. While a few of the newer sorts are grown to single stem the standards are generally grown to produce two and three blooms to the plant, and such flowers sell readily at \$1.50 and \$2 per dozen. Timothy Eaton for white and Col. Appleton for yellow seem to be the favorites, although Chadwick and Bonnafon are by no means relegated to back seats. Golden Wedding shows up equally well and Vivian-Morel is grown profitably in quantity. Polly Rose is becoming more popular and from all indications it will be grown extensively another year.

Lawrence Heintz, the dean of the craft, has his houses in fine condition, his general stock clean and thrifty. Among his carnations Crane is decidedly in the lead, being ahead of any of the other scarlets on the place. Ethel Crocker does equally well, being best among the pinks here. Flora Hill, White Cloud and Queen Louise are grown and it is a toss-up which of the three pays best. Among ferns were a lot of Nephrolepis davallioides furcans in 6-inch and 7-inch pots which ought to sell at sight.

Cowan Bros. Company have rebuilt three of their houses besides overhauling their entire range. The old office has disappeared, a new one, modern in all its appointments, taking its place. With a range of new, well stocked houses and with plenty of business in sight, the Cowans have nothing to grumble at.

F. Wunker & Sons, as usual, have their place in apple-pie order. Their roses and carnations are doing splendidly and if there is any favorite among their carnations Marquis is the one, with Lawson as a close second.

Otto Heintz has, during the past summer, removed and rebuilt his greenhouses, having a fine range. He grows a general stock of cut flowers and bedding plants to meet the requirements of his retail trade, which has been good all along.

Fred. Heintz is now installed in his new store on South Seventh street.

Alderman Graham's stock is in good shape and trade brisk. NOMS.

BUCKLEY'S November Special.

Smilax Do you need Smilax? If so, forward your order at once and we will furnish you extra fine 2 1/4-inch at 50c per 100; \$5 per 1000.

Geraniums The leading and best bedders, Jean Viaud (the pink novelty), \$2.00 per 100. S. A. Nutt (crimson), Alphonse Riccard (scarlet), E. G. Hill, Beante Poitevine (salmon), Mme. Janlin, \$1.50 per 100; \$14.00 per 1000.

Verbenas Our 20th Century Collection, 25 new mammoth varieties, all labeled, strong plants from 2 1/4-inch, \$1.50 per 100; \$12.50 per 1000.

Asp. Sprengeri Strong, 2 1/2-inch, \$2.00 per 100; 2-inch, \$1.25 per 100; \$10.00 per 1000.

Petunias Ten novelties from Dreer's latest sets, strong R. C. \$1.25 per 100.

Feverfew LITTLE GEM, rooted cuttings, 75 cents per 100. 2-m. \$1.25 per 100; 2 1/2-in., \$2.00 per 100.

Marguerites CHRYSANTHEMUM FRUTESCENS, both white and yellow, \$1.00 per 100.

Salvia Two best: St. Louis and Bonfire, 75 cents per 100.

The W. T. Buckley Plant Co., Springfield, Ill.

RETAILERS MAKING FINE SHOWINGS OF CHRYSANTHEMUMS.—GOOD BUSINESS IS EXPECTED.—WHITE HOUSE GARDENER RELIEVED.

Chrysanthemums have the sway now and everybody is making as much display with them as possible. J. H. Small & Sons had their opening last Thursday, and showed a number of fine blooms and pot plants, the walls, covered with oak branches, making a fine contrast with the bright chrysanthemums. A collection of first prize winners at the New York show, by D. Willis James, Wm. Duckham, gardener, attracted much attention.

A. Gude & Brother opened their show November 10. In the window they have a large horseshoe of yellow chrysanthemums, horsewhips and red ribbons. They have a fine lot of Timothy Eaton, Col. D. Appleton, Major Bonnaffon, White Bonnaffon, Mrs. Perrin and Maud Dean. Their range of rose houses is in fine condition, American Beauty and Bridesmaid are extra fine.

Henry Pfister has been relieved from duty at the White House conservatories, where he has been in charge since the Johnson administration. He has superintended all the floral decorations at the White House.

J. Louis Loose has his store decorated in yellow. In the front window he has a table decorated with Col. D. Appleton chrysanthemums and asparagus.

P. G.

MCPHERSON, KAN.—Miss Bliss is building up a nice trade at the new east side greenhouse.

HIGHLAND PARK, ILL.—George Brown, the veteran florist, is establishing a nursery for ornamental stock.

MORRISON, ILL.—Davis Brothers have just put in a new seventy horse-power boiler with which to heat their 20,000 feet of glass.

WHEELING, W. VA.—The Wheeling Greenhouse Company has this week given a successful three days' flower show at Odd Fellows' Hall, under the auspices of the King's Daughters.

The New and Rare Asparagus Fern of 1902, Asparagus Myriocladus.

I am now offering a limited number of the above charming novelty, which has been awarded 11 First-Class Certificates by the leading Horticultural Societies of England, including the Royal Horticultural Society of London, June 24th, 1902; also at Shrewsbury, Wolverhampton and Handsworth Horticultural Societies, etc. It is quite a distinct novelty, growing 18 to 24 inches high, requires no staking and having four different shades in color, which gives it a very effective appearance and as a pot plant and for decorating purposes it is by far the best Asparagus in cultivation. Good established plants in 5-inch pots, 15s each; 4s for 12. Good established plants in 3-inch pots, 10s each; 4s 5s per 12. Packing free. Terms Cash with order or satisfactory reference. ROBERT GREENFIELD, Jr., F.R.H.S., Nurseryman and Florist, Leamington Spa, England.

Holly and Green

VAUGHAN'S XXX HOLLY.

We maintain the highest grade Holly Branches in the market. Every case personally inspected by our own representatives; men who gather and pack our Holly are well experienced. While other shippers sometimes handle as choice Holly as Vaughan's XXX Brand, yet ours has averaged **THE BEST** one year with another. Our price is

about the same while our values are more than **DOUBLE**. Per case, \$5.00. For larger lots write. Burlap lined, for Pacific Coast shipments, 50 cents extra.

Vaughan's Bouquet Green and Wreathing.

We are pioneer headquarters on this stock, controlling same from reliable first hands of long experience. We can save you money. Our stock this season, while in moderate supply only, is from best sources, largely Indian picked and all late picked, avoiding the warm drying weather in October. Write for prices when you are ready to buy. Per 100 pound crate, \$4.50 to \$5.50.

WREATHING. Beginning about Dec. 1, we carry two grades regularly in stock in large lots, and will make closest prices in 20 yard coils. Per 100 yds., \$3 00 to \$5 00.

Vaughan's Seed Store, NEW YORK.
CHICAGO.

Christmas TREES.

SAVE MONEY by buying direct from First Hands. We retail no trees; sell only to dealers in either dozen or car load lots.

CHRYSANTHEMUM CUT AT ITS HEIGHT.—
EARLY END OF THE CROP IN SIGHT.—
VARIOUS NOTES OF MARKET SUPPLY.—
TRADE STEADY.

The greater part of the chrysanthemum crop is cut, due to the especially good weather conditions we have been having the past few weeks, producing blooms of good quality and the crops in rapid succession. With such large quantities coming in, and the cost being low, the store men are taking advantage of them and some very pretty effects are to be seen in some of the windows, arranged with yellow chrysanthemums and oak leaves. The chrysanthemums shown this year are the finest blooms ever seen here. The Eatons that come from Pierce, at Waverley, are superb. Not only are chrysanthemums at high tide, but the same applies to carnations, but it is difficult to keep some of the varieties from going to sleep. If good weather continues, there is liable to be a shortage of stock at Thanksgiving. Roses of first quality are already a little scarce, but the poorer grades are to be had in immense quantities and at any price; roses good enough for design work are selling at 50 cents per hundred. Beauty and Queen of Edgely are in fair supply and the quality is tip-top, but there is not much demand for such stock. There is a noticeable shortage of both Liberty and Meteor.

Trade continues to keep up in good shape. There has been a little activity among the social set the past week, a few receptions and a dog show. It was anticipated that a large amount of violets would be needed for the dog show, but it was anything but violet weather.

A. Roper, of Tewksbury, has certainly a fine pink in Fairmaid. At the Massachusetts Horticultural Society's show he was awarded a silver medal for a vase of fifty blooms.

M. A. Patten was much pleased with the exhibition at Madison Square Garden.

The first snow of the season fell on October 29. A. M.

Lily of the Valley From Cold Storage

It pays to grow Cold Storage Valley for Xmas, New Year and January. They bring flowers and foliage without much trouble and special arrangements. Grow them as cool as possible and without bottom heat. My stock is in excellent condition and will give satisfactory returns.

GREENHOUSE STOCK ALL IN GOOD SHAPE.
—ROSES BLOOMING IN THE FIELDS.—
TRADE VERY ACTIVE.—NOTES.

A visit to the greenhouses finds all in good shape for fall trade. The Texas Seed and Floral Company are the only ones making a show of chrysanthemums this season. They have some very good flowers, and carnations are in good shape. At the large range of the Haskell Avenue Floral Company everything is in the best of shape, carnations never looked better, and prospects are for a heavy cut. Five large houses are devoted to this flower. Lawson, White Cloud, Flora Hill, Crane, Irene, Win. Scott, Dorothy and The Marquis are the principal sorts grown. Roses here receive the lion's share of attention and a walk over their grounds is a treat, thousands of plants in full bloom. The stock for replanting their ten acres of roses is now being put into the cutting benches.

Rush has been the order of the day among Dallas florists for some weeks. Following the State Fair came the opening of the social season, with numerous balls, receptions and weddings, followed by the visit of Admiral and Mrs. Schley. The decorations for all of these have been of the finest, especially those for the banquets tendered to the Admiral and his wife.

The city parks are one bower of bloom and foliage. They never looked as beautiful as they do this season and the management is truly deserving of great credit. The fancy planting is much more elaborate than in former years and all classes of flowering plants are in the best possible condition.

An' de moekio' birds a singin'
The merriest kind o' tune,
Poses bloomin' till December.
Just like 'twas only June;
When you fellows north have winter,
With snow, ice, and skies of gloom.
Down in Texas, the roses er' in bloom.

LONE STAR.

SIoux CITY, IA.—John R. Elder has the sympathy of many trade friends in the loss of his wife, who died this week.

ENCHANTRESS

QUEEN OF CARNATIONS.

Of all Varieties it is the **Largest and Best**

Gold Medal at
KANSAS CITY
Three firsts at
NEW YORK

Best 100 at
CHICAGO
Two Kuhn Prizes at
PHILADELPHIA.

ENCHANTRESS as seen growing by competent judges has been pronounced the best carnation to date. All those who had placed orders doubled same on seeing the stock. This fact speaks for itself. Our plants of this variety have been blooming continuously since September 12 and the flowers have been of the highest quality throughout that period.

We have ample facilities to fill all orders to our limit of 400,000 with positively strong and healthy stock. We have in the benches 18,000 plants, 13,000 of them being strictly for propagating purposes. **COME AND SEE IT GROWING.**

OVER 250,000 ALREADY BOOKED!

FOR 1903....

The Finest Pink Rose ever introduced

Canadian Queen

Winner of the only Medal given at New York Flower Show, Oct., 1902, for New Rose. This Queen among roses is a sport from Mrs. Pierpont Morgan, possessing all its vigorous habits, stands erect, with strong stem and beautiful, clean cut foliage. The flower is perfect in form, each petal opening out faultlessly and in size equals Morgan, being four inches in diameter. The color is a shell Pink throughout, of exceptional shade, that will make it the peer of all other roses in light pink. The plant is most prolific and the keeping qualities are unusually good.

PRICES:

Strong Plants, 2 1-2 -inch pots, own roots.	Grafted plants, 2 1-2 -inch pots.
12 plants..... \$ 5.00	12 plants..... \$ 7.50

DELIVERED IN THE U. S. (in quantities of not less than 250) FREE OF DUTY.

READY FEBRUARY, many orders already in. **READY MARCH**, all orders filled in rotation.

Testimonials proffered by a few Florists who have seen the Rose:

New York, Nov. 4, 1902.
THE DALE ESTATE, Brampton, Ontario, Canada.
 Gentlemen—The Canadian Queens you have been shipping to me have arrived in the best of condition, and I like the rose very much. It has been shown to the principal retailers and they all admire it. Its keeping qualities are excellent, and it will no doubt prove a valuable acquisition to the list of good roses and also prove to be a profitable rose to the grower as well as the retailer.
 Yours very truly, T. YOUNG, Jr.

S. TIDY & SON, Toronto, Canada, write under date Oct. 2, 1902—I think the new rose is a lovely color and predict a great success for it, providing it has all the good qualities of the parent and judging from what I saw of Mrs. Oliver Ames at the Spring New York Show, would say without hesitat on that Canadian Queen is in every way its superior.

J. S. MURRAY, Montreal, Que., writes under date of Oct. 2, 1902. Dear Sir—Thank you so much for sending me the new rose, Canadian Queen, which I think lovely and waxy and am sure will be very saleable. The color, stem and foliage are beautiful. My customers who saw it today seem highly pleased with it. The fragrance too is delightful.

PHILIP BREITMEYER, of Detroit, Mich., Oct. 7, 1902—Canadian Queen is rightly named, you should be proud of it. I think it is a grand color. Canadian Queen fills just the want; it will supplant Cusin. To bear out what I say we want as many as we can plant for next season; if you will send it out, put us on early so as to get an order in.

AMERICAN FLORIST, Nov. 1—The new rose, Canadian Queen, from the DALE ESTATE, attracts much favorable comment at Thomas Young's, where the blooms are on sale. It is a light pink sport from Mrs. Pierpont Morgan, of very even tint and is an unexcelled keeper.

J. B. KELLER SONS, of Rochester N. Y., write Oct. 29th, 1902—Of all the pink roses we have ever seen we think this one, (Canadian Queen,) is the prettiest both in color and shape of flower and beats everything in a pink rose in our estimation. It is as good a grower and as free a bloomer as it appears to be it ought to have a phenomenal sale if you intend putting it on the market. We do not know of anything that will compare with it.

AMERICAN FLORIST'S REPORT, New York Show Canadian Queen from the Dale Estate, Brampton, leads in the novelty section.

W. J. PALMER, of Buffalo, N. Y., writes under date of Oct. 22, 1902—The Queen roses received last night were very fine, could not have been better. Should say that Canadian Queen is a better rose than Morgan or Cusin, and when you get ready to send it out, will have to try some of it.

THE FLORISTS' EXCHANGE, of New York Show, Nov. 1, 1902—Among the new things on exhibition are: The Canadian Queen rose, shown by the Dale Estate, Brampton, Ont., a sport from Mrs. Pierpont Morgan, of a beautiful shade of pink, lighter than that of Mrs. Morgan and a little deeper than the color of Mrs. Oliver Ames. This new-comer is highly spoken of by the rose growers present.

We have had this rose (unbeknown to the public) for 3 years but have not exhibited it until now, as we desired to make such a test of its qualities as would warrant us in recommending it to the trade and we have now no hesitation in saying it is in every way a more than desirable light pink rose—the best ever sent out and a necessity to any good grower.

We have 500,000 square feet of glass and are the largest and most successful growers of purely cut flowers in the world.

DALE ESTATE, Brampton, Ontario, Can.

Buffalo.

TRADE QUIET AND WEATHER FINE.—ALL STOCK PLentiful.—MOST OF IT GOOD.—JOTTINGS OF THOSE OF THE CRAFT.

Fair weather and moderate trade prevail. Weddings and receptions have been quiet for two weeks, owing to the active interest in the election. Roses are plentiful and quality good. Chrysanthemums are at their best at present and violets are good. Carnations seem equal to all demands.

Palmer & Son have not got into their store as yet. An accident about two weeks ago, to their ceiling decorations, has caused much trouble and necessitated the redecorating of that part of the room.

Philip Breitmeyer, of Detroit, called on his return from New York and is of the opinion that Detroit and Buffalo can beat what was shown in the New York exhibition.

The H. A. Meldrum Company, one of our largest department stores, is giving a chrysanthemum show this week which is being supported by all the florists.

Mrs. C. Schoenhut has about completed two new houses 18x100, on Jefferson street, in the rear of her store, for palms and bulbous stock.

J. H. Rebstock made a very large horse shoe for an out of town order last week; it was very fine.

S. A. Anderson has repainted his store, outside and in.

C. D. Zimmerman was in New York for the show. BISON.

ASBURY, N. J.—The greenhouse on the Runkle estate has been removed to H. G. Runkle's place at Plainfield.

FITZGERALD, GA.—Joel Thomas says that the prospects are for good business here. The city is young and so is his establishment, but everybody is prosperous.

A FEW GOOD THINGS YOU WANT.

ARECA LUTESCENS, 3 plants in a pot, 3, 4, 5, 6-inch, \$15, \$30, \$50, \$75, \$100 to \$125 per 100.

GROWER REPORTS GOOD FALL TRADE.—
MAKES GREAT SUCCESS OF GATE AND
ITS SPORT.—OTHER NOTES.

I found Lewis Ullrich comfortably installed in his new, commodious and well appointed "den," built during the past summer. "Comfortable and well appointed," in all that these terms imply, will about describe the new office, where the click of the typewriter and the mass of letters on the desk denote that business is by no means at a standstill. In fact, at no time has business been more brisk and encouraging, both wholesale and retail. Nor has his general stock been in better condition than it is at this writing. A stroll through the flat-roofed, mammoth carnation house showed that notwithstanding the unusually wet season, the plants have made rapid and vigorous growth since being housed. The best varieties, such as Lawson, Marquis, Bradt, Crane, Estelle, Queen Louise, Flora Hill and a few very nice seedlings of his own are grown successfully, such a thing as stem rot being practically unknown here.

Roses look equally well and while Brides and Bridesmaids are grown in quantity Golden Gate seems to be Mr. Ullrich's especial favorite. The stem he puts on it makes it a valuable rose. Its sister, Ivory, behaves in a similar manner, sending up fine buds on long, stiff stems.

Chrysanthemums have appeared in quantity, those grown to the single stem, such as Ivory, Chadwick, Vivian-Morel, Eaton and Appleton, being especially attractive. There is not a bloom going to waste.

Harrisii bulbs are well on the way and there is little disease apparent as yet.

NOMIS.

MUNCIE, IND.—The Carnes Greenhouses, formerly at Walnut and Willard streets, have been removed to Jefferson and Fifth streets, where four new houses have been put up, for roses, carnations and pot plants.

Orange, N. J.

FLORICULTURAL SOCIETY VIEWS LANTERN SLIDE REPRODUCTIONS OF FLORAL WORK.—MUCH INTEREST.

The November meeting of the New Jersey Floricultural Society attracted a large attendance by the display of the seventy-one lantern slides prepared by the S. A. F. for its convention in New York two years ago, and now loaned by Robert Kift in the name of that society. The pictures did their own talking, the title and artist only being called out, the discussion being among the members themselves. Opportunity was given in them for those who had not the previous privilege of viewing the best work of Thorley, Small, The Kosary, Kift, Murdoch, Graham, Breitmeyer, Pennock, Gray, Smith & Fetters, Robert Scott, Rawson and others. If our societies will only take up this matter and form a bureau where floral lantern slides may be obtained at small cost it must become very popular and will serve to build up our membership. The subjects began with simple house decorations and in succession covered weddings in house and church, public occasions, balls and dinners, and culminated in the Bradley-Martin ball and the Vanderbilt-Marlborough wedding.

JERSEY CITY, N. J.—F. Van Assche has a device for use in connection with iron sash bars in greenhouses so that the expansive movements of the iron are not communicated irresistibly to the glass.

CARLISLE, PA.—The Carlisle Nursery Company has just completed a range of five modern greenhouses. John Lindner is president of the company and H. E. Seitz, formerly with Storrs & Harrison, is manager.

Syracuse, N. Y.

FALL FLOWERS GOOD.—CARNATIONS THE ONLY SCARCE ITEM.—FIRING LATE.—A NEW CITY PLANNED.

Chrysanthemums displayed in the windows were never better than at present. They sell from \$2.50 to \$3 a dozen. It is not expected that prices will advance much at Thanksgiving time and there will be plenty of everything, with the possible exception of carnations. Two causes have combined to make carnations scarce and of poor quality, the continued spring rains and the scarcity of coal this fall. This has proved to be a great drawback and many florists were late in firing up. Soft coal is being burned now to a great extent. Violets are coming on nicely, although not many have been picked. Roses bring from \$1.50 to \$3 a dozen and carnations from 50 cents to 75 cents, retail. Business has been good but not rushing.

The Hudson River Realty Company, of this city, has been organized with \$5,000,000 capital to build a city on the Palisades in New York. Parks will be laid out and extensive landscape work undertaken. It is to be a city for rich people. Lyman C. Smith, of this city, is heavily interested. A. J. B.

FLINT, MICH.—During the past summer Darwin P. Smith has added 10,000 square feet of glass to his place and now he is attracting many visitors by a good showing of chrysanthemums.

BAY SHORE, N. Y.—The first annual exhibition of the Suffolk County Horticultural Society was held at the Casino on November 6 and 7. The prize schedule amounted to over \$500 and a keen competition was stimulated in the various classes between the many expert professional gardeners and florists of this section. The show was well patronized by the society people.

FLORISTS' SUPPLIES

50-52-54-56 North Fourth St., Philadelphia, Pa.

Providence, R. I.

TWO WEEKS OF QUIET TRADE.—BETTER THINGS LOOKED FOR NOW.—TWO NEW FLOWER ESTABLISHMENTS.

Business for the week averaged fair, with no special demand for anything. Violets seemed to go slow and cut flower trade was at a standstill. Saturday was the poorest windup we have had this season, although the weather was clear and the downtown district was crowded by spectators. A trip through the trade revealed general dissatisfaction. This made two weeks of quiet business, but we look for improvement now.

Another new flower house is being erected on Manton avenue, Olneyville, and is to be run as a retail stand. This section of the city does not offer great inducement to an ambitious florist, as it is situated among the mill classes, who are not regular flower buyers.

Albert, who was foreman for L. Williams, has erected a greenhouse plant and started in for himself. He was with Mr. Williams for about ten years and is well experienced.

Mr. Cranshaw formerly operated a store on Cherryville Square, but found it hard to interest a transient trade, although funeral work was fairly good. M. M.

SALT LAKE CITY, UTAH.—Liberty Park is to have a new greenhouse 21x150, with boiler house 35x50, the cost to be \$7,000.

WASHINGTON HEIGHTS, ILL.—D. S. Heffron, an old horticulturist of note, has been in poor health for some time. He is now over 80 years of age. Mr. Heffron was the original introducer of the Early Rose potato.

NORTHAMPTON, MASS.—City Forester Clarke has issued a circular letter urging upon town authorities and village improvement societies the importance of doing everything possible to prevent the destruction of roadside trees and groves for fuel purposes during the present scarcity of coal.

CLUB MEETS AND PLANS A LADIES' NIGHT. — COMMITTEE APPOINTED. — STORY OF WESTERN SHOW.

The regular club meeting on Monday evening last was well attended. John Mollenkopf was elected to membership. By a unanimous vote it was decided to hold a ladies' night the first Monday in December. The ladies will be entertained by the members. Wm. Stadie, F. C. Bartels and Henry Kunz were appointed a committee to make all necessary arrangements. A great time is promised and no member should fail to be on hand on that evening. Isaac Kennedy entertained the members with a little talk on what he saw at the Kansas City flower show. ECHO

JACKSON, MICH.—W. R. Tubbs, proprietor of the Sunnyside Greenhouses, has retired from business.

KEOKUK, IA.—Laisle & Haines have their stock in good shape and report fall business opening nicely.

INDIANAPOLIS, IND.—Walter Bertermann has been at Cleveland and Wm. Billingsly and A. Baur at Richmond, Ind., this week.

NEGAUNEE, MICH.—The Negaunee Nursery and Greenhouses has about 7,000 feet of glass well stocked for fall trade. Chrysanthemums are making a fine show just now.

CENTERVILLE, IA.—S. A. Love & Company have owned the Oak Park Greenhouses less than a year but they have improved the place greatly and stand at the opening of a prosperous season.

Bargains
FOR
Florists.

We are headquarters for a general assortment of the necessary material and supplies that you are looking for. If you are about to improve or construct, consult us.

In connection with the dismantling of the Pan-American Exposition, we have for sale:
20,000,000 FEET of fine seasoned lumber, practically new, consisting of all sizes of joists, timbers, dressed and matched boards and flooring; also sash and doors.
50,000 FEET of roofing glass.

PIPE.

We are headquarters for pipe. We offer you:
100,000 FEET of 2 to 4-inch wrought iron, lap welded casing. We can furnish this material in three ways: Either with sleeve or jacket couplings, screwed ends and threaded couplings or with expanded cast iron flanges with bolts and nuts.

1,000,000 FEET of standard black wrought iron pipe, size 3/8 to 12-inch. It is second-hand but has new threads and couplings and is in first-class condition.

1,000 TONS of galvanized wire 9, 10, 11, 12, 13, 14 and 15 gauge.

50,000 FEET of 2, 3 and 4-inch cast-iron soil pipe and fittings.

100,000 FEET of garden hose, 3/4 and 1-in.

75,000 FEET of cotton rubber-lined fire-hose, (rubber-lined in and outside), ranging in sizes 1 to 2 1/2-inch.

VALVES and fittings of every kind.
BOX COILS for heating purposes.
RADIATORS, new and second-hand.

We also offer the following bargains in

Heating Boilers

50 CAST-IRON sectional heaters, capacity from 450 to 5,000 feet.

RANGE OF TEN DIETSCH SHORT-SPAN GREENHOUSES BUILT THE PAST SEASON BY GEORGE REINBERG, CHICAGO.

In heat of summer Mr. Reinberg found these houses at all times from 9 to 15 cooler than old-style wide houses adjoining, due to better ventilation. H. A. Dreer, Riverton, N. J., has a similar range. Write us for list of other places where this popular new style of construction may be examined. You can prove our claim that it includes the following

Advantages Not Possessed by Any Other Method:

- | | |
|---|---|
| <p>1st Largest bench room obtainable; all benches equally good.</p> <p>2d Safe construction; roof a perfect truss; no high peaks.</p> <p>3d Best ventilation; a run of ventilators to every two benches.</p> | <p>4th Least shade possible with any method of roof and wall construction.</p> <p>5th Ease of construction; greatest durability at minimum of expense.</p> <p>6th Every requirement of modern construction fully provided for.</p> |
|---|---|

These advantages appeal to everyone and this style of construction has the endorsement of many prominent growers. Let us give you an estimate; the figures will be so low they'll surprise you; the work is so good it will please you.

Pittsburg.

BUSINESS BRISK.—STOCK BOTH PLENTIFUL AND GOOD.—DELIGHTFUL WEATHER.—NOTES HERE AND THERE.

Double violets will be one of the principal staples until Easter and a prodigious number will be sold in Pittsburg during that period. Orchids and gardenias are being called for to a considerable extent. Swainsona has made its appearance, also bouvardia and Harrisii lilies. Local weather conditions have been perfect for the past two weeks and the sunshine has gladdened the hearts of our growers. Beauties seldom reach a higher state of perfection and with the gorgeous colors of the chrysanthemums cause each flower store to be delightfully attractive. Carnations deserve special mention, as they are of a very choice quality and our home growers are producing the best on sale here. Lily of the valley is very good and Paper White narcissi are fine. Greens are plentiful. Business is good.

The sale of plants during the last two months has been large. Cycas revoluta, kentias and Boston ferns seem to be the best sellers. Cibotium Schiedeii is the cause of many inquiries and is a fair seller. Crotons appear to be popular and most other items have sold well.

Elmer E. Siebert, superintendent of Highland Park, whom the city controller refused to pay, has been dismissed and William Bailey, a clerk in the recorder's office, has been appointed to the position.

The greenhouses of George Gibbs, at Woodville, were visited by a disastrous fire one night this week. He had sixteen houses and my information is that the whole plant was destroyed.

C. H. Roney, superintendent of the Lakeview Rose Gardens, at Jamestown, N. Y., spent a few days in the city last week, visiting the stores and various plants around Pittsburg.

J. & H. Porter have opened a store in connection with their houses at 411 Stokes avenue, Braddock.

Henry Eichholz, of Waynesboro, is sending in some remarkably fine chrysanthemums. E. L. M.

D. W. Payne & Co.'s Latest Invention Over a Coil Boiler
 We have now constructed a Hot Water Boiler on piping or manifolds. It consists of hollow, bevel pointed cast stars with hollow hub, both sides of each hub being threaded 3/4-inch, so each star will screw into one another, built upright over grates. The hollow bevel points are cast solid to hub with 1 1/4-inch water space into hub. There are 8 points to each star, which stand out over grates; except the lower star which has two inlets 3-in. This boiler is encased in brick work. Send for circulars and testimonials. **D. W. PAYNE & CO., BOX 153, PORT CLINTON, OHIO.**

Steam Traps SAVE COAL

This is the Return Steam Trap used by the Up-to-date Greenhouse men to return the condensed water from the heating coils in their greenhouses. **Have been in use for this purpose over thirty years.**

WILKS Hot Water Heaters

Best made for Greenhouses. SELF-FEEDING MAGAZINE. All Steel. Simple, strong, durable. Send for Catalog, etc.

S. Wilks Mfg. Co., 53 to 55 S. Clinton St., CHICAGO.

PLEASE mention the AMERICAN FLORIST every time you write to an advertiser.

CROP INSURANCE.
Life insurance is valuable because it guarantees the outcome.

"Gurney" Heaters

"BRIGHT IDEA," "DORIC" and "400 SERIES" do the same thing for your hothouse: **THEY GUARANTEE THE CROP.** First of all they save 20 per cent on the coal bill and so keep expense at a minimum. Next, they produce an even heat and so do not imperil the life of the plant. Next, they are simple to operate and so require least attention. Lastly, they wear longer than others and thus perceptibly reduce the capital invested. Don't buy or exchange until you've investigated them.

THE EXHIBITIONS.

New York.

The American Institute exhibition was an unqualified success. Better blooms are seldom seen. Julius Roehrs staged a splendid group and so did G. H. Hale, gardener to E. D. Adams, Seabright. Of chrysanthemum plants, there were good specimens from John G. McNicoll, gardener to G. C. Rand, Lawrence, L. I.; James Bell, gardener to R. L. Burton, Cedarhurst, L. I.; Howard Nichols, gardener to Mrs. J. B. Trevor, Yonkers, and Alex. McKenzie, gardener to T. J. Taylor, Cedarhurst.

On cut blooms A. Herrington, Madison, N. J., carried off the trophy for fifty with Eaton, E. G. Hill Company, Richmond, Ind, second with Yellow Eaton. Wm. Duckham was first for twenty-five named varieties and Alex. McKenzie for best twelve, Mr. Herrington for five blooms of six varieties. J. G. McNicoll was first on six each of G. W. Childs, T. Carrington, Mrs. Barelay, reflexed, "any other" red and yellow. Mr. Herrington was first for six Jeannie Falconer, Appleton, Golden Wedding, Vivian-Morel, Merza, Eaton and Kate Broomhead. James Bell was first for six incurved and six Bonaffon. E. G. Hill was first for John Shrimpton. Wm. Scott first for Mrs. Weeks and "any other" white. E. G. Hill Company was first for "any other" pink. Special premiums in these classes were awarded to Wm. Duckham, G. H. Hale and Wm. Scott. There was also a showing of hardy chrysanthemums.

In roses L. M. Noe, Madison, was first for Beauty and G. H. Hale for tea scented white and pink and Mr. Noe again on "any other color." The carnations shown by Jas. T. Scott, of the Boys' House of Refuge, Randall's Island, were excellent. Violet winners were Lyons & Strickland, Milton, N. Y.; C. G. Velie & Son, Marlboro; Wm. Slack, Stamford, Conn., and Geo. T. Schueneman, Baldwin, N. Y.

Howard Nichols brought the best specimen palm and G. H. Hale the best fern. Mr. Nichols set the best table centerpiece. Special premiums for plants were awarded Lager & Hurrell for orchids, Howard Nichols for Adiantum Farleyense, J. P. Sorenson, Stamford, Conn.; for antigonons; H. T. Clinkaberry, Trenton, N. J., for orchids; the F. R. Pierson

Co., for ferns; Alex. McKenzie for poinsettias, and A. Herrington for Gerbera Jamesoni. Certificates were given C. H. Allen for white Mrs. Lawson carnations and E. G. Hill Co. for Yellow Eaton and R. E. Richardson chrysanthemums.

New Haven, Conn.

The second annual show of the New Haven Horticultural Society, November 11-13, found the weather and the exhibits each all that could be desired. The society young ladies who served refreshments and sold flowers were a popular feature. Music Hall, in which the exhibition was held, was appropriately decorated and was just the right size for the exhibits assembled. Plants from J. N. Champion, Yale Botanic Gardens and the Elm City Nursery Company, for decorative purposes, and handed to advantage by Manager Gus. Amhryn, made a pleasing effect.

The classes for groups and cut flowers were well filled and the stock was clean and well grown. A feature of the show was an exhibit by the combined Hartford florists, an immense pyramidal basket, standing nearly eight feet high composed of cut flowers, berries and grasses. It was escorted by a full delegation of the Hartford boys, who will justly apportion the certificate of merit awarded, each having his own individual piece framed. J. F. Huss, who acted as tactotum for the delegation and who, as usual, wore a wreath of smiles, showed a fine specimen standard chrysanthemum, F. Carrington, receiving first prize. He also received first for best bloom in the show with a magnificent flower of Timothy Eaton.

The S. A. F. silver medal for new and meritorious plants was awarded to David Kydd for his new Begonia Kyddii, B. metallica × B. Scharlhana, a very useful hybrid showing the characteristics of B. metallica in the foliage and the long flower spikes of B. Scharlhana, with the soft pink color of the former.

The silver cup for the best fifty square feet of foliage plants was won by Robert Patton, gardener to Mrs. Bennett, with a well grown collection. David Kydd, gardener to W. F. Wayland, was a close second.

For three stove plants James Morrison, gardener to James E. Hubinger, won with three splendid marantas. He also was first for best six chrysanthemums, Yale Botanic Gardens coming second.

The silver cup for the best twenty-five chrysanthemums in 6-inch pots went to David Kydd. Notable were Silver Cloud, Silver Wedding, G. W. Childs, Major Bonnaffon, Lavender Queen and G. Vanderbilt. Mr. Kydd also won the R. & J. Farquhar prize for group of specimen plants.

Among the plants especially noticeable were the Cosmos Klondike and the Begonia Gloire de Lorraine shown by Jno. Doughty, who also showed a plant of the new Gerbera Jamesoni.

E. Carroi showed some nice ferns, including Cibotium Schiedeii. Jno. N. Champion had the only table decoration, with a center piece of yellow chrysanthemums.

Charles Munro, Frank Kimberley, Gustave Ginter and the Robert Veitch Co. also showed good stock. S. J. Reuter took most of the carnation premiums.

Chicago.

The flower show closed with a very large attendance and a highly satisfied public. There is no shade of exaggeration in the statement that it was, all things considered, the best flower show ever given in Chicago and many accord it first place in the history of flower shows in the United States. Certainly no better stock was ever shown. There is some regret that a larger hall was not chosen, but it is well to be content with the success achieved; let the energy go into preparations for next year.

Among the special awards not mentioned last week was the C. D. Peacock silver cup for best vase of chrysanthemums in the show, which went to H. W. Buckbee for the vase of Mrs. Jerome Jones illustrated in the last issue. The C. L. Hutchinson silver cup went to the Chicago Carnation Co., for Fiancee, which was also awarded the S. A. F. silver medal for new variety.

Nathan Smith & Son were awarded the S. A. F. bronze medal for their new yellow chrysanthemum F. J. Taggart.

On the closing day the competition was between retail florists, the awards being as follows:

Vase of roses, J. Mangel, first; T. D. Mosconesotes, second.

Basket of roses, J. Mangel, first; A. Lange, second.

Basket of carnations, J. Mangel, first; T. D. Mosconesotes, second.

Box of cut flowers, A. Lange, first; T. D. Mosconesotes, second.

Joliet, Ill.

The first annual flower show of the Joliet Improvement Association opened here November 20, to be continued three days. There was a goodly array of creditable exhibits on the opening day. The exhibitors included George A. Kuhl, Pekin; Klehm's Nursery, Arlington Heights; Mt. Greenwood Cemetery Association, Mt. Greenwood; Vaughan's Seed Store and A. Lange, Chicago; and in Joliet, C. E. Carter, Jos. Labo, J. R. Hobbs, Col. Lambert, Bush Park, J. D. Thompson Carnation Company, the Chicago Carnation Co., James H. Ferriss and others. Among the prize-winners were A. Lange, bouquets; Jos. Labo, table decoration; St. Francis Academy, Woodlawn School, Father Foster, Dr. Fredricks, Messrs. McDermott and Baldwin,

and Mesdames Wheeler, Brown, Berson, McDade and Johnston.

The show was held in a tent on Van Buren street and awakened much local interest. While the premiums were quite liberal for an organization so young, it is anticipated that the prizes will be much more attractive next year. Edwin A. Kanst, of Chicago, officiated as judge.

Aftermath of Philadelphia Show.

On the average, quality and quantity were equal to previous years. There was a distinct falling off, however, in the large specimen chrysanthemums. Neither the first nor the second prize lots compared with what we have seen in previous years. The best plant in the "whole bunch," to my mind, was Wm.

E. A. KANST.
Superintendent of the Chicago exhibition.

Robertson's Brutus. The Robertson geraniums were, as ever, extra fine. The only improvement that could be suggested is in regard to color, which averaged too much red. A few well grown plants of pure white and white with crimson eye would have improved the exhibit.

The Dodd group of foliage and flowering plants was very tasteful and choice, both as to quality and variety of plants and the arrangement of them. Good culture and good taste seem to have gone hand in hand in this instance. Mr. Hopper has good reason to be pleased with the work of his people this year, the competition in this section having been stronger than usual.

Thatcher's foliage plants were a revelation as to what care and intelligent effort can accomplish. The specimen palm (Cocos Bonneti), the crotons, and especially the specimen Maranta Makoyana, were exceptionally fine and deserved all the praises that were lavished on them during the week.

The table decoration by Hugh Graham was the finest I ever saw. It was composed of choice orchids and greenery and was arranged with exceptional taste. The premium of \$50 awarded to this exhibit did not begin to cover the expense of same, and Mr. Graham has therefore to be credited with considerable public spirit in putting up this fine display.

Among the new chrysanthemums, R. G. Carey's new yellow stood out con-

spicuously. It is a very deep incurved flower of a beautiful bright golden yellow. Mr. Carey also exhibited a new pink for which he got first prize, but I do not think it was as good as Mr. Binder's pink in the same section. It was about the same sized flower but Mr. Binder's was, in my opinion, a brighter shade, and from what one can judge of the cut blooms, a more vigorous variety. Mr. Binder calls his new seedling Mrs. H. V. Casey, and it undoubtedly has a future. The judges here have given it a certificate both from a commercial and an exhibition standpoint.

Francis Canning's twelve specimen ferns were choice and well grown and a very commendable exhibit considering the facilities at his disposal.

The private gardeners showed up better than usual with cut roses. It is a pleasure to commend them on that branch of gardening, for if they can grow roses well they can grow almost anything. Geo. Morrison's Sunrise, Bridesmaid and Perle des Jardins were particularly fine. One wonders how he managed to get such stems on these varieties. Mr. Kleinheinz's Beauties were also commendable and compared very favorably with the commercial exhibits in this section. Jacob Becker's Ideal, a sport from La France, was much admired and the consensus of opinion was that it was a great improvement in color.

On the whole there was nothing specially new in chrysanthemums this year, either in plants or cut flowers. Form and size were about as usual. The limit seems to have been reached in the present types, and unless we have some distinct break soon, it is to be feared that the public will lose their interest in the chrysanthemums.

Violet growers have arrived at the conclusion that, all things considered, Luxonne is the most profitable variety to grow. Its perpetual blooming qualities carry all before it. Aicher & Gilmet, a comparatively new firm in this neighborhood, carried off first prize for a fine exhibit of this variety and were also prize winners in other sorts.

A well-grown specimen of Cattleya labiata was shown by E. W. Cox, gardener to J. H. Bromley, Germantown. It had fourteen well developed flowers averaging seven inches in diameter. The judges awarded this a certificate of merit.

FRUITS AND VEGETABLES.

In the fruit department there were only a few pears and apples and some foreign grapes but the vegetable display was so good as to make up for all shortcomings. Plants and flowers were in such abundance this year that a large part of the vegetable exhibits were crowded into the passageway leading from the lower end of the hall out to the driveway, the latter of which was also fully occupied, there being two long sixty-foot tables in that unique position, with celery exhibits alone. The celery exhibit was certainly one of the best ever seen here.

Another of the prominent features were two large tables of sixty square feet each consisting of a collection of vegetables of various kinds. Jno. McCleary took first and John Little second for these. To my mind the second prize collection looked fresher and better than the first. Perhaps there was not quite enough variety in the second and that may have influenced the judges. A notable item in the first prize exhibit was the giant Cashaw Crookneck squash, as was also the White Curled endive and Sutton's Best of All tomato. The distinguishing feature of the second prize exhibit was three immense heads of

A GENERAL VIEW OF THE PHILADELPHIA FLOWER SHOW, NOVEMBER 11-15, 1902.

Snowstorm cauliflower, and two lots of kohlrabi, the green and purple.

Jno. Dodds carried off the prize for tomatoes with a nice exhibit of four varieties, Stirling Castle, Lorillard, Stone and Marvel. Thomas Long was first with potatoes, of which there was quite a fine display. An odd variety of potato exhibited for the first time here was the Blue Peter, originated and exhibited by Leo Haen, Tanguy, Pa.

The Burpee premiums did not bring out a large competition, but what there was of it was excellent. Notable items were Crimson Globe beet, Iceberg lettuce, Black Beauty egg plant and Nansen or North Pole lettuce. The Dreer premiums brought out a very large and splendid collection. William Bell Wright carried the honors in this section. He is certainly a king among vegetable growers. His cabbages were immense, his Autumn King being the finest I ever saw.

Michell's premiums also brought out a fine collection, which filled a large part of the west side of the hall. The prizes offered by the other seedsmen also brought out creditable exhibits. A feature of the lower hall was the bulb exhibit by Michell. The distinguishing point of this was a bed of tulips in full bloom. They were artificial, of course, but the effect was excellent and as an advertisement one of the most effective possible. The arrangement of this and the rest of Michell's exhibit was in the hands of Phillip Freud, to whom considerable credit is due for excellent taste in arrangement.

Another notable feature which I must not forget to mention was a collection of

pumpkins and squashes from Burpee's South Jersey trial grounds. In a hurried glance I counted fifty separate and distinct varieties in the collection and doubtless there were more than that. This exhibition was a source of great attraction to the public and was surrounded by crowds most of the time.

I noticed some good Stirling Castle tomatoes in the Michell collection, but the Sutton's Best of All, in the same section, was not true to type, too large and not the right shape for Best of All. There was a fine lot of Best of All in the McCleary group, however, which was quite true. It is a pity to see this fine tomato exhibited in poor shape, as it gives the public a wrong impression of it. Either the gardener was careless or else his seedsmen should look to his stock seeds.

G. C. WATSON.

The show closed its doors Saturday night, after one of the most successful efforts recorded in the society's career. The weather was good the entire week and the attendance large each day, even Saturday night there being good crowds present.

I omitted to mention Jacob Becker's new rose, Ideal. This sport of La France is quite a departure from this popular old variety. Whether of these varieties, or I should say, of this type of rose could be introduced as something entirely new, what a furor they would make! The Ideal is very distinct from La France, although resembling it in some respects. It received a certificate of merit.

Alphonse Pericat's collection of seedling cyripediums received a gold medal.

They were exhibited in a glass case and were for the most part of the albino type, being very lightly colored.

Graham's table decoration was beautiful and artistic, being composed mainly of orchids with a tall vase of yellow chrysanthemums in the center. The orchids were arranged with ferns in the hollow center of the table, which was round. From the group in the center small narrow glass trays were placed on the inner edge of the table. These projected toward the spaces between the plates and were filled with cattleyas and sprays of oncidiums. The china and glasses were gilt-edged and the chairs surrounding the table also gilt. The whole effect was yellow, but very light and beautiful.

The pair of large vases ten feet high were covered with alternantheras well worked out in different colored designs and attracted considerable attention. Edward Jones was the exhibitor.

The only criticism I have to make of the exhibition as a whole is as to the absence of decorative effect. Much could be done to enhance the beauty of the show in this way and, while it would cost money, I believe it would have paid handsomely. The driveway, for instance, which is never used, could be turned into a handsome promenade, which, with the aid of flowers, foliage and electric light effects, could be made one of the main attractions of the exhibition.

ROBERT KIET.

OXFORD, N. Y.—The Race greenhouse has been doubled in size and a hot water heating plant is now being installed.

St. Paul.

The first flower show held here in many years was opened in the Armory on November 10 under the auspices of the Ladies' Auxiliary to the N. W. Manufacturers' Association. The display as a whole was most creditable, although this being the first attempt, premiums were small, so that the most that the trade could expect was glory.

The awards were as follows: Best collection of single-stemmed chrysanthemums, any color, first, L. L. May & Company; second, Holm & Olsen.

Best collection of pot chrysanthemums, not less than ten varieties, first, Holm & Olsen; second, L. L. May & Co.; third, August Vogt.

Best collection of cut flowers, not less than ten varieties, first, L. L. May & Co.

Best design or basket of chrysanthemums, first, Holm & Olsen; second, E. F. Lemke.

Best collection of orchids, first, Doctor Schiffmann.

Best collection of crotons and other foliage plants, first, L. L. May & Co., second, E. F. Lemke.

Best collection of cut roses, not less than twelve, first, Minneapolis Floral Co.

Best designs or baskets, money divided between R. J. Mendenhall and the Windmiller Co., of Mankato. FELIX.

Poughkeepsie.

A very pretty sight greeted those who attended the eighth annual exhibition of the Dutchess County Horticultural Society, which opened on Tuesday, November 12. The State Armory, where this and other recent shows have been held, is admirably adapted for the purpose and with an abundance of room, good lighting and very satisfactory arrangement

Sam'l Horn, gardener, second with a brilliant arrangement of foliage plants, with cattleyas, lœlias, cyclamens and begonias. For group of ornamental foliage plants, Archibald Rogers scored first with a collection of stately arecas, kentias, crotons, etc., and F. R. Newbold, Thos. Bell, gardener, second with a beautiful group in which were some of the best-colored crotons ever seen. Winthrop Sargent with a group of six foliage plants and a superb Davallia Fijiensis, Archibald Rogers with Asparagus Sprengeri and Nephrolepis exaltata, also a table of neat crotons, dracanas, etc., were also first prize winners here, and F. W. Vanderbilt, Robt. Barton, gardener, came in second with a similar table.

In chrysanthemum cut flowers there were some very fine entries. Sam'l Thorne, I. L. Powell, gardener, won out on vase of twenty-five whites with Mrs. H. Weeks and six crimson with John Shrimpton. Archibald Rogers' A. J. Balfour was the best pink in the class for twenty-five and Levi P. Morton's Vivand-Morel in the class for six. Winthrop Sargent's Timothy Eaton in white and L. P. Morton's Goldmine in yellow were the leaders in their respective classes. For twenty-four blooms of distinct varieties W. Sargent was first and A. Rogers second, and in twelve blooms Sam'l Thorne was first and Girand Foster, E. Jenkins, gardener, second. The winning set comprised Golden Wedding, Goldmine, Merza, Timothy Eaton, Bonnaffon, Mme. Deis, Lawn Tennis, Mrs. Barclay, J. Shrimpton, Mme. Carnot, Col. D. Appleton and Vivand-Morel. W. G. Saltford won out with a handsome vase of Timothy Eaton, Japan maple foliage and barberries.

In roses A. Rogers was first on Beauty, Girand Foster on Carnot and collection of four varieties and S. Thorne on Bride and Bridesmaid, second prizes going to

caused the keenest interest. While the judges were at work on this table there were by actual count thirty-five spectators ranged around them, devouring every word and motion. When the risky job was completed and the result made known it transpired that the Mayor Hine prize had gone to A. Flagler, of Vassar College, and that Herman Asher had captured all the rest.

The winners of the prizes for table decorations on Tuesday were Winthrop Sargent, first with center piece of white chrysanthemums and poinsettias and J. H. Howarth second with decoration of American Beauty and violets.

W. G. Saltford won first for dinner table decoration on the second day.

Other exhibitors in the respective classes not mentioned in the above list of awards were F. R. Newbold and F. W. Vanderbilt in chrysanthemums, V. Burgevin's Son, A. Rogers, W. Sargent, L. P. Morton, Spy Hill Conservatories, Mrs. Oakleigh Thorne, Chas. Rapp, gardener; and Girand Foster in carnations, D. S. Lamont and Mrs. Oakleigh Thorne in roses, Lyon & Strickland, C. H. Bahret and Girand Foster in violets, State Hospital with rustic stands and ferns and F. R. Pierson Company with Piersoni fern. W. G. Saltford had an artistic pagoda in the center of the hall. The judges were Eugene Dailledouze, H. A. Siebrecht and Thos. Harrison.

Ballimore.

The annual chrysanthemum show of the Baltimore Gardeners' and Florists' Club was held at Lehmann's Hall, November 12-14. The competition for the premiums did not bring out the entries it deserved, although, the white, yellow and pink chrysanthemums were represented in very large numbers, all of them being in exquisite form and foliage; and the size of the flowers has not been excelled anywhere. The pompon display made by R. Vincent & Son included sixty-eight varieties embracing every shade of color.

For white Timothy Eaton, W. H. Chadwick, Mrs. Jerome Jones and Philadelphia were shown in great shape. Colonel Appleton, Major Bonnaffon and Golden Wedding were equally good. Maud Dean, Mrs. Baer, a rich creamy flower, with incurved petals, and Mrs. Warren, a reflexed variety, were very fine. Mrs. Harry V. Casey, a new pink seedling originated by Wm. Paul Binder, is sure to be a winner. It is not yet in commerce, but will be introduced the coming season. The bronze and red varieties were represented by Geo. W. Childs, Edgar Sanders, Brutus, Black Hawk and Intensity. G. A. Lotz, C. R. Diffenderfer, Halliday Bros., H. Weber & Sons, Lehr Bros., Ex-Postmaster General Gary and others made fine showings of large flowers.

The rear hall was almost entirely filled by Patterson Park with hundreds of pot plants, ferns and palms, together with a collection of crotons and pompon chrysanthemums.

Isaac H. Moss had some good roses and carnations and the most liberal display was made by the president, Robert Halliday, of Halliday Bros. His arrangement of palms was the most artistic that has yet been shown at any of our exhibitions.

On the evening of the opening day a dinner was given the judges, Wm. F. Gude, Z. D. Blackstone and Otto Bauer, of Washington. Those present were:

ORCHID DISPLAY AT THE BOSTON EXHIBITION.

of the tables it was a comfort and delight for visitors to inspect the displays. Taking up the classes in order as presented in the schedule, the classes for chrysanthemums in pots were poorly filled, Fred. Potter, W. C. Roberts, gardener, being the sole contributor. For round table of ornamental and flowering plants there were two entries, Mrs. Winthrop Sargent, W. C. Gomersall, gardener, being first with a stately group of palms, ferns, crotons, cypripediums, poinsettias, etc., and Archibald Rogers,

D. S. Lamont, A. Nichols, gardener, and M. B. Tillotson. The carnation display was particularly good. In pink W. H. Vanderbilt's Lawson was first, in red W. G. Saltford's Crane, in variegated Saltford's Prosperity and in seedlings Saltford's entry, a fine magenta. On thirty-six blooms of three varieties Adam Laub & Sons were first and Saltford second and in the same limited to private gardeners W. H. Waite was first and M. B. Tillotson second.

As always, the violet competition

GENERAL VIEW OF THE NEW HAVEN SHOW, NOVEMBER 11-13, 1902.

Richard Vincent, Jr., Thomas H. Patterson, Robert L. Graham, Fred. G. Burger, N. F. Flitton, Philip H. Weleh, Isaac N. Moss, E. A. Seidewitz, Charles L. Seyhold, John J. Perry, John A. Cook, Henry F. Michel, Thomas Stevens, Frank Sauerwald, William Christie, F. C. Bauer, William Johnson, Ed. Kress, W. Paul Binder, Harry Lehr, Gustav Lotz, W. W. Burger, G. O. Brown.

Louisville, Ky.

The oriental tea and flower exhibition held at Luderkrantz Hall, Louisville, for the benefit of the Business Woman's Club closed with an auction of plants. Among the prize winners were Nanz & Neuner, Mrs. Chas. W. Reimers, E. G. Reimers, F. C. Haupt and, among out of town exhibitors, Benthey & Company, of New Castle, Ind., and Nathan Smith & Son, of Adrian, Mich.

Mrs. Reimers received first prize on twenty yellow chrysanthemums, first for single-stemmed yellow, first on lily of the valley bridal bouquet, first on bridesmaid's bouquet, first on double and single violets, and a number of first and second prizes on carnations and roses. On the opening day a handsome silver cup was awarded Mrs. Reimers for 100 cut chrysanthemums and second prize on oriental tea garden, a second silver cup for best bride's and bridesmaid's bouquets and a first prize on a table decoration of lilies of the valley and orchids.

Nanz & Neuner also came in for a large share of first and second prizes. Their collection of chrysanthemum plants and cut blooms took a number of firsts and seconds. The first prize was awarded to Nanz & Neuner for an oriental tea garden which was unique and quite attractive, first prize on oriental plants and fruits, a number of first and second prizes on cut chrysanthemums, roses and carnations, and first prize on table decoration and funeral design, which were shown on Saturday.

E. G. Reimers had a fine collection of chrysanthemum plants for which he received premiums, also some fine La France roses.

Benthey & Company, of New Castle, received first premiums on American Beauty, Bridesmaid and Bride roses.

Nathan Smith & Son, of Adrian, Mich., were first on collection of cut chrysanthemums.

Henry Nanz had charge of the entire affair and certainly deserves much credit for hard work and good management.

Providence, R. I.

Our chrysanthemum show, November 13-14, was a profitable exhibit for public inspection and generally satisfactory to all exhibitors. Our city has only two large chrysanthemum exhibitors, the Macraes, and competition is close on some varieties. F. Macrae proved a winner on Eaton, Jones, Appleton and Pullman, with John Macrae capturing second and third on general classes.

W. L. Lewis and John Barr made creditable exhibits and Mr. Barr won a first

prize on twelve cut blooms. In fact, Mr. Barr would doubtless have gained some extra prizes had he entered in more classes. His display of cut blooms in bottles was a worthy effort. One could count upwards of fifty varieties in the show, but in the main the display consisted of only Eaton and Appleton. E. J. Johnson gave us a delightful surprise with Mrs. Balfour, dark pink. The color is desirable and although the flowers were not in competition, they were awarded a gratuity. The Rustique, grown by J. Macrae, seemed to strike a responsive note among the bronze yellows. F. Macrae's Florence Pullman exhibit was very fine.

The carnation exhibit was never before surpassed among local growers. F. Macrae had a good white seedling of size and stem. The Little South Floral Company, of Natick, Mass., showed The Queen, their own introduction, and won an easy first prize. Wm. Maxfield, of Barrington, obtained second on a white seedling, and Maxfield and Fales were second on Floriana. John Macrae made the largest exhibit and showed himself a skillful grower. He was first and second on several entries, and his Beau Ideals were fine. This variety, on the Daybreak order, has had its tribulations, but Mr. Macrae has a stock to be proud of. The Crawford of E. S. Cooke, Brockton, Mass., is a fine mottled cerise of good size. J. H. Cushing and J. A. Foster made good exhibits and Wm. Hoffman showed his Challenger, a new red.

Reuter, of Westerly, made a special effort in carnations and roses, the latter winning a gratuity. His Lawson received first prize and Lillian Pond was second, being overscored by The Queen.

Wm. Appleton's palm exhibit received special mention for its completeness. Mr. Hill, as usual, made two fine groups of foliage plants.

J. Macrae had a table of Lorraine begonias in splendid condition, also a cluster of Princess of Wales violets.

The judges were Thomas Greaves, of Brockton; James Burke, of Warwick; Charles Forbes, of this city, and W. L. Lewis, of Marlboro. M. M.

GROUP FROM H. S. HOPPER, NARBERTH, PA., J. H. DODDS, GARDENER.

(Shown at the Philadelphia Exhibition.)

Elmira, N. Y.

The fifth annual exhibition of the Elmira Horticultural Society was held November 11 and 12, and the quantity and quality of flowers exhibited and the attendance of spectators would indicate no falling off in interest. In nearly all classes the flowers showed an improvement over those of previous years. The principal prize of interest was the Board of Trade cup for the best seedling not disseminated, which was awarded to a seedling of G. P. Rawson's, grown and exhibited by John Rudy. It is a white tinted primrose, of good size, stem and foliage, with broad petals, reflexed, center incurved, an attractive exhibition sort which may be called the Strathmont.

Wm. Paul Binder, Rider, Md., sent three blooms of a beautiful pure light pink variety, Mrs. Harry V. Casey, of good size, broad petals, reflexed with tips incurved, which is very promising.

Nathan Smith & Son, Adrian, Mich., sent a collection of their splendid old and new varieties, including among others Bentley, Chenon de Leche, Edgar Sanders, a very attractive, well formed red bronze variety; the beautiful yellow, Mrs. J. J. Glessner, and the new gem, F. J. Taggart.

The exhibit from the Strathmont greenhouses was large and the palms, mammoth chrysanthemums, roses, carnations and violets all showed the ability and painstaking care of the gardener, John B. Rudy, and the liberal, intelligent interest of the proprietor, J. S. Fassett. The most noticeable varieties in this exhibit were Timothy Eaton, Calvat's 99, Jessie Cottee, Thomas Carington and Mrs. Barksdale. He also showed a beautiful bunch of Liberty roses and some seedling carnations.

Grove P. Rawson filled two tables with exhibits, the most attractive being his Col. Appleton, Lady Hanham, Idavan, Orizaba and Philadelphia. He had fine roses and carnations and some good miscellaneous plants.

H. N. Hoffman exhibited fine vases of Timothy Eaton and Col. Appleton and a

vase of 100 Estelle carnations of large size and rich color, also Lawsons, roses and some floriferous cyclamen plants.

There were also attractive exhibits of carnations from Fred. La France and George Backer and of carnations and chrysanthemums, plants and cut flowers, from E. Orvis. H.

Lawrence, N. Y.

The Lawrence-Cedarhurst Horticultural Society is in receipt of many congratulations on the great success which it attained in its recent exhibition. The attendance was very large, the aristocratic summer colony turning out generally to admire the work of, and encourage by their presence, the painstaking gardeners who have worked so enthusiastically for the success of the event. Chrysanthemum plant groups were so well done and the competition so close that the two best exhibits, those of Karl Kretschman and Alex. McKenzie, were given equal first prizes, second, third and fourth going respectively to J. G. McNicoll, H. Entwistle and H. Worthington. These gentlemen, together with James Bell, were the main contributors in the chrysanthemum plant classes, all participating in the prizes. The classes for cut blooms were well filled and the quality throughout was superb, the competitors being Messrs. Bell, McKenzie, McNicoll and Victor Malmros.

Four groups of decorative plants arranged along the sides of the hall were greatly admired. They were contributed by J. G. McNicoll, Jas. Bell, W. Mitchell and John Reilly, to whom the premiums were awarded in order as named. Smaller groups of stove and greenhouse plants, table plants, specimen ferns, etc., were staged and substantial honors won by Messrs. Bell, McKenzie, McNicoll, Malmros and Kretschman, fine taste in arrangement being displayed by all. The entries in the rose, violet and carnation classes were also excellent.

Alex. McKenzie won the special prizes offered by Mrs. T. J. Taylor for Beauty and Bridesmaid roses and for chrysan-

themums, also the Geo. C. Rand prize for chrysanthemums, Victor Malmros the L. L. Benedict prize for carnations, John Reilly the A. W. Hard prize for dinner table decoration, Jas. Bell the Thorburn prize for chrysanthemums, Karl Kretschman the F. B. Lord prize for smilax, also the W. P. Bolton prize for cyclamens and J. G. McNicoll the R. L. Burton prize for chrysanthemums.

Tuxedo, N. Y.

The Tuxedo Horticultural Society held its first annual show in the ballroom of the Tuxedo Club on November 7 and 8. The event was a pronounced success, the exhibits being of a high order of merit and the hall being thronged with distinguished visitors. The society, which was organized only last January, comprises in its active membership nineteen of the principal gardeners of the neighborhood and the associate membership is composed of the owners of the summer homes. Among the special triumphs of the show were the groups of standard and bush plant chrysanthemums by C. D. Shaeffer, gardener to R. Mortimer; groups of palms and other decorative foliage plants from W. Hastings, gardener to C. B. Alexander; fruiting orange trees, also ornamental-foliage plants from R. Franke, gardener to H. W. Poor, collections of fine cut chrysanthemum blooms from W. Hastings, C. D. Shaeffer, R. Franke, Thos. Meany, gardener to P. Lorillard, and Jas. Morenen, and a new golden privet and group of orchids from W. A. Manda. Clucas & Boddington, J. M. Thorburn and Bobbink & Atkins made trade exhibits of seasonable goods in their respective lines.

Special certificates were awarded to George Stewart for palms, R. Franke for palms and orange trees, Wm. Hastings for chrysanthemums and Lorraine begonias, W. A. Manda for exhibit above mentioned, and Bobbink & Atkins for Foster fern. Hastings and Franke were the principal rose and carnation contributors. The judges were Wm. Turner, of Oceanic, and Louis Schmutz, of Flat-bush.

CHRYSANTHEMUMS.

A VALUABLE ACQUISITION.

Among the many new chrysanthemums which have been put upon the market there are few which have attracted more notice than Timothy Eaton. When this variety came, with its magnificent bloom, we heard on every side, "Would that we had a yellow Eaton!" That wish has materialized and the Yellow Eaton is now giving promise of being one of the most valuable chrysanthemums ever introduced to a flower-loving public. Eaton sported yellow with A. N. Pierson, of Cromwell, Conn., during the fall of 1901. In color it is a rich lemon yellow with a center of a slightly deeper shade. This variety bids fair to become very popular, and it will no doubt be widely grown. In all except color it is an exact counterpart of its parent.

W. R. PIERSON.

CHRYSANTHEMUM ESTELLE.

The first chrysanthemum to be exhibited this season before any committee of the C. S. A. was Estelle, certificated by the Cincinnati committee on October 18. Marketable blooms were cut October 4, by the originator, H. M. Altick, of Dayton, O., who says that, with the same

CHRYSANTHEMUM HENRY SINCLAIR.

TWO OF THE SEEDLING CHRYSANTHEMUMS WHICH JOHN N. MAY IS EXHIBITING BEFORE C. S. A. COMMITTEES.

conditions for growth, it is ready fully a week earlier than its parent, *Glory of Pacific*. It is pure white, of fine form. The blooms illustrated were grown in a sash house, given very ordinary culture and no feeding beyond a light mulch, yet they measured from eighteen to twenty-one inches in circumference.

CHRYSANTHEMUM MRS. E. THURKELL.

ED. AM. FLORIST:—I notice the account of a chrysanthemum in many of the trade papers, which is attracting considerable attention as an exhibition variety. There were two blooms shown at Chicago under the name of *Mme. Thirkall*. Being interested in all new comers, and desiring to know of its origin, I have, after some searching, been able to locate this variety. The correct name is *Mrs. E. Thirkell*, one of Thos. Pockett's seedlings. Herewith I append a description as given in G. Brunning & Sons' catalogue, who are noted Australian raisers: "*Mrs. E. Thirkell*, very deep yellow, late flowers bronzy yellow, extra large, grand exhibition variety, best on late-crown buds." The English firm of W. Wells & Company catalogue this variety as *Mrs. E. Thirkell* but Brunning & Sons handle all of the Pockett novelties and are likely correct.

I furnish this information with the hope that all parties cataloguing may adopt the correct name and thus avoid some confusion.

ELMER D. SMITH.

NEW CHRYSANTHEMUMS.

Amorita, which John N. May grew as No. 15, is a bright, glowing satin-like shade of pink. It is a seedling of *Mrs. Perrin* and *Mrs. Jerome Jones*, a sturdy grower with extra fine foliage and stem. The flowers average six inches in diameter by four and one-half inches deep, ready October 15 and remarkable for their keeping quality. The plant is about three and one-half feet high and the use of the first terminal bud is recommended.

Henry Sinclair, formerly designated as No. 11, also raised by Mr. May, is a fine canary yellow, a bold, handsome flower and a very good shipper. It is a seedling of H. L. Sunderbruch and *Jeanie Falconer*. The flower averages six inches in diameter by five deep, on a strong stem clothed with good foliage. Flowers ready October 15 were still in good condition on the plants on November 4. The plant is about four feet high and the second crown or terminal buds give best results.

Color Scheme in Chrysanthemum.

BY PROF. JOHN F. COWELL, BUFFALO, N. Y.
[Read before the Chrysanthemum Society of America at the Chicago convention, November 12-13, 1902.]

When I received an invitation to prepare a paper for this national body of experts, gathered in convention to-day, I must confess that I doubted my ability to prepare anything that would be either new or interesting on the subject dearest

to the heart of this society, and the more I looked into the extensive literature of the chrysanthemum the stronger this feeling became.

To find some phase of the subject which had not been thoroughly threshed out and winnowed, and yet within the limit of my time and knowledge, seemed an almost hopeless task, and only my feeling of duty to your organization prevented my declining the honor.

The subject as announced briefly is "*The Color Scheme in Chrysanthemum*," and the investigations on which much of what I have to say is based were carried on by me over a quarter of a century ago. I must beg of you not to regard my remarks as a sermon or a lecture, but merely as a rambling talk, on certain theories, which may bring out further discussion of benefit to all interested in extending the color range in the queen of autumn.

My acquaintance with the chrysanthemum dates back over forty years, and my earliest recollection is of the clumps of somewhat pinky white and rather striped purple blooms that stood in a sheltered nook beneath the dining-room windows of my boyhood's home. While these blooms would hardly pass muster to-day, yet I remember that we looked forward to their blooming and valued them the more because they braved the cold November winds with their modest show of color.

Of the then choicer varieties, grown in pots for indoor decoration, were a bronzy yellow, a pure white and a brown red or

maroon, all of which were small, reflexed blooms of the Chinese type. As above indicated, all of these early forms of the Chinese species were of rather impure color.

The wine colored or magenta tints did appear in many of these, but I do not remember anything that could be called, even by courtesy, pink among them. With the Fortune introductions came gradually pure yellows, fairly good pinks, wine reds, waxy whites and nearly all the other shades except red, scarlet and blue, and notwithstanding many years of cultivation since, the blue and the scarlet have not been attained.

Just why these colors have eluded us it is hard to say. The long line of heredity within historic times seems to have been too weak in the proper pigments to dominate the blooms and by many the possibility of obtaining the blue chrysanthemum is doubted. In considering the possibility of reaching this more or less desired result, it may be well to recall what has been done with other species before we proceed further. It may encourage us.

The Chinese primrose, introduced to cultivation in England in the early part of the last century, seems to have been either white or of varying intensity of purplish pink, yet in recent years the colors have been much intensified and varied and we now have good reds and a pretty respectable blue. It is true that the yellow is yet mainly confined to the central portion of the flower and is very slow to diffuse itself.

The pansy may be mentioned as another example. Here from the original wild *Viola tricolor*, with its creamy white petals faintly marked or stained with purple, we now have good blues, yellows and even red, with countless intermediate tints. The garden phloxes have varied under cultivation from the original rosy bloom to deep red, scarlet, lilac and an approach to yellow, all since 1835.

The old theory that blue and yellow cannot occur in the same genus has long been exploded, as witness *viola*, *iris*, *aquilegia*, *linum*, *delphinium* and many others. Still the fact remains that where the species was originally blue, yellow has been most difficult to attain, and where yellow pure and simple was the original color, blue has never, to my knowledge, been produced.

The pigments which enter into the colors of flowers have been divided into two series, the xanthic or yellow and the cyanic or blue. To the blue series we must credit all the reds, and we must consider the greens as mixtures of the two series.

These pigments are dissolved in the cell sap and are often so abundant as to be seen in the leaves and stems as well as the flowers. Familiar examples of this excess of pigment may be seen in carnations, primroses, cinerarias, cyclamens, etc.; so marked is it in many cases that it is easy to group a lot of seedlings according to color long before they come into blossom. These coloring matters may be extracted and crystallized. If solutions be made of these crystals some interesting results may be obtained by treating them with certain organic acids and alkalies. The reactions brought about seem to be analogous to the changes of color seen in the blossoms of living plants. Solutions of the cyanic group are readily acted upon by dilute acids and alkalies, such as tartaric and oxalic acid on the one hand and sodium compounds, even ammonia on the other.

The xanthic group, however, is most refractory and defies any change except slow oxidation, by means of which the pigment is destroyed. I now refer to the action of the vegetable acids; with sulphuric or hydrochloric acids xanthophyll changes to green and blue. Changes of blue to red and red to green are easily brought about. Changes from red to green and from red to blue are very common in nature. In early spring young leaves of maples and other trees are often quite red, but later as the leaves grow and mature the coloring becomes green. Later in the season the change is reversed and we see the green changing to red. In many flowers a similar change takes place. In *mertensia* and other boraginaceous flowers the expanding buds are red and change to blue as they come into anthesis. Green is to be considered as a mixture of blue and yellow, and it is well known that chlorophyll, the green coloring matter of leaves, is separable after crystallization into yellow and blue elements.

The green coloring matter of plants, existing principally in the leaves of plants and often in a less degree in the flowers, is known as chlorophyll. This coloring matter may be easily extracted by digesting the leaves with dilute alcohol. The coloring matter of many flowers may be extracted in the same way, and most of them seem to be closely allied to the green coloring matter of the leaves. There are, however, to be found in certain flowers color pigments which are soluble in water. So far as is known, no one has been able to dissolve the yellow coloring in water and but few of the blues. In testing these extracted colors with the spectrum analysis the yellow and blue coloring matters of the chrysanthemum seem to be identical with chlorophyll and are only to be dissolved by alcohol or benzol, not by water.

The method of separating the blue from the yellow elements is based upon the greater solubility of the blue in benzol, and the corresponding greater solubility of the yellow in alcohol; the yellow is extracted by alcohol, but the green is not, or at least very slowly. It is to be understood that these coloring matters are rarely found in a state of purity, there being almost always representatives of the two groups present in colored flowers, and it is the differing proportions that give us the infinite number of tints seen in nature.

Now, considering the convertibility of these pigments of the cyanic group and the presence of the yellow pigment in the mixture, are there any good reasons for expecting scarlet and blue to appear in chrysanthemum flowers? Let us look for a moment on the color of this bloom as it is to-day and as it was at the time of its introduction. The oldest colored plate of the bloom that I have seen represents it as a purplish pink, a strongly cyanic color. On the other hand yellow has always been well and abundantly present in the cultivated varieties since their earliest introduction into this country, at least, and since the Japanese introductions yellow of great purity has been almost predominating.

The very name of the flower refers to the yellow coloring. If we are to consider yellow as original and typical of *C. Indicum*, it would seem from what we know of the immutability of that pigment, an almost hopeless task to convert it into blue or any other color. But if I mistake not, the other parent of our modern flower is strongly cyanic. Many of our hybrid blooms are strongly

impregnated with the cyanic pigment, and we have quite a long list of varieties described as amaranth, purplish crimson, magenta, lilac, mauve, etc., certainly showing a marked increase in the amount of the blue pigment, in these later years.

The forces that govern the character of the secretions in the cells of the plant are most delicately adjusted, and an increment or a diminution that baffles the most sensitive scale of the chemist may change entirely the color of a flower or transform a leaf. And so it is to qualitative rather than quantitative analysis that we must look for the solution of many of the problems of plant life.

Qualitative tests seem to show that the reactions which bring about the red and yellow and red colors are acid, and those that give us blue and green are of an alkaline character. Just how far this knowledge will help us in the production of the missing colors in chrysanthemum remains to be seen.

It certainly will not do to rely on hypodermic injections or on absorption of gaseous fumes for the attainment of the end in question; but the knowledge may be of some use to us in the work of development. It is entirely probable that the process of developing the new colors will be along the lines of selection and breeding, and when we remember what wonderful results have been brought about by long continued and intelligently applied effort there seems to be a fighting chance.

It would seem that given one color to start with it ought to be a comparatively easy matter to produce the opposing color, that is if we have red to start with we ought to obtain green without difficulty, if we have purple we ought to get yellow, theoretically. Practically it is not so easy, it seems. Indications are that it is from the cyanic flower nearest in value to the color desired that we must proceed. This group, or at least that part of it which lies between the violet and the red, seems to be easily disturbed and changed or broken up. For instance, in working for a blue one would naturally start with a violet red which we already have, and which is a particularly instable color. In working for scarlet one would preferably begin with an orange red shade modified with blue if possible.

Another problem connected with the preceding is that of obtaining a homogeneous coloring on both sides of the petal. At the present I think our nearest approaches to red and scarlet are to be found in the bi-colors. Here of course the unity of the color is marred by the dull papyry under petal.

With distinctly and regularly reflexed flat petalled flowers of course this is not so noticeable; but with less compact inflorescence or of incurved blooms, the dull coloring and poor texture spoils many a bloom otherwise admirable. This difference in color and texture is not uncommon in the petals of flowers generally. A great many of our flowers that are upright or lateral exhibit this same diversity—the lower or outer surfaces are greenish, dull colored, or coarse, while in pendulous flowers this difference is not so marked. The reason advanced is that in the one case the brilliant coloring is not needed, as practically only one side—the upper—of the petal is seen. In the case of the pendulous flower it is the outer side of the petal that is presented to the eye, and so it is to be made the conspicuous surface. Why these things occur thus and so is all written in the book of

DECORATION BY WALTER KREITLING & CO., CHICAGO, FOR A BANQUET TO THE CROWN PRINCE OF SIAM.

evolution. To be sure, it has taken a long time to bring these colors about in the haphazard way of nature. We expect the modern florist to accomplish in a few years more than natural selection has done in thousands.

The evolutionist of to-day can make his crosses between forms gathered from the uttermost parts of the earth, and is not confined as nature has been to slight variations growing accidentally in juxtaposition. If one chrysanthemum bloom shows the desired characteristic there is no reason why all cannot be made to do so. Like produces like and unlike produces unlike, just as surely to-day as it did a thousand years ago, and there is no good reason to believe that we have reached the limit in any direction. As we accumulate knowledge we increase in power over all things and a little obstacle like the coloring of a bit of cellular tissue should not be insurmountable.

Perhaps I have left you still just as far from an answer to the question as you were when I began. However, what has been may be again, and even new combinations are possible. It has been demonstrated that both pure red and blue pigments exist in the species, and the possibility of intensifying and isolating them seems to me to be not unreasonable. Because we have never seen these colors appear is no reason why they may not yet come. At any rate I think we shall all agree as to the desirability of this increase in color, though we may differ as to the probability of reaching the goal. And I feel sure that if this change is ever brought about it will be due in a great measure to the inspiration of the C. S. A.

Hybridizing Chrysanthemums.

BY ELMER D. SMITH, ADRIAN, MICH.

[Presented to the Chrysanthemum Society of America at the Chicago convention, November 12-13, 1902.]

Before entering into the details of this subject, let us consider some of the natural conditions which have more or less influence upon our results. Dame nature says the chrysanthemum shall be single and reproduce itself from seed; so in producing these marvelous flowers, with almost countless petals, we are working in direct opposition to her laws.

In some of our improved varieties we are prevented from making further improvements, owing to the pistils or styles being abortive, and in other varieties the staminate florets provide little or no pollen. As you are aware, hybrids result from the crossing of species, and as this has not been attempted to any extent with chrysanthemums it seems wise to confine ourselves to cross-fertilization.

In cross-fertilization, the operator's desire is to improve the chief characteristics, such as color, size, form and fullness. It is beyond human power to state exact results in uniting or mixing the colors of petals. Pollen from a white flower applied to a red may give red, white, or any of the intermediate shades, which would be the many varieties of pink. Mrs. Alpheus Hardy, white, and E. Molyneux, red, gave Lady Playfair, pink. The union of red and yellow gives similar results, producing red, yellow and all the intermediate shades of brown and tan. We have more assurance when varieties of the same color are crossed.

Improvements in color can only be attained by the union of colors, bearing in mind the laws of nature in making these unions.

The chrysanthemum, like the carnation, has a great tendency to revert to its antecedents. Hence it is we get many strange colors when two of the same color are crossed. The variety Mrs. J. J. Glessner came from Edward Hatch and Mrs. Jerome Jones, both of which are white, or nearly so. This seedling partook of the parentage of Edward Hatch, which was *Gloriosum* × *Ada Spaulding*. Form, size and fullness are improved only by careful consideration of these qualifications in the varieties at our disposal. We are more certain of advancement in the style of growth, securing those which are dwarf and sturdy by confining our operations to such varieties as possess these qualities. Large and small foliage can be produced by using those which have these peculiarities. What governs the potency of the pistillate and staminate parent we cannot determine. We are dealing with minute affairs. The stigma may scarcely have reached maturity when the pollen is applied, or the pollen may be past its prime, with the stigma at the height of development. These varied conditions may have their influence upon establishing the character of the seedling.

In selecting varieties for this work, the two great classes for consideration are those for exhibition and those for the commercial grower. In the former, size is the most important factor, if the other qualifications are up to the average. The commercial grower requires staple

colors and the purer the color the better. Size, form, fullness and style of growth are important and should be taken into consideration.

Plants intended for seed raising should be staged in a dry, light house, and excessive moisture at the roots or in the atmosphere should be avoided. June and July struck cuttings grown to single stems in 4-inch pots are the most convenient. Such flowers, if given but little feed, are more natural, furnish an abundance of pollen and are easier to trim than the massive exhibition blooms.

The operation begins when the flowers are half open, by cutting the petals off close to the base with a pair of scissors until the styles are exposed. When the styles are fully grown, the upper surface or stigma is in condition to receive the pollen. Select the desired flower for pollen and push aside the ray florets or petals until the disc florets are in view; these produce the pollen which may be collected on a camel's hair pencil or a toothpick, and then applied to the stigma of the flower previously prepared. If a toothpick is used, never use it for more than one kind of pollen. By allowing the camel's hair pencil to stand in an open-mouthed vial of alcohol, a few moments after using, it may, when dry, be used upon another variety without fear of the pollen of the former operation affecting the present.

Pollenizing should be done on bright sunny days as far as possible. In wet weather, a dry warm house can be utilized, and the work continued each day provided sufficient pollen is at hand. On bright days, pollen is generally very abundant and may be collected, stored in vials and labelled ready for use. If kept perfectly dry, this pollen will retain its vitality throughout the chrysanthemum season.

After fertilization, give the plants only sufficient water to keep them from wilt-

that time. Do not anticipate super-abundance of seed. The crosses which give but a few seeds generally produce the best seedlings. Hand pollenized seeds are of more value than those naturally fertilized. It at least seems rational to expect more from seed secured by the union of our best kinds than from that produced by the wind without intent, or the bee, whose only object is to secure his daily sustenance. If this be true, our results depend upon the degree of intelligence employed in the selection of parents and the thoroughness with which every detail is attended.

Chrysanthemum Cut Blooms.

BY CHAS. W. JOHNSON, ROCKFORD, ILL.

[Presented to the Chrysanthemum Society of America at the Chicago convention, November 12-13, 1902.]

In presenting this subject to you my first duty will be to review the cut bloom chrysanthemums that have gone before, or, in other words, the foundations of our popular kinds of to-day. In looking over the varieties that we consider standards now we can hardly realize how very few of the veterans we still have with us. One of the oldest favorites is Ivory, a grand old variety but now being grown less each year. It is being discarded on account of not being large enough for present day requirements.

Geo. W. Childs is a variety which has long been the standby in red. It is still on deck and possessing, as it does, so many good points, it is likely to remain with us for awhile. I suppose this variety at the time of introduction was the most distinct American seedling. Mrs. Jerome Jones, that beautiful incurved with such handsome foliage and the flowers of which keep so well, did not get a very good start owing to its requirements not being properly understood. I remember the first plant of this variety that came under my notice. It was grown in a

Major Bonnaffon is another of the old wonders for which lack of size is proving its undoing. Without a doubt this variety was at one time grown more than all others combined. This is also a very distinct sort, possessing characteristics entirely its own and which our hybridizers have not been able to infuse into the later day seedlings. Niveus, Philadelphia, Mrs. W. C. Egan, Yellow Queen and H. L. Sunderbruch are still grown to meet some special purpose but are no longer considered wonders, as of yore. Mrs. Henry Robinson, Modesto, Pennsylvania, Mayflower, Jeannie Falconer and Mrs. Perrin are very much alive yet and well able to hold up their heads among the leaders. But what has become of The Queen, Harry May, Hicks Arnold, Harry E. Widener, Frank Thompson, Mrs. E. G. Hill, Gold, Mermaid, Robt. Bottomley, Minnie Wanamaker, J. C. Vaughan, Exquisite, Ada Spaulding, Mrs. Alpheus Hardy, Eda Prass and Lillian B. Bird, varieties without which a few years ago an exhibition collection would not be complete? Our Mutual Friend is still holding its own and is found in most collections and this year, I believe, has done better than ever.

Of the vast number of foreign varieties that have been introduced into this country we have to award first honors to that sterling French variety Vivian-Morel, which we still see in various grades of quality, some seasons extra fine, others not so good, although it would seem as though most of us are still loth to let it go. Golden Wedding, from the other side of the globe, cannot yet be beaten in its season. This variety was very disappointing the first year or two after being introduced. Several growers were so disgusted with it, because of its being so infested with disease, that they pulled out the plants without letting them come into bloom. But time has proven that our golden friend was made of better stuff than we even then dared suppose and to-day it is simply grand. W. H. Lincoln, in its day a fine yellow for cut blooms, is now being pushed aside by many much better, although for growing into specimen bush plants it is still a top notch yellow.

After these three varieties we have to skip a few years before anything very useful from an American standpoint came to hand. Several English varieties put in their appearance but after due examination very few of them could pass muster. One that looked at first to be a winner was Mrs. Henry Weeks, but it was too fussy and could not bear so much sunshine. We had, therefore, with regrets, to let it go. No other of the English varieties of that time ever got far enough into the front ranks to be classed as standards.

We have several English varieties now on trial which seem a great deal more promising. The two leaders are: Kate Broomhead, a magnificent bronze, a fine grower, of good even color. It likes plenty of sunshine and is one that will give the best of them a close race. Mrs. Coombes, a massive reflexed pink, is another wonderful variety with the same easy growth and stout stems, clothed with heavy foliage. We are much impressed with this and the more we see of it the better we like it. A. J. Balfour, another pink from England, pleases us very much on account of its beautiful clear color. We did not get this one till late, consequently it did not have a fair show and is a little under size. Mrs. Barclay is another pink monster with very heavy foliage, and, although it may

GREENHOUSE PLANT OF THE DALE ESTATE, BRAMPTON, ONT., IN 1901.

(New range of 23 houses in course of erection to right. See page 554, issue of Nov. 15.)

ing. Always keep a record of the work, showing the parents of the seedlings. It will afford you pleasure to know how a meritorious variety was produced, and may suggest possibilities along other lines.

Seeds ripen in five to six weeks. Those fertilized early in the season give the greatest number of seeds, doubtless due to the weather being more favorable at

6-inch pot with stunted foliage and made a dirty white flower with wide open center. But what a transformation we did behold the next season or two, when this selfsame variety had jumped to first place as the leading commercial and prize winning kind of its season. It is still well up in the front rank, with its graceful blooms and well clothed footstalks which size alone has beaten.

HOUSE OF THE NEW ROSE CANADIAN QUEEN PHOTOGRAPHED IN OCTOBER AT THE DALE ESTATE, BRAMPTON, ONT.

seem a little coarse, it is still a striking variety.

We are also trying some of Mr. Godfrey's finest set of novelties, with results that are hardly up to our expectations. Godfrey's King and Queen Alexandra have made the best showing of the lot, but can only be used in collections and they will have to increase in size to hold a place there. Bessie Godfrey we have been building great hopes on, which have not been realized, but perhaps we can do better with this one another season.

The Australian people use as their motto "Advance Australia" and the Australian chrysanthemum raisers are certainly acting up to it, for some of the new varieties that they are giving us are truly wonderful. We have Nellie Pockett, a very distinct sort and a gem in every way. Although it has not enough substance for commercial purposes, it can find a place in exhibition collections. Walleroo and T. Carrington are also two very telling varieties for exhibition and late reports from England on several more varieties now on trial lead us to expect something amazing.

We are getting some very fine things from France, but most of them have the very serious fault of being ungainly, tall growers and many of them come with long necks. Mme. Deis, a very large reflexed white, pleases us very much. It is very slow to make cuttings, but if this fault is overcome this variety should prove a winner. M. Chenon De Leeche, a rosy buff, reflexed, is fine for exhibition and in Europe this variety is considered the finest ever raised. Mme. R. Cadbury, a very large showy white, is another grand sort. Mme. Carnot and its yellow sports, Mrs. Mease and Chas. Warren, we have had for some time and, though they require special culture, they are still splendid varieties.

It is quite amusing to read what the European growers think of some of our most popular kinds. One or two varieties which we think are top-notchers are described there as nothing startling, while many of our early sorts are classed as late. But this is no doubt due to the different climatic conditions. In looking over the English reports it would seem as though Our Mutual Friend is entitled to first place among American varieties in that country, closely followed by Modesto, Niveus, Sunstone, Western King, Simplicity, Mrs. E. W. Clark and Geo. W. Childs, varieties that have all made their mark.

The first year that I was in Chicago we grew our chrysanthemums out in the field during the summer, lifting them in the fall, the same as we now treat carnations, and I believe the first house of single-stemmed chrysanthemums in this part of the country was grown at Mount Greenwood. At that time we put the cuttings in along in June or the early part of July and planted in the benches early in August, growing them along as fast as possible, taking the first bud that put in its appearance. We then thought we got fine blooms, but they would not be in it to-day.

Now we have to commence to propagate some of the varieties in March, selecting the best wood obtainable, potting them up as soon as rooted and giving them a light airy place, with a night temperature between 40° and 50°. Some of the varieties that need to be propagated early are Mrs. Jerome Jones and its sports, Brutus, Nellie Pockett, Mutual Friend, Major Bonnaffon, and most of the early kinds.

Stock that is intended to produce exhibition blooms should be planted the last of May or by June 10 at the latest. We find that we get as good results from six

inches of soil as when a greater depth is used, so I would not advise planting in any deeper benches than the regulation. Stock planted as early as this needs ample room and should be set nine to ten inches apart. They will also require at least seven feet of head room and a little more if they can have it, for a great many of our best varieties will use up all of this. The question of what kind of soil to use must be governed to a certain extent by the nature of the soil in the locality where we may be situated. Chrysanthemums respond readily to a good, rich compost, but in using a very rich soil greater care will have to be taken to get them started right.

A little over-watering before the plants have become used to the soil will make a great many of them turn yellow and get disease, and plants so affected will never amount to anything. Some seasons our soil in this western country will be as dry as powder and if put onto the benches in this condition it is difficult to get the water to work down evenly to the bottom; consequently the roots of the plants derive very little benefit from watering while soil is in this condition. The better way is to turn the hose onto the compost pile before bringing it into the house. By doing this you can have the soil in any condition you want. This season we used the prairie sod as found in this locality, mixing it as follows: Two loads of sod, one load of clay, one of well rotted cow manure, and after on the benches a liberal sprinkling of fine bone meal was forked into it. This has given us excellent results. After planting chrysanthemums will stand all the sunshine and ventilation they can get, also liberal syringings should be given them two or three times a day.

After the plants are well started keep the soil open by scratching the surface

every little while and keep the beds clear of weeds. This, together with picking the lateral shoots out and attending to the tying, will be the general routine of the work in caring for the plants from the time they are planted until the buds are ready to take.

While mapping out the plan for planting the character of growth and time of flowering of the several varieties should be taken into consideration, the tall and dwarf growers kept separate, also the early, mid-season and late ones planted in sections by themselves. A great deal has been written about the proper time to take the buds, but this most important matter must be governed by the variety in question, also considering the time of planting. Early planted stock, if kept growing actively, can be timed to form a bud between the middle and the end of July. This one must be rubbed out, throwing the plants into growth again, giving them time to make another bud from August 20 on, which, according to my experience, in nearly all cases will make the finest bloom.

I timed several varieties this season on various buds. Col. Appleton buds taken between August 26 and September 10 have developed magnificent blooms with centers full up, ready to cut October 25. Mrs. Jerome Jones buds taken at the same time are showing full flowers, solid to center, ready to cut October 30. Our experience with Timothy Eaton being very limited until this season, I was a little doubtful about taking an August bud, so had them removed excepting on about fifty plants, buds of which were taken the last week in August. These have developed into massive blooms and were ready to cut November 1. The plants of which the August bud was rubbed out went right into growth again and added another two feet of stem, with the result that November 1 not any of them are ready and the blooms are not nearly so good. The first lot attained a height of four and one-half feet and the later ones six and one-half feet. With the variety Mrs. Coombes, buds taken the last of August made wonderful blooms, ready to cut October 20, of very much greater depth and fuller flowers than on the plants where a later bud was taken. I do not wish to be understood that this bud is the only bud to take and am only giving you my experience, hoping other growers will do the same.

Referring to liquid manures, I do not use the commercial fertilizers to any great extent except an occasional dose of nitrate of soda and a dressing of Clay's. In applying liquids we always use a Kinney pump. We give just as much attention to temperature and ventilation in our chrysanthemum houses as we do in the rose, palm or fern houses and aim to have the night temperature as near as possible 50°, especially when the petals are unfolding. After the flower is part way out we sometimes have to raise this slightly to keep the moisture from settling on the blooms. When they are half open we shade the glass a little; this we find a great help in keeping them from burning, also develops the bloom slowly and hence gives them greater substance.

BURLINGTON, VT.—The annual flower show was held in Masonic Temple on November 11-13. There were fine promising collections of flowers from Dr. W. Seward Webb, W. J. Van Patten, S. L. Griffith, Mrs. F. Billings and others and orchids from Lager & Hurrell.

Border Chrysanthemums.

BY PATRICK O'MARA, NEW YORK.

[Presented to the Chrysanthemum Society of America at the Chicago convention, November 12-13, 1902.]

It is a somewhat difficult task to prepare a paper, brief as it must of necessity be, on the subject given. The first snag is that this being read before a national society, it ought to be so prepared as to be applicable to the entire country. To follow the curves and waves of the isothermal lines which the maps show on the United States is a task beyond me; to say that this or that variety would do well here and not there is to invite in advance challenges as to accuracy of statement from which I shrink.

This preamble is based upon the assumption that the coiner of the title assigned to me had in mind the preparation of a paper on hardy chrysanthemums for the border. Perhaps his idea was to obtain a paper on the outdoor culture of "queen mums;" if that assumption be correct the task is simplified, bearing in mind the adage "Fools rush in where angels fear to tread."

In these days when all the flowers grown for market and exhibition are produced under glass, it would seem ridiculous to attempt growing chrysanthemums in any other way to compete with them, yet it is only a few years ago when Wm. Tricker literally "swept the deck" with flowers grown in an outside border, and that, too, in the metropolis of the country. It is he who should write a paper on this subject, for it is the man who has accomplished the difficult, I might almost say, the seemingly impossible, who can best tell how it was done. I well remember the amazement of the "experts" as they looked at the fine flowers he displayed, many of them being varieties which were then regarded as being obsolete. It was there demonstrated once again that care and attention with a knowledge of the requirements of the plants under treatment can accomplish what would seem to be the impossible.

This paper will be read before men who are specialists in chrysanthemum culture, therefore it would seem like "carrying coals to Newcastle" to dilate on soils, pinching, watering and so forth, but as it may be read by others not so well versed in the "a, b, c" of the gentle, commonplace art of gardening, a few words at least would seem to be essential on these and kindred matters pertaining to the subject embodied in the title of this paper.

If the cultivator has a greenhouse he will put in his cuttings in February, in a temperature of say 50°, potting them when rooted, of course, and seeing to it that they are watered and shaded so that they are not checked in their development. Of all plants it may be safely said that none are more sensitive to a check than is the chrysanthemum and none are more disastrously affected thereby. It may also be said in general terms that good, rich, fibrous soil is a necessity to successful culture. To these must be added the other necessities of a free circulation of air, care in not overcrowding and shifting at the proper time.

By careful attention to these necessary details fine plants should be had for setting out in May, say from the tenth to the fifteenth, in the latitude of New York. There is nothing more unreliable, however, than fixing an arbitrary date for outdoor planting. The weather conditions prevailing at the time must deter-

mine whether the propitious season has arrived; hence the cultivator must determine for himself from the existing weather conditions whether or not it is best to plant out. It is safe to say that it is better to be a little late than early.

The border should be a deep rich loam and well drained. When practicable or possible I would advise selecting the south side of a fence for a border. This situation will be best in the late fall days even if it has some disadvantages in the "dog days." Some of the disadvantages are that their friends, the bugs, to use a general term, will in all likelihood find that situation very congenial for their well being and will assemble in force to regale themselves on the repast of juicy foliage. The aphides, green and black, will come and tobacco dust must be used liberally to checkmate them. With a strong force of water and a fine spray nozzle in addition they can be kept away; but they must not be allowed to get a foothold or the task is multiplied many times. Caterpillars are likely to come and must be picked off. The squash bug will find them, too, if he is in the neighborhood, and he very generally is; he knows a square meal when it is spread for him. The grasshoppers, plague upon them, come around too; these fellows must be taken by the neck, or any other convenient part, and unceremoniously ground into fertilizer—by the foot is a good way and very convenient. The brown fly will surely come too, and he must be gotten rid of in the same manner.

By the middle of August if all these matters are attended to properly, strong, bushy plants, maybe a couple of feet high and wide, are the result and the foundation is laid for the fall feast of flowers. By that time all pinching back must be stopped. The flowering shoots, and they are all of that character, are allowed to develop and soon the disbudding begins. All the buds but one on each shoot, generally speaking the topmost one, had better be rubbed off so as to get better flowers at the expense of quantity. At this time liquid manure will be found beneficial, in fact necessary for the best results. Sheep manure makes a good liquid fertilizer. In the absence of this—but it is easily obtainable—barnyard manure can be used as a liquid stimulant. The quantity to be used is best determined by the condition of the plants and it is always best to wash it in thoroughly immediately after applying. Staking will of course be found necessary in most cases, that will suggest itself.

With the approach of cool nights protection will be found necessary. The best plan is to provide what is commonly known as "protecting cloth," a medium heavy grade of muslin which has been oiled. This can be tacked to the top of the fence, having previously sewed it into proper widths; put up a light support in front of the border to sustain it and pull it down at night. By this method all the early flowering varieties may be grown outdoors in the north.

It is unnecessary to burden this paper with a list of the kinds but I will mention a few as a guide: Mme. Bergmann, Mme. Gastellier, Glory of Pacific, Polly Rose, Monrovia, Primo, Solar Queen, Lady Fitzwygram, Day Dawn, Mrs. Henry Robinson, Marion Henderson, Mrs. E. G. Hill, Rose Owen, Yellow Queen.

The pompon varieties are all essentially "border" chrysanthemums, being hardy. Although not requiring the same amount of care as the others, yet they are benefited by it and well repay the extra labor.

A VIEW IN THE NEWLY ESTABLISHED PHILADELPHIA WHOLESALE FLOWER MARKET.

Philadelphia Wholesale Flower Market.

The Philadelphia Wholesale Flower Market is already going beyond the expectations of its founders. Manager Meehan says: "We cannot get flowers enough; our growers are cleaned out every morning as soon as they open up." W. Foulds, one of the growers who formerly peddled his stock, said one day last week: "Just look; I'm cleaned out and ready to go home when last year this time in the morning I was only over one-third of my route. It's a great saving of both time and money to me." This is the statement of other stall renters, all claiming the market a great advantage to them. W. K. Harris has handled a great many chrysanthemums since the market opened and has done it much quicker and more satisfactorily to his customers than by the old method.

In order to increase its efficiency the company will handle on consignment good stock of all kinds for its stall renters if they are not able to be on the ground. Every consignor must first rent a stall, the price of which is \$50 a year, payable monthly, in advance. Then for its services in handling and selling the stock, guaranteeing accounts, and so forth, the charge is a commission of ten per cent. The company has an elegant floor space of 9,000 square feet equipped with all the modern facilities for handling cut flowers and plants. The room is well lighted on three sides, has freight and passenger elevator service, long distance telephone and is convenient to depots. At present the hours are from 7:30 a. m. to 6 p. m., but will no doubt be lengthened as the service requires. Messrs. H. A. Dreer, W. K. Harris and Jos. Heacock are carrying stocks of plants from which orders are taken or the stock sold for immediate delivery. They are all much pleased with their business.

While the above is an account of actual

conditions, there are some who for personal reasons are not in favor of the movement and are giving it short terms of existence. There are always some men in every community who never entirely countenance or support any movement looking to the general welfare of their business. When, however, it goes ahead and meets with success without and in spite of them they are pretty sure to be found safely inside reaping the benefits of the hard work of others. Every florist in the community, be he grower or dealer, should work for the success of this enterprise, as each additional supporter will build up and increase its efficiency, and by so doing reap the reward in the better service which is sure to follow such co-operation.

ROBT. KIPT.

Hartford, Conn.

The first annual banquet of the Hartford Florists' Club, at the Hotel Heublein on the evening of Monday, November 17, was a most delightful affair. The invited guests included President J. N. Champion, with five members of the New Haven Horticultural Society, and Secretary W. J. Stewart of the S. A. F. The cozy subterranean den in which the banquet was held, with its colored hanging lanterns, quaint mediæval architecture and illuminated German inscriptions, looked very beautiful in its dress of green and flowers. Groups of ferns and palms filled the niches and corners, three gorgeous mounds of chrysanthemums, roses, carnations and cyclamens, with scroll-work of smilax, adorned the table and a big Lawson carnation lay alongside each plate. The material was supplied by members of the club and the decorations were the work of Aloise Frey, the junior member of Hartford's floral colony. The menu was decidedly novel, being all hand work throughout, each individual's copy being embellished in

colors, with the representation of some scenery or incident, humorous or sentimental, appropriately suggestive of the tastes or occupation of the recipient. This was the work of Chas. Welty, a young man in the park department.

A. C. Sternberg made an eloquent and jovial toastmaster. When the time for talking had arrived he expressed briefly his congratulations on what this young club had accomplished in the past year and extended a joyous welcome to the honored guests of the evening, calling upon President Thos. McDonald to respond. Mr. McDonald also voiced a cordial greeting to the visitors and told of the early struggles of the organization now closing so felicitously the second year of its existence. The next speaker called upon was Mr. Stewart, who, responding for the American florists, said that commercial floriculture in America furnished in its marvelous development during the past quarter of a century one of the most impressive examples of American progressiveness and referred to the ambition to excel, so universally characteristic of the profession, as promising still greater attainments, socially as well as commercially, in the future.

J. N. Champion responded for the Connecticut societies. He told of the varying vicissitudes of the New Haven Horticultural Society, which, although but a year younger than the Massachusetts society, had maintained for many years a very precarious existence, meeting sometimes in a police court and sometimes in a savings bank, but which now, under the reviving influence of young florist blood, had started out on a prosperous career and with the rare record of a very successful exhibition this fall, to its credit. G. A. Parker spoke for the Connecticut parks. He told of the remarkable development of the park idea within ten years and the great increase

in extent of public reservations which is none too large, considering the disproportionate growth of urban populations and the necessity of providing wholesome breathing places and cleanly surroundings, together with the elevating influences of park scenery. He closed by reading a tale of woe done in verse by ex-Superintendent Keith, of Bridgeport, describing the author's experiences during a sojourn in North Carolina.

G. H. Osborne, replying to the toast, "Commercial Floriculture," gave a graphic account of some of the obstacles confronting the florist, illustrated with pertinent anecdotes, and saw in the beneficent influence of the S. A. F. and other organizations the most hopeful agency for the advancement of the profession. Theo. Wirth presented a very witty communication on the intrinsic value of decorative ability in painting as well as floral and landscape work and strongly advocated more liberality in the use of flowering plants in park work.

J. F. Huss contributed some amusing reminiscences, J. F. Coombs, the "handsome secretary," made response for the ladies, G. X. Amrhy brought good wishes from New Haven, A. Frey stood up while three cheers were accorded him and W. J. Stewart led the chorals in Annie Laurie. Then, at midnight, the party broke up and dispersed, all enthusiastic over the excellent repast and faultless service provided by mine host Heublein.

New York.

TRADE DULL.—VIOLETS LITTLE WORN AT THE HORSE SHOW.—GROWERS GREATLY DISAPPOINTED.—ROSES SCARCE.—TAYLOR SHOWS LAWSON IN EXCELLENT SHAPE.—NEW COMMISSION HOUSE.—VARIOUS NOTES.

There is a very dull market this week notwithstanding the horse show, which is counted on ordinarily to help out on the surplus. The violet people are especial sufferers. The old tradition regarding the violet and its indispensability at the Madison Square horse show seems to have retained sufficient life to make a deal of trouble. Visitors at the great function report that the most infrequent thing to be found there is a bunch of violets and the sales record of the commissionmen emphatically endorses this presentation, yet there is a sufficient number of antiquated people who think that the only royal road to fame and fortune is to double the price of violets during horse show week. More violets have been sold at 40 cents or 50 cents a hundred than at any other price this week and a good many have not been sold at all, but a few gilt-edged consignments have reached \$1.25. Roses are scarce. Were it not for the chrysanthemums which accumulate regardless of results it is quite possible that the roses would make a November record worth preserving. White roses are called for but do not materialize when wanted and American Beauty buyers must keep reasonably near the dozen classification as hundreds are out of the question. The call for cattleyas also exceeds the supply. In short, it only requires a sudden pinch in the weather conditions to bring about a decidedly bull market in New York.

A party comprising thirty-five prominent commercial growers for the New York market visited Briarcliff Greenhouses, at Scarborough, on Thursday, November 20, on invitation to inspect the new greenhouse recently completed by the Pierson-Sefton Company. The structure, which is 55x300 feet, is of galvanized steel throughout and repre-

sents the highest development of greenhouse construction. The guests were welcomed by the owner, Mr. Law, and escorted over the vast estate by the manager, Paul M. Pierson, the vast plantations of Beauty and Liberty roses being greatly admired for their vigor and promise of luxuriant crops. After dinner at the beautiful Briarcliff Inn the party was conveyed in carriages through the great stock farm and dairy departments and thence for a brief look at the Pierson greenhouses. Among visitors from distant points were A. N. Pierson and Wallace Pierson, Cromwell, Conn.; Edwin Lonsdale and Joseph Heacock, Philadelphia; Benj. Dorrance, Wilkesbarre; Alex. Montgomery and W. J. Stewart, Boston.

At John H. Taylor's there is an opportunity for those interested to see Lawson carnation at its best. Mr. Taylor has 12,000 Lawsons planted and they are eloquent examples of vigor and health, bristling with tall flower stems and innumerable buds that suggest gilt-edged Christmas profits. The flowers are remarkably bright and uniform in color, as are also those of Prosperity, which is now yielding its second crop, scattering it is true, as is characteristic of the variety, but every flower a standard. Mr. Taylor is lukewarm on Crane and Gomez, both of which seem with him to have lost constitution, and Hoosier Maid is decidedly dubious, while Floriana, Harry Fenn and Manley are temptingly promising. Norway is at present doing better than it did last season and is throwing some grand blooms. Roses generally are behind hand with Mr. Taylor and there is no prospect of a surplus for many moons. Green cord-wood is giving great satisfaction as an auxiliary to soft coal in the heating department. The combination seems to work all right.

A new commission house on Twenty-ninth street is the sensation of the hour in the wholesale cut flower section. Henry Reidell, for many years employed with Thos. Young, Jr., has formed a partnership with F. Spicer and opened for business as H. Reidell & Company, at 34 W. Twenty-ninth street.

L. B. Coddington and Miss A. E. Chandler were married at Roselle, N. J., on November 20.

W. Seitz, of Bayside, died Thursday, November 13, a victim of the strenuous life and typhoid fever.

Wesley B. Lesh was married to Miss Florence Avers, at Astoria, November 12.

George Golsner mourns the loss of a son, fourteen years old, on November 17.

Visitors in town: Sam. McClements, of Pittsburg, and a whole bunch of up-the-Hudson violet growers.

Boston.

PROSPECTS FOR A GOOD MARKET AT LAST. PERIOD OF DEPRESSION ENDED.—THANKSGIVING BRINGS RELIEF.—VARIOUS LOCAL NOTES.

After going through a period of two weeks unanimously acknowledged to have been among the most spiritless and disheartening ever experienced in the floral trade of this section, growers and dealers now begin to discern light ahead. Nothing is expected from the present week and it is conceded that it will make fit company for its two immediate predecessors, but the coming week, with its Thanksgiving demand, will, undoubtedly, go on record, as heretofore in New England, as a winner, and since the main chrysanthemum season is booked for an

abnormally early closing this year on account of the unprecedented high temperatures of this November, no uneasiness is felt regarding the period following Thanksgiving week. The carnation market has given the most marked evidence of suffering from the incursion of the chrysanthemum. Roses have little to crow about, it is true, but they can at least congratulate themselves on the fact that the carnations have had to endure the greater humiliation. Roses promise to be in rather short supply in the immediate future. Violets remain about stationary.

Much sympathy is felt in the trade for Wilfred Wheeler, of Concord, who, while hunting for deer in the Maine woods, on November 13 accidentally shot and killed John Hager, a guide.

The November meeting of the Horticultural Club on Thursday evening, November 20, was well attended, Ed. Hatch presiding at the board.

Edward Kirk, gardener for George Vanderbilt at Bar Harbor, sailed for a visit to England on the Dominion Line steamer, November 11.

Chicago.

WEEK BRINGS GOOD BUSINESS ON SHORT SUPPLIES OF ROSES—MANY ORDERS TURNED DOWN.—RECEIPTS LIGHT FOR THANKSGIVING.—CARNATIONS AND VIOLETS PLENTIFUL.—CHRYSANTHEMUM CROP DECLINING.—QUALITY AFFECTED BY THE WEATHER.—A VARIETY OF TRADE JOTTINGS.

The week has been a quiet one except as regards the market situation. Little of interest has transpired since the exodus of the trade visitors in the last hours of the flower show, but business has been fairly active and cuts of roses so reduced that wholesalers have experienced much difficulty in filling orders. The Beauty crop has fallen away all at once and in most of the houses more orders been rejected this week than have been filled. The weather was for days cold, dark and damp, and it not only took the color out of the buds but held back the stock and weakened the plants. Tea roses are in equally reduced supply and show the effects of the weather to an even greater degree, with the result that there is little really first-class stock in the market. Carnations come along in increased quantities and steadily improving quality and a few days of good weather would make the stock all that one could ask. Violets are among the most plentiful items in the market and the quality is generally good. There have been some large funeral orders during the current week which have used up large quantities of violets at a fair price. But this is an item for which there is little out of town demand and it looks as though the supplies would be all the market could handle locally this winter. Chrysanthemums seem already on the down grade. Supplies are not nearly so heavy as ten days ago, and the high-class exhibition blooms are not frequently encountered. It looks as though the cut is to be not only off very early this year, but it appears that the damp weather recently encountered has had a disastrous effect on qualities. As to Thanksgiving, the prospect is that supplies of roses will be inadequate. There will likely be all the carnations that can be used to advantage. Growers are strongly advised not to hold back carnation shipments, but to send the stock along daily from now on. A general holding back would certainly result in breaking the market on Tuesday and

Wednesday, with a disastrous effect all along the line.

At the Palmer House last Saturday there was a meeting of growers interested in organizing a corporation to establish a flower market similar to the one recently opened in Philadelphia. They have called another meeting for Iten's Hall, Lincoln avenue and Winona street, for three o'clock this afternoon.

The Pictorial Printing Company, of which O. P. Bassett is president, has decided to remove to Aurora, and Mr. Bassett goes out each day to superintend building operations there. They will have a large three-story brick building admirably located.

W. N. Rudd states that it was an error in the flower show programme which credited the premiums for boxes of cut flowers to Ed. F. Winterson. It was not donated by Mr. Winterson, but by Mr. Winterson's firm, McKellar & Winterson.

E. E. Pieser says he never saw the like of the way violets are coming into this market at present. On Tuesday Kennicotts sold over \$100 worth to one buyer and had plenty for all others.

A. C. Kohlbrand, of Amling's, has been on the sick list a day or two this week. Max Ringier, of the same house, is just getting about after his operation for appendicitis.

Joseph Milton, one of the visiting florists from Minneapolis, was robbed of his money and watch after the close of the flower show last week.

C. L. Washburn returned Wednesday from Alma, Mich., leaving Mrs. Washburn slightly improved in health.

Peter Reinberg is getting a good cut of Sunrise and Chateaux and finds the demand big at present.

A. Lange says that he was unable to find a profit in the sales booth at the flower show.

Cassie Arnold, of Omaha, is spending a few days with friends in the city enroute to Boston.

Louis Gresenz has been on the sick list this week.

Visitors: John Degnan, of Minneapolis; C. H. Jackson, of Oconomowoc, Wis.

Philadelphia.

TRADE FULLY UP TO AVERAGES FOR THE SEASON.—MOST ITEMS SELLING WELL.—PRICES GOOD.—DETAILS OF THE FIGURES.—VARIOUS LOCAL NOTES.

Business is quite up to the standard of the year, there being a good demand for everything with the exception of carnations. While there are a great many chrysanthemums about, they seem to be moved without trouble. Prices range from \$6 to \$20 per hundred. There is also a good demand for a smaller size, something about \$4 per hundred, and that could be handled in bunches of one dozen each. If some of the growers would make a specialty of this size I believe it would pay as well as the larger sizes. Beauties are fairly plentiful but they are all sold at good prices, ranging from \$1.50 to \$5 per dozen. The quality is very good. Bridesmaid roses are poor, in fact have been so all fall. With a few exceptions the color is pale and the second day they are positively good for nothing. Teas are selling for from \$6 to \$8. Jacob Becker is cutting some fine La France for which he gets \$10 per hundred. His new sport from La France, called Ideal, is coming on finely and promises to be a winner. Pennock Brothers have brought the entire crop of flowers for the winter.

Carnations are very good but it takes something extra to tempt buyers at this time, as chrysanthemums hold on well and will until after Thanksgiving day. Prices range from 75 cents to \$2.50 per hundred, the latter for extra Lawsons. Violets have moved up a peg, the choice of the doubles now bringing \$1 per hundred. This is a great city for single violets and many hundred bunches are sold every day at from 25 cents to 35 cents per hundred. Some Paper Whites are in; \$3 to \$4 is the price. Sweet peas, although very much out of season, sell quite well at from 75 cents to \$1 per hundred.

James Cole has four houses of chrysanthemums in pots which are very well done and for which he has an active demand. The varieties are Major Bonaffon, White Bonaffon, W. H. Lincoln, Mrs. Jerome Jones and the yellow sport of Maud Dean. A few Timothy Eatons were tried but it was a waste of room and pots.

Wanamaker's department store has had a large display of orchids, palms and chrysanthemums the past two weeks, all of which were for sale, placed there on commission by a large grower.

George W. Grover sued one Henry W. McFassell for the price of some funeral flowers and received judgment for \$41.54. The defendant claimed the flowers were ordered by his son.

Chas. D. Ball says that this is the best year in the palm business, his September shipments breaking all records. Other growers also report a good demand.

Oglesby B. Paul has been appointed landscape gardener by the park commission, to succeed the late Charles H. Miller.

The Pennsylvania Railroad Company has instructed agents to receive no more perishable freight until further orders.

K.

Buffalo.

DEPARTMENT STORE GIVES A SUCCESSFUL CHRYSANTHEMUM SHOW.—FLORISTS ALL ASSIST.—LIST OF THE PRIZE WINNERS.—VARIOUS TRADE NOTES.

The H. A. Meldrum Co., proprietors of one of the leading department stores, made a great hit last week with a chrysanthemum show, for which they enlisted the aid of most of the florists by offering \$500 in premiums. The exhibition occupied almost all of the fourth floor and the attendance was so large that they are planning a show for next year with three times as much prize money. Much good stock was shown, the following being the prize winners: In the class for twenty-five chrysanthemum blooms, open only to Erie county growers, all showed Eaton, the premiums being awarded to D. Newlands & Co., S. A. Anderson and Wm. Scott. In twenty-five yellow, Scott was first with Appleton, Newlands second with Golden Wedding, and Anderson third, with Appleton. For pink all showed Maud Dean, the prizes going to Wm. Belsey, Wm. Scott and S. A. Anderson in the order named. In the open class all again showed Eaton for white. W. F. Kasting won, Scott second and Anderson third. Kasting also won with Maud Dean for pink, Anderson second and Scott third with Mlle. Marie Liger. For yellow, Scott was first with Appleton, Kasting second with Golden Wedding and Anderson third with Appleton. In ten varieties, ten blooms each, Anderson was first, Scott second and G. Reichert third. For twenty-five blooms, one variety, Nathan Smith & Son, Adrian, Mich., were first, Scott second

and Anderson third. In handle basket and flat basket Anderson was first and Scott second, C. D. Zimmermann being third in the latter. Anderson was also first for original design, Scott second and L. H. Neubeck third. Anderson had the best vase of chrysanthemums, Scott second. The novelty of the show was Velvety Eaton, seen here for the first time. The blooms were grown by A. N. Pierson, Cromwell, Conn., and were exhibited by Anderson.

Palmer & Son opened their handsome new branch store last Saturday. It makes a very imposing appearance, having about fifty feet of plate glass windows in two of the best business streets in town, the corner of Main and Genesee streets. Of course the store is modern in every particular, the fittings being of the best. Miss Ruby Mack and Miss Hunter, from the downtown store, are in charge.

Trade has been about normal during the past couple of weeks, with fair supplies of stock in all lines.

A recent visitor was J. L. Dillon, of Bloomsburg, Pa. BRON.

WILKESBARRE, Pa.—The partnership of Harvey & Hoever, at Plainville, has been dissolved and the firm is succeeded by Thomas Harvey.

W. SPRINGFIELD, MASS.—W. S. Bragg makes an annual gift of Chinese lily bulbs to each room in the public schools. He finds it a good advertisement.

AURORA, ILL.—J. M. Smely has bought the greenhouse and residence property he has been leasing from Roscoe Saunders. The consideration was \$10,000.

DELAWARE, Wis.—N. O. Caswell has his plant of 3,500 feet of glass in good shape. He has torn down 2,500 feet of old houses and will rebuild during the winter.

CHATTANOOGA, TENN.—Mrs. J. W. Crouch gave a chrysanthemum show, with three houses full of fine stock, and received a very satisfactory number of visitors.

TOLEDO, O.—Moore W. Mahaffey, who recently sold out his florist business, has bought for \$2,000 a tract of land on which he proposes to build a range of greenhouses.

ST. JOSEPH, Mo.—Frank Stuppy thinks that this city has had this season as good chrysanthemums as were shown at Kansas City. Stock never was better and sold well.

RICHMOND, VA.—Mark T. Thompson had a good season with dahlias and a good season with chrysanthemums. He is planning many improvements in his place before another summer comes.

RUTLAND, VT.—The C. H. Miles greenhouses on Church street have been bought by Geo. E. Hunt, who has been gardener at the State Industrial School at Vergennes for the past seven years.

MIDDLETOWN, OHIO.—Henry Behrens began business here thirty-eight years ago, raising bedding plants and vegetables in hotbeds. Now he has a modern range of 10,000 feet of glass well stocked.

HINSDALE, MASS.—The fern pickers in the Berkshire Hills are experiencing some opposition from owners of the tracts over which they pick. The Pittsfield *Sun* characterizes the fern fields as "better than gold mines," and it is evident that a very magnified estimate of the financial yield of the "greens" industry has taken possession of the proprietors of this otherwise unproductive land.

THE AMERICAN FLORIST

EIGHTEENTH YEAR.

Subscription, \$1.00 a year. To Europe, \$2.00.
Subscriptions accepted only from those
in the trade.

Advertisements on all except cover pages,
10 Cents a Line, Agate; \$1.00 per inch.
Cash with Order.

No Special Position Guaranteed.

Discounts are allowed, **only on consecutive inser-**
tions, as follows—6 times, 5 per cent; 13 times,
10 per cent; 26 times, 20 per cent;
52 times, 30 per cent.

Cover space sold only on yearly contract at
\$1.00 per inch, net, in the case of the two
front pages, regular discounts apply-
ing only to the back pages.

The Advertising Department of the AMERICAN
FLORIST is for florists, seedsmen and nurserymen
and dealers in wares pertaining to those lines *only*.

Orders for less than one-half inch space not accepted.

Advertisements must reach us by Wednesday to
secure insertion in the issue for the following
Saturday. Address

AMERICAN FLORIST CO., Chicago.

EARLY copy will be thankfully received
next week; Thursday is a holiday.

It is announced that "Mechan's
Monthly" will suspend publication next
month.

F. J. Taggart says he is out of the
flower show business, but he said the
same thing a year ago.

ON a conservative estimate 12,000 carnation
blooms were displayed at the
Chicago flower show last week.

THE flower show idea appears to be
growing in popularity in all sections and
florists will do well to encourage it.

THE freshness of the blooms on the
closing day of the Chicago flower show
proved Norway to be one of the best
keepers among up-to-date carnations.

WE are in receipt of Part I, Vol. VI, of
the proceedings of the sixth annual meet-
ing of the American Park and Outdoor
Art Association, held at Boston August
last.

THE whole number of certificates
granted by the Chrysanthemum Society
of America from its organization to and
including 1901 is 231, not 131 as stated
in President Herrington's address read
at Chicago and published by the trade
press last week.

J. C. KENNISON, of Sioux City, Ia.,
informs us that for several years he has
been subject to poisoning about the eyes,
neck and wrists through handling chrys-
anthemums during their season. If there
are any others of our readers who have
been similarly troubled, it would be
interesting to hear from them. It is said
that Japanese ladies, who sometimes
wear the flowers about the neck and
head, are affected in the same way.

Price of Glass.

The present quotation for American
window glass, as given by John Lucas &
Company, averages as follows:

Less than car lots, 89 to 90 per cent.
Car lots, 90 and 5 to 91 and 10 per cent.

The list on 16x24 double strength A is
\$45.50 and on B \$41.50. Therefore the
price for the former would range from
\$4.10 to \$5 per box and for the latter
\$3.75 to \$4.57. The list on single
strength A, 16x20 to 16x24, is \$30 and
on B \$28, to which the above discounts
apply. These quotations are f. o. b.
Pittsburg, Philadelphia or Muncie, Ind.
To obtain carload price the purchase
must equal a minimum weight shipment
of 30,000 pounds, based on a weight of
seventy pounds to the box for single thick
and 100 pounds to the box for double.

Welcome and Valuable.

ED. AM. FLORIST:—We enclose check for
\$1 for which please extend our subscrip-
tion to your welcome and valuable
journal. ROGERS BROS.
Chaumont, N. Y.

Carnation Adonis.

We are in receipt of a photograph show-
ing one of the large houses of Carnation
Adonis in excellent condition at the
establishment of Robert Craig & Son,
Philadelphia, November 11. In our issue
of March 8, 1902, we reproduced a pho-
tograph showing a bench of this variety
at the same place, and the present picture
shows that it has retained all its vigor
and continues to produce its high class
blooms in surprising quantity. In this
connection it is now interesting to find
that the first illustration of Adonis
appeared in the AMERICAN FLORIST, Feb-
ruary 17, 1899.

Hail Association Pays Promptly.

The following letter, under date of
November 12, has been addressed to
John G. Esler, of the Florists' Hail Assoc-
iation, by A. D. Cunningham, secretary
of the board of trustees of the Missouri
Botanical Garden, St. Louis:

Please accept thanks for check in full pay-
ment of our loss by hail October 12, 1902. We also
wish to express to you our appreciation of the
prompt and satisfactory manner in which you
have settled our claim.

This is a very pleasing condition of
affairs and one that should commend the
association and its methods to all green-
housemen.

Greenhouse Building.

Gardner, Mass.—J. B. Davis, cucumber
house.

Baldwinsville, Mass.—A. R. Paine,
cucumber house.

Toledo, O.—Moore W. Mahaffey, range
of houses.

Hillsdale, Mich.—S. J. Shank, one house.

Columbus, O.—Underwood Bros., one
house.

Cochituate, Mass.—George Fullick, four
houses.

Monson, Mass.—Samuel Closson, one
house.

Hudson, Mass.—Mrs. A. A. Smith, one
house.

York, Me.—W. G. Moulton & Son, one
house.

American Rose Society.

The executive committee of the Ameri-
can Rose Society met in Philadelphia on
Friday afternoon, November 14, and took
up the matter of preliminary arrange-
ments for the forthcoming exhibition and
convention, which will take place on
March 24, 25 and 26 in Horticultural
Hall, Philadelphia. The meeting and
exhibition will be held in conjunction
with the spring exhibition of the Penn-
sylvania Horticultural Society and the
joint premium list is now being prepared
and will be shortly issued.

The American Rose Society will offer a
very complete schedule of the rose classes
while the Pennsylvania Horticultural
Society's offers will be confined to
bulbous and other seasonable stock. In
addition to the regular prizes of the rose
society there has already been received
several promises of silver cups and other
special prizes in cash or plate, which will
be duly announced. Special inducements
will be held out for growers of rose
plants exhibited in groups.

LEONARD BARRON, Sec'y.

Society of American Florists.

DEPARTMENT OF PLANT REGISTRATION.

The Conard & Jones Company, West
Grove, Pa., registers the following new
cannas: Hiawatha, bronze foliage striped
with green; flowers rosy-pink, dappled
silver blush, bordered cerise; height about
three feet. Chautaugua, bronze foliage,
flowers vivid scarlet; trusses carried high
above foliage. Gladiator, foliage leath-
ery green; flowers yellow, spotted crimson;
smaller center petals solid crimson;
height four to five feet. Louise, flowers
soft rose-pink delicately dappled and
streaked red; petals long; flower spikes
unusually large; height about five feet.

Hoopes Bro. & Thomas, West Chester,
Pa., register the following new roses:
Prof. C. S. Sargent (Wichuraiana ×
Souvenir d' Auguste Metral). Foliage
deep green and shining. Branches and
young leaves all deep red or mahogany-
colored. Deep golden-yellow in bud;
open flowers of perfect form, very double,
two and one-half inches in diameter, deli-
cate buff shaded to a decided richer tone
at the center. Fragrance very decided
and pleasant.

Wm. F. Dreer (Wichuraiana × Bon
Silene). Foliage rather small and slightly
glossy. Blooms in clusters with a bud
similar to Mme. Elie Lambert, creamy-
white bordered with bright rosy-pink.
Open flowers, quite double, two and one-
half inches in diameter, pure white or
creamy-white and exceedingly fragrant,
like its pollen parent.

Wm. K. Harris (Wichuraiana × Bon
Silene). A vigorous grower, with bright
green, shining foliage. Flowers pale
flesh-color, about two inches in diameter,
double to the center, blooming freely in
clusters. Fragrance very marked and
similar to its pollen parent.

Robert Craig (Wichuraiana × Beaute
Inconstante). Foliage rich glossy green.
Bud perfect in form, yellowish to light
apricot in tint. Open flower full to the
center, two and one-half inches in diame-
ter, yellow shaded with apricot, deepening
to the center, being a combination of
yellow, apricot and fawn, in the way of
Wm. Allen Richardson.

Edwin Lonsdale (Wichuraiana ×
Safrano). Reddish tints on the young
shoots, with dark glossy green leaves.
Flowers two to three inches in diameter,
quite double, pale lemon-white, with a
delicate tea fragrance. Bud well formed.

John Burton (Wichuraiana × Safrano).
Rather small but not glossy foliage.
Flowers medium in size, very double and
of a delicate pink or peach color, similar
to La France. Fragrance very delicate
and decided.

WM. J. STEWART, Sec'y.

Chrysanthemum Society of America.

Following are the reports of the com-
mittees judging seedlings, sports and
new importations:

Boston, November 10.—The E. G. Hill
Company, Richmond, Indiana, exhibited
Dr. Oronbyatekha, sport of Timothy
Eaton, light yellow, Japanese incurved,
which scored 91 points both commercial
and exhibition scales. T. D. Hatfield,
Wellesley, Mass., exhibited a sport of
Oriental Glory, yellow, tinged apricot,
Japanese incurved, which scored 85
points exhibition scale.

New York, November 15.—The E. G.
Hill Company exhibited R. E. Richard-
son, bright rose pink, silvery reverse,
incurved Japanese, which scored 89
points commercial scale. John N. May,
Summit, N. J., exhibited Mrs. R. W.

Smith, creamy white, Japanese, which scored 87 points commercial scale. Uwanta, by same exhibitor, magenta rose, Japanese reflexed, scored 85 points commercial scale. Herman C. Steinhoff, West Hoboken, N. J., exhibited Catherine Steinhoff, a pink sport of Maud Dean, Japanese incurved, which scored 74 points commercial scale.

Cincinnati, November 15.—The E. G. Hill Company exhibited R. E. Richardson which scored 92 points commercial scale. Nathan Smith & Son, Adrian, Mich., exhibited a yellow variety, Japanese reflexed (same as Nagoya) which scored 79 points commercial scale. This variety has been named H. W. Buckbee.

Philadelphia, November 15.—The E. G. Hill Company exhibited R. E. Richardson which scored 89 points commercial scale, 87 points exhibition scale.

Chicago, November 15. — Vaughan's Seed Store, Chicago, exhibited Golden Chadwick, yellow, incurved, which scored 92 points commercial scale. The E. G. Hill Company, Richmond, Ind., exhibited W. R. Church, red, incurved, which scored 76 points commercial scale, 82 points exhibition scale. Nathan Smith & Son, Adrian, Mich., exhibited the following varieties: H. W. Buckbee, yellow, reflexed, which scored 86 points commercial scale; Ethelyn, Daybreak pink, incurved, which scored 78 points commercial scale; Mrs. J. J. Mitchell, cream, incurved, scoring 89 points commercial scale; and Minnie Bailey, pink, which scored 85 points commercial scale.

The name of the variety exhibited by Nathan Smith & Son at Cincinnati, on November 8, as Jersey Cream has been changed to Mrs. J. J. Mitchell.

EDWIN LONSDALE, Sec'y.

OBITUARY.

LOUIS VALERE LEFEBVRE.

The dean of the seed trade of France, Louis Valere Lefebvre, died at his home on Raincy (Seine-et-Oise), October 17, 1902, in his ninety-first year. He was born at Blois, July 21, 1812, and about seventy-five years ago entered the employ of Vilmorin-Andrieux & Company, of which firm, through his application and energy, he soon became managing member. He had a good knowledge of plants and botany and did much of the preparatory work on the first edition of "Les Fleurs De Pleine Terre," which was issued in 1863. Early in the fifties he foresaw the wide field for seedsmen which was to open in the United States and was instrumental in sending Messrs. Mies (now dead) and Posth (still well remembered by the older generation of American seedsmen) to canvass North America before any other seedsmen had sent a representative to this country. After these two young men had acquired sufficient experience to take his place, Mr. Lefebvre retired from the firm, in 1863, and led a quiet home life, devoting himself to the fine arts, painting, etching, etc. During his whole lifetime, however, he kept in close touch with horticulture and the seed trade and always listened with lively interest to the glowing accounts which his nephew, Eugene Schaeffel, gave him of his annual trips to the United States and Canada, and of the growth there of the Vilmorin business. It was Mr. Lefebvre's good fortune to work in conjunction with the grandfather, father and mother of the lamented Henry De Vilmorin, who died prematurely in 1899 at the age of fifty-

six. He knew the latter gentleman from earliest childhood, also Maurice De Vilmorin, who is now an active member of the firm, and in his time Mr. Lefebvre saw the staff of the concern increase from less than fifty to over 500 permanent clerks. In his long life the deceased was most courteous and affable—beloved alike by the humble and the great—and he will be greatly missed by a wide circle of friends.

HILLSDALE, MICH.—S. J. Shank is preparing to add another large house.

SITUATIONS, WANTS, FOR SALE.

Advertisements under this head will be inserted at the rate of ten cents a line (six words) each insertion. Cash must accompany order. Plant ads. not admitted under this head.

Every paid subscriber to the AMERICAN FLORIST for the year 1902 is entitled to a five-line WANT ADV. (situations only) free, to be used at any time during the year.

CUT FLOWERS AT WHOLESALE.

THE SEED TRADE.

AMERICAN SEED TRADE ASSOCIATION.

WALTER P. STOKES, Pres.; C. N. PAGE, First Vice-Pres., S. F. WILLARD, Wethersfield, Conn., Sec'y and Treas.

VISITED BOSTON: J. B. Kidd, of the Cox Seed Co., San Francisco.

ALASKA peas are being offered rather freely at about \$3.25 per bushel.

VISITED CHICAGO: Max Wilhelmi, of F. Barteldes & Co., Lawrence, Kans.; Henry Nungesser, New York; Jesse E. Northrup, Minneapolis.

ALEX. RODGERS, until lately with S. G. Courteen, Milwaukee, is now with J. Charles McCullough, Cincinnati.

LOUIS VALERE LEFEBVRE, the dean of French seedsmen, died October 17. For details of his career see page 621.

VAUGHAN'S SEED STORE, Chicago, received a carload of Japanese lily bulbs this week by way of San Francisco.

VISITED ST. PAUL:—C. R. Kimberly, Lester Morse and W. J. Fosgate, of California, and Henry Nungesser, of New York.

QUEENS, N. Y.—V. H. Hallock was thrown from his buggy in a runaway while driving November 13, breaking his collar bone. He is reported doing well.

LESTER L. MORSE, of Santa Clara, Calif., after short trips to Rockford, Milwaukee, Minneapolis and St. Paul, left Chicago for the east November 18. He will return to California by the southern route in about a month.

WATERLOO, NEB.—One of our correspondents at this point reports that the wet weather has caused delay in drying the corn and if continued may damage some crops seriously. He considers late corn, both field and sweet varieties, in a precarious condition.

THE continued warm, mild weather and lack of frosts is unfavorable for ripening holly foliage into first-class shipping condition. Freezing weather is desirable as holly foliage that has not been sharply frosted is very likely to heat and discolor when packed closely in cases.

The Seed Situation.

Northrup, King & Company, of Minneapolis, write their customers under date of November 15, 1902, as follows:

"We wish to advise our customers of the fact that great shortages exist on many varieties of seeds. This is notably true as respects seed beans, both wax and green pod varieties, sweet corn, both early and late, cucumber, all varieties, peas, nearly all varieties, all varieties of squash, most varieties of tomato, several varieties of turnip, etc.

"Beans are less than one-third of an average crop. Sweet corn is a very light crop indeed, and nearly all sorts, it would seem, will be very high. Cucumber seed is an entire failure; less than five per cent of a crop the country over. Cucumber seed that we were selling in June, July and August at from 25 cents to 40 cents per pound is now selling readily at from \$1.75 to \$2.50 per pound; in other words, it is not a question of price, but of the seed at almost any price.

"The same condition is, to an extent, true of muskmelon, also of some varieties of watermelon. While the crop of onion seed is fair, yet we are anticipating a scarcity of Large Red Wethersfield, and

firm prices on most other sorts. Onion sets are a very good crop, but they are not keeping well. All peas, as above stated, are scarce, but such varieties as American Wonder, Little Gem and Nott's Excelsior, are entirely out of the market,

White Egg turnip, garden varieties, will be held at firm prices.

"There is also a very great shortage on early varieties of field corn, particularly of seed grown in Minnesota and North Dakota, and of varieties which are adapted to those states. Our acreage of these varieties was very much larger than ever before. Our crop was good, but much of it, owing to the very cold and backward season, was damaged by frosts, and the unfavorable drying weather since cutting."

Leonard Wins Insurance Case.

The Supreme Court of the United States yesterday finally disposed of the Leonard Seed Company cases, growing out of the explosion in the seed warehouse in West Lake street in 1899, by denying the writ of certiorari asked by Orient and Phoenix.

There was insurance on the mill to the amount of \$76,500. The companies denied liability on the ground that a part of the building fell before the fire broke out, thereby voiding the policies.

For the assured H. W. Magee and Myron H. Beach contended that the fire was the result of an explosion, and that the insurance companies were liable under the clause providing that they shall not be liable for loss by an explosion unless fire ensues, and then for loss or damage by fire only.

After a time \$50,000 of the insurance was compromised at 65 per cent but six companies fought the cases. They won two victories in the United States Circuit Court, but these were reversed by the United States Circuit Court of Appeals. On retrial the juries found against the insurance companies, the Court of Appeals sustaining the verdict, and now the highest court declines to interfere.—Chicago Tribune, November 18, 1902.

THE LATE LOUIS VALERE LEFEBVRE. (See page 621)

and practically unobtainable at any price.

"All varieties of squash, both summer and winter, were nearly a total failure, with scarcely an exception. Purple Top Strap Leaf, White Top Strap Leaf and

THE NURSERY TRADE.

AM. ASSOCIATION OF NURSEYRIMEN.

CHAS. A. IJGENFRITZ, Pres.; D. S. LAKE, Vice-Pres.; GEORGE C. SEAGER, Rochester, N. Y., Sec'y. Twenty-eighth annual convention, Detroit, Mich., June, 1903.

C. W. STUART & COMPANY, Newark, N. Y., have moved their offices to the business block recently purchased at Rochester.

GEORGE HUSSMAN, one of the best known pomologists on the Pacific Coast, died at Napa, Cal., recently, aged 75 years.

THE Jewell Nursery Company, Lake City, Minn., has put in a complete printing plant capable of turning out all their work.

J. O. SHARE has established a small nursery at Albert Lea, Minn. The first season's business encourages him to branch out.

THE Council Bluffs Nursery Company, of Council Bluffs, Ia., has been served with notice of action for alleged breach of contract by parties near Waterloo.

Detroit.

CLUB HOLDS A LIVELY SESSION.—LADIES PRESENT.—VISITORS TO CHICAGO SHOW RECOUNT EXPERIENCES.—RETAILERS GIVE EXHIBITIONS.—TRADE SATISFACTORY.—VARIOUS NOTES.

The club meeting Wednesday evening was full of interest and amusement. A big attendance, which included many of the members' wives and lady friends, enjoyed a musical programme provided by the recently appointed entertainment committee. Hugo Schroeter read a paper on his experience in eastern establishments last spring, which was well received. Geo. A. Rackham and Frank Beard gave interesting reports of the Chicago flower show and the large greenhouse establishments of that city and Joliet, which they visited. L. Bomb, who was one of the Detroit visitors there, also gave a report of the trip, which was full of humorous anecdotes. The evening's programme was concluded by an imitation of the Chicago club choir at a banquet as it impressed some of the younger visitors. Professor Taft, of Lansing, addressed the club at the meeting of October 15 on San Jose scale and also gave an interesting review of the State Agricultural College work, with which he is connected.

John Breitmeyer's Sons made their annual fall exhibition of chrysanthemums and orchids at their Miami avenue store four days of last week. A distinguishing feature of the exhibit was an orchid tree of large dimensions. B. Schroeter also made an attractive exhibit of the same flowers, his display of orchids being unique and extensive. J. F. Sullivan, having completed extensive alterations in his store, including a conservatory in the rear, celebrated the event last week with a flower show, including a special display of roses. The weather prevailing was fine, the event well advertised and was visited by over 9,000 persons.

A satisfactory condition of trade prevails, although some apprehension of an over-supply of chrysanthemums was felt just previous to the fall exhibitions of the three local retailers above named, who used several thousand of them. The present warm weather is responsible for a big supply of carnations, but a scarcity is looked for in Thanksgiving week. The crop of roses of the local growers is also

off and they, too, will be scarce, while the crop of chrysanthemums will be well used up. Violets are getting better and more plentiful and meet with good demand.

A party of Detroit florists, with their lady friends, attended a banquet and entertainment at Arbeiter Hall, Wyandotte, on the evening of November 6, given by J. E. Smith, of that place. A most enjoyable evening was spent there.

J. K. Stock is again slowly regaining his health after a long siege of typhoid fever.

Visitor: Geo. A. Heint, Toledo.

J. F. S.

Toronto.

TRADE GOOD.—PASSING OF THE CHRYSANTHEMUM MAKES CALL FOR OTHER STOCK.—NEW MARKET OPENS AUSPICIOUSLY.—VARIOUS LOCAL NOTES.

The chrysanthemum crop is on the wane, most of the better grades having been cut out. White sorts are scarce. Many social functions have called for decorations of merit and large quantities of stock have been used up in this manner. With the passing of the chrysanthemums an extra demand for roses is very noticeable and the supply has shortened considerably. Of Meteor and Liberty the shortage is decided. Some very good Sunrise are the latest addition to the stock. Carnations are both plentiful and good and fill in when roses are scarce. Violets are elegant for this season, plentiful and in good demand. Lily of the valley has been scarce all season. Paper Whites and Romans have appeared on the market. There is a decided shortage of adiantum and asparagus.

The official opening of our new market took place last Saturday and florists have a section to themselves. It is steam heated and well ventilated, a decided improvement over their old stands, where they had the disadvantage of being outside, exposed to every kind of weather. Quite a showing was made at the opening, with a very heavy sale for cut flowers. Several had to re-stock and by evening all were sold out. Among those having stands are Frank Duffort, Manton Bros., E. Hoskins, H. Waters, Harry Endean, R. T. Dean and O. Grainger.

Stock for Christmas seems well advanced. Gloire de Lorraine begonias are even now in full flower and poinsettias well along. Azaleas are well set with buds and Harrisii very forward, with the disease scarcely noticeable.

H. Waters has been bringing in some very fine Princess of Wales violets. This crop has been a failure with him for the past few years.

Arthur Frost is cutting some grand smilax, strings from twelve to fifteen feet long.

C. E. Follet, of Kingston, has assigned. H. G. D.

MONMOUTH, ILL.—Thos. Hewitt gave his sixth annual chrysanthemum show November 4-8 and then, with Miss Hewitt, went to Chicago to see the big exhibition there.

WICHITA, KAN.—F. Kuechenmeister has had such good success this year that after viewing his stock the *Eagle* proudly declares that "the finest chrysanthemums that grow in the world are grown in Wichita."

Almost half a century of fair dealing has given our products that prominence which merit deserves. We still offer everything of the best for

OUR PASTIMES.

Announcements of coming contests or other events of interest to our bowling, shooting and sporting readers are solicited and will be given place in this column.

Address all correspondence for this department to Wm. J. Stewart, 79 Milk St., Boston, Mass.; Robt. Kift, 1725 Chestnut St., Philadelphia, Pa.; or to the American Florist Co., 324 Dearborn St., Chicago, Ill.

At New York.

The meeting of the bowlers on the alleys last Monday night gave evidence of an awakening of interest which it is hoped will now continue uninterruptedly through the season. The scores are appended:

Player	1st	2d	3d	4th
Lang	175	159	179	156
Siebrecht	136	143	146	163
Young	139	158	141	101

Shaw	116	138	156	126
Mansfield	144	140	144	150

The Lakeview Trophy.

The accompanying illustration is from a photograph of the sterling silver cup which A. N. Broadhead presented to the Lakeview Rose Gardens Bowling Club. The rose growers and the carnation men organized rival teams last winter and after a sharp contest the rose growers carried off the trophy. Preliminary practice is now being indulged in and it is expected that a tournament for the possession of the cup will be begun on the club's own alleys about January 1, three teams competing.

At Chicago.

The McKellar & Winterson team is beginning to feel itself invincible in the Florists' league. They defeated Vaughan's Seed Store three straight November 18, when the Wholesalers lost two games out of three to the Retailers. E. F. Winterson made 224. Following is the score:

WHEELING, W. VA.—John Burke is getting his stock of house plants into shape for a good season's business.

Minneapolis.

CUTS REDUCED BY DARK WEATHER.—PROSPECT OF LIGHT SUPPLIES FOR THANKSGIVING.—PERSONAL AND TRADE NOTES.

Weather conditions have been very poor for the production of cut flowers,

TROPHY OF LAKEVIEW BOWLERS.

the last two weeks being dark and cold. The result is another shortage and the supply for Thanksgiving is likely to be limited. Carnations are plentiful enough to fill orders excepting red, which has

taken the place of white in scarcity. Tea roses are in light supply, with Beauties the same. Violets are of very choice quality but the demand is small and fancy stock can be had at 50 cents per hundred. The Minneapolis Floral Company, Donaldson & Company, E. Nagel & Company, A. Swanson and others have had a very busy week in decorations.

A train from Chicago on the St. Paul R. R., was wrecked at La Crosse one day this week and detained several consignments of cut flowers for eight hours, occasioning much inconvenience.

Frank Kindler, of St. Cloud, was in the city on a short visit this week.

White Carnations

WILL soon be in demand when 'mums are gone. MURPHY'S WHITE, the coming commercial Carnation, is standing the test on long shipments to Chicago, Buffalo, Pittsburg and St. Louis. It is a bloomer or we could not keep up the supply we have since August 15th to date, and still plenty of buds in sight for the Holidays. You will not make a mistake in stocking up on this variety.

ROOTED CUTTINGS. \$6 per 100; \$50 per 1,000; \$45 per 1,000 in 5,000 lots and \$40 per 1,000 in 10,000 lots.

COOL WEATHER IMPROVES MARKET CONDITIONS.—CARNATIONS NOW THE PRINCIPAL GLUT.—CHANGES IN BUSINESS.—NOTES.

The weather has turned cooler and business has picked up accordingly. It looks as though the glut of flowers is coming to an end and prices are a little steadier than last week. Chrysanthemums are still arriving in quantity and meet with fair sale. Roses have gone up a notch, with just about enough for the orders except Beauties, which are scarce. Lily of the valley has been in good demand and violets also. Romans and Paper Whites are not selling very well. There is enough smilax and adiantum for all orders. Carnations are plentiful and only the best ones sell.

Frank W. Ball has purchased the store of Chas. Jones, at 136 E. Fourth street. Albert Sunderbruch will succeed him as manager of the Cincinnati Cut Flower Company and will conduct the same as a strictly wholesale cut flower commission house, with florists' supplies. He will be assisted by Alex. Osendorp and W. A. Mann.

At a meeting of the schedule committee last Saturday it was decided not to have any show in December or January, but to give a big show of roses and carnations in February.

Julius Baer had the Ernst-Kilgour wedding the past week, which used up about 1,000 yellow chrysanthemums. D.

Columbus, O.

A VARIETY OF TRADE JOTTINGS OF LOCAL INTEREST.—SEASON A PROSPEROUS ONE.

Gus. Drobish, who is one of the best posted men in the state on herbaceous plants, is replenishing his old collection, which has been greatly reduced by heavy demand, with a large importation.

Underwood Brothers are building a new house which, when completed, will be the largest single house in the city.

There was an unusually heavy demand for Dutch bulbs this fall, in a retail way, mostly to be used for bedding.

The first fakir has made his appearance on our busy streets and claims to be doing a large business.

We are now having some heavy fall rains and outside work has stopped for the present. CARL.

TRADE ON THE INCREASE.—NOTES OF STOCK CONDITIONS.—THE STREET SALESMEN.—FIRE DAMAGE.—CLUB MEETING.—VARIOUS ITEMS OF INTEREST.

Business continues to increase, with sufficient supply of stock, but without surplus. Chrysanthemums are thinning out and may be gone entirely before Thanksgiving day. Harrisii lilies are scarce. Roses are satisfactory in every way. Violets have taken a sudden spurt upward and are greatly improved. Gardenias are fine, orchids a little scarce. Carnations are elegant. Paper White narcissi and Roman hyacinths are good.

A new crop of curbstone florists has loomed up within the last few weeks. They are not generally considered a menace except in one case, where a stand is operated about thirty feet from a leading retail store. There are not more than a dozen of these fakirs in Pittsburg, but it is claimed that they have a buyer in Chicago who consigns his shipment to a distributor here.

The damage caused by fire to the plant of Sidney Gibbs has been estimated at \$5,000. He carried no insurance. Two recently completed houses were entirely destroyed and twenty feet of the ends of five houses. Residence and work rooms also went. He will rebuild at once.

There was a large attendance at the club meeting November 12 and a discussion of chrysanthemums. Exhibits came from Smith & Son, Adrian, Mich.; J. N. May, Summit, N. J.; R. Vincent, Jr., & Son, White Marsh, Md.; F. Burki, Bellevue; Blind Bros., West View, Pa.

Mrs. E. A. Williams effected a notable achievement in her decorations of the Duquesne Gardens, on the occasion of the fiftieth anniversary of the Masons.

Charles Crall, of Washington, Pa., visited the show at Chicago. He states the carnation exhibit, particularly, surpassed anything he had ever seen.

Mr. McClelland, of Castle Shammon, who grew so many fine gladioli last year, has ordered 10,000 bulbs of the standard varieties.

J. B. Murdoch, who visited the show at Philadelphia, was delighted, especially with the chrysanthemum exhibition.

Miss Cecelia Diamond has opened a store at South Fork, Pa. E. L. M.

COLORADO SPRINGS, COLO.—Wm. Clark never had a better showing of chrysanthemums than this year and he had a big attendance when he announced a public exhibition November 8-10. His carnations are also in good shape and other stock doing well.

Chrysanthemums

Large Strong Stock Plants From Bench.

Adrian, 35c each; \$3.00 per dozen. C. Holst, Honesty, Prosperity, Providence, 25c each; \$2.00 per 100. T. SOCIAL AFFAIRS KEEP FLORISTS BUSY.—STOCK WELL CLEANED UP.—CHANGES IN BUSINESS.—EIGHT RETAIL STORES ON ONE STREET.

Coming out receptions, balls, teas and the various functions at which society disports itself have kept us busy and have kept the supply of flowers down to a good working basis. Chrysanthemums are still plentiful and seem to have kept their place in favor. Eaton, Chadwick, Appleton, Maud Dean and Rieman are the best of the varieties now coming in. Roses are good and the supply is about equal to the demand. Much the same may be said of carnations. Violets are also plentiful, both single and double, and are selling well. Harrisii from cold storage are now blooming profusely and holding their own against the chrysanthemums.

This week has seen quite a change in the flower shops. Sargent has gone out of business and has sold his fixtures to C. D. Thayer, who has opened a store at 368 Main street in charge of Mr. Sargent. Fisher has opened a small branch store at 219 Main street, making a total of eight florists on the street.

Lange has a house of bouvardia just coming in and is cutting some fine mignonette. A. H. L.

MANCHESTER, MASS.—The North Shore Horticultural Society held its annual chrysanthemum show on Tuesday, November 11, at Lee's Hall. The show was excellent and the attendance large.

ST. PAUL, MINN.—Mr. and Mrs. A. H. Bunde, A. S. Swanson and Frank Gustafson were visitors at Chicago last week. They report a grand show and a good time. Geo. F. Struck, representing Lager & Hurrell, was a recent caller, having come up from Chicago to see his old tutor Mr. Whatton, now with Dr. R. Schiffmann, the local orchidist.

Aster Seed

We offer Seed from selected flowers of the following varieties of our own growing:

Vick's Branching

- Vick's Daybreak

HOLLY and ..GREEN

VAUGHAN'S XXX HOLLY.

We maintain the highest grade Holly Branches in the market. Every case personally inspected by our own representatives; men who gather and pack our Holly are well experienced. While other shippers sometimes handle as choice Holly as Vaughan's XXX Brand, yet ours has averaged **THE BEST** one year with another. Our price is about the same, while our values are more than **DOUBLE**. Per Case, \$5.00. For larger lots write. Burlap lined, for Pacific Coast shipments, 50 cents extra.

VAUGHAN'S BOUQUET GREEN AND WREATHING.

We are pioneer headquarters on this stock, controlling same from reliable first hands of long experience. We can save you money. Our stock this season, while in moderate supply only, is from best sources, largely Indian picked and all late picked, avoiding the warm drying weather in October. Write for prices when you are ready to buy. **PER 100 POUND CRATE, \$4.50 TO \$5.50.**

Wreathing.

Beginning about December 1, we carry two grades regularly in stock in large lots, and will make closest prices in 20 yard coils. **Per 100 yds., \$3.00 to \$5.00.**

Vaughan's Seed Store, NEW YORK. CHICAGO.

Albany, N. Y.

SOCIAL ACTIVITIES SERVE TO SUPPLEMENT GOOD TRANSIENT TRADE.—NUMEROUS LARGE DECORATIONS REQUIRED.—NOTES OF THE WORK.

The trade reports that business is steadily improving and the outlook for the winter most promising. Whittle Brothers early this week had two notable contracts for dinner decorations. Both were held in the Hotel Ten Eyck, the first on Sunday afternoon, November 16, when Bishop Burke, of the diocese of Albany, entertained Archbishop Farley, of New York, and about 260 priests. The tables, twelve in number, were decorated with smilax, maidenhair fern and Lincoln and Red Warrior chrysanthemums. The same firm on the following Monday evening had the decorations for the dinner given by the Delta Phi fraternity in honor of its seventy-fifth anniversary. Yellow and white chrysanthemums, Boston ferns and smilax comprised the decorations.

H. G. Eyres on Wednesday, November 12, had a large wedding decoration in St. John's church, Troy, the occasion being the wedding of Prof. Palmer C. Ricketts, director of the Rensselaer Polytechnic Institute, and Miss U. J. Renshaw, of Baltimore. Southern smilax, kentias and arecas were used at the church, while at the home of the bride's brother, where a reception was held after the ceremony, southern smilax was used to drape the doors and Black Hawk and Vivand-Morel chrysanthemums were used for room decorations. Eyres also had the decorations for the farewell dinner given by Prof. Ricketts at the Troy Club on Monday evening, November 10. American Beauty roses were used extensively.

W. C. King & Company had two decorations on Thursday of this week, one for a debutante on Madison avenue and the other in honor of the opening of a new club house in Pine Hills. Southern smilax, ferns, fine kentias and latanias, and La France roses were used in both instances. R. D.

Springfield.

TRADE GOOD AND STOCK IN FAIR SUPPLY.—
VIOLETS SUFFER FROM DISEASE.—
PERSONAL AND TRADE NOTES.

Business, like the weather, has been good the past two weeks, there being quite a call for funeral work in and out of the city, which has kept stock well cleaned up. Roses, carnations, chrysanthemums and valley are plentiful, but good double violets are scarce owing to the disease which is causing lots of trouble to the New Haven growers, from whom this city gets most of its supply. Home grown stock of chrysanthemums is about used up and store men are looking to other sources.

Springfield is to have some city greenhouses, for which the contract was given to one of our leading builders some months ago.

Outdoor planting of tulips is about finished and, judging from reports, is on the increase.

G. Whitehead, of Greens Farm, Conn., made us a short visit and reports business good. A. B.

Louisville, Ky.

Jacob Schulz has been visiting in Chicago and was much impressed by the wonderful strides made by the growers there.

Mr. Hitz, of Madison, Ind., and H. G. Walker, of Louisville, were the judges at a chrysanthemum show at Ghent, Ky. The chrysanthemums were all grown by lady amateurs and some fine flowers were shown, especially the ones grown to single stem. H. G. W.

CANTON CHINA PLANT-POT.

Canton China Hall-Seat or Plant Pot Stand.

PLANT POTS —AND— PEDESTALS.

We invite the attention of intending buyers, or those interested in seeing the newest productions of the potter's art, to our importations of English, French, German, Japanese and Chinese **Plant Pots** or **Jardinieres**, selected by our buyers at the places of production in the present season.

They include all sizes and shapes up to the large and very large, from the lowest price up to \$150 each.

Our stock of China and Glass occupies seven floors and more than 10,000 bins.

NOTICE.

THE MODEL PLANT STAKE COMPANY, formerly of Brooklyn, N. Y., has removed to 208 Jersey St., Harrison, New Jersey, and is now The Parker-Bruen Mfg. Co.

The Model Extension Carnation Support.

Flushing, Long Island, Dec. 11th, 1901.
MR. THERON N. PARKER, Brooklyn, N. Y.

Dear Sir—I have used your Wire Carnation Support the last two years, in all about 12,000. They fill the bill in every particular. Nothing could be more satisfactory and would give me a great deal of pleasure if I can bespeak a good word for you to the trade and you are at liberty to refer to me at any time.

Very truly,
A. L. THORNE,
La Fayette, Ind.,
July 8th, 1902.
MR. THERON N. PARKER, Harrison, N. J.

Dear Sir:—After using your Model Carnation Support in two of our houses the past winter, we have come to the conclusion that it is perfectly adapted to supporting carnations, and shall use them on all our plants the coming season. We were much pleased with the simplicity, strength and neat appearance of the support.

Yours truly,
F. DORNER & SONS Co.

Denver.

CHRYSANTHEMUM CUT HEAVY BUT PRICES ARE GOOD.—STORE HAS FLOWER SHOW.—VALENTINE STILL VERY ILL.

The chrysanthemum show given by the Daniels & Fisher Company at their big department store was on a large scale and the center aisle of the store was used, arches and pyramids forming the principal decorations, while placed along the sides of the aisle were large vases of chrysanthemums. The show was well patronized.

Chrysanthemums are to be seen everywhere and form most of the window decorations. They are going only fairly well and the growers who are holding their own with them now and will have a late cut feel lucky. Notwithstanding the big cut that is in now and has been for the past two weeks, good prices have been realized.

J. A. Valentine is still very sick. An operation was performed November 6, and since that he has been very weak, but has gained sufficiently to cause encouragement. B.

EAST ST. LOUIS, ILL.—Aug. Mirring has been giving a chrysanthemum show with 102 varieties on display.

SPRINGFIELD, Mo.—The forty-fifth annual meeting of the Missouri State Horticultural Society will be held here December 2-4.

BAY SHORE, N. Y.—The first annual exhibition of the Suffolk County Horticultural Association held at the Casino here on November 6 was a gratifying success in the number and quality of the exhibits.

FOR SOMETHING NEW AND NICE

"Cluster of Roses Stationery"

for Florists, is the latest. Both plain and in colors. Samples free by **DAN'L B. LONG, Publisher, BUFFALO, N. Y.** Please mention the American Florist when writing.

Bargains FOR Florists.

We are headquarters for a general assortment of the necessary material and supplies that you are looking for. If you are about to improve or construct, consult us.

In connection with the dismantling of the Pan-American Exposition, we have for sale:

20,000,000 FEET of fine seasoned lumber, practically new, consisting of all sizes of joists, timbers, dressed and matched boards and flooring; also sash and doors.
50,000 FEET of roofing glass.

PIPE.

We are headquarters for pipe. We offer you: **100,000 FEET** of 2 to 4-inch wrought iron, lap welded casing. We can furnish this material in three ways: Either with sleeve or jacket couplings, screwed ends and threaded couplings or with expanded cast iron flanges with bolts and nuts.

1,000,000 FEET of standard black wrought iron pipe, size ¾ to 12-inch. It is second-hand but has new threads and couplings and is in first-class condition.

1,000 TONS of galvanized wire 9, 10, 11, 12, 13, 14 and 15 guage.

50,000 FEET of 2, 3 and 4-inch cast-iron soil pipe and fittings.

100,000 FEET of garden hose, ¾ and 1-in. **75,000 FEET** of cotton rubber-lined fire-hose, (rubber-lined in and outside), ranging in sizes 1 to 2½-inch.

VALVES and fittings of every kind.

BOX COILS for heating purposes.

RADIATORS, new and second-hand.

We also offer the following bargains in

Heating Boilers

50 CAST-IRON sectional heaters, capacity from 450 to 5,000 feet.

1 NO. 2 Standard Kroeschell hot water heating boiler.

FOUR 36x10 Horizontal Tubular.

FOUR 36x12 Horizontal Tubular.

FIVE 42x10 Horizontal Tubular.

FIVE 42x12 Horizontal Tubular.

SIX 48x14 Horizontal Tubular.

TWO 54x16 Horizontal Tubular.

FOUR 60x16 Horizontal Tubular complete with all fittings.

PUMPS of all Descriptions.

A carload of shovels and spades that we are selling at \$5.00 per dozen.

We carry a complete stock of hardware and farm implements, besides plumbing material of every kind.

Write for Catalogue No. 47.

Notes and Comments.

E. G. Asmus came over to Philadelphia in time for the regular business to open in the Wholesale Flower Market last Saturday morning, and he expressed great surprise that the cut flower commission merchants were barred out. He believes that in order for the market to be the success it deserves to be, this barrier against them will have to be removed. In his opinion the fewer restrictions against the men handling flowers coming into Philadelphia the better. Keeping the commission men out of the market does not keep the flowers they handle out of competition with the grower who handles his own product, and the more the business of selling flowers at wholesale is centralized the better for all concerned. Quite a number of the growers are of the same opinion.

Mr. Asmus says that he had to pay \$4,000 for 250 tons of anthracite coal recently, which is \$16 per ton. He tried to put up the price of lily of the valley to \$4 per hundred to help pay for the additional cost of coal, but it was no go; after a week of futile effort he had to come down to the price valley was sold at by parties who had 2,000 tons of bituminous coal on hand when the coal strike started.

For many days recently Mr. Asmus cut roses to the value of \$225 daily from the new 55x400 rose house built by Hitchings & Company last summer, which is located at Closter, N. J., and is operated by his second son, Edward. Of course Mr. Asmus will not know until the first of July, 1903, what has been his gross cut and net profits during the season, but \$225 per day for several days in the fall months is a very good showing and must be quite gratifying to the persons interested.

Many times has it been asked by those who do not give much thought to such matters, "Why cannot we have a national chrysanthemum society in America with as many members on the roll as they have in the National Chrysanthemum Society of England?"

In an effort to explain, let us consider for a moment that in America there are not the numbers who make up the leisure class here as there are in Great Britain, and as William Scott said in Madison Square Garden a week or two ago: "Every person, no matter what the walk in life, lawyer, doctor, parson, weaver or farm laborer, all can talk intelligently about gardening, and cannot only talk

intelligently about gardening but can work effectively at gardening." A flower show is an annual affair in many of the country villages in the British Isles, and keen is the rivalry among the residents there in the various classes to be competed for. And then there are different "classes" to subscribe and subscribe to in the National Chrysanthemum Society of England. He who feels like paying into the "guinea class" does so, and all for the benefit of horticulture, and also for the benefit of horticulture he who feels he cannot afford to pay a guinea, pays half a crown cheerfully, and then again there is a column for donations—some subscribers more than double their membership fee by a donation.

This is a commercial age and Americans have a decidedly commercial tendency, which is all right, and it comes natural to try to receive as much as possible for as little as possible, and that is one reason why the membership list of our own Chrysanthemum Society of America is not numerically larger than it is. I believe now that annual meetings are assured for the future during the chrysanthemum, and consequently the correct, season, the number of members cannot help but increase. Note the number who paid at the recent meeting held in Chicago, over \$50! (It goes to show that almost anybody when on an outing trip will "chip in" a dollar, no matter what the cause, when personally appealed to, who would with indifference "turn down" a membership due-bill when sent by mail.) Many who have paid with such alacrity at Chicago have been members before, but for divers reasons had not kept up their affiliations.

I know there is a difference of opinion upon the point now about to be set forth, and that is respecting the publication of papers read at conventions or meetings of national and other organizations. What is read at such meetings may always be depended upon as timely, consequently valuable matter, and the promoters of the horticultural press can hardly be blamed for using every endeavor to secure same to adorn their inviting pages, but it certainly has a tendency to reduce the membership list when those who do not contribute to the maintenance of the organization are on an equal footing with those who do.

My own private opinion publicly expressed is that papers read before trade or any other organizations are the sole property of that organization before which they are read, and no press publication, whether horticultural, ethical or

otherwise, has any moral or other right to make a demand upon the writer of a paper for a copy of same prior to its being read before the body which was responsible for the desired paper having been written. The better way, according to the opinion of the undersigned, would be for the editor to review the papers read, drawing attention to the strong and best points in each one, frankly criticizing same and in his own way creating within his readers a desire to read the whole paper, and all the papers read, and in that way possibly increasing the membership list instead of as is now the practice of making common property of a society's only asset, thus having a decided tendency to decrease its number of members instead of increasing same.

E. L.

CARNATIONS.

SPOT ON CARNATIONS.

ED. AM. FLORIST:—I have a house of carnations benched the middle of September, apparently healthy. Now about one-third of them are covered with a dried spot with a dark ring at the outer edge and the young buds are drying up. It is rapidly spreading. What is the nature of the trouble and the remedy?

M. J. M.

The carnations have the spot. There is no real remedy. Spraying with copper solution early in the day so that the plants are dry before night, and giving them abundant ventilation and some heat at night and on all dark days, keeping the foliage as dry as possible, will eventually rid the plants of the trouble. They are likely to outgrow it when the regular winter culture begins, with plenty of firing and the addition of a dry atmosphere.

A. M. HERR.

NOTES ON VARIETIES.

It has always been a question with me whether it is profitable to grow a carnation that will not show a fairly good crop of salable flowers sixty days after it is housed. There are growers who bring their carnation plants into the houses from the field with well developed buds, but the following observations are taken

from plants that had all of the buds taken off them when brought in from the field. In addition to this, owing to some extensive additions and changes to the place, they were not planted until the last week of August and, in fact, most of them not until the middle of September. This, coupled with the fact that because of scarcity of coal they had heat but three nights from the time they were planted up to the time of writing, has cut the length of the stems at least three inches.

The beginning of November is a good time to make the first practical notes as to the value of the different varieties, as they should then have nearly their normal size and stem and it is well to know just how they stand in point of productiveness at this time.

Crocker on my place takes the lead in pink. Properly grown, its color is not excelled by any other carnation and in size and length and strength of stem it is the equal of any. It is not so productive as some others but as it brings almost twice as much as any other carnation on the market, a few undisseminated varieties excepted, I expect to have as much from my 10,000 plants of this as from any other 15,000 plants on the place. Last season a writer on carnations intimated that those growers who were praising Crocker had cuttings to sell, but this is a very narrow view to take and not a just one to the few who are fortunate enough to have success with this variety. It has been such a universal failure that I could not recommend anyone to grow it, yet I find it ahead of all others.

Cressbrook is making a tremendous crop of flowers, but only a few commercial stems up to date. The color is good, the size also, and with earlier planting and knowledge of its habits obtained this season it will no doubt make a profitable and standard sort. It has an iron-clad calyx and this may be an item, as we will have to save coal wherever possible; it can be done without nearly the loss some growers imagine.

Mrs. E. A. Nelson, a variety that gave the poorest promise of anything I ever bought, has turned out wonderfully fine

plants, showing that it has unusual vitality. It is not producing heavily at this time but is gaining in quantity and looks as if it will give a steady crop for the season. The flower is large and of good color and has not bursted a calyx up to date. It needs considerable room and produces a great many side buds, which need to be taken off at least once a week.

Dorothy was last season rated at this time as a second-class carnation but later it showed its good points and I planted it extensively. It is very much better than a year ago, is always full of buds and flowers and the size is up to the average, the stem good if grown a bit cool and the calyx non-bursting. It seems to do best in a temperature of 45° at night and with pretty liberal feeding.

Enquirer is producing some large flowers on short stems and I do not believe we have had half a dozen with bursted calyxes. It makes a fine growth, needs room and, if it keeps up to its present standard, will certainly be a good one to grow for size.

Morning Glory is a trifle short in the stem but is wonderfully productive. Its chief weakness is that it is rather single and many of the flowers have both stamens and pistil well developed. On this account, if it is allowed to fully mature on the plant, many of the flowers will go to sleep shortly after being cut. Cut a little close, they will keep with the average carnation. Mrs. Higinbotham is better in respect to everything but productiveness and on this is up to most other sorts.

Estelle lacks stem at this time but promises to produce a fair length soon. It probably should be planted extra early. The color is ideal and the flower itself fairly good. Apollo has the stem of Crane or better and the color of Estelle. It is now rather small but no doubt will improve later. It has produced a good crop of flowers and promises to keep up this record for the balance of the season.

Golden Beauty is as nearly right in its color as it seems possible to get, since the days of Buttercup. In color it is very much like that variety but it seems to be a steadier bloomer and a general improvement over that good old sort. Grown below 50° at night its will burst its calyx.

Roosevelt blooms early, late and all the time. It is a fine flower with a fine calyx on a fine stem. Its greatest fault is that it has considerable rust, but this has never had any effect on the quality or number of flowers cut. The fact that this variety produces such magnificent flowers in spite of its being full of rust has done much to show growers that a little rust on a variety that has merit is no reason why they should not grow it.

Prosperity is very much the same as last season, a fairly good crop of magnificent flowers but not much promise of anything afterward until late in the season. Gaiety is full of buds and flowers and, while perhaps not so handsome as Mrs. Bradt, in every other way it will supersede that much lauded variety. It is early in coming into bloom and promises to be very prolific. The flower is not so large as Bradt but it has an excellent stem.

Queen Louise stands at the head of my list of whites on account of the great quantity of flowers produced from early until late in the season. It is not a high grade carnation but fairly good in quality, with a good stem. Even with the adverse conditions under which my stock

has been grown this fall, the bursted calyxes have not been much over five per cent.

Alba looks as if it might be a very good one, but my cuttings arrived too late to make good plants. Gov. Wolcott is a grand flower judged from every point of view. Her Majesty is another high grade white, with an occasional streak of light pink through a petal or two. This comprises the list that I am growing this season. ALBERT M. HERR.

ROSES.

SEASONABLE NOTES.

We are now entering a season of activity for all rose growers and all who have their stock in a healthy and well advanced condition have much in their favor. Up to this time the market has not been very good for roses but we may expect an improvement at any time, now that the chrysanthemum season is drawing to a close.

With the weather which we have had lately we should have succeeded in procuring a hard growth, as a liberal amount of ventilation has been possible. Of course we must expect cold weather at any time now, and we should act

accordingly. Ventilate as freely as possible, avoiding all draughts. It is a good plan to allow the ventilators to remain open a few inches in the afternoon as long as possible, even if the fires have to be started a little earlier.

As the days continue to grow shorter more care is necessary to grow good stock. The grower should watch the weather indications and avoid allowing the foliage to be wet on a cloudy day. Syringing should only be done on very bright days.

The soil must be tested thoroughly and often, so that it will not become too wet at the root, or, on the other hand, dry at the root with the upper layer moist. This condition is often brought about by careless syringing. One can hardly be too careful in testing the soil, as the extra trouble necessary to do this properly is well paid for by the results obtained.

We are at this time nearing a young crop which will bring good returns for Christmas if properly handled. The plants have exhausted what nourishment there was in the soil and in all probability will need a light feeding regularly, say manure water once a week.

Do not allow the greenfly to get ahead

of you, as after they appear it is often necessary to adopt measures which will cause deformed flowers, or blooms of poor color. It is well to keep a light coat of sulphur on one pipe in each house to keep down mildew.

Go through the houses occasionally and cut out the blind wood. This is often found in quantity on the old stock and especially is it true where you are growing Golden Gate or Ivory. By trimming out this brush new breaks are induced which will give flowers if you have cut back to a good healthy eye.

R. I.

Some New Chrysanthemums.

Three of Nathan Smith & Son's 1903 set of novelties are illustrated herewith. The light yellow named F. J. Taggart is undoubtedly the most striking of the set. It is of the Bochmer type and won the special prize of \$150 offered at Kansas City for a unique flower. It was also given a gold medal there. The flowers are as large as eight inches in diameter and fully double. Sepia is the result of a cross of Mrs. T. L. Park and Nagoya. It is bright yellow, incurved, very similar in style to the Mrs. Park but an improvement on it, being double under all conditions. Globosa Alba is a very compact, closely incurved Japanese variety, globular and, as the name indicates, pure white.

The Annual Shaw Banquet.

The thirteenth annual Shaw banquet given to the market gardeners, florists and nurserymen of St. Louis and vicinity was held at the Mercantile Club on November 19, and proved a marked success although Dr. Wm. Trelease, the director of Shaw's Garden, was at the time out of the city. H. C. Irish assumed his place at the speakers' table. Dr. Green, one of the trustees of the garden, served as toastmaster. His first toast was to the fruit that caused the downfall of Adam and Eve and he called on Charles H. Williamson, of Quincy, Ill., vice-president of the Mississippi Valley Apple Growers' Association to respond, who said the American apple is invading the markets of the world. Arthur T. Erwin, of Iowa, a graduate, was called on to respond to the toast to the Missouri Botanical Garden. Albert Blair answered for the commercial grower of apples.

Dr. Herman von Schrenck, of Washington University, spoke of his experiences as a pathologist and J. W. Dunford, Jr., responded to the toast to the florists. C. L. Watrous, president of the American Pomological Society, answered for that body with a very fine speech and Dr. H. Bean, chief of the forestry department of the World's Fair, and F. W. Taylor, chief of the horticultural and agricultural departments, were called on for short addresses. The last speaker was Judson Squirrel.

R. J. M.

HOUSTON, TEX.—S. J. Mitchell, of this city, was judge at the Marshall flower show, November 13-14, and reports it an excellent success.

NEW YORK.—Moore, Hentz & Nash received large consignments of Queen of Edgely roses this week and disposed of them easily at top prices.

PEKIN, ILL.—Geo. A. Kuhl made a fine display of Boston ferns at the Joliet flower show and was awarded first prize. His stock never looked better than this year.

VASE OF 100 BLOOMS, CHRYSANTHEMUM TIMOTHY EATON.

(Exhibited at Chicago by Mrs. E. T. Grave, Richmond, Ind.)

SEPIA.

F. J. TAGGART

GLOBOSA ALBA.

THREE OF THE 1903 SET OF CHRYSANTHEMUM NOVELTIES OF NATHAN SMITH & SON, ADRIAN, MICH.

A Missourian's Impressions of Chicago.

[Synopsis of a paper by A. Jablonsky, read before the St. Louis Florists' Club, November 21, 1902.]

My carnation flowers don't look half as big as they did before I left for Chicago and I am fussing about with the men for keeping the houses too hot or too wet, and I don't know what else, trying to apply some of the wisdom I acquired up there. Excuse me for starting at the tail end of the story, but the end is generally the most important part of everything and it is so important to me that I mention the extreme end of the trip first.

After breakfasting on our arrival at Chicago the party went to pay its respects to Vaughan, who sent us to Western Springs. There they have the most complete storage house and packing shed I ever saw, and among other of their numberless varieties of plants I noticed quite a batch of Gloire de Lorraine begonias and another batch of Adiantum Farleyense. These were magnificent. Mr. Wilson showed us all through the establishment.

Thence we went to Bassett & Washburn's, at Hinsdale, where we received an eye-opener in the shape of very fine carnations, Lawson, Bradt, Prosperity, Crane and Morning Glory and others. They made me right sick with envy. Why can't I do the same. Another thing quite new to all of us was their patent Jones underfeed stoker, which I believe a paying investment for a large place.

That evening we went to the show. The gentlemen from Chicago received us very cordially and bestowed all manner of kindnesses on us. They had a pretty nice hall for the show, only the space allotted for the carnation display was not large enough to show them to advantage. However, they managed to put the right ribbon on the deserving ones. The diversity of the exhibit was a pleasure, showing that other flowers and plants besides the chrysanthemum are appreciated and cultivated for much longer periods to get them perfect. There were fine Lorraine begonias and geraniums of all sizes, some standard plants about eight feet high in perfect condition and full of bloom. At the show the Chicago boys challenged us for a match at

bowling, and of course they beat us, for some of them could whirl the ball over their heads and roll it backward and get a strike. They are up-to-date with other things besides carnations up there.

The next day we went out to Peter Reinberg's, the largest, most complete and neatest establishment I ever saw. His carnations were good and the roses the finest any of us ever saw. Talk about glass, when we go out there it is nothing but glass. The vegetable and truck growers have more glass and better houses than we have. It would have been impossible for us to go through the Reinberg houses; there you just go through the middle aisle and look each way, that's all. Three hundred feet is about the average length of their houses, with no side ventilation, but with a ventilating sash on top about every five or six feet apart. Their houses are all sash-bar houses and very lightly constructed.

The most beautiful sight I ever saw was a range of, I believe, six houses at Peter Reinberg's of Sunrise roses. The most wonderful foliage, perfect in every detail, full of buds and some in flower. Mr. Reinberg invited us to lunch and proved himself a most entertaining host.

Next we went to Wieter Brothers', also an immense plant. The best part of the place is the new range covering three acres all planted in carnations. The only thing I did not like there was the overhead system of heating, the pipes obstructing the view and detracting from the appearance of the houses. Mr. Ammann and Mr. Steidle fell in with the foreman of this range and, by the way they stayed with him, I guess they were extracting some pretty valuable points on up-to-date methods of growing.

We visited M. Winandy before returning to the city to prepare for the banquet of the Chicago Florists' Club, to which we were all invited. This banquet, mixed with the wit and humor of those responding to the toasts, will be a lasting remembrance to me and an inducement to reciprocate if the occasion offers in the future.

Having been up till two o'clock we had to hurry next morning to get a train for Joliet, for any florist going to Chicago should not miss a stop at Joliet, to have

a look at the crack carnation establishments there. Those establishments are put up with great cost, the like of which is simply out of reach of the likes of me. Their stock as a whole was the finest I saw on the trip, including some of the new varieties.

Packing Cut Blooms.

BY E. E. PIESER, CHICAGO, ILL.

[Presented to the Chrysanthemum Society of America at the Chicago convention, November 12-13, 1902.]

Having for years taken special interest in the handling of cut flowers, from the receiving end to getting them to the trade in small towns and large cities in the best possible shape, causes one to try the many ways to pack the blooms. Now, we have found, except in very warm weather, ice is not wanted. We have also found that as near dry as you can get your stems before packing brings the stock through the best. We have also found that where one can get boxes long enough, packing the head of the flowers all one way with a light cleat about the center of the box, is an improvement. This we do not follow ourselves, as we have not the space to carry these large boxes and also in many cases the small buyer complains of the use of a large box, as he says express eats him up.

I would say that it is not so much the packing of flowers that the trade has to complain of, but it is more often the fault of the flowers. In chrysanthemums especially this is noticed, as the grower does not leave them on the plant long enough to have them well done, or "finished," as the term is often used, and flowers of this stage, no matter how carefully packed, would not carry ten miles. The same fault again applies when the grower goes the other way and lets them get over-ripe; the softness that shows in a chrysanthemum not yet done will spot and looks like an over-ripe apple packed in the middle of a barrel, when over-done, or left on the plant too long.

As near as I can learn from what I see in our place, as well as in others, just as soon as a grower hears that a certain thing is a bit scarce he goes home and at once starts to count how many pennies or dollars there are in sight, and goes at

the cutting regardless of their completeness. This is a great mistake, for a dozen first-class chrysanthemums will bring more than ten dozen poor ones. Another thing comes before we get to the packing. Eleven No. 1 chrysanthemums and one "ringer" does not make a dozen first quality flowers. The same applies to all flowers, roses, carnations, Beauties, valley, violets, etc.

If I raised flowers to be sold on a wholesale market, or if I were a buyer on a large scale, I would furnish my own boxes and never have a box over six to seven inches deep for roses, carnations and that class of flowers. For chrysanthemums I would advise a flat box, wide enough for four to six and long enough so that they could be packed flat, with an extra light white wax tissue between each row of blooms. Never pack chrysanthemums one on top of another.

I have mentioned above that I believe all flowers should be as near dry as possible before packing; this I am sure applies to every flower except the violet, and, while it is never followed, I believe that a damp tissue on the stems and each bunch with white wax would improve them on their journey. Above all things don't try and put all the violets you can possibly gather into one box, but stand them up and make rolls of nice clean paper between each row. A violet takes the odor of printers' ink, so I say "pass up" old newspapers for this one flower and give them enough space so as not to crush the end row either forward or back. In cold weather put heavy paper and plenty of old newspaper outside of the box to keep out frost.

Experience is the best teacher and a grower often wonders why his neighbor gets more for his flowers than he himself gets, even though they both sell through the same broker. It is simply one of two things. The one that gets the money is the man that never cuts a flower until it is just right, never tries to push through a few seconds with a lot of fine stock, and who is liberal in his judgment in regard to the requirements of the time of year, as to the proper boxes, paper,

Cattleya Bowringiana.

The subject of the illustration is from the collection of Dr. R. Schiffmann, St. Paul, Minn. The plant is in a 12-inch pan and has fifty bulbs with eight flowering growths bearing ninety-six flowers each measuring nearly four inches across. The petals are of a very rich magenta color. The four strongest growths measure two feet nine inches from the top of the pan to the top of the flowerspike, are a full inch in diameter and bore sixty flowers; the largest growth bore eighteen flowers. The plant was purchased some years ago from the late Erastus Corning, of Albany, N. Y., who bought the same of James Veitch, of London, in 1883, as the label shows. It is grown with a general collection of cattleyas and the treatment differs none from the ordinary course of cattleya growing, warm and moist all the year around, always avoiding too much water at the roots, especially if over potted. The potting material is peat and sphagnum. The plant is a complete mat of live roots, the delight of all orchid growers. The plant was considerably larger but at each repotting period several pieces are removed for increase of stock.

Dr. Schiffmann's collection is also rich in hybrid cattleyas, lilio-cattleyas and phalaenopsis in variety. Of Phalaenopsis amabilis there are alone over 500 plants, many already far advanced in spike and promising a grand crop of flowers.

Chrysanthemum Exhibitions.

BY GROVE P. RAWSON, ELMIRA, N. Y.

[Presented to the Chrysanthemum Society of America at the Chicago convention, November 12-13, 1902.]

It is generally conceded that horticultural exhibitions are educational, but like other matters educational seldom profitable, viewed strictly from a financial standpoint. A net surplus one year is quite apt to be wiped out the next. Perhaps it was bad weather, or other local conditions were unfavorable, from some cause or other.

Local perennial exhibitions require the

be a chrysanthemum or other flower show. With sculpture and flowers in New York, landscape effects and dancing in Kansas City, and the first exhibition of the Chrysanthemum Society of America at Chicago, 1902 surely provides novelty galore, and it is said the public always craves novelty.

Much depends on the management. A successful manager should be wise above his fellows, the happy possessor of natural tact coupled with experience. It is no small job to manage any kind of a show, little or big. It is a calling where "few are chosen" and the balance "called down," as was Belshazzar of old. The handwriting on the wall reads, "Weighed in the balance and found wanting!"

Some of the qualifications of an efficient manager include affability, a genial individuality, philosophy, business tact, being "all things to all men," forecast weather probabilities, reduce expenses to the minimum, see that the daily papers do their share of advertising at cheap rates, and above all, induce or compel the dear public to come in, at a nominal price, that you may do them good. Of course "nerve" is indispensable, lots of it, and well tinged with that shining metal, an alloy of copper and zinc!

A popular manager is a cheerful liar—this is expected. And there is the matter of premiums to reward the winners and interest exhibitors, the larger the premiums the larger possibilities of exhibits. (I once won a load of hay as a premium in the rural districts. It was so big I couldn't get away with it!) And there are the judges to award the honors and receive anathemas.

Taking it all in all, a modern flower show can stir up things akin to a jealous church choir. A minister's little boy said to his father after the morning sermon, "Pa, was that true, what you said this morning, or was it only preaching?" I'm not preaching!

One of the essentials of a perennial flower show is competent judging. Choose apostles of horticulture, born, not made, being well equipped by nature and experience for the difficult task at best. Men of iron nerve and eagle eye and undisputed integrity, not easily coaxed to drink away their good judgment or biased by patronage. If I was preaching I might say more of what I've seen and experienced.

Sometimes judges are selected for other reasons than strict capacity. It is possible that an excellent grower might prove a poor judge. The question is asked, "Why don't the retailer help out more?" "Because he does not see anything in it, for himself," and the character of such exhibits rarely receives full justice. Judging florists' work is biased largely by individual preference and personal taste. I would omit premiums in this section and offer inducements for exhibits in some other way.

In my opinion amateurs should be the main support of all our horticultural exhibitions. They can afford gratis what is more or less an onerous tax to the struggling grower and commercial florist. The florists' time and wares are taxed in advance of most other professions. Various charities claim not "the tenth" of one's income but would even kill the goose!

Let every exhibition have some special prominent feature so stunning or distinct as to advertise the show of itself. Break up the sameness and monotony of general exhibitions. First premiums almost invariably go to varieties that produce the biggest blooms, so there is little

ORCHID DISPLAY OF DR. R. SCHIFFMANN, ST. PAUL FLOWER SHOW, NOV. 10-13.

twine and sundry items that put his flowers before the buyer in the best possible shape. That is why he gets all there is to be had, but his neighbor would not believe this, even though he stood in front of the counter when the stock was sold.

BALTIMORE, MD.—The fifth annual meeting of the Maryland State Horticultural Society will be held at Dushane Post hall December 18-19. A good programme has been prepared, including papers by Richard Vincent, Jr., N. F. Flitton and Orlando Harrison.

backing of a live horticultural society, or the pledged support of wealthy patrons, in time of need. An uncomfortable deficit will take all the "gimp" out of a manager and a financial committee, and when the time comes 'round again to discuss the advisability of having another the chances are the majority will "cuss" the whole thing. So it goes, and the project is *non est*, postponed indefinitely, what is called in parliamentary parlance "laid on the table."

Just what will make an exhibition successful, sufficient to attract the crowd, is something of a conundrum, whether it

variety. Compile a longer list of varieties eligible to compete for special premiums. Appletons and Eatons are not the whole thing. The board system that is being revived will add much to variety, and don't leave out specimen plants, even if they must needs be grown to order. Connoisseurs are interested in exhibitions without providing novelty, but unfortunately connoisseurs are not in the majority.

Furnish as good music as can be afforded. Music and flowers are a great combination and the glory of the scene is light, floods of it, and brilliant enough to shame out of existence any poor exhibits. An attractive exhibition hall that is centrally located is necessary for a full attendance.

The flower show of the future may have some different regulations. Cups or plate will probably comprise premiums. There will be more displays "for exhibition only" and greater individuality. Possibly judging may be eliminated and the good, the true and the beautiful dominate. Some think a flower show that is so beautiful in itself should be elevating and refining.

Have you ever been behind the scenes, before the lights were turned on, and the orchestra's music thrilled your very soul? Why, the air is blue with invective and "cuss" words chase each other like chain lightning. And strong, hot, clove-scented breaths hurl anathemas like battering rams. It is every man for himself and "the devil take the hindmost."

The deacon had a balky horse which tried his patience to the utmost. "Con-sarn ye! I'll sell your old hide the first chance I get!" "What," said his conscientious son, "do you think it right to sell a balky horse and make other people sin?"

The getting up of flower shows is often "balky" work and as a matter of conscience rather trying to the promoters.

A Type: Its Treatment in the South.

BY F. P. DAVIS, MOBILE, ALA.

[Presented to the Chrysanthemum Society of America at the Chicago convention, November 12-13, 1902.]

The distinction of speaking for the queen of autumn, from the south, which I have been asked to do by your committee of arrangements, is a compliment which I have hardly deserved, and which finds me poorly equipped in knowledge to do justice to the subject and credit to the craft, that tireless army of toilers who wage the war of extermination against the aphides and the mighty corythuca in the land of perpetual sunshine. It seems almost an intrusion for one of my limited experience to presume to advance an idea or suggest a method that could enlighten the master minds of the trade, whose patience I may test, but whose charity I shall entreat.

Surprising as it may strike some of you, the modern chrysanthemum is yet a novelty in many parts of the extreme south. Our native florists have not been alive to the spirit of progress and those who have come to us schooled by the contact with thrift have been of the not uncommon class of mind, that though in the full fruition of methods, cannot apply them to conditions and locality. It is no longer a problem to evade the dangers of cold, but to control heat is the obstacle that confronts us, and makes Chicago better suited to floriculture than Mobile.

Few of the many very excellent varieties of chrysanthemum can expand their flowers under the influence of a tropic sun. This one condition is what taxes

CATTELYA BOWRINGIANA.

the mind of the southern grower. By very close observation we must find a type that meets the emergency and weigh our selections by its standard. Any robust variety that grows quickly from late planting will do, provided its flowers do not linger in the bud but burst and open like a rose. No matter what the glowing eulogy in the catalogue may say for it, if it fails in this one quality it disappoints the grower.

In no variety do we find this quality so strongly in evidence as in the old Golden Gate. Since I first came to know it many years ago, I have learned to measure all others by this one feature which it possesses to a degree almost incomparable. Let the great growers study their stock for this simple prerequisite, and put into their catalogues a list suited to the south. They will do much to increase their own trade and assist the southern grower on the road to success.

In my own home city where 40,000 souls breathe the pure air from the Gulf of Mexico, and 20,000 more live in its beautiful suburbs, I blush to say, there is not one modern greenhouse where chrysanthemums are grown for sale. There are many houses, such as they are, yet I doubt if a single grower would know his plants by the foliage if he should lose the label. This condition is largely due to the many trials in the past, where their best efforts have been failures for want of the proper type.

As to treatment, it is simple, but do not be deluded with the idea that a first-class chrysanthemum can be grown in the south without the protection of glass. Surely not to give it heat, but protection from rain and wind it must have. It is true the sides may be only of canvas, and here we may obtain our ventilation, but we must be able to make the house perfectly close in order to combat insects and keep out storm winds. My experience has been that solid beds are better than benches, for the reason that they do not dry out so fast, and we can better risk keeping them a little on the dry side as protection against mealy bugs. Of course perfect drainage must be given, for which purpose I have used coarse gravel with the best results. It would be suicidal to use any wood in the construction of the beds or even as plant stakes, as white ants, or wood lice, as we know them, are sure to appear about the time your plants look the most promising. These wood lice are only second to the corythuca in point of destructiveness.

I should advise all growers who are ambitious to achieve success in the south to shun commercial fertilizers. I know of one grower who has been quite successful with liquid manure made from cotton seed meal rotted in water for sixty days and used very much diluted, but I take my chances with a heavy mulch of rotted sweepings from the cow lot, having first given the beds a light dusting of

bone meal, and then trust to ample nourishment at flowering time from copious watering, this being too late to give much encouragement to the mealy bugs.

For the corythuca I have used with the best results weak kerosene emulsion, sprayed on the under side of the foliage, this pest being similar in habit to the red spider, but not having the protection of the web. As the corythuca is not so well known outside of the cotton-growing states, I may ask your indulgence to give him an introduction to you. He huddles in flocks on the under side of the leaves and suggests to the naked eye a flock of sheep as you may have seen them grazing in the woods. When the plant is shaken the little fellows fly to the ground and at once begin to scramble back to the stem of the plant, where they climb and start a new colony. The body is about the size of a good fat black aphid. The wings stand out so that it gives the appearance of a woolly sheep. In color it is a dirty gray. It feeds altogether on the under side of the leaf, and its presence is therefore not noticed until the mischief is done.

While the touch of kerosene is certain death to it, I have never known a house of plants to be free of it and amount to much after it once made a showing. The evaporation of tobacco juice effectively rids the house of aphides, and we no longer look upon this pest with any great alarm.

I have long ago concluded that while we may be very successful with the chrysanthemum in the far south, by growing the proper type and giving it careful treatment, we may never hope to reach that stage of perfection which is attained further north. Climate and conditions are against us.

A Mammoth Bouquet.

Bouquet making is not yet a lost art in Hartford, Conn., judging by the graceful composition of the huge specimen illustrated herewith. It was a complimentary gift from the Hartford Florists' Club to the New Haven County Horticultural Society on the occasion of the recent exhibition and naturally attracted much

attention and admiration from visitors. A list of the material used in its make-up is given as follows: The sprays were attached to willow twigs, an abundance of damp moss being used and the center of the pyramid being well filled in with evergreen. The flowers used were chrysanthemums, carnations, geraniums, Forsythia Fortunei. The foliage was Kalnia latifolia, Prunus Pissardi, Lonicera fragrantissima, smilax, Spiraea arguta, Berberis Thunbergii, Photinia villosa, Andromeda polifolia and oaks. The fruits were Pyrus arbutifolia, Christmas pepper, Celastrus scandens, Ilex verticillata, Ilex laevigata, Rosa multiflora, Rosa blanda, Symphoricarpos racemosus, Symphoricarpos vulgaris and Bocconia cordata. Aspidium acrostichoides was used, also the following grasses: Eulalia Japonica, Bambusa Metake and Typha latifolia.

Commercial Flower Shows.

This is the season when commercial flower shows are most in favor, and they seldom fail to make a profit for their promoters. One of the most successful of the season was that of the Texas Seed and Floral Company, where 6,000 Dallas people inspected the display in the three days of the show. There was one of the best collections of chrysanthemums, roses and carnations ever staged in the southwest. A view of the store is shown in one of the accompanying illustrations. The other gives a glimpse in the store of the Daniels & Fisher Company, Denver, during their recent flower show. The store was crowded during the day and a large amount of good stock was shown, the display being along the main aisle. The event was not only a success as judged from the effect in the cut flower department but also in its influence on business throughout the store.

Houston, Tex.

The ninth annual chrysanthemum show given by the Faith Home Association at Houston, Texas, November 18 and 19, was a success in every particular. The season for flowers in this vicinity was an exceptionally good one, and chrysanthemums were never grown to more perfection. The premium list included about forty-five classes and they were all contested for with more entries than ever before seen at a flower show here.

A remarkable feature was that the amateurs, who raised pot plants and blooms in their home gardens and in open beds, had better results than the local florists who used glass protection. The exhibits sent by Nathan Smith & Son, Adrian, Mich.; Vaughan's Seed Store, Chicago, and James Morton, of Clarksville, Tenn., were the most successful of all the exhibits staged. A very fine exhibit of cut blooms was sent from California and came in a splendid state of freshness.

Among the Houston florists the following made very good exhibits of chrysanthemums, palms, ferns, roses, begonias, also emblems and design work: Wm. Kutchbach, Robert Luepke, M. V. Wright, Kerr's Fairland Greenhouses and the Bryn Mawr Nurseries. At the completion of awards it was found that they were all about equally successful in winning prizes.

The judging was done by S. J. Mitchell. The attendance for the two days was better than on any preceding year, realizing about \$700 on admission fees alone.

S. J. M.

BOUQUET SEVEN AND ONE-HALF FEET HIGH.

(Exhibited at New Haven, Conn., by Hartford Florists' Club.)

FLOWER SHOW OF THE TEXAS SEED AND FLORAL CO., DALLAS.

A Visit to Mt. Clemens Growers.

The Detroit Florists' Club is becoming famous for the frequency of its outings. The last one, and by far the most notable and interesting, was to Mt. Clemens, Thursday, October 30. John Breitmeyer's Sons, with their characteristic generosity, chartered a special car on the Rapid Railway, which left their Miami avenue store at 10 o'clock in the morning. The jolly party numbered just forty, including two visitors, A. Zirkmann, of New York, and Wm. Trillow, of Chicago. The weather was delightful, which added much to the pleasure of the event.

An hour's journey brought us to the Breitmeyer greenhouse establishment, where lunch was awaiting us. After that important part of the programme was concluded a tour of the houses was commenced. The most interest centered upon the new range of four large houses and they were first inspected. A description of these recently built and most modern of houses has not heretofore appeared in the trade press. Their location is at a considerable distance from the old range and the situation, alone, is an improvement.

The houses run east and west, parallel to the Clinton river, close by, from which the water supply for the whole place is obtained, since the use of Mt. Clemens city water was discontinued some time ago because the mineral properties of the same proved injurious to plant life. Three of these houses were completed last season, each 35x276. The fourth one was built the present season and is the same length as the others, but one foot wider, 16x16 double strength glass being used on all. They are heated with steam from two boilers each 160 horse-power.

The tables are constructed with brick side walls filled in with earth, on which is laid 4-inch tile, forming the bottom for the soil, which is five to six inches deep. These tables are five feet wide and there are five of them in each house, with six walks. The houses are separated by eight feet and have ventilation at the top and on both sides and are all planted with roses except one table devoted to Asparagus Sprengeri. The whole Mt. Clemens establishment, comprising in all about 220,000 square feet of glass, is under the charge of Fred. Breitmeyer, who is ably assisted by his younger brother, Will, and other department managers.

Mr. Breitmeyer says, speaking of roses, that the present season was fraught with many difficulties, the grub worm being the most serious, and evidence of their destructive work was apparent in most of the rose houses showing unevenness in the growth. Repeated plantings were necessary on many tables. When sterilizing of the soil was suggested, Mr. Breitmeyer said he has had some experience with soil thus treated and believes it takes the life out of the soil, requiring too much manure and work to restore.

One table of 1,000 Liberty, while still young and small, looked well and more of it will be planted here next year. A table of the new rose Mrs. Oliver Ames was especially good and Mr. Breitmeyer thinks it the best rose introduced for many years. He will plant it largely next year. Four tables of Meteor looked promising for a splendid Thanksgiving crop. A table of 1,000 plants of Helen Gould is on trial and up to the present is satisfactory, but heavy feeding is necessary to maintain its true color. A lot of 1,000 plants of Madame Hoste is

grown, also a similar number of Madame Cusin and Mrs. Morgan. Bridesmaids and Beauties are also largely planted, the four new houses containing a total of over 20,000 plants.

In the rose houses of the older range two-year old plants are mostly used and no ravages of the grub worm are seen. Perle, Sunset, Bridesmaid, Bride, the old Bon Silene, La France and Isabella Sprunt are grown to the extent of over 22,000 plants. Here about 18,000 violets are grown, chiefly in two varieties, Parquhar and Marie Louise, with some Swanley White and Lady Campbell.

At that time the spectacle of 25,000 chrysanthemums absorbed the attention of the visitors, and little wonder, for they were surely fine. A carefully selected list of varieties, both old and new, is grown, but the latter in limited quantities. The majority comprised the well known Bonaffon, H. Rieman, Ivory, Brunnilda, H. Hurrell, Golden Wedding, Thornden, Western King, the white and yellow Mrs. Jerome Jones, Childs, Murdock and Dean, and of the more recent introductions Appleton, Eaton, Mrs. Elmer Smith and Chadwick in goodly numbers. Arline, originating in Detroit, is a beautiful white of Domination parentage. The firm considers R. H. Pearson the very best yellow of its time of blooming, which is earlier than the well-known Bonaffon, and they still grow Mrs. Perrin in large quantities. Nellie Pockett, a creamy white, was good, and Silver Wedding, a valuable one among the long list of whites.

In carnations, Bon Homme Richard is largely planted and with them is unquestionably the best white, 3,500 plants looking splendid. Glacier is grown, too, in large quantities, for short-stemmed flowers only. Floriana, a pink, sent out three years ago and partaking of old Albertina character, is growing very bushy and erect and is very prolific. Marshall Field and Her Majesty are on trial and at present promise well. Dorothy is this firm's best pink, their 3,500 plants having yielded ten blooms to the plant by the end of October. Joost was late planted and has not yet done much. Prosperity does not bear out its reputation here, but a house of 1,800 Lawsons

A GLIMPSE OF THE FLOWER SHOW OF THE DANIELS & FISHER CO., DENVER.

is elegant. Murphy's White, a fringed variety, Gov. Wolcott, another large white, and Sunbeam complete the carnation list, with a few unnamed seedlings.

The resumption of the use of coal for fuel in place of oil, which has been in use here for the past fourteen years, is explained by the constantly rising price of the latter, which cost when first used, 56 cents per barrel and has now attained the exorbitant figure of \$1.30 per barrel. It was also noted that as the price advanced the quality of the oil kept getting worse and although well equipped with storage tanks, it was thought the return to the use of lump coal at about \$3 per ton would be an advantageous change even although the change necessitated building the chimneys higher at considerable expense and requiring additional help for firemen.

We next visited Robert Klegge's place, close by, where it is well known that first quality stock is the rule and not the exception. This place consists of thirteen modern houses covering an area of about 70,000 square feet heated by steam supplied by three boilers of an aggregate of 175 horse-power. One house was built the present season, 31x150, and of similar construction to those of the new Breitmeyer range. Mr. Klegge's specialty is violets and this year 20,000 clean, vigorous plants greeted the visitors. Two varieties are grown in about equal quantity, Marie Louise and Farquhar. Many bottomless pots are in use and Mr. Klegge had nothing but words of praise for them and will use them more extensively next year, although he says a little more labor is entailed by their use when the violets are first planted. In carnations, one house of 2,000 Lawsons and another of 1,000 of same variety were particularly fine and he may feel justly proud of them, as well as of a house of Morning Glory, which was strikingly beautiful. A house of Cerise Queen showed that this variety still has merit under careful culture, as shown here. A house of Dorothy, one of Estelle and Crane and another of Glacier and Prosperity were all in splendid condition.

F. Gutschow & Son's place was next visited. Their six houses and contents

were notable for neatness and order throughout. Three houses, each 31x112, were built the present season and contain 8,000 violets just recovering from the persistent attacks of what they call gall fly, and prospects for future good results are now apparent. Three houses of carnations, include Lawson, Morning Glory, Cerise Queen and Scott, and their condition is very encouraging and complimentary to the efforts of this new firm.

Jas. Taylor's place was next in line, where six houses, each 20x160 are chiefly devoted to violets and carnations, although this season marked his entry into chrysanthemum growing and he pointed with pride to his 4,000 plants, embracing the best known standard sorts, together with many of the more recent introductions. His carnations are all fine, especially two tables of Lawson, which promise to equal his famous ones of last year.

Another establishment was yet to be visited, that of John Carey, whose continued and uninterrupted success with Meteor and other roses has made him locally quite famous. An inspection of his stock revealed everything in splendid condition. One table of Beauties was especially fine and indicated a heavy crop in December. His new boiler room is now completed and the setting of a new boiler of immense size was in progress. Here, too, as in the four places previously visited, we were called upon to dispose of a generously provided lunch. Darkness was now upon us and the pleasures of the day ended in speeches, songs and recitations and of the latter Will Breitmeyer acquitted himself admirably, to the great delight of all. J. F. S.

HINGHAM, MASS.—The Hingham Horticultural Society held its annual chrysanthemum show on the evening of November 13, at Agricultural Hall. Fine specimen plants and flowers came from the conservatories of Peter B. Bradley, also George Hollis, A. A. Spear and N. L. Hollis. R. W. E. Vining, A. A. Spear and George Hollis were represented further by carnations, violets, etc., of superior quality.

Chicago.

ROSES ARE SCARCE FOR THANKSGIVING.—ORDERS VERY NUMEROUS.—TEAS MORE PLENTIFUL THAN BEAUTIES.—CARNATIONS BREAK IN PRICE ON HEAVY RECEIPTS.—VIOLETS COME IN AT THE LAST MINUTE.—CHRYSANTHEMUMS DO WELL.—A VARIETY OF TRADE AND LOCAL NOTES.

The Thanksgiving demand, as had been anticipated, found a market decidedly short in roses. Beauties were in pronounced demand and there was no house in the city which was able to fill anything like all its orders for this specialty. It was practically impossible for the local buyer to obtain Beauties in this market up to Wednesday, for everything in the rose line up to that day went out on shipping orders, which were never more numerous, but some houses say they averaged light. Supplies of Bride and Bridesmaid were more nearly equal to the demand, but here, too, the shortage was sufficient to compel the growers to send out poorer average stock than many of them like to ship, and even at that most orders were cut more or less and many refused entirely. There was a good call for Liberty and Meteor, both of which were correspondingly short of the demand. It was no surprise that the receipts of carnations were sufficiently heavy to cause weakening values before the shipping business had been disposed of. Then the market broke considerably. The carnation crop seems to be on with most of the growers in spite of the bad weather which has prevailed. The warnings against holding back were unheeded, as usual, so that Wednesday saw very heavy receipts and much of the stock was sacrificed or left unsold. The same story applies to the violet situation, there having been a good demand early in the week, with comparatively light receipts and a deluge on Wednesday. Thanksgiving day saw a fair demand, but repeated experiences should teach the growers that it is folly to hold any quantity of stock beyond the second day preceding a holiday. There has been a good market this week for all the chrysanthemums which the growers have been able to cut. The quality has deteriorated very pronouncedly, but good values have been received for all grades of stock and everything was well cleaned up. Such specialties as lily of the valley, orchids, sweet peas and wedding greens have moved well because of the number of Thanksgiving nuptial events.

At the regular meeting of the Florists' Club, November 26, there was a rather small attendance, due, no doubt, to the pressure of Thanksgiving work. In the absence of the retiring president, the duties of that office were assumed by J. D. Thompson, the president-elect. Alex. Henderson officiated as secretary pro tem. A committee of three—W. N. Rudd, J. C. Vaughan and P. J. Hauswirth—was appointed to look after the programme and entertainment for the winter months. Mr. Hauswirth, toward the close of the meeting, gave a most entertaining account of his trip to Joliet November 22, with E. F. Winterson, C. Balluff, Geo. Pieser and A. Lange, on the occasion of the recent flower show and banquet at that place.

John Brod, at Niles Center, has rebuilt twenty-eight houses this season, part of them 20x110 and the rest 15x114. The plant is now in first-class shape and profitable cuts are being made. A portion of the stock is consigned to Milwaukee.

HOUSE OF PALMS AT A. N. PIERSON'S, CROMWELL, CONN.

DETROIT FLORISTS' CLUB AT ROBERT KLEGG'S, MT. CLEMENS, MICH., OCTOBER 30, 1902.

The business of P. J. Saunders, on Cottage Grove avenue, will be discontinued next month, Mr. Saunders leaving for his old home, Cork, Ireland, where his brother, David, a widely known and successful nurseryman, died a few weeks ago.

George Bayer, of Toledo, again hit the market right with his chrysanthemums. He had several thousands of blooms at Kennicotts' this week, when most of the growers had practically ceased shipping.

Wietor Brothers report a good call for field-grown carnation plants to take the place of the chrysanthemums now cut out. They shipped several thousand plants during this week before the freeze.

Peter Reinberg has already begun to make carnation cuttings. He expects to do an even larger business than heretofore in this line this season. He had a big cut of Liberty for Thanksgiving.

Miss May Wood, who for some years was bookkeeper for Anthony & Curran and Joseph Curran, when they were in business, died November 27. Miss Wood was Mr. Curran's sister-in-law.

Quite a delegation of Chicago people went to Joliet on Saturday to attend the banquet in connection with the flower show.

Weiland & Riseh have a pink sport of Timothy Eaton, Daybreak in color, of which they think highly.

E. C. Amling has been getting in quantities of sweet peas this week, which have found a ready market.

President John Burton and John N. May expect to pay this city an early visit.

Visitor: Chas. E. Heite, of the Rock-Heite Company, Kansas City.

EAST BRIDGEWATER, MASS.—Mr. and Mrs. Abel E. Houghton celebrated their golden wedding anniversary on November 25.

MEDFORD, MASS.—Miss Eunice Belcher, formerly with John Coombs, of Hartford, Conn., has opened business here under the name of the Medford Flower Store.

Boston.

DOWNPOUR SERVES TO DAMPEN THANKSGIVING DAY ARDOR.—SHORT SUPPLIES PROVE ADEQUATE FOR THE OCCASION.—OLD GUARD ON THE MARCH.—A VARIETY OF LOCAL AND TRADE NOTES.

The Thanksgiving day record might have been different had the rain kept away. After a month of remarkably salubrious weather it seems rather hard that the day before Thanksgiving should be given over to one of the most furious storms of wind and rain imaginable and it is natural that much disappointment should be felt by the flower people. The stock available was decidedly light, had a normal demand been experienced. Chrysanthemums had ceased to be a controlling factor in the market, few flowers being seen except some late shipments of Mrs. Jerome Jones and Maud Dean. Roses averaged below the mark as to quality and more or less complaint was heard regarding the Brides and Bridesmaids. American Beauty sold out fairly well, as might be expected. Carnations were in heavy supply, considering the demand, and experienced only a slight inflation as a result of the holiday. Violets refused to be pushed. The highest figure that they could touch was 75 cents, although strenuous efforts were made. As to bulbous stock, no advance was possible. Lily of the valley is abundant and Paper White narcissi are on deck, but going feebly at \$2 a hundred.

On Tuesday afternoon and evening, November 25, a special detachment of the Old Guard responded with full ranks to a call for duty at the precinct of W. W. Edgar, at Waverley. The tour through the greenhouses disclosed the neatness and thrift always characteristic of this place. A bench of poinsettias in full glory for Thanksgiving was particularly interesting to the visitors and the usefulness of this cheery plant for Thanksgiving was quickly recognized. Another novelty was a house of astilbe, cold storage stock, which will be in bloom for Christmas. For Christmas, also, is a splendid lot of three-year ardisias, lilies, Lorraine

begonias and azaleas, among the latter being Van der Cruyssen, which is not usually in at so early a date. Easter preparations already appear in large blocks of genistas, acacias and so forth. Mr. Edgar expresses astonishment that *Dracena Bruanti*, of which he has elegant specimens, does not appear to meet with the favor it deserves as a good-keeping decorative plant. The salesman, Herman H. Bartsch, displayed a self-consciousness for which the reason was not apparent until it became known that he had been happy father of a nice daughter for some twenty-four hours, and he was duly congratulated thereupon by the visitors. In the evening the party was taken charge of by Mrs. Edgar and Miss Grace Edgar, whose ability to provide for guests of the Old Guard capacity has been well proved in the past and, suffice it to say, their reputation was fully sustained on this occasion.

Mrs. E. M. Gill, of Medford, suffered the loss of about 200 lights of glass and a promiscuous stock of plants in her greenhouse through the antics of a deer which came down on an exploring expedition from the Middlesex Fells park reservation. Deer and other wild game are increasing rapidly in that region.

According to the Boston *Traveller*, J. Geist has filed a petition charging his son, J. Geist, Jr., with embezzlement and asking for restitution of the sum of \$5,000, of which it is alleged the young man has come into wrongful possession.

It is said that Charles Evans, of Waverlytown, erstwhile cultivating due disdain for the Yankee military, as becomes a true Britisher, has lowered his colors and donned the uniform of the Ancient and Honorable Artillery Company.

H. P. Kelsey was married on Tuesday evening, November 25, to Miss Low, at Salem. The floral decorations were very beautiful.

Lawrence Cotta has four children sick with whooping cough, two of them seriously ill.

Visitors: E. S. Haskell, New Bedford, Mass.; John Chambers, Toronto, Ont.

Philadelphia.

SUPPLIES SHORTEN AND PRICES STIFFEN ALL ALONG THE LINE.—SALE OF CHOICE OF STALLS AT THE MARKET.—TWENTY-FIVE GROWERS ON THE GROUND.—TRADE LIVELY IN THE RETAIL STORES.

Flowers are scarce and Beauties of all grades are hard to get. Tea roses, particularly white ones, are all grabbed up on sight. In the commission houses and at the market there is a great rush for stock, which is sold generally before it arrives. Prices, in consequence, are soaring. Beauties range from \$1.50 to \$6 per dozen and no fault to be found with the grading. Teas range from \$4 to \$10 per hundred, being doled out in lots of twenty-five. Carnations range from \$1.50 to \$3 for good stock. Chrysanthemums are now on the slide and this week will no doubt wind them up. Ehret had an order for 1,000 choice Bonnaffon and was able to fill it from one of his growers who took his advice and did not force his flowers on the market two weeks ago. From \$8 to \$25 per hundred are the figures for good flowers. Violets are in good demand and all fair flowers sell rapidly at from 35 cents to \$1. Valley, Romans and narcissi bring \$3 to \$4. Some nice bouvardia in white, pink and red is being sent to the market by John Savage and Charles Meehan. It is a welcome addition to the rather meager assortment of the season.

The sale of choice of stalls took place at the market last Saturday morning and realized something short of \$200, which was considered good considering the limited number of growers, some twenty-five, who are on the ground. Every week two or three new ones are added and before long it will be a very busy place. Joseph Heacock and Henry A. Dreer are putting up platforms of their own. The office of the company is being built, a delivery service established and a commission man, Leo Niessen, has been rented a space to sell greens, ferns, wild smilax, galax, waxed paper and other florists' needs, but no cut flowers. Ernst Asmus was an interested visitor on the day of the sale of the stalls. He is likely to be a stall owner, or at least it is to be hoped so. He gave the interested parties some useful information about the market in New York and their way of doing things.

Trade has been lively for the past week, the president's visit having caused a demand for some elaborate decorations. H. H. Battles had a very large decoration at the Union League which was considered one of the finest ever made in this club house, where fine things of the kind are the rule. The stores are all having considerable to do with the coming out teas, which are now at their height, and many gorgeous bunches are seen daily on the counters. K.

Washington.

TRADE RATHER QUIET.—SOME HANDSOME THANKSGIVING WINDOWS.—LOCAL NOTES OF INTEREST.

Trade was not as brisk as might have been expected last week. Stock is good and plentiful. Violets are coming in very fine but are not much in demand. Everybody made preparations for Thanksgiving, some of the windows being decorated very tastefully.

Minder Brothers are cutting some fine chrysanthemums. Their roses and carnations are in good shape and they also have a fine lot of *Adiantum cuneatum* and other small ferns.

The American Rose Company furnished

the bouquets for the wedding of Miss C. Anderson. The bride's bouquet was of Ivory roses and a shower of lily of the valley. The bridesmaid's bouquet was of Alice Roosevelt roses, with a shower.

Robert Bowdler has put in a sixty-five horse-power steam boiler in his new range of houses, but is using it for hot water without pressure. The houses are planted with roses, carnations, callas and poinsettias.

A. Gude & Brother are cutting some fine American Beauties.

Visitors: Prof. Nash and Mr. Skene, of the New York Botanic Garden. P. G.

Milwaukee.

LOCAL ADDITIONS TO GLASS AREA BELOW THE INCREASE IN DEMAND.—LARGER SUPPLIES FROM ILLINOIS GROWERS ESSENTIAL.—JOTTINGS OF VARYING LOCAL INTEREST.

One of the daily papers recently published an interesting article under the head "Florists Enlarge Plants," in which it was said "that wholesale florists here are making a determined effort to become independent of the great flower growing center of Rogers Park and Rose Hill, Ill., which is the greatest cut flower section of the west." The impression given to anyone not acquainted with the facts must be that the Milwaukee florists are not satisfied with their Illinois connections, but this is palpably untrue. The Illinois growers have done much to build up this market by their co-operation with the commission houses here and both Holton & Hunkel and C. C. Pollworth say there will be more flowers come into this market from Illinois this winter than ever before, because they are needed in spite of the increase of glass here.

The principal increases in glass here this season are in N. Zweifel's new carnation houses at North Milwaukee and the new plant of Charles Johansen at the same place, Heitman & Baerman's addition in Wauwatosa, and A. Klokner's plant in the same town. A. Burmeister has expended \$8,000 on Howell avenue and Ben. Gregory has put up a "boarding house." He will look after the trade in that line, which was a specialty of the Whitnall place before the Holton & Hunkel Company took possession.

The Florists' Club has begun regular meetings for the purpose of devising ways and means for making the convention next August as satisfactory as possible. One feature talked of is the arrangement of an exhibition that will be attractive to the public as well as to the craft.

The park commissioners are reported to fear getting into a rut in the management of their horticultural affairs; what they should fear is the result of their penny wise and pound foolish policy.

The C. C. Pollworth Company has raised the office about seven feet above the floor, so that other business can be done underneath. Their present quarters are becoming too small.

Herman Stapes, of Elm Grove, is bringing in some good bouvardia to Fox. C. B. W.

BELLOWS FALLS, VT.—C. W. Butterfield has retired from the greenhouse industry and sold out the contents of his place at auction.

WINSTED, CONN.—Nine fern gatherers have been collecting in the woods here for New York parties for some time. The ferns grow in great profusion in this section.

St. Louis.

CLUB HOLDS A WELL ATTENDED SESSION.—NEW CHRYSANTHEMUMS SHOWN.—MARKET SHORT ON SUPPLIES.—THE PRICES.—VARIOUS LOCAL NOTES.

The last meeting of the St. Louis Florists' Club found twenty members and two visitors present. Although this was supposed to have been a chrysanthemum meeting there were very few to be seen. Most of the home grown stock was past but Nathan Smith & Son sent a box of their novelties in fine shape. Dr. A. S. Halstead had several cut blooms of his new seedling geranium. A vote of thanks was given both these exhibitors. After the usual order of business the president called on Mr. Jablonsky for his story of his trip to Chicago, which proved very entertaining. Otto Koenig, J. J. Beneke, Mr. Weber and Mr. Ammann also spoke and were warm in their praises of the Chicago show and the hospitality of the florists there. The Chicago bowling team is to be invited down here during the holidays.

The market has not had plentiful supplies of good flowers this week. Roses are bringing from \$5 to \$8 and \$10 for fancy stock, while carnations fetch \$3 to \$4. Chrysanthemums are about at an end. Violets are also slow in coming in and bring at present \$1 to \$1.50 per hundred. Christmas green is beginning to show up and \$5 per crate is asked at present.

The new pink seedling chrysanthemum, R. E. Richardson, that has excited considerable interest, was exhibited at the St. Louis show last year by its originator, Julius Schray, who sold it to Mr. Lemon, as was mentioned in these notes at the time.

Parker F. Barnes, a member of the club and formerly with the Missouri Botanical Garden, left November 25 for Manila, where he will accept a position as government forester.

Julius Koenig is now with H. G. Berning. He is a brother of Otto and George, of the Koenig Floral Company.

Recent visitors: J. A. Peterson, Cincinnati; Arnold Ringier and Wm. Trillow, Chicago; S. S. Skidelsky, Philadelphia; Miss Molly Allen, Boonville, Miss.

R. J. M.

Cleveland.

TRADE NOT WHAT MIGHT BE EXPECTED AT THE SEASON.—MUCH GOOD CHRISTMAS STOCK IN SIGHT.—VARIOUS LOCAL NOTES.

Business for the past week has been fair, but not quite as good as one would expect at this season. The Thanksgiving demand created a spurt which cleaned up everything. Although if the demand were any greater there would not be sufficient good stock to supply the demand, as the continued dull weather has a baneful effect upon the rose and carnation output. Chrysanthemums are on the wane; another week or so will wind them up. The season for the queen of autumn this year has been much shorter than last year, owing, I presume, to the continued warm weather which advanced the blooms more rapidly than if the weather had been colder.

G. M. Naumann has a house of Lorraine begonias which look exceptionally fine, also a house of *Primula obconica* which will sell to good advantage during the holidays. His cyclamens are the finest we have seen for a long while. They are undoubtedly the best that come into this market. His new carnation,

Louise Nannmann, while not a show variety, is a most prolific producer, some of the flowers measuring over three inches across.

S. N. Pentecost is right in it this year with peppers in 6-inch and 7-inch pots. They certainly are a fine lot, the best he has ever grown. He also has a fine lot of *Primula obconica*. His carnations this year are better than ever. Altogether the business with him this year has been very satisfactory.

John Thomas, foreman for D. Charlesworth & Son, was married to Miss Nora Schmidt, of East Cleveland, September 20, but the event was kept a secret.

Casper Aul will remodel his entire plant next year and put in steam heat.

Mrs. G. G. Stehn is recovering from her recent illness.

Visitors: Herbert Heller, of New Castle; J. McHutchinson, of New York.

ECHO.

San Francisco.

CHRYSANTHEMUM SEASON DRAWS NEAR A CLOSE AND PRICES ON OTHER STOCK ADVANCE.—SOCIETY MEETS.—DOINGS OF THE GROWERS.

Indoor chrysanthemums have been going so fast of late that they can only be had at a premium, since very few late varieties are grown here. Outdoor stock has been damaged severely by heavy rains and frosty mornings. Prices for roses and carnations have advanced fifty per cent and will keep up from now on. Business has been fairly good so far and no complaints on that score are made. So far no hyacinths are to be seen and a shortage of this bulb seems to be on account of the high prices charged this year by the Dutch growers.

At the recent meeting of the Pacific Coast Horticultural Society a new committee on entertainment was elected, four new members proposed and four elected. A paper was read by Mr. Waddington, which was so well received that he was requested to re-read it at the next meeting, the first Saturday in December.

At Schwerin's stock is in excellent condition. The Beauties are doing considerably better this year. This place is headquarters for bulbous stock and an immense number of bulbs have been boxed up for forcing.

Ferrari Brothers are bringing in some fine carnations and roses and expect to make quite a hit at the holidays.

GOLDEN GATE.

Omaha.

SOCIETY TO BOWL AND DINE.—SEEDLING CARNATIONS SHOWN.—TRADE GOOD.—CHOICE STOCK NOT PLENTIFUL.—A VARIETY OF PERSONAL AND LOCAL NOTES.

The last two weeks have seen a number of large social events, making a good demand for chrysanthemums and American Beauties. One of the receptions was almost a flower show, so lavish were the floral decorations. Good chrysanthemums have been hard to get around Omaha and pot chrysanthemums have been much in demand and sold well. Peterson Brothers had a fine lot which brought from \$1 to \$2.50 each.

November 13 the Nebraska Florists' Society met at the City Hall. There were some good chrysanthemums and seedling carnations shown. G. Sorenson, of Florence, has a good dark pink seedling which has a fine stem and form. H. Peterson, of Florence, the violet grower, also has a good white seedling carnation. The club decided to have a bowling con-

test, December 2, and a banquet afterwards.

S. B. Stewart has one window devoted to ballia in colors and says it sells well, as it has taken a hold among the society people.

Hess & Swoboda are showing a fine lot of poinsettias and azaleas in their window.

A. Donaghue is cutting some fine Meteors and Bridesmaids.

GRIPPE.

Cincinnati.

TRADE DEMANDS MORE THAN MARKET CAN SUPPLY.—ROSES SCARCE AND BEAUTIES OUT OF THE QUESTION.—LOCAL NOTES.

Trade is very brisk and the wholesale houses have to skirmish around to get flowers enough for their orders. Good Brides, Bridesmaids and Meteors are fetching \$6 per hundred, while fancy carnations have gone to \$4. Beauty roses are out of the question; the few coming in are sold at sight. Chrysanthemums are cleaning up pretty well and in another week or two they will be all gone, with the exception of the very late varieties. Gus. Adrian sent in a fine lot of Golden Wedding, which found a ready market for Thanksgiving. Gus. Meier, at Hyde Park, is right in crop with Brides and Bridesmaids and they found the market waiting for them.

The carnations at A. Sunderbruch's Sons' greenhouses are a fine sight. Mr. Skidelsky, who was in town this week, says they are the most uniform lot of plants he has seen in his travels in the west. The Mrs. E. A. Nelson here is certainly a grand variety and proves itself to be all that is claimed for it.

The Cincinnati Cut Flower Company had a very pretty thing on exhibition this week. It is *Ilex verticillata*, or commonly called winterberry. It will be a fine Christmas specialty.

J. A. Peterson is sending in some of the finest lily of the valley seen in these parts for some time and says he realizes \$5 and \$6 per hundred for same.

Charley Brunner blew into town Tuesday, loaded up with stock enough to help him out on a good big decoration for Wednesday.

Indianapolis.

A VARIETY OF JOTTINGS OF MATTERS OF LOCAL INTEREST.—DOINGS OF GROWERS AND RETAILERS.—PROJECTS ON FOOT.—NOTES.

Flowers were rather scarce for Thanksgiving, for roses are off crop with everybody, violets and carnations are not overly plentiful and chrysanthemums have seen their best days. Prices stiffened accordingly; \$8 to \$10 for good teas, \$2.50 for carnations and \$1 for violets.

There is a movement on foot to build a large convention hall in this city. John Bertermann is deeply interested in the project on account of the chrysanthemum show. During his recent visit in Kansas City he made most careful investigations along that line.

The Smith & Young Company is to handle nursery stock as a side line. They have issued a price list of trees and so forth and are hopeful of making their nursery department a paying venture.

E. Hukriede & Son have very fine chrysanthemum pot plants this year. They also make a specialty of Boston ferns and the quality of their plants is up to the top notch.

The drivers of Bertermann's delivery wagons have been dressed out in very neat gray and green uniforms.

The checks of the Florists' Hail Association to pay the Indianapolis members who suffered by the hailstorm in October, arrived with characteristic promptness.

M. Brandlein is very proud of his fine carnations. He is especially enthusiastic over Dorothy, which he considers the queen of the pinks.

A. Wiegand & Sons have provided their boilers with automatic water-feeders.

John Hartje has had a very narrow escape from typhoid fever.

Wm. Billingsly has remodeled his store.

H. J.

Syracuse, N. Y.

TRADE GOOD DESPITE UNSEASONABLE WEATHER.—CHRYSANTHEMUMS PLENTIFUL AND GOOD.—DOINGS OF THOSE OF THE CRAFT.

Cut flowers are coming in freely and sell readily. Chrysanthemums are the most popular and are fine. They came in a little late and the dealers consequently had a better quality for Thanksgiving than usual. Last year at this time there was snow on the ground but this season the weather during November was more like September. No one is complaining of business and, while chrysanthemums take the edge off from the business on the other flowers, still there is a fair trade on all lines.

Henry Morris made a big showing of chrysanthemums for Thanksgiving and a few days previous. Mr. Morris has just planted out 1,000 pæonias. He is going more into the culture of spring blooming plants every year and says that the demand for that class of stock is increasing all the time.

A recent funeral design turned out by Quinlan & Company was a representation of the badge of the Consistory. The double eagles were made of violets and 2,000 were used. The crown was made of white roses and violets and the triangle of lavender orchids.

W. S. Wheadon recently returned from a week's vacation in Michigan, where he created havoc among the small game. He spent a day at the Chicago flower show and felt well repaid for the trip.

A. J. B.

Lowell, Mass.

ALL ABOUT THE STATE OF SUPPLIES.—CHRYSANTHEMUMS ON THE WANE.—OTHER STOCK MAKES ADVANCE.

Already some of the chrysanthemums are beginning to look like the last rose of summer. Such unusual weather as we have had this fall has shortened the life of the queen of autumn, but never was there a season when there were so many blooms of good quality. Other stock is now getting a chance to show itself. There has been a good deal of complaint lately of the sleepy condition in which carnations have arrived, but this seems to have been remedied. Lawsons of good quality that were being sold for \$1.50 per hundred a few days ago have just doubled in price. Whites seem to be abundant, with the price for good stock at \$1.50 per hundred. There has been an increased demand for violets the past week. The supply of roses is not quite up to the standard, but the Beauties that find their way here from Madbury, N. H., are elegant.

Business during the past two weeks has been very brisk at times, there being considerable funeral work.

Wm. Whittet is a candidate for re-election to the city council.

THE AMERICAN FLORIST

EIGHTEENTH YEAR.

Subscription, \$1.00 a year. To Europe, \$2.00.
Subscriptions accepted only from those
in the trade.

Advertisements on all except cover pages,
10 Cents a Line, Agate; \$1.00 per inch.
Cash with Order.

No Special Position Guaranteed.

Discounts are allowed, only on consecutive inser-
tions, as follows—6 times, 5 per cent; 13 times,
10 per cent; 26 times, 20 per cent;
52 times, 30 per cent.

Cover space sold only on yearly contract at
\$1.00 per inch, net, in the case of the two
front pages, regular discounts apply-
ing only to the back pages.

The Advertising Department of the AMERICAN
FLORIST is for florists, seedsmen and nurserymen
and dealers in wares pertaining to those lines only.

Orders for less than one-half inch space not accepted.

Advertisements must reach us by Wednesday to
secure insertion in the issue for the following
Saturday. Address

AMERICAN FLORIST CO., Chicago.

PRICES of window glass usually advance
about January 1.

FRANZ DEEGEN, not Deegan, is, we
understand, the correct name of the new
yellow rose seen at recent exhibitions.

POLYGONUM LANIGERUM, with hand-
some silvery foliage, is recommended as
a good subject for sub-tropical bedding.

THE mailing label on your paper shows
when your subscription expires; when
you send your renewal note that the
date changes within two weeks; it will
serve as your receipt.

RAFFIA, long indispensable to the horti-
culturist, has now become an article of
of household necessity. In summer the
women weave it into hats, in winter the
children into Indian baskets.

SUBSCRIBERS are free to ask our help in
the solution of their knotty problems,
one and all, but the query must be signed;
the name and address are not necessarily
for publication, merely as evidence of
good faith.

CHRIST. HANSEN, of St. Paul, is con-
testing an assessment of \$1,200 on the
stock in his greenhouses, but Judge Kelly,
of the District Court, on November 18,
handed down a decision that plants in
greenhouses are assessable as personal
property.

New Incorporations.

Among the recently reported incorpo-
rations under New Jersey state laws are
"Thos. F. Galvin, Incorporated" and the
Rosemary Roseries.

Valuable for Reference.

ED. AM. FLORIST:—I have taken your
paper for more than ten years and have
preserved every copy, the volumes are so
useful for reference.

ALAMITOS NURSERY,

Important Awards.

Some important awards which have
been inadvertently omitted in our exhibi-
tion reports are as follows:

At the Chicago exhibition, November
11-15, the F. R. Pierson Company, Tar-
rytown, N. Y., received for *Nephrolepis*
Piersoni the highest award of the soci-
ety.

At the American Institute exhibition,
New York, November 12-13, E. G. Asmus,
West Hoboken, N. J., was awarded a
silver medal for Franz Deegen, his new
yellow rose.

Greenhouse Building.

Newark, N. Y.—Chas. E. Clark, one
violet house.

Charleroi, N. Y.—J. W. Coyle, one house.
Crown Hill, N. H.—Chas. Dubois, one
house.

Pittsfield, Mass.—Dr. F. A. C. Perrine,
conservatory.

Florists' Clubs' Programmes.

One of the reasons for slim attendance
at many club meetings is the deplorable
monotony of the round of essays and
listless discussions. The surest way to
put life into the meetings is to put life
into the programmes. This isn't such a
difficult task, for every club has live
members. As a sample of what more
club programmes might be, the following
programme, for the last meeting at
Detroit, is submitted:

Orchestra. Walter Taepke and friends.
Musical sketches. Miss Common and Mr. Bird.
Talk on Newport and New York.

Song. Hugo Oestreichler, formerly with the
Metropolitan Opera Co.
Talk on Chicago Show, etc.

Messrs Rackham and Beard.
Imitation of Chicago Florists' Club Choir at a
banquet. The Kids.
Trip to Chicago and what we have seen.

Unveiling of a new statue.
Dedicated to the Florists' Club.

N. B. Dues can be paid at any meeting of the
club.

Etherizing Lilacs Before Forcing.

The following may not be new to all
readers, but I believe it will be to many
and it is worth a trial. We have had the
best of success by the method, using it
for procuring blooms for a stated time.
It will work; try it.

Just six weeks before you desire the
blooms, take lilac plants that have been
kept in pots, either the ones forced before
or new plants potted in advance for the
purpose, and place them under a tight
box. Put the plants on the ground, close
together, and turn a large box over them.
Then place a ten-ounce bottle of spirits
of ether with cork removed under the
box with plants. Bank up all around
the box with soil and see that the box is
as near air-tight as possible. Let the
box stand for forty-eight hours. Then
remove plants and treat the same as if
you had dug them in the winter for
spring forcing. If you follow out these
directions, you can bloom this plant at
your own will. I believe this treatment
would apply to other plants, but have
not tried it on anything but lilacs.

F. W. B.

Best Indoor Climbers.

ED. AM. FLORIST:—I should like to
know four of the best conservatory
climbers, the temperature of the green-
house being 70° to 80° in the day time
and 55° to 60° at night.

Four of the best climbers for conserva-
tory use under such temperature condi-
tions as have been indicated are *Passiflora*
racemosa, *Stephanotis floribunda*,
Thunbergia laurifolia (T. *Harrisii*) and
Stigmaphyllon ciliatum. This selection
provides red, white, blue and yellow
flowers respectively, in the order in which
the names are given. Of these the *passiflora*
and the *thunbergia* are the most
rampant growers and are also exceed-
ingly free in flowering after the plants
are well established, while the *stephanotis*
is one of the most fragrant flowers that
can be used for this purpose. The
stigmaphyllon is known as the butterfly

vine or golden vine, is of slender growth
and also flowers abundantly. A second
choice of four species for the same pur-
pose would include the following: *Tacsonia*
Van Volxemii, *Clerodendron Thomp-*
sonæ, *Bignonia venusta* and *Bougainvil-*
lea glabra, all of which are most admir-
able strong growing climbers with fine
showy flowers.

W. H. TAPLIN.

New York.

REDUCED RECEIPTS AFFECT A REJUVE-
NATION OF THE MARKET.—PRICES AT A
REASONABLE LEVEL.—FAIR BUSINESS FOR
THANKSGIVING.—VARIOUS NOTES.

A diminished supply of chrysanthe-
mums and a not-over-abundant cut of
roses and carnations, together with an
apparent disposition on the part of
growers to withhold some of their pro-
duct, had the effect, two days before the
holiday, of stiffening up prices all along
the line. In tea roses those with good
flowers and clean foliage are in the
minority, the greater number showing
mildew, and poor color in the pink
varieties. Beauty is the leader at prices
which compare favorably with those of
former years. The supply of Beauty is
by no means cumbersome. Carnations
have spurted and are assuming a more
prominent position in the estimation of
the buyers, who have been regarding the
divine flower with studied indifference
while chrysanthemums were in their
zenith. Of the latter the finest coming
into the market are the blush-pink Allen,
Bonnaffon, Jones, Eaton, Chadwick and
McArthur. All are salable at fair
figures. With no horse show bugaboo to
hustle the price and a normal picking of
violets, these have taken a normal place
in the game and clear up at prices com-
mensurate with the grade and the pocket
of the buyer. The range is from 50 cents
per hundred to \$1.50 and there are some
especially fine ones in bunches of 100
flowers that bring \$2. Orchids have sym-
pathized with the upward trend of prices,
Cattleya Trianae and *C. Percivalliana*
and *Dendrobium formosum* holding the
center of the stage at present. Paper
White narcissi and Roman hyacinths are
in and find a slow call thus far. Receipts
at present include some very choice
spikes of mignonette that sell readily at
\$10 per hundred.

A recent issue of the Brooklyn *Eagle*
devoted a large section of one page to a
profusely-illustrated article on the chrys-
anthemum display at the Brown estate
in Flatbush, where P. Riley, the invin-
cible Flatbush bowler, presides.

Kansas City.

BUSINESS GOOD AND CARNATIONS THE ONLY
ABUNDANT ITEM OF SUPPLY.—SOME GOOD
DECORATIONS.—PERSONAL NOTES.

Stock is scarce, except carnations.
Roses of all sorts are short of the
demand and high in price. Chrysanthe-
mums are on their last legs. As to
violets, Kansas City does not know what
good stock is. Plenty are shipped here
but without their main quality, fragrance.
Beauties are up several notches, but still
have the call. Romans and narcissi are in
market. A goodly number of decorations
are reported for the past week, notably
a large wedding job done by Murray,
wherein some very select stock was used,
such as orchids, valley, *Begonia Gloire de*
Lorraine, the finest of white chrysanthe-
mums and Beauties. The Schley banquet,
given by the Commercial Club, is worthy
of mention. This event occurred at the
Midland Hotel and some thirty-five cases

of southern smilax were used. A miniature battle ship thirty feet long done in canvas and covered with flowers and lights was a novelty. American Beauties to the number of 1,500 were used on the tables. Altogether it was the largest banquet ever given in Kansas City. The approximate cost of menu and decorations exceeded \$4,500.

Lawrence Sweiger, who was formerly Newell's right hand man, has opened a flower shop at 1215 Grand avenue.

Chas. Heite, of Rock-Heite Company, is on an educational tour among the Chicago and Joliet growers.

The Alpha Floral Company has opened a new flower store at 810 Walnut street.

Miss Jennie Murray has moved back to her old stand at 715 Walnut street.

Another new flower store is that of the Misses Kreitz, 1035 Main street.

W.

Worcester, Mass.

SOCIAL ACTIVITIES MAKE BUSINESS BRISK.—NO SURPLUS ANYWHERE AND ROSES SCARCE.—NOTES.

Business has been brisk and teas, receptions and balls have followed each other in quick succession. Chrysanthemums have been used in quantity and show no signs of a surplus. Roses on the other hand show signs of shortening up, especially Bridesmaids. Carnations have been plentiful and of good quality and the demand has been good. Violets are in good supply and selling well, single and double varieties being equally popular.

F. B. Madaus is confined to his home with a mild form of pneumonia and his wife and three children are ill with tuberculosis poisoning, supposed to have been caused by infested milk. From last reports all are on the road to recovery.

There has been an exceptionally good fall for bulb planting and the sale of tulips, hyacinths, narcissi and so forth shows quite an increase over last season.

A. H. L.

OBITUARY.

ALBERT BREITMEYER.

Albert Breitmeyer died at Detroit November 24, aged 77 years. He was born in Germany and fifty years ago came to America in company with his younger brother, John, who died in 1900, both settling at Detroit. John Breitmeyer engaged in floriculture and laid the foundation for the fine business now conducted by his sons. Albert Breitmeyer engaged in gardening and also conducted his business with success until infirmities necessitated his retirement.

JAMES J. HARRIS.

James J. Harris, aged 32, a son of Wm. K. Harris, of Philadelphia, died November 25 of consumption. Deceased did not take an active part in the business although living at home. He had an artistic temperament and has made some very fine paintings of flowers and other subjects. He was also a fine performer on the piano. He spent the past year in Florida in search of health and seemed benefited, but on his return he failed rapidly. He was much liked by all who knew him.

K.

JOHN C. PINKSTONE.

John C. Pinkstone died at his home at Utica, N. Y., on November 16, after an illness of over a year. Mr. Pinkstone was born in Barnstable, England, 49 years ago. At the age of nineteen he came to

America, locating at Washington Mills. Since 1879 he had lived in Utica, where he conducted a small greenhouse establishment and during the summer months sold vegetables and plants. He was a member of Jubilee Lodge, No. 242, Sons of St. George and had been one of its trustees for thirteen years. He was also a member of Oriental Lodge, No. 224, F. & A. M. He belonged to St. Luke's Church and was a member of its Burial Guild. July 17, 1879, he married Miss Ellen Coughlin, of Utica, who survives with two sons, Samuel and Charles Pinkstone, and a daughter, Margaret.

Catalogues Received.

Samuel Bide, Alma Nursery, Farnham, England, nursery stock; Perry Hardy Plant Farm, Winchmore Hill, London, Eng., hardy rock and border plants, roses, etc.; Frederick Roemer, Quedlinburg, Germany, flower seeds; Sluis & Groot, Enkhuizen, Holland, vegetable and flower seeds; Raynbird & Company, Basingstoke, Eng., vegetable, grass and farm seeds; Oregon Nursery Company, Salem, Oregon, fruit and ornamental trees, etc.; P. G. Copyn & Company, Groenekan, near Utrecht, Holland, nursery stock; J. M. Thorburn & Company, New York, seeds; Webster Brothers, Hamilton, Ont., Canada, hardy perennials and shrubs; Souper & Notting, Luxembourg, Europe, roses; Mark T. Thompson, Rio Vista, Va., small fruits; Olsson & Seiders, Austin, Texas, roses; George Stevens, Peterborough, Ont., Canada, wood ashes; Leterlier Son and Company, Caen (Calvados) France, nursery stock; Otto Heyneck, Magdeburg, Germany, chrysanthemums, etc.; Foley Manufacturing Company, Chicago, ventilating apparatus; The King Construction Company, Toronto, Ontario, greenhouse machinery; W. Atlee Burpee & Company, Philadelphia, Pa., seeds; C. Platz & Son, Erfurt, Germany, seeds; F. C. Heine-mann, Erfurt, Germany, seeds; J. C. Schmidt, Erfurt, Germany, seeds.

OMRO, Wis.—The Omro Horticultural Society held its eighth annual chrysanthemum show November 19–21. Besides cut blooms and plants there was a fine display of fruit and a baby show was one of the attractions.

SITUATIONS, WANTS, FOR SALE.

Advertisements under this head will be inserted at the rate of ten cents a line (six words) each insertion. Cash must accompany order. Plant advs. not admitted under this head.

Every paid subscriber to the AMERICAN FLORIST for the year 1902 is entitled to a five-line WANT ADV. (situations only) free, to be used at any time during the year.

CUT FLOWERS AT WHOLESALE.

THE SEED TRADE.

AMERICAN SEED TRADE ASSOCIATION.
WALTER P. STOKES, Pres.; C. N. PAGE, First
Vice-Pres.; S. F. WILLARD, Wethersfield, Conn.,
Secy and Treas.

VISITED BOSTON: W. J. Fosgate, of
Santa Clara, Cal.

RAFFIA trade has shown a very con-
siderable increase of late.

A. N. JONES, formerly of Newark, N. Y.,
is now located at Le Roy, N. Y.

VISITED ST. LOUIS: Lester L. Morse
and W. J. Fosgate, Santa Clara, Cal.

CHAS. P. BRASLAN, of San Jose, Cal.,
was at Lawrence, Kans., November 27,
on his way east.

THE demand for first-class holly is
likely to be excellent. Many carload
buyers are abroad.

VISITED CHICAGO: L. C. Rontzahn, of
the McClure Seed Company, Arroyo
Grande, Cal.; H. C. Agnew, of Agnew,
Cal.

THE novelties offered by M. Herb, of
Italy, include *Centaurea rutifolia* pur-
purea, *Myosotis dissitiflora atrocaerulea*
and *Aretotis aspera arborescens*.

KOHLER & RUDEL are offering *Heu-
chera grandiflora hybrida*, in white, pink
and red, with large panicles of flowers
as large as those of lily of the valley.

D. M. FERRY & Co., Detroit, Mich.,
have secured options on a section of
land embracing several farms in Avon
township, New York, which it is intended
to devote to seed growing purposes.

GREEN buyers in Wisconsin who have
purchased without contracts are holding
more stock than the regular average
annual demand from the trade will
absorb. Prices are still fairly upheld by
them but it is more than probable that
bulk green will be cheap at Christmas
time. Much of the surplus will hardly
get down to market in time to be avail-
able for the best trade.

Richmond, Ind.

CLUB HOLDS INTERESTING SESSION AND
ELECTS OFFICERS.—NEW PLANT UNDER-
WAY—NOTES.

The November meeting of the Rich-
mond Florists' Club was held at the
greenhouses of the E. G. Hill Company,
and important business pertaining to the
welfare of the club was transacted. An
amendment to the by-laws abolishing all
fees and dues of membership was carried
unanimously, also that all expenses of
the club be borne by the proprietors of
greenhouses and greenhouse furnishers.
The annual election of officers resulted as
follows: President, Vernon Grave; vice-
president, Joseph Hill; secretary, H. C.
Chessman; treasurer, John A. Evans.
After other routine business, and talks
by those having visited the various
shows, the club adjourned to partake of
a very bountiful oyster supper, furnished
by the host, after which they enjoyed
themselves till a late hour socially and
with games. The next meeting to be at
the Grave's greenhouses, the third Mon-
day in December.

Ground has been broken for another
large plant on the west side. I am
informed that several acres have been
purchased for the purpose, the new con-
cern to consist of Charles Knopf, William
Bachmeyer and George Bulerdick.

THE NURSERY TRADE.

AM. ASSOCIATION OF NURSERYMEN.

CHAS. A. ILGENFRITZ, Pres.; D. S. LAKE, Vice-Pres.; GEORGE C. SEAGER, Rochester, N. Y., Sec'y. Twenty-eighth annual convention, Detroit, Mich., June, 1903.

THE spring will see an unprecedented call for garden roses.

NOT in years have nurserymen been favored by so prolonged a season for fall planting.

THOMAS W. BOWMAN, a well-known nurseryman, died at Rochester, N. Y., November 22, after a long illness.

TOPEKA, KAN.—The thirty-sixth annual meeting of the Kansas State Horticultural Society will be held at the state capitol December 29-31.

GUELPH, ONT.—The twenty-fourth annual meeting of the Ontario Agricultural and Experimental Union will be held here, at the Ontario Agricultural College, December 8-9.

THE forty-seventh annual meeting of the Illinois State Horticultural Society will be held at the University of Illinois, at Champaign, December 17-19. There will be, in addition to an attractive programme, a large exhibit of fruits, and many nurserymen will attend because of the presence of several hundred fruit growers.

Apple Growers' Congress.

The annual meeting of the American Apple Growers' Congress was held in St. Louis November 18 and 19, \$250 being awarded as premiums for exhibits, B. Stuart, of Des Moines, having the best and largest display. Several very interesting papers were read and discussed. It was decided to hold the next session in St. Louis in November, 1903. A resolution in support of the Louisiana Purchase Exposition was adopted. H. M. Dunlap was chosen as president of the organization and authorized to act for the body in securing pure food legislation.

Denver.

COOL WEATHER AIDS BUSINESS BUT REDUCES SUPPLY OF STOCK.—LOCAL AND TRADE NOTES OF INTEREST.

A change of weather brought snow and cold, together with a spurt in business, and tended to shorten up the market, leaving everything a little scarce, with the exception of chrysanthemums, which are still plentiful and in good supply for Thanksgiving day. Long-stemmed Beauties are in demand but rather hard to get and shorter stock is not wanted. Bridesmaids and Brides are fine, meeting with very good sale. Paper Whites and Romans are in now but are used mostly in funeral work. Violets have shortened up, while demand on them keeps up, and prices have advanced accordingly. The same is true of carnations; more could be used. A goodly amount of funeral work the past week has kept the market well cleaned up on the poorer quality of stock.

The Florists' Bowling Club rolled its first games in the Commercial League last Thursday and got walloped three straight. With the exception of Gus Benson the team fell down badly, but we expect better scores from now on.

J. A. Valentine is recovering nicely and expects to leave the hospital this week for his home, where after a few weeks rest we expect to see him around again in good shape.

Azaleas at Import Prices

We will supply, as long as stock remains unpotted, Azaleas of the best quality we have ever sent out, stock that we know will give entire satisfaction:

10 to 12-inch crowns, bushy plants.....	\$ 4.50 per dozen:	\$ 35.00 per 100

OUR PASTIMES.

Announcements of coming contests or other events of interest to our bowling, shooting and sporting readers are solicited and will be given place in this column.

Address all correspondence for this department to Wm. J. Stewart, 79 Milk St., Boston, Mass.; Robt. Kift, 1725 Chestnut St., Philadelphia, Pa.; or to the American Florist Co., 324 Dearborn St., Chicago, Ill.

At New York.

On Monday evening, November 24, the following phenomenal scores were rolled by the magnates of the New York florists' bowling fraternity. Wonder whether they will ever overcome their native bashfulness sufficiently to duplicate the performance when there is anything at stake and the persistent Philadelphians, for instance, are in the mix-up:

Player	1st	2d	3d	4th
Sebrocht	157	146	165	221
Lang	187	195	185	181
Traendly	163	170	136	110
Mansfield	178	162	158	197
Thielman	180	187	177	220

At Chicago.

In the Illinois league the Florists met the Ansons in a postponed match and fell in defeat, the Ansons in their first game coming close to the record for five-man teams. Their figure was 1037 and the record stands at 1103. The complete score follows:

FLORISTS				
	1st	2d	3d	4th
Bullbrocht	159	184	167	510
Hauswirth	156	198	157	511
Sterrett	168	162	172	52
Asmus	186	157	161	504
Winterson	174	166	191	531
Total	843	867	848	2558
ANSONS				
	1st	2d	3d	4th
Bangart	233	24	236	673
Trapp	203	215	207	625
Berlin	191	192	170	553
Hasselhuhn	204	197	179	580
Clineh	206	161	177	513
Total	1037	968	969	2974

The Illinois team, of which Joseph Foerster, of George Reinberg's is a member, holds the season's record, made November 17, in the Chicago league. Their total was 1101, within two points of the world's record, and was made up as follows: Foerster, 232; Cluever, 244; Morrison, 172; Blaul, 252; Rogman, 201.

Minneapolis.

STOCK SHORT AND PRICES ADVANCE SHARPLY.—LOCAL NOTES OF VARYING INTEREST.

In the seven days before Thanksgiving prices advanced to an exceedingly stiff figure, caused by continuous dark weather, resulting in a shortage in all lines of stock. Chrysanthemums are about finished, and the main varieties of these were Appleton and Eaton, which were grown heavily by most of the florists, with the result that other good sorts realized comparatively better prices.

John Monson had a large decoration at the West Hotel, the other day, in which ten cases of wild smilax were used. Rice Brothers report a rapidly widening call for this article.

Ralph Latham, with Wm. Donaldson & Company, report a good trade the last week, topped with some good decorations.

Frank Kindler, of St. Cloud, was a recent visitor. C. F. R.

WILMSTON, N. D.—M. Bartholomew, formerly of Excelsior, Minn., is planning to engage in business here in the spring, building a range of greenhouses.

LILLIAN POND A Large and Fancy White.

Unlike most fancies it is free and continuous. Starts in to bloom early, sending out large flowers on long stems. It is a strictly fancy flower at all times and commands top notch prices. Order at once and you will not regret it. PRICES—12, \$1.50; 25, \$3.00; 50, \$5.00; 100, \$10.00; 250, \$23.00; 500, \$37.50; 1000, \$75.00. Orders booked now for February delivery. S. J. REUTER, WESTERLY, R. I.

Miss Louise Faber The Longest Stemmed and Most Fragrant Carnation in Existence
